2 Water bath preservative liquid Aqua Stabil

2

- Prevents build-up of algae and bacteria in bath tanks providing hygienic operation
- No contamination of the tank or immersion thermostat components
- Economical - only 2 ml of Aqua Stabil is required for every 1 litres of water
- Remains effective for weeks, as shown by colour indicator.

JULABO

This product is a disinfectant containing biocides. Please inquire its availability and legal information.

1

1 Refrigerated circulator baths DYNEO™ DD

Ideal for internal and external applications. With powerful components and a large, easy to read colored TFT display. Operation is simple and intuitive via the central controller on the front of the device. Equipped with USB interface, also available with optional analogue (extra code A) or RS232 (extra code D) interface.

JULABO

- Easy switching between internal and external circulation
- Built-in drain tap
- Integrated programmer for 8 x 60 program steps
- Class III (FL) acc. to DIN 12876-1
- Continuously adjustable, powerful pressure pump
- Pump connectors M16x1
- External Pt100 sensor connection

2 hose connectors for 8 and 12 mm I.W. and bath lid included.

1 Chiller DuraChill®

PolyScience

Stable and reliable cooling for many common heat removal applications, including laser etching, AA furnaces, ICP, rotary evaporators, vacuum systems, reaction vessels, plasma etching, and condenser cooling.

The chillers are available with turbine or positive displacement pump.

- A bright, full-color touchscreen display
- Cooling at ambient temperatures up to 30 °C
- DynamicFilter™ self-cleaning filter system
- Liquid level sensor
- UV light system to prevent growth inhibitors
- User-adjustable temperature, pressure, and flow rate alarms
- External temperature tracking and communications capability (optionally)
- Cool Command™
- WhisperCool® noise reduction system
- Self-diagnostics service and functionality system
- Front fill reservoir
- 4 Casters, 2 of them locking

Specifications:

Working temperature:	-10 ... 70 °C
Temperatur stability:	±0.1 °C
Cooling capacity:	850 ... 2900 W
Connectivity:	RS232, status relay, dry contact
Power supply:	240 V, 50 Hz

2 Benchtop Chillers

PolyScience

These powerful, low-temperature chillers are well matched for use with rotary evaporators, vacuum systems, spectrometers, and other analytical equipment. They also are available with a mobile cart accessory for convenient placement under a bench.

- Large, easy to read LED display
- Space-saving design
- Cooling at ambient temperatures as high as 35 °C
- Temperature Stability ±0.1 °C
- Low flow shut-off and alarm, high and low temperature alarms
- Front mounted fluid level gauge
- Simple setup, operation, and maintenance
- Choice of pumps

1 Unichiller® in alternative bench-top or tower housing formats

Unichillers are intelligent chillers which are used mainly as an environmentally friendly and economic alternative to tap water for process cooling. Low temperatures increase efficiency and recovery rates in condensation processes. In contrast to tap water a set-point can be selected between -10/-20°C to 40°C and controlled with a temperature stability of $\pm 0.5^\circ\text{C}$. The product range includes air cooled and water cooled models, with cooling powers from 0.3kW to 50kW. Most models can be factory fitted with a heater if required. Housings are made of stainless steel to ensure long life. Compact, value-for-money units are available in classic look with cooling powers up to 2.5kW for cooling applications in the lab. Models from Minichiller to Unichiller 025w are suitable for on or under the lab bench. The proven Huber tower housing models offer power with small footprints. These models are fitted with the exchangeable Pilot ONE controller and are used in both research and production. The range of cooling powers available is from 0.3kW to 50kW. Unichillers with an optional heating become powerful process circulators (additional charge on request). The desktop models are equipped with the Pilot ONE- and OLÉ-controller.

Huber

2

2 Chillers, Minichiller®

Small, robust and cost effective with its stainless steel casing. The Minichiller is the smallest Unichiller in the world. Minichillers are available with air or water-cooled refrigeration systems, illuminated level indicator, overflow and drain on the front. The filling port is on the top of the unit. All models use natural refrigerants as standard. Minichillers have suction and pressure pumps and therefore have the advantage of have a high flow at low pressure. This is particularly interesting for all pressure sensitive applications (e.g. glass condensers).

1 Unichiller® with Pilot ONE controller

1

High performance Unichiller with Pilot ONE controller for standard applications.

The Unichiller offers cooling powers up to 2.5 kW. The chiller is ideal for standard cooling applications in the laboratory or in industry. The energy efficient function of the chiller reduces the water consumption for many applications, helping to protect the environment and reducing operating costs. The models are fitted with the Pilot ONE controller including 5.7" colour touch screen and 2 x USB, Ethernet and RS232 connections. P-models include circulating pumps with a high discharge pressure for applications with high pressure drops.

- Cooling power up to 2.5 kW
- Air- and watercooled models
- Compact, robust stainless steel housings
- Fitted with wheels for easy handling
- Optional heating up to +100 °C

1 Unichiller® with OLÉ controller

High performance Unichiller with OLÉ controller for standard applications.

Huber

The Unichiller with the OLÉ controller offers cooling powers up to 2.5 kW.

The chiller is ideal for standard cooling applications in the laboratory or in industry. The energy efficient function of the chiller reduces the water consumption for many applications, helping to protect the environment and reducing operating costs. All models are fitted with the OLÉ controller with its modern OLED display as well as for RS232, USB interfaces and PT100 measurement sensor connection.

P-models include circulating pumps with a high discharge pressure for applications with high pressure drops.

- Cooling power up to 2.5 kW
- Air- and watercooled models
- Compact, robust stainless steel housings
- Fitted with wheels for easy handling
- Optional heating up to +100°C

2 Compact Recirculating Cooler, F-Series

- Environmentally friendly operation with low energy consumption
- No side vents, instruments can be placed right next to other equipment
- All wetted parts made of stainless steel or high grade plastic
- Large, bright LED display
- Compact design and small foot print
- Splash-proof keypad
- Drain tap
- Easy filling

1 Flow coolers, FL series

- Working temperature range covers -20 °C to +40 °C, the temperature stability of the PID control is ±0.5 °C
- splash-proof keypad with integral mains switch
- large, bright LED display
- reliable Microprocessor PID temperature control
- filling level indicator
- powerful immersion pumps, suitable for continuous operation
- permissible temperature within return line: +80 °C max.
- easy filling from the top with hinged protective lid
- low liquid level protection with visual and audible alarm signal
- stainless steel bath tanks
- removable venting grille for cleaning of the condenser
- front drain
- no side vents
- RS232 interface for PC connection
- Ingress protection class acc. to IEC 529: IP 21
- pressure indicator
- adjustable bypass for pump pressure

2 Recirculating chillers ULK

For cooling applications and processes in laboratory and industry.
Thanks to the space-saving design and the particularly quiet cooling unit,
the Chiller is ideally suited for installation directly at the workplace.

Fryka-Kältetechnik

- Higher energy efficiency through fan with EC technology
- Pleasantly quiet and space saving
- Refrigeration unit: fully hermetically sealed, air-cooled, low maintenance
- Integrated funnel
- Self-sealing hose connector with quick coupling
- Touchscreen controller with high-grade glass screen and integrated flow and digital fill level indicators
- Freeze-up and thermal overload protection
- Flow control with dry running protection
- Optical and acoustical alarm
- MOD bus interface optionally available

Highly Dynamic Temperature Control Systems Presto™

The models of JULABO's new Presto generation set new standards for highly dynamic temperature control systems. They represent the optimal solution for highly precise external temperature control applications. Temperature control of jacketed reactor vessels, reactor systems, autoclaves, distillations, pilot plants, semiconductor industries.

JULABO

The advantages of PRESTO models:

- Extremely short heat-up and cool-down times
- Powerful circulating pump with adjustable pump pressure
- Wide working temperature ranges without change of thermal fluid
- Large TFT touch screen for interactive operation
- Digital and analog interfaces
- Handles and castors allow for easy set-up
- Low filling volume
- Small dimensions

Temperature regulators/Temperature Control Accessories

1 2 Function upgrade for Huber circulators

E-grade - innovative activation keys for the functionality to suit your budget and process requirements

Huber

Every application requires particular functions. If the circulator is to be used in a range of applications it will generally require greater functionality. The required functionality grows with the complexity of the application. The innovative "E-grade" has the answer. Models with the Pilot ONE Controller have a comprehensive range of functions suited to the classical temperature control applications. The E-grade allows the functionality to be extended at any time to suit new process requirements and budget. E-grade stands for electronic upgrade and it is simple to do: To extend the functionality a unit specific code is entered via the controller. This code is specific to the serial number of the unit and is either already entered at the factory for new units or it can be activated at a later date. The code is sent by email. There is no requirement for a hardware or software update.

The E-grade "Explore" for Unistats is more than just another functions package. It makes important information available to users of Unistat temperature control systems. Temperature values and temperature differentials as well as for the actual heating power, cooling power and pump power within the system are displayed on the touch-panel. E-grade "Explore" is an evolution of the existing Unistat technology. Existing sensors are utilised to make important process temperature and power data visible. In addition to making the data visible on the display of the device, it can also be accessed via the digital interfaces for further processing.

Application examples for E-grade® "Explore":

- Process and product development and optimisation
- Use-Tests of raw materials, quality control
- Enhanced data collection for scale-up trials

1 Water baths Precision incl. Thermal Beads

The general purpose water baths, Precision, are rugged, high performance baths for temperatures up to 100°C (TSGP02 up to 90 °C). Over-temperature safety circuit is designed to prevent thermal runaway. Benefit from outstanding chemical and corrosion resistance with epoxy powder-coated exterior, and easily clean the chamber with its seamless stainless-steel interior. With timer.

Thermo Scientific

- Advanced microprocessor controller is designed for extended functionality
- Protect your work with audible alarms
- Conveniently save commonly used settings with four temperature presets
- Clear polycarbonate gable cover

Scope of supply: Bath incl. gable cover, diffuser tray, TSGP02 and TSGP05 with hand pump, all other models with drain hose.

2 Thermal beads for Water baths Precision

Thermal beads replace water in laboratory baths or ice in ice buckets to prevent contamination. A bath filled with Thermal Beads can be left unattended and is always available at the set temperature without danger of water evaporating to dryness.

Thermo Scientific

- Small, non-uniform metal beads composed of a dry metallic thermal alloy
- Cleaning with biodegradable disinfectant every 2 - 4 weeks only
- Good temperature stability and uniformity
- Energy-efficient
- Minimizes maintenance such as emptying, cleaning, monitoring, and refilling the bath
- Holds common lab vessels in place without accessories such as racks, floats, and weights

Description	PK	Cat. No.
Thermal beads, 4 l	1	6.290 968

GENERAL CATALOGUE EDITION 21

Heating/Water baths

1

1 Digital water baths

The unstirred, general purpose water baths are available in 5 sizes:
2, 5, 10, 20 and 28 liters.

PolyScience

- Color TFT display with control panel
- Calibration offset feature
- Low liquid alarm
- Over temperature alarm
- 5 user programmable pre-sets (temperature and duration)
- 5 languages (English, German, French, Spanish and Chinese)
- Integrated independent timer
- Eco-mode
- Safety thermostat
- High-gabled, clear lids accommodate taller media bottles
- Rear-mounted drain (10, 20 and 28 liters)
- Recessed Handles

Scope of supply: Digital water bath, incl. lid

Specifications:

Temperature range:	Ambient +5 °C ... 100 °C
Temperature uniformity:	±0.2 °C
Temperature stability:	±0.1 °C
Power supply:	240 V, 50 Hz

2

2 Basic digital water baths JB Academy

An ideal choice for schools and colleges requiring a basic simple-to-use quality water bath.
Base tray included as standard. A great value range consisting of three models.

Grant

- Ambient + 5 °C to 95 °C
- Unique Set and Forget™ technology, fast heat-up, reliable temperature control
- Stability ±0.5 °C
- Simple, intuitive controls, quick and easy to set temperature
- Practical front panel lock, disables front panel controls preventing unintentional temperature changes
- 3 year warranty

Accessory polypropylene spheres or a lid must be used at temperatures between +60 °C and +99 °C.
Please order lid and PP spheres separately.

3

3 Water bath preservative liquid Aqua Stabil

- Prevents build-up of algae and bacteria in bath tanks providing hygienic operation
- No contamination of the tank or immersion thermostat components
- Economical - only 2 ml of Aqua Stabil is required for every 1 litres of water
- Remains effective for weeks, as shown by colour indicator.

JULABO

This product is a disinfectant containing biocides. Please inquire its availability and legal information.

2 Unstirred water baths SUB Aqua Pro series, digital

High quality and excellent temperature stability, in a value-for-money package designed to meet the needs of the world's researchers. The SUB Aqua Pro range is composed of eight models, including shallow and dual baths.

Grant

- Three programmable temperature presets
- Drain tap on SUB Aqua Pro 12, 18, 26 and 34
- Front panel lock-out
- Countdown timer with audible buzzer
- Ambient +5 °C to 99 °C operation
- Stability ±0.2 °C
- Digital PID control for quick heat-up and precision control throughout the temperature range
- User-settable sample protection and fixed thermal cut-out
- High grade stainless steel tanks
- Non drip polycarbonate lid and base tray included as standard

Available as 120V or 230V.

Accessory polypropylene spheres or a lid must be used at temperatures between +60 °C and +99 °C.
Please order PP spheres separately.

Heating/Water baths

GENERAL CATALOGUE EDITION 21

Water baths PURA™

Flexible in use for all purposes in research and quality control. All PURA™ water baths (except PURA™ 4) have an integrated drain screw. The bright, easy-to-read white LED display is clearly visible, even from a distance. With integrated side recessed grips for easy transport and non-slip rubber feet for safe standing. The complete interior surface of the water baths can be used, as there are no installation elements in the interior.

JULABO

- Including platform
- Integrated timer
- Working temperature range from 18 to 99.9 °C (with counter-cooling/bath cover)
- Models with filling volumes from 0.8 to 36 liters available
- High temperature accuracy of 0.15 °C
- Bright display with membrane keypad
- Splash-proof
- Built-in dry-running protection

Please order bath cover separately

The Hydro water baths are optimally equipped for every application in the laboratory. With their precise temperature distribution, they are designed for the needs of biological, medical or biochemical laboratories. The H 8 A and H 16 A models are also equipped with a circulation system for optional mixing.

- Interior made of high quality stainless steel
- Applications in the boiling range possible (temperature range: 25 to 100 °C)
- TFT color display for intuitive operation, temperature display in °C and °F
- Programmable timer
- Optical and acoustic alarm in the event of an error

GENERAL CATALOGUE EDITION 21

Heating/Water baths

Water baths WNB/WNE

The Memmert waterbath is available in six model sizes and two performance classes. In addition to the Basic class for standard temperature control tasks, the Excellent version provides precise test procedures with a maximum of safety. The 3-sided heating ensures excellent temperature homogeneity.

WNB = water bath, natural circulation, temperature controller BASIC with 2-fold overtemperature protection

WNE = water bath, natural circulation, temperature controller EXCELLENT with 3-fold overtemperature protection, filling level control and calibration option

Specifications

Working-temperature range:

at least 5 °C above ambient to +95 °C and additional boiling stage

Setting temperature-range:

+10 °C to +95 °C and boiling stage

Temperature variation:

±0.1 K

Temperature distribution:

±0.25 K (sizes 7 - 29), ±0.3 K (size 45)

Power supply:

230 V, 50/60 Hz; 115 V, 50/60 Hz no extra charge

Options and accessories for water baths

Flat cover: Flat stainless steel cover with openings and concentric ring sets

Memmert

Gable cover: Stainless steel gable cover, also suitable for shaking device and Peltier cooling device

Shaking device: Shaking device including support frame (for racks or support basket with perforated mounting shelf) for use in water baths, shaking speed 35-160 strokes per minute (horizontal back/forth movement), requires gable cover

Peltier-cooling device CDP115: For precise operation with temperatures starting from +10 °C. The temperature is controlled via the electronic controller of the waterbath with a precision of ±0.1 K. Easy fitting to bath by snap-on-technology, suitable for all tank sizes. Power supply: 230 V, 50/60 Hz or 115 V, 60 Hz (please state in case of order).

Effective cooling capacity: 115 W. Pumping capacity of circulation pump for coolant: 600 ml/min

Bottom grid: reversible for 2 heights (30 mm and 60 mm)

3 Shaking water baths Hydro

With their excellent temperature homogeneity, the universal Hydro shaking water baths are designed for the needs of biological, medical or biochemical laboratories. The models H 20 S and H 20 SW shaking water baths have a linear, oscillating shaking movement, while model H 20 SOW moves the sample in an orbital motion.

- For boiling range applications
- TFT display
- Speed controller for load-independent, continuously adjustable shaking movement
- Soft, controlled start of the shaking movement
- Dry run protection (safety class I, NFL)
- Maintenance free and reliable
- H 20 SW and H 20 SOW with integrated cooling coil

1 Sand Baths with Performance Control and Thermostatic Controller

For continuous operation. Electrical sand baths with thermostatic temperature control and separate power controller for performance adjustment to the heating requirements.
Gestigkeit
Anodised aluminium alloy hotplate. Excellent uniform temperature distribution over the entire heating surface.
Asbestos free. The sand bath frame is tightly screwed onto the hotplate so that the sand is in direct contact with the hotplate. Useful depth 50 mm. Stainless steel controller housing, with painted central section.
Height-adjustable feet. Connection cable approximately 1.7 m.
With earthed plug for 230 V supplies up to 3300 W. A 400 V 3-phase model is also available.

2 Heating Bath HB eco

Compact and ergonomic heating safety bath.

IKA

- Ergonomic handles
- Clear, black-and-white display
- Alternating set-point/actual temperature display
- USB interface

**Specifications**

Heating output:	1400 W
Temperature range:	ambient ... 99 °C
Setting accuracy:	±1 K
Offset:	±2 K
Material:	Stainless steel 1.4404
Useful volume:	4 l
Dimensions, internal (diam. x H):	225 x 130 mm
Dimensions, external (W x D x H):	330 x 325 x 190 mm
Weight:	3.9 kg
Power supply:	200 ... 240/100 ... 120 V, 50/60 Hz
IP code acc. to DIN EN 60529:	IP 21

Type	PK	Cat. No.
HB eco	1	6.311 083

3 Heating Bath HB Digital

Compact and ergonomic heating safety bath for all tempering media.

IKA

- Ergonomic handles
- Key button to lock heating bath temperature
- Clear, black-and-white display
- Permanent set-point/actual temperature display
- 3 different safety operating modes
- USB interface

**Specifications**

Heating output:	1350 W
Temperature range:	ambient ... 180 °C
Setting accuracy:	±1 K
Offset:	±1 K
Material:	Stainless steel 1.4404

Heating/Heating baths

1

1 Heating bath HBR 4 control

The heating bath is noted for:

- Cylindrical bath shape
- Heating elements integrated into the bath base
- Heat transfer media can be low-viscous oil (50 mPas) or water
- Two carry handles
- Infinitely variable safety temperature limiter according to DIN 12877
- Double-jacketed mantle protection against burns
- Digital display for target, actual and safety temperatures as well as speed
- Integrated magnetic stirrer drive to circulate the tempering fluid, allowing for better heat distribution in the bath
- RS 232 interface

IKA

2 Heating bath liquid, BUDDE

Use:

Buddeberg

BUDDE heating bath liquid can be used continuously as a heating medium up to approx. 170 °C. Higher temperatures (below flash point) are possible, but will result in rapid darkening. The low pour point allows the bath liquid also to be used as a cooling medium. Mixtures with 10 % to 30 % water achieve best results.

The crucial advantages of BUDDE heating bath liquid compared to the oils or other organic liquid mainly used are:

- accidental spillage of water into the bath does not lead to dangerous spitting at temperatures over 100 °C, as the water dissolves in the heating bath liquid and subsequently evaporates safely
- BUDDE heating bath liquid can easily be rinsed away with water which eases cleaning of laboratory equipment, e.g. distillation flasks, and also bench or floor if the bath liquid is accidentally spilled.
- BUDDE heating bath liquid does not foam when mixed with water.

Viscosity on addition of water:

BUDDE heating bath liquid is quite viscous at ambient or low temperatures, and therefore sometimes difficult to dispense. The addition of 10-20 % water reduces the viscosity and enables easier handling. If the mixture is then heated to 100 °C, the water evaporates without boiling. Further heating is only shortly delayed by this. Before next heating, water can be added again.

Water solubility:

BUDDE heating bath liquid can be mixed with water in any ratio.

The hardness of the water has no effect on the bath liquid.

Chemical character:	Modified polyglycoether
Appearance:	Clear, colourless or lightly yellowish liquid
Storage time:	When stored for long periods (over 2 years) the product may become darker. This does not affect the performance of the product.
Water solubility:	Heating bath liquid BUDDE can be mixed with water in any ratio.
pH value (DIN ISO 976):	6-8 (100 g/l, 20 °C)
Solidification temperature (DIN ISO 3016):	approx. -39 °C
Boiling point:	200 °C
Density (DIN 51757, 23 °C):	approx. 1.13 g/cm³ to 1.17 g/cm³
Flashpoint (DIN EN ISO 2592):	> 290 °C
Ignition temperature (DIN 51794):	approx. 390 °C

Hotplate Ceran®

Housing made of stainless steel, brushed and polished, in a unique Softline Design, Schott Ceran® cooking surface. Adjustable power control with power-saving or power control in 9 steps (TC = Touch Control). Two-circle HiLight technique, thus extra large heating zone (dia. 210 mm) can be activated. Thermal shutdown and automatic cooking system. Residual heat indicator and warning light. Temperature range (empty): 0 to approx. 460 °C. Power supply 230 V.

2 Hotplate induction Ceran®

- casing made of brushed stainless steel in softline design
- Schott Ceran® cooking surface, superior and easy to clean
- with superior induction technology, pot recognition
- safe, user-friendly and extremely energy-saving
- temperature selection in 21 levels in steps of 10 °C from 60 °C (keeping warm) up to 260 °C
- power selection in 9 levels, powerboost (2200 W) for additional performance
- timer up to 99 minutes, automatic switch-off and signal tone
- electronic regulation via touch control sensors
- integrated safety functions, overheating protection
- indicators for residual heat, standby and power-on

**4 Hotplate CP 300, analogue**

A heated glass ceramic plate mounted in a block of pure PTFE creates a powerful hotplate which is chemically resistant, even to concentrated acids. The separate temperature controller is connected to the hotplate via a 2 metre PTFE coated lead, which allows the hotplate to be located in fume hoods.

NEW

Stuart

- Ideal for acid digestions or trace metal analysis
- PTFE construction with glass ceramic plate for exceptional resistance to chemical attack
- Can be cleaned with concentrated nitric acid
- Controller is fitted with a hot warning light for temperatures above 50 °C

**Specifications**

Max. temperature: 400 °C

GENERAL CATALOGUE EDITION 21

Heating/Hotplates

Hotplates SS/CS/SD/CD/SP150

Hotplates with accurate temperature control.

Stuart

- Spill-resistant front control panel with chemically toughened glass for extra resilience
- Hot surface warning light flashes when plate temperature is above 50 °C
- Durable chip-resistant aluminum top plate offers excellent heat transmission, rapid heating, and oven temperature distribution
- Ceramic top plate is chemical resistant and easy to clean, plus the white surface ensures good visibility of colour changes
- With an integral fixing point for a retort rod
- With BioCote, silver-based, antimicrobial protection

SP150 additionally with:

- Full-colour 10-cm TFT screen which simultaneously displays target settings and the actual temperature
- Individual profiles can be created and saved
- User calibration for adjusting the temperature output ($\pm 5\%$ at 50 and 450 °C)
- Incl. Pt100 Temperature sensor

3

Precision hotplate, PZ 44

Automatic, precise regulation of temperatures between 20 and 450 °C. Digital presetting and temperature display. Three power levels (825 W, 1650 W and 3300 W) can be set and an additional electronic power controller (adjustable 10 % to 100 %) is provided. At 825 W and 3300 W settings the entire plate surface is heated. At 1650 W setting only the right hand side of the plate is heated. As a result of heat conduction, the temperature from the right hand side to the left edge of the plate varies by approx. 40 %. Built-in relay allows direct connection of electronic contact thermometers. With solid, flat, low-distortion, cast GG15 alloy. Switching differential ±1 K.

* 400 V, 3-ph. versions are also available on request

1 Precision hotplates, PZ-series

For continuous operation. Provide extremely accurate, uniform temperatures, even in plate corners and on edges. Polished anodised aluminium heating surface. Microprocessor-controlled temperature controller with temperature setting up to 99.9 in 0.1 °C steps, over 99.9 in 1 °C steps. Actual temperature displayed continuously. With separate power controller for performance adjustment to the heating requirements from 10 to 100 %. Built-in relay allows direct connection of electronic contact thermometers. Adjustable temperature monitor from 50 to 300 °C (with PZ 28-1, 30 to 110 °C) to prevent excess temperatures.

2 Hotplates with Performance Control and Thermostatic Controller

For continuous operation. Electric hotplates with thermostatic temperature control and separate power controller for performance adjustment to the heating requirements. Anodised aluminium alloy hotplate. Excellent uniform temperature distribution over entire heating surface. Asbestos free. Stainless steel housing, with painted central section. Height-adjustable feet. Mains cable approximately 1.7 m. With earthed plug for 230 V supplies up to 3300 W. A 400V 3-phase model is also available.

3 Electronic heating mantles, EM series

Polypropylene outer case is resilient and chemically resistant. Highly efficient in heating up to a maximum element temperature of 450 °C. The flexible heating element is suspended in a thermal insulating cartridge to provide maximum heat transfer with minimum risk of flask breakage. Even at full power output, the exterior remains "cool-to-touch" due to good heating element insulation. All heating mantles have support clamp for rods of up to 12 mm diameter, and are double fused, with earth (ground) screen to protect the user from electric shocks. Available as 220-240 V 50/60 Hz models; spare heater cartridges are available on request.

E & OE.

1 Heating mantles Electrothermal® CMUV

Heating mantle has a "V"-shaped design for large, pear-shaped and round-bottom flasks. The bottom opening allows 60° funnels of various diameters to be accommodated. Coiled heating element provides optimal heat transfer. Control heat throughout the mantle using three separate electrical circuits (top, middle, and bottom), each controlled with its own dial switch.

- Cool-to-the-touch design with powder-coated aluminium casing
- Indicator lamps for "power on" and "heat on" operation

Scope of supply: Heating mantle, three sets of integrated support rod clamps, power cords with UK and EU plugs

3 Power controller KM-L116 for heating mantles

LabHEAT®-regulator for heating mantles.
Electromechanical; infinitely variable control over power outlet;
plastic housing (H x W x D) 55 x 65 x 120 mm; switching power max.
2990 W (13 A); 1.5 m power supply (earthed) cable with plug.

SAF Wärmetechnik

Type	PK	Cat. No.
KM-L116	1	9.642 660

4

4 Laboratory regulator series KM-RX1000

LabHEAT®-regulator. Freely configurable electronical temperature regulator with two displays indicating the desired and actual values. PID self-optimisation,
with ramp function, USB port, for external configuration. Pt-100 or thermocouples for temperatures up to 1200 °C,
metal housing (H x W x D) 75 x 205 x 140 mm with fixed support clamp, switching power max. 2300 W (10A),
1.5 m power supply (earthed) cable with plug. Nominal voltage 230 V AC.

2 Power controller, Voltron 20

Alternating current resistance controller with interference suppressor for variable, no-power-loss control of hotplates, heating tapes, soldering irons, light bulbs, infrared radiators etc., control range 25 V to 225V. With single throw on/off potentiometer and shielded fuse holder for safe fuse replacement away from the internal circuit. Fitted with interference suppressor in accordance with EN standard.

3 Temperature controllers, TEMPAT®-D

For controlling temperature of heating coils, hotplates, ovens, infrared radiators and water baths. TEMPAT®-D has a 10 mm high, LED display which can even be seen in dark rooms and allows monitoring of actual temperature at any time. Set point can be entered via a 3 or 4 figure coding switch with 1 °C resolution. Built-in sensor breakdown fuse, switching interval display and Xp trimmer to adjust variable gain amplification between 0 and 10 K. Sensor connection is via a plug-in socket.

Appropriate temperature sensor please order separately.

If no temperature sensor is ordered, a loose plug is supplied.

Specifications

Input:	230 V, 50/60 Hz
Switching capacity:	2300 W, 10A
Connection, appliance:	1.20M long connection cable with impact resistant plug
Consumer load:	earthed schuko socket, other plug-in connections in accordance with Swiss or French/Belgian standards, for example can be supplied at additional cost.
Housing:	Polycarbonate plastic, gray
Dimensions:	188 mm x 110 mm x 70 mm
On/off switch:	via dipole luminous rocker switch
Probe connection:	via socket
Contact assignment Pt100:	1 and 2
Contact load:	1 + 3
Accuracy:	±1 % from measuring range value

GENERAL CATALOGUE EDITION 21

1

1 Power controller, VOLTRON-PLUS F

Alternating current controller for variable and no-loss control of resistive and inductive power devices with the following additional features:

- On/off luminous rocker switch, dipole switching, 10 A (4)
- IC controlled, hysteresis free
- Quiet running
- Anti-interference grade N
- Fast-blow fuse
- Protected fuse holder
- Power-on indicator lamp

Specifications

Voltage:	220-235 V, 50/60 Hz
Switching capacity:	Max. 2000 VA
Switching current:	Max. 10A

Universal drying oven LLG-uniOVEN 42 and LLG-uniOVEN 110

1

Microprocessor controlled universal drying oven with **forced convection** including two shelves. Each shelf of the uniOVEN 42 and uniOVEN 110 has a load capacity of 20 kg, the total load capacity of each unit is 50 kg. The maximum number of shelves is 7 for uniOVEN 42 and 10 for uniOVEN 110 with a distance of 40 mm between shelves.

- Quick and intuitive operation
- Microprocessor control with integrated auto-diagnostic system
- Forced convection with fan
- Digital display for time and temperature
- **Timer:** 1 minute to 99.9 h and continuous
- Delayed start timer: 1 minute to 99.9 h
- Outlet for vapour exhaustion
- Acoustical and visible information for end of program
- Acoustical and optical alarm at temperature differences
- Interior made of stainless steel
- Adjustable over temperature protection at 300 °C

6.263 670

Scope of supply: LLG-uniOVEN incl. 2 shelves

Specifications

	LLG-uniOVEN 42 // LLG-uniOVEN 110
Internal volume:	42 l // 110 l
Temperature range:	50 ... 250 °C
Temperature accuracy:	±1 °C (at 70 °C)
Temperature uniformity:	±2 °C (at 70 °C)
Permissible ambient temperature:	5 ... 40 °C
Permissible relative moisture:	80 %, not condensing
Dimensions (W x D x H):	420 x 280 x 360 // 500 x 445 x 500 mm
Weight:	39 kg // 66 kg
Power supply:	230 V, 50/60 Hz
Warranty:	3 years

2 | 3 Heating ovens, ED, FD, FED series - Classic.Line

Diversity for all types of thermal, whether efficient drying, long-term controlled elevated temperatures or sterilization tasks for homogeneous temperature distribution: a BINDER oven and heating chamber is up to any tasks thanks to its wide temperature range.

BINDER

ED Series: Drying ovens with gravity convection.

FD Series: Drying ovens with forced convection.

FED Series: Heating chambers with forced convection and enhanced timer functions.

Equipment:

- Temperature range from 5°C above ambient temperature to 300 °C
- Independent adjustable temperature safety device class 2 (DIN 12880), with visual temperature alarm
- Optional RS 422 Interface for APT-COM™ Data Control System communication software

The number of shelves included in the scope of delivery is listed in the table.

1 Heating ovens, ED, FD, FED series - Avantgarde.Line

The drying chambers with natural convection (Type designation ED) or forced convection (Type designation FD, FED) are renowned due to their new design, convenient operation, and efficiency. The latest APT.line™ technology offers outstanding temperature accuracy.

BINDER

1

Equipment:

- Temperature range series ED: room temperature plus 5-6 °C to 300 °C
- Temperature range series FD, FED: room temperature plus 10 °C to 300 °C
- Controller with LCD display
- Electromechanical control of the exhaust air flap
- Class 2 independent temperature safety device (DIN 12880) with visual temperature alarm
- USB port for recording data

The number of shelves included in the scope of delivery is listed in the table.

DryingOven 125 basic dry/control dry

Powerful drying cabinets with rapid heating and exact temperature regulation guarantees reproducible results. Thanks to its high quality insulation, the device has a very large interior of 125L in relation to its total volume. This structure also reduces odour emissions, operating costs, and ensures excellent temperature uniformity.

IKA

- Oven basic dry with natural convection up to 250 °C
- Oven control dry with recirculating air up to 300 °C
- Electronically adjustable ventilation
- Clear LED display and control menu
- Key lock function
- Timer from 1 minute up to 100 days
- Adjustable temperature limit
- USB Interface
- For up to 6 shelves
- Interior made of stainless steel
- Also available with glass door
- Door opening possible up to max. 180°

Additional features Oven 125 control dry:

- Recirculating air drying cabinet with automatic fan switch-off
- Recirculating air adjustable in 10 steps
- Real-time clock
- Temperature selection limited TWB (DIN 12880)
- Illuminated interior
- Cable bushing at the rear for measurements inside the oven
- RS 232 Interface
- Direct saving of data on USB stick
- Interface for additional temperature sensor (display and control possible)
- 2 large TFT Displays

Scope of supply: Oven with 2 shelves and calibration certificate at 160 °C.

1 Ovens Heratherm™

The series provide bench-top models with 60, 100 or 180 l as well as floor models with 400 or 750 l chamber volume and 3 different fittings, each optionally with gravity or mechanical convection.

Thermo Scientific

- Very high energy efficiency, environmentally friendly materials (reduced use of formaldehyde), reduced heat emission
- Programmable timer
- Small footprint
- Flexible shelf system doubles the number of shelves and therefore the footprint
- Very good spatial and temporal temperature stability
- Automatic visual and acoustic over-temperature alarm
- Very low temperatures at outer wall
- Easy to read vacuum fluorescent display
- Intuitive user interface for setting temperature
- Easy cleaning due to edgeless fabrication

Heratherm™ General Protocol:

Perfect for routine daily work from 10 to 250 °C. Chambers made from corrosion-resistant st. steel with rounded corners. Timer, mechanical exhaust vent as well as 2 shelves are incl. as standard.

Heratherm™ Advanced Protocol:

For a greater flexibility and accuracy of temperature values. With V2A st. steel interior, works up to 330 °C at highly stable temperatures. Digital timer for daily or weekly On/OFF cycles. Up to 10 cycles can be stored and combined as ramps. Fan speed and air valve can be integrated into ramp programming.

Selectable quick start function allows for extremely fast heating.

Specifications

Power supply: 230 V, 60 Hz

Temperature range: 10 to 250 °C (General Protocol/Advanced Protocol floor models)
10 to 330 °C (Advanced Protocol benchtop models/Advanced Protocol Security)

2 Heratherm™ General Protocol Ovens

Thermo Scientific

Thermo Scientific™ Heratherm™ General Protocol ovens are perfect for routine daily work, providing the ideal heating and drying solution for your applications.

- Low energy consumption
- Built in timer
- Excellent footprint/volume ratio
- Tabletop models in 3 sizes (60 L, 100 L, 180 L), floor models in 2 sizes (400 L, 750 L)
- Inner chambers made from corrosion-resistant stainless steel with rounded corners for easy cleaning
- Large, easy to view vacuum fluorescent display
- Simple, microprocessor-based touch button controls
- Doors can be opened over 180° making these units easy to access
- Automatic overtemperature alarm system to protect samples
- Gravity convection units (Type designation OGS) are designed to protect delicate samples while offering temperature uniformity of ±4 °C with temperature stability of ±0.4 °C at 150 °C
- Mechanical convection models (Type designation OM) provide a temperature uniformity of ±3.3 °C with temperature stability of ±0.3 °C at 150 °C
- The exhaust vent can be used as an access port for an external temperature sensor
- Lockable casters for easy mobility and stability (floor models only)
- All Heratherm™ ovens come standard with a RS232 data interface

The number of shelves included in the scope of delivery is listed in the table.

7. Heating and cooling technology

Heating/Universal, Heating and Drying incubators

GENERAL CATALOGUE EDITION 21

1 | 2 Heratherm™ Advanced Protocol Ovens

As well as incorporating all the benefits of Thermo Scientific™ Heratherm™ General Protocol ovens, the Heratherm™ Advanced Protocol range boasts additional features providing even more flexibility, accuracy and dependability.

Thermo Scientific

- Sophisticated timer extends the automation options available to the user: turn on or off after a pre-set time, choose between a recurring weekly timer or run oven based on the 24 hour clock
- Highest level of temperature uniformity
- Exceptionally low energy consumption - 60 litre models just need 170W (gravity convection) and 275W (mechanical convection) per hour to maintain 150°C
- Adjustable fan speed for application related airflow
- Programmable controller for temperature ramps and dwells (store up to 10 programs with 10 discrete steps, features electronically controlled fan speed and damper position)
- Access port allows the introduction of sensors for independent data monitoring
- A simple calibration routine ensures temperature accuracy over time
- Boost function enables rapid heating up - no need to run the oven 24/7 (tabletop models only)
- Optional stainless steel exterior

The number of shelves included in the scope of delivery is listed in the table.

1 Heratherm™ Advanced Protocol Security Ovens

Thermo Scientific

The Thermo Scientific™ Heratherm™ Advanced Protocol Security portfolio combines the benefits of the Advanced Protocol line with an extra layer of security for applications where process reliability and sample protection are paramount.

Additional security features provide peace of mind for precious samples:

- Auto-dry function deactivates oven when the samples are dry, saving energy (optional sample temperature sensor is required to utilize this feature)
- Standard overtemperature alarm and an additional undertemperature alarm
- Door lock prevents disruption, tampering or accidental opening
- Door alarm notifies the operator when door is left open accidentally
- Socket for independent sample sensor (option): When connected, exact sample temperature is shown on display for additional peace of mind

The number of shelves included in the scope of delivery is listed in the table.

7. Heating and cooling technology

Heating/Vacuum drying incubators

GENERAL CATALOGUE EDITION 21

1

1 Vacuum drying ovens VD/VDL series

NEW
BINDER

For gentle, fast drying without residues, incrustations or oxidation.

- Direct heat transfer through large thermal conducting plates
- Program-controlled drying monitoring with automatic ventilation at end of process
- Internal data logger, measured values can be read out in open format via USB
- Inert gas connection
- Shatterproof, spring-mounted safety glass panel
- Large viewing window
- Aluminum expansion racks, can be custom-positioned
- Ethernet interface

Vacuum drying ovens VD:

- Temperature range: RT +10 °C to 220 °C
- For non-flammable solvents
- Controller with digital display of pressure and temperature
- 2 relay outputs, 24 V DC (max. 0.4 A)

Vacuum drying ovens VDL:

- Temperature range: RT +10 °C to 110 °C
- For flammable solvents
- ATEX conformity for units: EX II 2/3/- G IIB T3 Gb/Gc/- X
- Intuitive touchscreen controller with graphical pressure and temperature display
- Pressure control device for heating activated from < 100 mbar

Vacuum Ovens VO

1

Reliable, comfortable and energy-efficient - that's how vacuum drying works today. Separately adjustable and directly heated thermoshelves ensure precise temperature control and, thanks to the digital pressure control, the chamber load is not only dried at high speed but also extremely gently in our powerful and robust vacuum drying oven.

Memmert

- Safety glass door with armoured glass on the inside and splinter shield on the outside
- Digital pressure control
- Directly heated and individually controllable thermoshelves
- With 2 thermoself connections
- Optional: Pump base cabinet and energy-efficient vacuum pump

Model variant TwinDISPLAY: ControlCOCKPIT with two colour displays

You can find a detailed description of the "TwinDISPLAY" model at www.memmert.com

Scope of supply: Vacuum drying oven, 1 aluminium thermoself, calibration certificate (for 160 °C at 20 mbar), software AtmoCONTROL

4.663 352

Specifications

Working temperature range:	at least 5 above ambient to +200 °C
Setting temperature range:	20 °C to +200 °C
Setting accuracy:	up to 99.9: 0.1 °C/ from 100: 0.5 °C
Vacuum:	5 to 1100 mbar
Power supply:	230 V, 50/60 Hz

Accessories for vacuum ovens VO

Premium module: The premium module comprises the inert gas inlet (only sizes 49/101), extra connectors for thermoshelves, one for VO29, two for VO49/VO101, an additional thermoself for model size 49/101.

Memmert

Vacuum pump module: Without pump with antivibration metal plate at the bottom to accommodate the vacuum pump, including full-sight glass door, socket, signal cable and connecting hose to the vacuum oven.

Chemical-resistant vacuum pump: With 4x diaphragm, pump capacity: approx. 50 Nl/min = 3.0 m/h³, automatic purge control, with signal cable (3 m) to control the rotation speed and vacuum connecting hose (3 m).

Heating/Incubators

1

1 Mini-Incubator CULTURA® M inclusive Multirack

The CULTURA® M Mini-Incubator has specifically been designed for the incubation of contact slides and dipslides, as well as common Petri dishes for detecting bacteria, fungi and yeast. With its extremely small footprint, it can easily be transported wherever you need to use it. The Cultura® M incubator has an internal capacity of approximately 4 L. It is used in the areas of medical diagnostics and water analytics. The transparent door allows you to check inside the incubator without opening the door. Supplied with one Multirack for the incubation of up to 18 dipslides and one thermometer.

Specifications

Temperature range:	25 to 45 °C
Temperature uniformity:	±1.0 °C
Capacity:	4 l
External dimensions (W x D x H):	310 x 168 x 155 mm
Internal dimensions (W x D x H):	220 x 150 x 120 mm
Weight:	1.1 kg
Power supply:	230 V, 50 Hz
Warranty:	2 Years

Type	PK	Cat. No.
Mini-Incubator CULTURA® M incl. Multirack for 18 tests	1	6.280 441

2

2 Incubator Lovibond® DI 10

Designed for the reliable incubation of dipslides in laboratories and field work.

Lovibond®

- Low voltage, in-car operation possible
- Holds up to 12 dipslides or 10 quanti-discs
- Excellent temperature stability
- Programmable incubation period setting
- LCD Temperature display with up/down push button control
- Rapid heating times for fast testing
- External status LEDs

Scope of supply: Incubator incl. external 12 V universal power supply, set of leads (UK, EU, US), 12 V in-car power adapter

Temperature range:	ambient +5 ... +40 °C (±0.5 °C)
Dimensions (W x D x H):	246 x 215 x 162 mm
Weight:	1.7 kg
Power supply:	110/220-240 V or 12 V

Dipslide-Holder	1	6.274 399

3

3 Microbiological rapid tests Lovibond® Dipslides

The Lovibond® Dipslides are designed to test liquids as well as surfaces.

Lovibond®

These dual-sided Dipslides are available in a wide range of different media types. They are ideal for use in many applications including evaporative cooling towers, closed water circuits, cutting fluids, food testing, and many more.

1 | 2 Mini-Incubator LLG-uniINCU 20

The **portable** LLG-uniINCU 20 **digital** incubator is ideally suited for haematology and microbiology applications, such as the cultivation of contact plates for microbiological hygiene analysis. Due to its small footprint and economical price, it is also the perfect incubator for educational institutions and small laboratories. The LLG-uniINCU 20 incubator features a large internal chamber with capacity of 20 liter, capable of storing flasks and bottles up to 2 liter. In addition, the incubator includes two adjustable/removable shelves for increased capacity, as well as an electrical socket. The digital temperature control eliminates the need for external thermometers and repetitive "fine tuning" of an analog control knob. Optimum temperature distribution throughout the cabinet interior by fan circulation. The LLG-mini tumbling shaker uniSHAKER 2 which can be positioned inside the incubator (please order separately).

Scope of supply: incubator, mains adapter, mains cable for integrated socket, 12 V cigarette lighter cable, 2 grid shelves, 1 drip tray

Specifications LLG-uniINCU 20

Temperature range:	Ambient + 5 °C to 60 °C

Heating/Incubators

Incubators IN/IF and INplus/IFplus

Incubators for research, medicine, pharmaceuticals and food technology. Organic chamber loads require gentle heating. For this reason, the heating and control system are especially optimised for low temperatures of up to +80 °C. To prevent temperature overshoots, temperature is increased within a very narrow control range and kept exactly at the setpoint value.

- with all-round surface heating
- fresh air is pre-heated
- with inner glass door

Specifications

Type designation:

N = Natural convection,

F = Forced air circulation

plus = TwinDISPLAY

Working temperature range: at least 5°C (IN/INplus), at least 10°C (IF/IFplus) above ambient to +80 °C

Setting temperature range: +20 °C to +80 °C

Setting accuracy: 0.1 °C

Power supply: 230 V, 50/60 Hz

Incubators IN and IF

SingleDISPLAY: ControlCOCKPIT with one colour display

1 Microbiological Incubators Heratherm™

1

Thermo Scientific Heratherm™ microbiological incubators are available in four different models, providing three different incubator airflow technologies in a choice of six sizes.

Safe

- Safe view of samples through internal glass door, without impact on temperature
- Safe conditions with superior temperature uniformity
- Safe containment with automatic alarm for temperature deviations

Easy

- Easy temperature setting with intuitive user interface
- Easy to remove shelf system
- Easy to clean interior with rounded corners
- Easy to read large display

Efficient

- Efficient small footprint to optimize benchtop space
- Conveniently stackable without the need for tools or stacking kits
- Efficient utilization of interior with flexible shelf system

**2 | 3 Heratherm General Protocol Microbiological Incubators**

2

Thermo Scientific Heratherm General Protocol incubators have been designed for your routine applications in pharmaceutical, medical, food and research laboratories.

7. Heating and cooling technology

Heating/Cooling incubators

GENERAL CATALOGUE EDITION 21

1

1 | 2 Cooling incubator LLG-uniINC 28 Cool

The LLG-uniINC 28 Cool is a small cooling incubator with 28 litres and a temperature range of 3 °C - 45 °C. Natural convection prevents the samples from drying and enables cultivation and storage of long-term samples. The device is suitable for food controls, research, various cultivation processes and protein crystallization.

- Control panel for temperature setting
- Good temperature distribution due to 5 cooling and heating surfaces
- Peltier cooling and heating system
- Lockable
- Max. 6 shelves possible

Scope of supply: Cooling incubator LLG-uniINC 28 Cool with power plug, 2 shelves, key, instruction manual

2

Specifications

Temperature range:	3 °C ... 45 °C

3 Cooled incubators FOC series

Versatile cooled incubators with class A+ energy efficiency. The auto-tuning temperature control system ensures excellent temperature stability and temperature distribution.

Velp Scientifica

- High efficiency, low operating costs
- 2 internal sockets for further devices
- Optionally available software TEMPSoft™ for setting times, temperatures, ramps and alarm thresholds
- Wireless data transmission
- Forced ventilation for uniform temperature distribution
- 3-digit display for indoor temperature
- The FOC 200I model has an internal glass door
- The FOC 200IL model has an internal glass door and illuminated shelves

Scope of supply: Cooled incubator, shelves

Cooling incubators, KB, KT series

1

Series KB: Cooling incubators with compressor technology, for safe, reproducible incubation, even at high ambient temperatures.

BINDER

Temperature range: -10 °C to 100 °C (KB 23: 0 °C to 100 °C).

Series KT: Cooling incubators with thermoelectric cooling, combines exceptional performance with low energy consumption. Temperature range: 4 °C to 100 °C.

- Adjustable fan speed Controller with time-segment and real-time programming
- Inner door made of tempered safety glass
- 2 stainless steel racks
- Class 3.1 independent temperature safety device (DIN 12880) with visual and audible temperature alarm
- Computer interface: Ethernet or RS 422
- Data recording and USB interface (Series KT)

2 Thermostatic cabinets

2

The incubators from Lovibond® are designed for continuous tempering for different applications, mainly for the determination of BOD, the storage of wastewater samples, and the determination of enzymatic activity. The temperature range is +2 °C up to +40 °C and can be regulated in steps of 0.1°C. Temperature tolerance is defined with ±1 °C respectively ±0.5 °C (at 20 °C). Low energy consumption due to reinforced isolation. The interior of the cabinets is equipped with sockets for connecting stirrers. There are 3 models available with standard doors from 135 to 445 litres net capacity, and 2 models with glass doors with 140 and 255 litres net capacity. Illuminated LED display with actual/setpoint display.

Lovibond®

- Temperature range 2 °C to 40 °C, continuously adjustable in steps of 0.1 °C
- Low power consumption
- Illuminated LED display of preset and current temperatures
- Ideal for BOD determination at 20 °C
- Power sockets inside the incubator
- 5 models in 3 sizes
- Standard door or glass door

Cooled Storage Incubators, IPS

Sample storage, incubating and cooling in the food industry, medicine, the cosmetics industry or pharmaceuticals. The storage cooled incubators with Peltier elements, heat and cool seamlessly with one system.

Memmert

- double doors as standard: prevents contamination and drops in temperature, and at the same time an optimal view of the load through fully glazed interior doors
- fans integrated in the Peltier elements ensure rapid energy transport and optimal temperature distribution

Model variant SingleDISPLAY: ControlCOCKPIT with one colour display

You can find a detailed description of the "SingleDISPLAY" model at www.memmert.com

Specifications

Working temperature range:	+14 °C to +45 °C

2

2 Refrigerated incubator RI-150/RI-250

For incubation and test applications below ambient temperature as well as standard incubation applications at 37 °C in warm environments.

Thermo Scientific

- Available in 2 sizes as tabletop or standalone unit
- Standalone unit has lockable casters for easy mobility
- Door with viewing window
- Microprocessor control for precise temperature adjustment
- Timer function
- Temperature alarm, overtemperature shutdown
- Port hole on the right side of the device for inserting monitoring probes or cables
- RS232 data interface for temperature monitoring (software not included in delivery)
- IQ and OQ documentation and qualification service available
- Automatic defrosting
- Overheating protection in fan motor

Specifications

Peltier-cooled incubators IPP and IPPplus

Heating and cooling seamlessly with one system thanks to Peltier technology. In this respect, cooled incubators IPP not only contribute to climate protection, but it also achieves an additional decrease in operating costs of up to 90 % compared to compressor technology.

- Extremely quiet, vibration-free and space saving as no compressor is required
- No condensation in the interior chamber: due to the closed Peltier cooling system no outside air is exchanged
- LED light module for sizes 110 to 750 (as an option): dimmable LED light in three alternative colour temperatures (cold white light, warm white light or cold white and warm white light, dimmable in steps of 1 %)

Specifications

Type designation:	plus = TwinDISPLAY
Working temperature range without light:	0 (at least 20 below ambient) to +70 °C
Working temperature range with light:	+10 to +40 °C
Setting temperature range:	0 to +70 °C
Setting accuracy:	0.1 °C
Power supply:	230 V, 50/60 Hz

Cooled incubators with compressor cooling ICPeco

NEW

Memmert

This environmentally-friendly incubator is cooled with climate-friendly CO₂.

Thanks to the excellent thermodynamic properties of the refrigerant CO₂ (R744) and the finely adjusted control technology, the ICPeco cooled incubator is both powerful and high-precision. Without critical temperature overshoots, it keeps the temperatures exactly at the setpoint.

- double doors standard for all models: Prevention of contamination and drops in temperature, and at the same time an optimum view of the sensitive load through wide-area interior glass doors
- very good air circulation in the working chamber through sophisticated ventilation technology
- intelligent defrosting function

Model variant TwinDISPLAY: ControlCOCKPIT with two TFT colour displays

You can find a detailed description of the "TwinDISPLAY" model at www.memmert.com

1 CO₂ Incubators CellCulture®

The CellCulture® CO₂ incubators from Esco are widely used in scientific research to grow and maintain cell cultures. Typical fields of application include tissue engineering, neuroscience, cancer research and other mammalian cell research applications.

ESCO

- Fast and uniform temperature, CO₂ and O₂ control (O₂ suppressed models)
- HEPA filtration system with internal blower (some models)
- Capacitive humidity sensor
- IR CO₂-sensor with automatic auto zero
- Quick recovery time for temperature, CO₂ and humidity after door opening
- Stainless steel 1.4301 (AISI 304) or copper interior
- 90 °C moist heat decon system (models with air jacket)
- Easy to clean due to removable lids and inner door
- Serial RS485 communication port
- Low maintenance
- Stackable

Options on request:

Additional shelves, stacking kits, rollerbase, chart recorder

CO₂ Incubators CelCulture® with High Heat Sterilization

NEW

ESCO

Incubator with 180 °C high heat sterilization cycle, for efficient contamination protection.

Conforms to the international standards for dry heat sterilization.

- Stainless steel chamber
- Heat-resistant sensors
- IR CO₂ sensor
- O₂ Sensor (for suppressed O₂ model)
- 2 MB built-in flash memory for data and event logging

2 | 3 CO₂ incubator Heracell™ VIOS™ 160i with Cell Locker™ system

NEW

Thermo Scientific

The CO₂ incubator with the Cell Locker™ system is designed for improved culturing efficiency and security for sensitive cultures. Six individual, autoclavable polycarbonate chambers divide the incubator chamber. Each Cell Locker™ chamber has dual 0.2 µm membrane filters, that permit air circulation but exclude microbial contaminants. When the Cell Locker™ chamber is opened, the temperature, CO₂ concentration and humidity in the unopened Cell Locker™ chambers remain stable.

Heating/CO₂-Incubators

1

1 Cell Locker™ chambers for CO₂ inkubator Heracell™ VIOS™ 160i

NEW

Transparent. Each Cell Locker™ holds 9 each T-75 cell culture flasks, 20 each 6-well plates, or 24 each 96-well plates. The Cell Locker™ can be manually disinfected or can be autoclaved a maximum of 12 times.

Thermo Scientific

- Tapered box for easy installation into incubator
- Easy and secure one handed latch and pull
- Non-slick sliding tray with tip protection
- Removable cover for protected transport
- Membrane filter (0.2 µm)

2 CO₂ Incubators ICOmed

Memmert

The CO₂ incubator ICOmed is the perfect solution: Thanks to the battery-buffered ControlCOCKPIT, the operating display, logging and CO₂ control remain fully functional even when there is a power failure. All parameters are logged in accordance with the FDA and, when individually adjusted ranges for CO₂, O₂, temperature and humidity are exceeded, notifications can be sent to a mobile phone in addition to an alarm. With its rounded corners, the interior is easy to clean and can be sterilised for 60 minutes at 180 °C (including all sensors). The active humidity control offers optimal protection for cell and tissue cultures. It minimizes evaporation in the interior and ensures short recovery times. Every Memmert CO₂ incubator ICOmed is a medical device of class IIa according to MDD 93/42/EEC until 26 May 2024 according to the transitional provisions by the (EU) 2017/745 article 120 (2).

- fully insulated stainless steel door and heated inner glass door

Model variant TwinDISPLAY: ControlCOCKPIT with two colour displays

You can find a detailed description of the "TwinDISPLAY" model at www.memmert.com

1 CO₂ incubators, CB series with sterilizable sensor

Suitable for all incubation tasks, even for complex experiments under hypoxic conditions.
Models with additional O₂ control, **active humidification** and split interior doors are available.
With intuitive touchscreen controller, DuoDoor™ system for simultaneous opening of outer and inner door as well as lockable door handle. CO₂ autodiagnostic system to protect cell cultures.

BINDER

- Unit and CO₂ sensor can be sterilized with hot air at 180 °C
- Double-pan humidification system with condensation protection
- Seamless inner compartment made of stainless steel
- Measured values can be read out via USB and Ethernet interface
- Sealing inner door made of safety glass
- Stackable with adapter
- Fault diagnosis system with optical and acoustic alarm
- Internal data recording, can be read out via USB
- Ethernet interface

GENERAL CATALOGUE EDITION 21

Heating/Shaking incubators

1

1 Incubator 1000, Suitable for Heidolph Shakers

Modular system for shaking, mixing and heating with visual reaction control.
Compatible shakers are Duomax 1030, Polymax 1040, Titramax 1000, Unimax 1010 and Promax 1020.

Heidolph

- Heating module with a heating capacity of 300 W allows for quick and gentle temperature adjustments up to 65 °C
- Digital temperature setting of target temperature of 65 °C and separate display for actual temperature (accuracy of ±2°C up to 50°C and ±4°C over 50°C)
- Low noise blower allows for quick and even temperature distribution throughout the entire enclosure
- One incubation system can be used for several shakers, fast conversion possible
- To protect samples from thermal damages this unit features a safety circuit to prevent overheating
- Unlimited visual reaction control due to transparent and non-fogging PETG hoods
- 3 hoods options available: A flat hood for small vessels and microtiter plates, a high hood for all common medium sized vessels and a high hood XL for larger Erlenmeyer flasks up to 2000 ml
- The incubator hoods open instantly and interlock in any position

Please order hoods separately.

Shaking Incubators ES-20/ES-80

Stable and reliable orbital shaker-incubator for vigorous or even mixing and incubation of samples in a variety of flasks and vessels.
For Life Sciences, suitable for growing cell cultures in flasks, extracting tissue samples at physiological temperatures, and sample preparation processes, mixing of biological liquids as well as the incubation and cultivation of biological liquids, growing e-coli, bioluminescence preparation.

Grant

- Variable speed: 50 to 250 rpm
- Digital control of time, temperature and shaking speed for accuracy and repeatability
- Display 2-line 16 character LCD
- Interchangeable platforms for shaking/incubating different vessels (please order separately)

4 Shaking Incubator 211DS

Due to a small footprint, compact, stackable design and expanded temperature range, this shaking incubator is ideal for molecular biology and general use. With integral orbital shaker. Two full and one half shelves are supplied with each incubator.

- Temperature control system SmartChek™
- Internal electrical outlet
- Flask capacity: 4 x 1 l, 5 x 500 ml, 9 x 250 ml or 16 x 125 ml
- Gasket door with large viewing area

Heating/Shaking incubators

GENERAL CATALOGUE EDITION 21

1

1 Benchtop Shaking Incubator 222DS

The Benchtop Shaking Incubator is a combination of a shaker and a temperature chamber, designed for shaking and heat treatment of sensitive samples. It replaces two devices, reduces time and space needed. It is very suitable for biochemistry, microbiology and medicine laboratories in which thermal and shaking treatment of samples is a daily used routine.

Labnet

- High temperature working range
- Can be used in cold rooms too
- Digital readout of all parameters - read temporary or preset RPM, temperature, time, acceleration
- Parameter changes while the device is running (except timer)
- Last parameter values reside in the memory even if the device was switched off
- Precisely adjusted and maintained temperature regulation within 0.5 °C of absolute deviation from the set temperature
- HOLD and STEP time function with 1 minute resolution
- Easy interchangeable platforms
- Lid sensor

Universal attachment and non-slip mat please order separately.

Specifications

3 Shaking Incubator 311DS

Incubator with built-in orbital shaker. Stable temperature conditions and a broad temperature range enables the use of this incubator for cell cultures, washing blots, bacterial cultures, yeast cultures, entomology studies, egg hatching, hybridization washes, mixing and re-suspensions. Opening the door stops operation of the shaker. The incubator is supplied with one shelf.

- Temperature control system SmartChek™
- Broad temperature range
- High uniformity and accuracy
- Gasket door with large viewing area
- Adjustable shelves

Flat platform with non-slip rubber mat, flask platforms, additional shelves please order separately.

Shaking Incubator with rocking or tumbling motion

The Incubating Rocking and Tumbling Shakers combine smooth rocking or tumbling motion and general purpose incubation in one compact bench top unit.

OHAUS

- Electronic tilt adjustment while unit is operating
- LED displays for temperature, speed and tilt angle, and time
- Timer with audible alarm
- Overload Protection
- Speed Ramping Feature
- Caution Hot Indicator
- Polycarbonate Lid

Scope of supply: Shaking Incubator incl. built-in tray and lid

Heating/Shaking incubators

1

1 Shaking incubators SI500/SI600/SI600C

These combined shakers and incubators are ideal for scientists doing cell culturing procedures, especially suspension culture applications. All units are compact enough to be positioned on the laboratory bench.

Stuart

When SI600C is combined with the SRC4 recirculating cooler, or equivalent, the SI600C can operate at temperatures down to 15 °C below ambient (min. 5 °C). On the SI600C all viewing windows are also double glazed to prevent condensation. The Incubators have a versatile clamping system which secures most sizes and mixtures of flask up to 1 litre on the SI500 and 2 litres on the SI600 and SI600C.

Typically, the SI500 platform will accommodate the following Erlenmeyer flasks: 12 x 250 ml, or 9 x 500 ml or 4 x 1000 ml while the SI600 and SI600C can accommodate the following: 6 x 2000ml, 9 x 1000ml or 15 x 500ml.

- Microprocessor controlled
- 51 or 115 Litre capacity available
- Digital display for temperature and speed
- Timer from 1 second to 9 days
- USB connection
- Unique retractable platform for easy loading and unloading
- With alarm function

KS 3000 i control/KS 3000 ic control

Innovatively designed, compact incubator shaker to safely allow unattended operation in a temperature-controlled environment. The unit has a large LED display for speed, temperature and timer. An integrated PID temperature control allows the use of PT 1000 temperature sensors to assure highly accurate temperature control. The electronically controlled incubator comes equipped with RS 232 and USB ports for PC interface. All functions can be controlled and documented using labworldsoft® (software sold separately).

IKA

9.837 882

- Controls with antimicrobial coating for reduction of bacteria
- Junction box in the workspace for connection of an additional temperature sensor, e.g. PT 1000 (included with delivery)
- Wide range of attachments allows for using almost all shapes and sizes of vessels
- Unit stops automatically when hood is lifted
- Collecting tray with drain hose on rear of the unit
- Electronic timer
- Error code display

KS 3000 ic control additionally with built-in cooler for connection to an external cooling unit.

Accessories for Incubator Shaker KS4000i control

AS 4000.1 Universal attachment

For various types of vessels. Infinitely variable clamping rolls allow universal adaptation to various vessels.

IKA

AS 4000.2 Fixing clip attachment

For shaking flasks, Erlenmeyer flasks and bottles with a round crosssection (without fixing clips). Number of fixing clips (volume): 50 x AS 2.1(25ml), 48 x AS 2.2 (50ml), 25 x AS 2.3 (100ml), 16 x AS 2.4 (250ml), 12 x AS 2.5 (500ml), 7 x AS 2.6 (1000 ml)

AS 4000.3 Dish attachment

For smooth shaking operations in the low viscosity range, e.g. for cell cultures, nutrient media in Petri dishes, culture bottles and vessels with a low centre of gravity. With integrated slip-resistant foil (PP).

1 MaxQ 4450 Compact Benchtop Incubated Shakers, orbital

- Holds up to 4 x 1L flasks.
- Requires minimal bench space.
- Choose between two temperature ranges, 5 °C above ambient to 80 °C or 5 °C below ambient to 80 °C.
- Clear lid lets you view samples without disturbing internal temperature
- Triple eccentric drive handles heavy loads, provides uniform agitation and continuous 24-hour operation, even at high speeds.
- Monitor and control chamber temperature range with ±0.1 °C accuracy and ±0.5 °C uniformity at 37 °C.
- View speed, operating time and temperature simultaneously on three individual LED displays.
- Visual/audible alarms alert you to temperature deviations. Heat turns off if temperature deviates ±1°C of set point.
- Soft start feature eliminates sudden starts and stops, splashing of vessel contents or wetting of flask closure.
- Retains parameters during power failure and restarts unit automatically after power is restored.
- Over-temperature safety feature with independent thermostat provides additional backup by controlling heat if main temperature controller fails.
- Safety interlock stops platform motion when lid is opened.
- 5 year warranty and 10 year on drive mechanism.

Heating/Shaking incubators

1 MaxQ 6000 Incubated and Refrigerated Stackable Shakers, orbital

- Available in incubated or refrigerated models.
- Units can be stacked two high on the floor with the stacking kit accessory.
- Two adjustable-height shelves provide added storage.
- Large viewing window and internal light offer sample visibility.
- View temperature, speed and time simultaneously on three individual displays.
- Door can be hinged from the right or left by the user for convenient placement in lab.
- Triple eccentric drive handles heavy loads, provides uniform agitation and continuous 24-hour operation, even at high speeds.
- Visual/audible alarms alert you to temperature deviations. Heat turns off if temperature deviates ± 1 °C of set point.
- Shaker shut down and visual/audible alarms signal if unit operates ± 10 % of set speed, preventing shaker from moving.
- Unbalanced load sensor stops platform motion when excess vibration is detected visual/audio alarms signal until condition is corrected.
- Soft start feature eliminates sudden starts and stops, splashing of vessel contents or wetting of flask closure.
- Retains parameters during power failure and restarts unit automatically after power is restored.
- Over-temperature safety feature with independent thermostat provides additional backup by controlling heat if main temperature controller fails.
- Safety interlock stops shaking motion when the door is open.
- 5 year warranty and 10 year on drive mechanism.

2 Adhesive Flask Mat for MaxQ Shakers

Our Adhesive Flask Mat is an alternative to flask clamps for securing odd shaped objects such as bottles, volumetric flasks and test tube racks to a shaker platform. Simply place the 21 cm x 21 cm Adhesive Flask Mat on an anodised aluminum or stainless steel shaker platform and secure the vessel to it. It will hold Erlenmeyer flasks as large as 4 L that contain 2 L of media at speeds up to 250 rpm. The mat is not suitable for use in water baths.

Thermo Scientific

- Easy-to-view samples. The white background makes it easy to determine when to harvest your samples
- Simple to clean. Can be restored to like new condition by wiping with alcohol
- Long lasting. Months of use without losing adhesive properties

1 Digital dry bath LLG-uniBLOCKTHERM

Suitable for use in microbiological, histological, clinical, industrial and environmental laboratories.
Various types of optional heating blocks are available as accessories for the LLG-uniBLOCKTHERM.

- Digital control with LED display
- Can be used up to 120 °C
- For timer and continuous operation
- Can be used with different heating blocks
- 1 x block unit
- With overheating protection

Scope of supply: LLG-uniBLOCKTHERM, removal tool, lid

Please order heating blocks separately.

1 Digital Dry Bath AccuBlock™ Mini

AccuBlock™ Mini combines digital control, a fast heating microtube block and a convenient AccuRack™ transfer system, all in an ultra compact footprint.

Labnet

With a temperature range to 100 °C which can be set in increments of 0.1 °C, AccuBlock™ Mini is suitable for a range of uses in life science, molecular biology, environmental and industrial laboratories and a variety of applications including incubation, enzyme reactions, immunoassays.

- Accepts up to 12 x 1.5 ml tapered microcentrifuge tubes
- With thermometer well for temperature confirmation and calibration
- Microprocessor controlled heating element
- Easy to read 4 digit LCD display
- Built in calibration mode allows end users to calibrate the bath as needed

The included AccuRack™ allows quick loading or unloading of all sample tubes simultaneously. It is self standing and can be used to hold samples while they are prepared for loading. Samples can also be loaded directly into the AccuBlock™ Mini without the AccuRack™.

Specifications:

Temperature range:	Ambient +5 °C ... 100 °C, resolution 0.1 °C

Dry Block Heaters, digital

Designed for applications that require repeatable results and superior temperature stability.
These multi-purpose units are ideal for incubation and activation of cultures, enzyme reactions, immunoassays, melting/boiling points, and a wide variety of other laboratory procedures.
Integral support rod holder with locking knob accepts optional External Temperature Probe Kit.
Optional External Temperature Probe Kit monitors actual block or sample temperature.
Each of the models accept separate interchangeable modular blocks, accommodating various tube sizes from 0.2 ml microtubes to 50 ml centrifuge tubes. Each block has a thermometer well for measuring block temperature. Efficient heating due to close tube-and-block contact for maximum heat retention.

- Microprocessor Control
- LED Display
- Temperature Calibration Mode
- Caution Hot Indicator
- Audible Alarm

Without blocks. Please order separately.

1 Microtube block thermostat BTD

Grantás block heating system BTD with fixed block is designed for rapid and precise heating of microtubes up to 100 °C.

Grant

- Digital temperature control for optimum precision
- Heating block holds combinations of four microtube sizes simultaneously
 - up to a total of 49 tubes: 24 x 1.5/2.0 ml, 15 x 0.5 ml, 10 x 0.2 ml
- Flexible tube sizes and rapid heat-up time enables swift change of application
- Convenient integral timer for time-sensitive incubations
- Sturdy, durable, easy-to-clean plastic construction; compact design with small footprint
- 2-line display for simple and precise setting of temperature/time and for monitoring current status during operation

2 3 Block thermostats, QBD and QBH series

For controlled dry heating of test tubes, microplates and Eppendorf tubes in interchangeable aluminium blocks. The following models are available:

Grant

- Choose from 3 digital systems with 1, 2 or 4 interchangeable blocks (QBD models) and 1 digital high-temperature system (QBH2) with 2 blocks
- Fast heat-up time and in-block temperature sensing capability using external sensor probe. Please order Cat. No. 6.228 714 separately.
- Built-in timer, programmable delayed start and RS232 output for data monitoring
- Includes block removal tool

Requires but does not include interchangeable QB-series blocks

Grant

Heating/Thermoblocks

1

9.852 300

Block Heaters, analogue and digital, SBH series

- choice of either analogue or digital models
- digital models available with either 130 or 200 °C maximum temperature
- three block model for extra capacity
- dual control models have two blocks with independent temperature control
- uniform and stable block temperatures

Stuart

Designed for the precise heating of test-tubes, microcentrifuge tubes, cuvettes and microplates.

Range compromises an economical analogue model with easy to use, dial setting and advanced digital models with bright, easy to read, LED display which facilitates setting of the required temperature and also accurate monitoring of the actual temperature.

Excellent temperature stability and uniformity is maintained via sensitive, microprocessor control.
Heats to 100°C in <12 mins.

Supplied complete with block extraction tool but without aluminium blocks which must be ordered separately.
With BioCote, silver-based, antimicrobial protection.

Dry Block Heater

Digital block heaters for 1, 2, 3 or 4 aluminium blocks provides precise temperature control in small vessels. Included PT 1000 temperature sensor allows temperature control directly in the sample vessel. It is used with PCR tubes, PCR strips, Greiner tubes, microplates and cuvettes. The block heater is ideal for melting and boiling point determination, enzyme reactions, incubation and activation of cultures, immunoassays, DNA denaturation, culture media tests, coagulation tests, blood-urea-nitrogen determinations and in situ hybridizations.

IKA

9.816 801

- Stepless adjustable temperature up to 120 °C
- Timer: Countdown, adjustable from 1 min to 99 h 59min
- Counter: Display of heating time
- Highly versatile with a large number of blocks
- Error code display
- Fixed safety circuit
- Acoustic signal at end of test

Cooling/Heating block Eppendorf ThermoStat C

Eppendorf AG

The ideal device to accurately set and maintain temperatures.
Precise temperature control is achieved using optimally balanced heating and cooling elements (peltier technology). The cooling and heating temperature keys provide quick access to five important experimental temperatures (4 °C, 16 °C, 37 °C, 56 °C and 95 °C). You can also individually store 15 programs.

- Excellent temperature accuracy
- Precise temperature control from -10 to +110 °C
(+110 °C can be set when using 12 mm and cryo SmartBlocks™)
- Prevent condensation and improve temperature homogeneity with the new ThermoTop
- Comprehensive range of program functions

Specifications

Temperature operation range:	min: +30 °C below RT, max: +110 °C
Temperature adjustable range:	-10 to +110 °C (+110 °C can be set when using 12 mm and cryo SmartBlocks™)
Accuracy/ resolution:	±0.5 °C at +20 to +45 °C
Max. heating time:	5.5 °C/min
Max. cooling time:	5 °C/min between +110 °C and RT
Dimensions (W x D x H):	206 x 304 x 131 mm
Capacity:	dependent on Eppendorf SmartBlock™
Weight:	4.3 kg
Power consumption:	200 W (max.)
Power supply:	220 - 240 V ±10 %, 50/60 Hz

Type	Description	PK	Cat. No.
Eppendorf ThermoStat C	Basic device without Eppendorf SmartBlock™	1	9.776 903

1 Exchangeable blocks Eppendorf SmartBlocks™ and accessories for Eppendorf ThermoMixer™ C and ThermoStat C

Exchangeable blocks:

Flexibility has never been this easy.

Eppendorf offers a variety of SmartBlocks™ for tubes from 0.5 ml to 50 ml.

- Fast and simple block exchange due to Eppendorf Quick Release

- Optimized block design guarantees maximum temperature transfer to the sample

Eppendorf AG

Transfer Racks:

- Autoclavable transport aid for tubes from 0.5 to 2.0 ml

- For transferring up to 24 tubes in/from the heating block at the same time

- Offers protection against burns when transferring hot samples

SmartExtender:

A heatable frame/attachment for mixer, with separate temperature control (3 °C above RT to 110 °C), for simultaneous operation at two different temperatures.

- Enables 2 incubations at the same time

Constant Climate Chambers HPP

They are simply unbeatable in energy efficiency.

Memmert

Furthermore, as constant climate chambers HPP have a very long maintenance free service life, they are perfectly suited for stability tests, storage in controlled environments and conditioning. The high precision temperature control as well as the active humidification and dehumidification were particularly adapted to the ICH guidelines, option Q1A, for stability tests.

- LED light module for sizes 110 to 750 (as an option): dimmable LED light in three alternative colour temperatures (cold white light, warm white light or cold white and warm white light, dimmable in steps of 1 %)
 - Heating and cooling seamlessly with one system thanks to Peltier technology
- Almost vibration-free and extremely quiet

Model variant TwinDISPLAY: ControlCOCKPIT with two colour displays

You can find a detailed description of the "TwinDISPLAY" model at www.memmert.com

Options and accessories for constant climate chamber HPP

Light module cold white 6.500 K:

Memmert

LED strips arranged on the side walls of the interior, 10 for model 110;
14 for models 260, 410 and 750; programme controlled dimming from 0 to 100 % (in 1 % steps);
ramp programming in combination with temperature and humidity

Light module cold white 6.500 K + warm white 2.700 K:

LED light strips - 10 strips for model 110; 14 strips for model 260, 410 and 750
(5 resp. 7 alternating cold white light strips and 5 resp. 7 warm white light strips);
on the side walls of the interior, programme controlled dimming from 0 to 100 % (in 1 % steps);
ramp programming in combination with temperature and humidity

Climate Chambers ICHeco

1

Climate-friendly and powerful: the ICHeco climate chamber for the stability testing of pharmaceuticals, cosmetics or food works with environmentally-friendly CO₂ (R744) as refrigerant. No icing, no drying out of samples, no dehumidification of the working chamber. Compared to appliances with refrigerant R134a, it scores with faster cooling-down times. In the ICHeco L climate chamber, stability tests in accordance with ICH guidelines Q1B, option 2, can be performed, thanks to an illumination unit. Fluorescent lights with cold white light (daylight: light colour 865, 6.500 K) and UV radiation in the spectral range of 320 - 400 nm. Daylight and UV light comply with standard illuminant D65.

Model variant TwinDISPLAY: ControlCOCKPIT with two colour displays

You can find a detailed description of the "TwinDISPLAY" model at www.memmert.com

Different variants of ICHeco:

ICHeco with humidity control

ICHeco L with humidity control and light

9.538 024

Humidity Chambers HCP

Memmert

2

The Memmert humidity chamber HCP - This climate chamber offers a full range of comfort, reliability and safety. This humidity chamber is ideally suited for environmental testing, environmental simulation, accelerated service life tests and 85/85 tests according to IEC 60068-2-67 and IEC 60068-2-78.

The active humidity control is the guarantee for ideal homogeneity of temperature and humidity as well as for short recovery times after opening the door. In combination with heating on all six sides, including heated inner glass door, it also minimises vaporisation in the interior and thus the risk of condensed water dripping onto the test object. An aluminium thermal conductive layer supports optimum temperature distribution and serves as a heat accumulator in case of a temporary power failure.

4.662 063

Specifications

Setting range active humidity control:	20 to 95 % rh
Setting accurate humidity:	0.5 % rh
Working temperature range:	at least 7 °C above ambient up to +90 °C
Setting temperature range:	+18 °C to +90 °C
Setting accurate temperature:	0.1 °C
Power supply:	230 V, 50/60 Hz

Heating/Test incubators

1

1 Constant climate chambers, KBF/KMF series

For long-term stable temperature/humidity simulations in one chamber.
The constant climate chambers are ideal for norm-compliant work according to ICH guidelines and work independently of the water supply.

BINDER

KBF Series: Constant climate chambers with large temperature range:

0 °C to 70 °C and humidity range: 10 % RH to 80 % RH.

KMF Series: Ideal for demanding stress tests, e.g. at 85 °C and 85 % RH.

Temperature range: -10 °C to 100 °C and humidity range 10 % RH to 98 % RH.

Equipment:

- Electronically controlled APT.line™ preheating chamber with cooling system
- Inner chamber made of stainless steel
- Intuitive touchscreen controller with time-segment and real-time programming with internal data recording
- Humidity regulation with capacitive humidity sensor and vapor humidification
- Inner glass door with seal
- Independent temperature safety device class 3.1 (DIN 12880) with optical and audible temperature alarm
- Avoidance of glass corrosion by special TIMELESS coating
- Access port with silicone plug diam. 30 mm, left side
- Door heating
- Ethernet interface for communication software APT-COM™ DataControlSystem
- Internal data logger, measured values can be read out in open format via USB
- Power supply 200 ... 230 V, 50/60 Hz

Type	Internal volume litres	External dimensions (W x D x H) mm	Internal dimensions (W x D x H) mm	PK	Cat. No.

2 Constant climate chambers, KBF P/KBF LQC

NEW

BINDER

For long-term stable temperature/humidity simulations in one chamber.

The constant climate chambers are ideal for norm-compliant work according to ICH guidelines and work independently of the water supply.

KBF P Series: Constant climate chambers with ICH-compliant lighting and variably positionable light cassettes.

KBF LQC Series: Constant climate chambers with ICH-compliant light source and patented light dose control for UV-A and VIS. Temperature range: 0 °C to 70 °C and humidity range: 10 % RH to 80 % RH.

Equipment:

- Electronically controlled APT.line™ preheating chamber with cooling system
- Inner chamber made of stainless steel
- Intuitive touchscreen controller with time-segment and real-time programming with internal data recording
- Humidity regulation with capacitive humidity sensor and vapor humidification
- Inner glass door with seal
- Independent temperature safety device class 3.1 (DIN 12880) with optical and audible temperature alarm
- Avoidance of glass corrosion by special TIMELESS coating
- Access port with silicone plug diam. 30 mm, left side
- Door heating
- Ethernet interface for communication software APT-COM™ DataControlSystem
- Internal data logger, measured values can be read out in open format via USB
- Power supply 200 ... 230 V, 50/60 Hz

1 Constant climate chambers series KBF-S Solid.Line

Constant climate chambers for long-term tests and accelerated stability tests of pharmaceutical products according to the ICH guideline Q1A. With corrosion and condensate-free stainless steel interior for homogeneous temperature and humidity conditions.

BINDER

- Electronically controlled APT.line™ preheating chamber with cooling system
- Inner chamber made completely of stainless steel
- 2 stainless steel racks incl. shelf support
- Intuitive touchscreen controller with time segment and real-time programming with internal measured value recording
- Humidity control with capacitive humidity sensor and vapor humidification
- Independent temperature safety device class 3.1 (DIN 12880) with optical and audible alarm
- Access port with silicone plug diam. 30mm, left side
- LCD display for indication of temperature, humidity, alarms and additional information
- Internal data logger with USB interface
- Independent water supply via canisters
- Models from 240 l capacity with double swivel castors and brake

Specifications

Humidity range:	20 ... 80 % r.F.

Material test chambers, FP and M series

The material test chambers from BINDER are highly precise and have a wide temperature range, as well as comprehensive programming options, with which you can customise ramps, profiles and processes.

BINDER

FP Series: Material test chamber with forced convection.

M Series: Material test chambers with individual programming.

- Electronically controlled APT.line™ preheating chamber assuring temperature accuracy and reproducible results
- Adjustable fan speed
- 2 chrome-plated racks
- Temperature range from 5°C above ambient temperature to 300 °C
- Independent adjustable temperature safety device class 2 (DIN 12880), with visual temperature alarm
- RS 422 interface for use with APT-COM™ DataControlSystem communication software

7. Heating and cooling technology

GENERAL CATALOGUE EDITION 21

Heating/Test incubators

Growth chambers, KBW, KBWF series

Homogeneous lighting conditions with constant temperature and humidity conditions, the BINDER growth chambers.

BINDER

The responsive humidification system, the high-performance cooling and uniform light distribution ensure optimal growth conditions.

KBW Series: Growth chambers with light.

KBWF Series: Growth chambers with light and humidity.

Equipment:

- Electronically controlled APT.line™ preheating chamber
- Temperature range 0 °C to 70 °C (without humidity and illumination)
- Humidity range 10 % to 80 % RH (KBWF)
- 2 variable position illumination cassettes each with 5 daylight fluorescent illumination tubes
- Controller with time-segment and real-time programming
- Humidity regulation with capacitative humidity sensor and vapor humidification (KBWF)
- Independent temperature safety device class 3.1 (DIN 12880) with optical and audible temperature alarm
- Ethernet or RS 422 interface for communication software APT-COM™ DataControlSystem

3 Rapid incinerator

For individual and series incineration of solids and liquids. Upper platform with 8 openings of 34 mm diameter, for porcelain crucibles up to 50 mm diameter. Upper platform and housing made of stainless steel. With 120 minute timer with audible signal after timed period and separate continuous operation switch. A safety switch switches the mains supply off/on automatically on opening/closing the incinerator chamber. With 1.5 metre cable and earthed plug.

Gestigkeit

Type SVR/E

With electronic temperature control which allows stepless heating adjustment from 10 to 100 %. Complete for use.

Type SVD 95

With digital temperature adjustment and display. Complete for use.

Muffle furnaces up to 1300 °C

High temperature furnaces with glass fibre insulated chamber.
Suitable for applications in industry, science and medicine.

1

4.669 221

- Ceramic bottom plate
- Side-opening, down-opening or top-opening door, depending on model
- Controls easily accessible in the socket
- Fast heating times
- Furnace housing made of powder-coated metal
- Good temperature stability
- Energy saving
- Models with Omron E5CC controller: time and temperature can be set
- Models with Omron E5CC-T controller: 8 storable programs

Model numbers with "1100" up to 1100 °C

Model numbers with "1300" up to 1300 °C

2 Muffle Furnaces Series LE 1/11 - LE 14/11 up to 1100 °C

Compact muffle furnaces with dual shell furnace housing of rust-free stainless steel and heating elements encased in quartz glass tubes.

Nabertherm

- Tmax 1100 °C, working temperature 1050 °C
- Heating from two sides from heating elements in quartz glass tubes
- Maintenance-friendly replacement of heating elements and insulation
- Insulation only made of materials that are classified as not carcinogenic acc. to TRGS 905, class 1 or 2
- Housing made of sheets of textured stainless steel
- Dual shell housing for low external temperatures and high stability
- Flap door which can also be used as a work platform
- Exhaust air outlet in rear wall
- Compact dimensions and light weight
- Controller mounted under the door to save space
- Equipped with the basic controller R 7 with one free storeable temperature, which is dwelled until the controller is switch off
- Standard power supply 230 V, 1/N/PE, 50/60 Hz

7. Heating and cooling technology

GENERAL CATALOGUE EDITION 21

Heating/Ovens, Furnaces

Muffle furnaces series L/LT 1100 °C to 1400 °C

For daily laboratory use. Models with flap door or lift door available, for temperatures from 1100 °C to 1400 °C.

Nabertherm

- Dual shell housing made of textured stainless steel sheets for low external temperatures and high stability
- Adjustable air inlet integrated in door
- Exhaust air outlet in rear wall of furnace
- Solid state relays provide low-noise operation
- Optionally available with flap door (L models) that can be used as work platform or with lift door (LT models) with hot surface facing away from the operator
- Available with the programmable controllers B 410 and C 450 with adjustable ramps and hold times (L 1/12 with R7 or 3216)
- All insulation materials used are classified as non-carcinogenic according to TRGS 905, Class 1 or 2
- Standard connection 220-240 V 1/N/PE 50/60 Hz

1100 °C and 1200 °C models

- Ceramic heating plates with integrated heating wire, splash and exhaust protected, easy to replace
- heating from two sides (heating from three sides for muffle furnaces with interior volumes of 24 litres and 40 litres)

1300 °C and 1400 °C models

- Heating elements on support tubes for free heat radiation, short heating times and long service life
- Heating from two sides

Optional

- Chimney, chimney with fan or catalytic converter
- Over-temperature limiter with adjustable cutout temperature for thermal protection class 2 in accordance with EN 60519-2 as temperature limiter to protect the furnace and load
- Protective gas connection to purge with non-flammable protective or reaction gases (not available in combination with chimney, chimney with fan or catalytic converter)
- Manual or automatic gas supply system
- Process control and documentation via VCD software package for monitoring, documentation and control

GENERAL CATALOGUE EDITION 21

Heating/Ovens, Furnaces

1

6.310 023

High-temperature chamber furnaces with air circulation NA/N

These chamber furnaces with air circulation are characterized by their extremely high temperature uniformity. Hence, they are especially suitable for processes such as cooling, crystallizing, preheating, curing, but also for numerous processes in tool making. Due to the modular concept, the forced convection furnaces can be adjusted to the process requirements by adding suitable equipment.

Nabertherm

- Tmax 450 °C, 650 °C, or 850 °C
- Horizontal air circulation
- Swing door hinged on the right
- Temperature uniformity up to ±4 °C according to DIN 17052-1 (model NA 15/65 up to ±5 °C)
- Optimum air flow and temperature uniformity through high circulation rates
- One frame sheet and rails for two additional trays included in the scope of delivery (NA 15/65 without frame sheet)
- Stainless steel air-baffles in the furnace for optimum air circulation
- Base frame included in the delivery, NA 15/65 designed as table-top model
- Air inlet and exhaust air flaps as additional equipment for using as drying oven
- NTLog Basic for Nabertherm controller: recording of process data with USB-flash drive
- Available with the programmable controllers B 400 and C 440 with adjustable ramps and hold times (NA 15/65 with B 410 or C 450)
- Standard power supply 400 V 3/N/PE 50/60 Hz (NA 15/65: 220 - 240 V, 1/N/PE)

Chamber furnaces

NEW

The chamber furnaces are suitable for Annealing, Hardening and Brazing. The furnaces can be extended with a variety of accessories, like annealing boxes for operation under protective gas, roller guides, or a cooling station with a quench tank. Even high-performance applications like the annealing of titanium can be implemented without the use of expensive and complicated annealing systems.

Nabertherm

- Robust insulation with light refractory bricks
- Deep furnace chamber with three-sides heating: from both side walls and bottom
- Low energy consumption due to multi-layer insulation
- Base frame included
- N 7/H - N 17/HR designed as table-top model
- Parallel guided downward swinging door (user protected from heat radiation)
- NTLog Basic for Nabertherm controller: recording of process data with USB-flash drive
- Available with the programmable controllers B 400 and C 440 with adjustable ramps and hold times

1 | Tube Furnaces

These compact tube furnaces with integrated control systems can be used universally for many processes. Equipped with a standard working tube of C 530 ceramic and two fiber plugs, these tube furnaces have an unbeatable price/performance ratio.

Nabertherm

- Tmax 1200 °C or 1300 °C
- Single-zoned design as standard
- Dual shell housing made of sheets of textured stainless steel
- Outer tube diameter of 50 to 170 mm, heated length from 250 to 1000 mm
- Working tube of C 530 ceramic including two fiber plugs as standard equipment
- Solid state relays provide for lownoise operation
- Available with the programmable controllers B 410, C 450 and P 480 (for three-zoned design) with adjustable ramps and hold times
- Standard power supply 400 V 3/N/PE 50/60 Hz (R 50/250 und R 50/500: 220 V, 1/N/PE, 50/60 Hz)

1

**Option:**

- Over-temperature limiter with adjustable cutout temperature for thermal protection class 2 in accordance with EN 60519-2 as temperature limiter to protect the furnace and load
- Charge control with temperature measurement in the working tube and in the furnace chamber outside the tube
- Three-zoned design (heated length from 500 mm)
- Working tubes
- Gas supply systems for protective gas or vacuum operation
- Process control and documentation with VCD software package

2 | 3 | Tube Furnaces with Stand

These compact tube furnaces are used when laboratory experiments must be performed horizontally, vertically, or at specific angles. The ability to configure the angle of tilt and the working height, and their compact design, also make these tube furnaces suitable for integration into existing process systems.

Nabertherm

2

- Vertical or horizontal operation freely adjustable
- Working height freely adjustable
- Working tube made of C 530 ceramic
- Control system integrated in furnace base
- NTLog Basic for Nabertherm controller: recording of process data with USB-flash drive
- Available with the programmable controllers B 410 and C 450 with adjustable ramps and hold times

Specifications

Power input: 1800 W
Power supply: 230 V, 1/N/PE, 50/60 Hz

3

4 | Glass drying pistol

Ideally suited for drying of small sample volumes. This sample dryer, for analysing substances and synthetic products, uses heat, desiccant and vacuum at the same time for optimum results. Its temperature range can be adjusted between +30 °C to +160 °C, with a temperature stability of ±1°C.

LABC-Labortechnik

4

The two-part drying vessel is approximately two parts of DURAN® glass:

- 1) Drying tube with an outer diameter of 44 mm, length inside 200 mm, joint NS45.
- 2) Ground flask with stopcock for connection to a vacuum pump.

The glass drying oven needs to be fixed with screw stand rod at the laboratory stand to be secured. Dimensions (without mounting for tripod and Flask): H 120 mm x B 195 mm x T 185 mm. Weight: 2 kg

Supplied with: Glass drying oven consisting of heating element with support rod and glassware with ground drying tube and ground flask with stopcock.

1

2 Measuring cylinders, PP, tall form, class B, moulded graduations

ISOLAB

- Manufactured from ultra clear, virgin polypropylene and its thick walls eliminate distortion.
- They offer high transparency, chemical resistance and remarkable heat tolerance.
- They meet the highest quality standards according to DIN 12681 and ISO 6706.
- Individually calibrated through automatic calibration process carried out by robots.
- Permanent quality control through all steps eliminate possible deviations from nominal values.
- Cylinders are calibrated to contain (In) and the tolerances are according to DIN/ISO Class "B" standards.
- Graduations are embossed and specially designed for plastic and resistant to 60°C.
- For consistent accuracy, polypropylene measuring cylinders should not be used with liquids over 60°C and should not be kept under direct sunlight or overheated conditions.

Volumetric apparatus/Measuring cylinders

1

1 Measuring cylinders, PP, tall form, class B, blue moulded graduations

VITLAB

Highly transparent. With easily readable, raised, embossed blue scale and ring marks at the primary scale points. Calibrated 'In'. Class B tolerances according to DIN 12681/ISO 6706. Hexagonal base with bottom studs provides high stability. Thermal stress up to 80°C does not cause tolerance limits to be permanently exceeded. To preserve markings, do not clean at temperatures exceeding 60°C. Food-safe product according to regulation (EU) No. 10/2011.

2

Volumetric Flasks, Borosilicate Glass 3.3, Class A, Amber Graduations, with PP Stoppers

BLAUBRAND® Eterna. To DIN EN ISO 1042. DE-M marking. With batch number.

BRAND

Graduation and inscriptions in Eterna amber stain. Calibrated to contain (IN). PP stoppers.

All BLAUBRAND® volumetric flasks are delivered with batch number and one batch certificate included per pack.

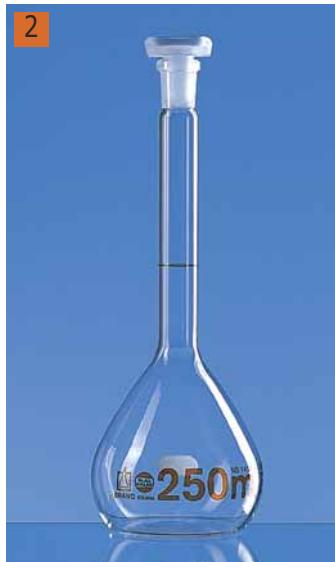

Also available with individual works or DAkkS (former DKD) calibration certificate, please enquire.

BLAUBRAND® volumetric flasks (except wide-neck flasks) are also available with individual and batch USP certification.

The batch certificate is also available to download from the manufacturer's website.

Volumetric apparatus/Graduated flasks

1 Volumetric flasks for determination of oil content, SILBERBRAND, Borosilicate glass 3.3

DIN 51 368. For determination of oil content in aqueous oil emulsions (e.g. drilling oil).
With NS19/26, hollow glass stoppers. Graduations and inscriptions in highly contrasting white enamel. Capacity 100 ml, tolerance ± 0.2 ml. Calibrated to contain (IN).

Subdivisions: 0 to 5 ml : 0.1 ml, tolerance: ± 0.1 ml.
Subdivisions: 5 to 30 ml : 0.5 ml, tolerance: ± 0.5 ml.

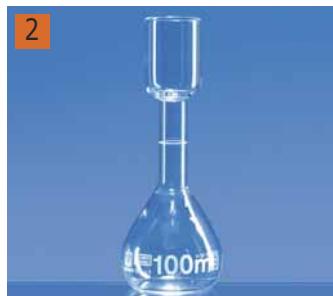

Sample volume ml	PK	Cat. No.
100	1	9.276 880

2 Volumetric flasks for sugar tests, Borosilicate glass 3.3, class B, white graduated

For sugar tests in the style of Kohlrausch. SILBERBRAND.
Tolerance equivalent to class B. Ring marks and inscriptions in highly contrasting white enamel. Calibrated to contain (IN).

Capacity ml	Tolerance \pm ml	PK	Cat. No.
100	0.2	1	9.276 885
200	0.3	1	9.276 887

3 Volumetric flasks, PMP, class A

VITLAB

With NS stoppers, PP. Highly transparent. With ring mark individually calibrated to (IN).
Class A tolerances according to DIN EN ISO 1042. With printed lot number and batch certificate.
Thermal stress up to 121°C (autoclaving) does not permanently exceed the tolerance limit.
To preserve markings, do not clean at temperatures exceeding 60°C. On request also with DAKKS calibration certificate or single certificate.

1 Transfer pipettes Samco™, PE

Repeatable Results

Thermo Scientific

- Inert, non-toxic Polyethylene
- Manufactured without mold release agents that could interfere with test results

Confidence

- Precision-cut tips deliver a uniform drop size
- Controlled processes produce a uniform bulb with uncompromised integrity
- Certified ISO 13485:2003

Design

- Grips easily with latex gloves 13 no slipping
- Fine tip accuracy
- Packaging materials greatly reduce airborne mold spores from entering testing areas

1

Pipettes Samco™, PE, general purpose and B/B Pet™

For tissue cultures and applications, sample transfer of serum and plasma, blood culture, urine analysis.

1 LLG-Serological pipettes, PS, sterile

Serological pipettes from LLG are ideally suited for sterile serological and cell culture applications. Easy to read graduation scales facilitate volume measurement and dosing. All LLG serological pipettes are plugged, sterile, pyrogen-free and have an increased volume capacity through extra graduations.

- Also available as short-pipettes (5 ml, 10 ml and 25 ml) or wide-mouth pipette (10 ml)
- 1 ml, 5 ml, 10 ml, 25 ml and 50 ml pipettes contain a bi-directional secondary graduation scale for precise dosing
- Colour coded ringmark for easy volume identification
- Single packed in easy-to-open plastic/paper packaging

2

1 | 2 LLG-Electrical pipette Plus

Ergonomic and precise - the cordless and lightweight LLG-Electrical pipette *Plus* enables fast and exact pipetting with glass and plastic pipettes.

- UV resistant housing
- Fatigue-proof pipetting due to ergonomically shaped handle
- Suitable for left and right handers
- Exchangeable filters protect the device mechanism from contamination
- LED display with speed display: High, Low or Gravity mode (for free liquid flow without drive operation)
- 5 different coloured autoclavable nose pieces and labelling area enables customisation of the pipette
- Extremely quiet and powerful drive
- Low-Battery LED indicator

Scope of supply: Charger (5 V micro USB), Li-Ion battery, 5 coloured nose pieces, 3 membrane filters, adapter for 1 ml pipettes, benchtop rack, magnetic wall mounting

Specifications

Membrane filters:	PTFE/Ø 25 mm /0.45 µm
Capacity:	1 to 100 ml, glass and plastic pipettes
Pipette attachment:	Polypropylene, autoclavable
Dimensions:	15 x 152 x 41 mm
Weight:	approx. 200 g
Power supply:	rechargeable Li-Ion battery, 8 h continuous operation
Warranty:	1 year

Description	PK	Cat. No.
LLG-Electrical pipette <i>Plus</i>	1	9.281 041
Membrane filter, 0.45µm, PTFE, non-sterile	5	9.281 005
Replacement accu	1	6.267 647

3 | Pipette Fillers ProfiFiller™ 447

Electronic pipette filler which allows longer and fatigue-free pipetting due to comfortable hand adjustment. Shape is ideal for working with glass or plastic pipettes. A powerful, quiet motor and a switch to set both aspiration and dispensing speeds enable maximal working efficiency even with large pipetting volumes.

Socorex

- Powerful pump (fills 25 mL in 3 seconds)
- Comfortable finger triggers
- Low battery light
- NiMH battery rechargeable during use
- Interchangeable protection membrane filter

Scope of delivery: Pipette filler ProfiFiller™ 447, power supply, four plug adaptors (EU, US/JP, GB, AUS/NZ), two spare hydrophobic filters (0.45 µm and 0.2 µm), bench and wall stands and instruction manual.

Type	PK	Cat. No.
Profiller™ 447	1	4.665 542

1

1 Pipette Filler, pipetus®

The pipetus® is ergonomically sophisticated in every detail despite most modern technology, powerful and light-weight. Fits graduated, volumetric and Pasteur pipettes from 0.1 ml to 200 ml. Without reloading it can be operated up to one week. The colour display shows the selected defaults (speed) and the current battery capacity

Hirschmann

reddot design award
winner 2005

DESIGNPREIS
2006
NOMINIERT

- Automatic inductive charge in the park station guarantees constant readiness
- Controlled pipetting by a simple push of a button
- EX/Blow out switch for precise operating
- Speed key for 5 operating speeds
- No memory effect by inserted microcontroller
- Clear colour display with permanent display
- Optimal meniscus adjustment by sensitive valve technique
- Standard relief valve against penetration of liquid
- Ergonomic design for fatigue-free serial pipetting
- Power supply 100-240 V, with EU, UK, US plugs

Supplied with:

pipetus® complete with mains operated charging unit and inductive charging stand, color display with battery level indicator, 2 additional round PTFE filters, additional safety valve and wall mount.

4 Pipette controller accu-jet® pro

- Additional battery compartment cover (included) allows instrument to be inverted on the bench to avoid contamination of the pipette adapter
- Corrosion protection by direct exhaust of liquid vapours
- Safety valve/membrane filter for protection against fluid penetration
- One-hand operation
- Stepless regulation of the maximum pipetting speed
- Powerful motor for fast filling times (50ml in 10 seconds)
- Liquid discharge optionally in gravity-delivery or motorised blow-out
- Engine speed variable
- A flashing LED light will alert you approx. two hours in advance
- 8 hours of continuous pipetting with a 10 ml pipette without recharging
- For glass and plastic pipettes from 0.1 to 200 ml

BRAND

Scope of delivery: accu-jet® pro, incl. wall support, 2 membrane filters 0.2µm sterile, NiMH battery pack, 2 battery compartment covers, instruction manual and power supply unit (100 - 240 V, 50/60 Hz).

3 Macropipette controllers

The handwheel allows precise suction of the liquid into the pipette with one hand.
When the wheel stops, the piston remains in the desired position.

ISOLAB

The liquid can be blown out by pressing the piston back or allowed to flow out
by setting the lateral switch to "Ex".

For

For	PK	Cat. No.
Pipette volume up to 2ml	1	4.008 322

4 Pipette filler Pi-pump

Pipette filler Pi-pump made of acid-proof plastic, suitable for all pipettes. By turning the knurled wheel, a piston is moved and liquids can be sucked up or released from the pipette. This technique allows for safe and precise pipetting by hand. Releasing the liquids precisely, i.e. line by line, is easily possible. Sizes 2, 10 and 25 are additionally equipped with a fast release valve which allows for free release of liquids instantly.

Pipettes/Pipette controllers-Pipette balls

1 Pipette controllers macro 0.1 to 200ml

BRAND

One single macro pipette controller covers the entire range of bulb and graduated pipettes from 0.1 to 200 ml. The conical silicone adapter offers a secure fit for the different diameters. The unique valve system allows for easy compression of the newly designed bellows. The spring loaded lever enables an even more sensitive filling and delivery of liquids. The meniscus is easily adjustable. The unit is fully autoclavable at 121 °C (2 bar) according to DIN EN 285. A hydrophobic membrane filter protects the system from liquid penetration.

Supplied with: pipette controller incl. 3 µm spare membrane filter.

Pipettes/Pipette balls-Pipettes Accessories

1 LLG-Safety pipette bulb, rubber, red

Chemically resistant rubber. With valves for suction, emptying and air release, controlled by thumb and finger pressure.

Type	Figure	PK	Cat. No.
LLG-Safety pipette bulb, normal	A	1	6.270 265
LLG-Safety pipette bulb, universal	B	1	6.270 266
LLG-Safety pipette bulb, "Flip"	C	1	6.270 267

2 Safety pipette bulb Howorka-Ball®

- no rigid connection with tube
- no valves or side vent on tubes
- suitable for all standard tube diameters, including pipettes, burettes, filter tubes etc.
- no unstable air pockets
- long operational life due to durable components
- Easily cleaned and steam sterilized if contaminated with liquids

Capacity ml	PK	Cat. No.
20	1	9.273 826
50	1	9.273 827

3 Pipette stand, horizontal, PP

Pipette stand for 12 pipettes, horizontal is made from moulded polypropylene which is autoclavable. On each side, 6 pipettes (longer than 22 cm) can be stored horizontally. Easy to clean.

Dimensions mm	PK	Cat. No.
210 x 155 x 230	1	9.273 896

4 Pipette stand, vertical, PP

The pipette carousel can be rotated 360° and can hold up to 94 pipettes. The pipettes are placed vertically in the stand. The base plate has a raised edge which catches dripping liquids.

Type	PK	Cat. No.
Pipette stand, vertical	1	9.273 895

5 Pipettes stand, PP, chrome-plated steel

Frame for pipettes with two rotating perforated plates and drip pan. For drying and space-saving storage of pipettes, thermometers and test tubes. The holders are suitable for up to 40 pipettes up to a max. diameter of 18 mm.

- Rotatable
- Very sturdy pedestal
- Magnetic concept, no clamping screws necessary
- Adjustable height up to 450 mm

Type	PK	Cat. No.
Pipettes stand	1	6.079 517

6 Pipette stand, PS

Manufactured from polystyrene for easy organisation of all kinds of pipettes. Cranated design enables safe holding of large size pipettes in longitudinal direction and short size pipettes in transverse direction. Can also be used in drawers as well as on bench tops.

Width mm	Length mm	Height mm	PK	Cat. No.

4 Pipette rinser system

For easy and gentle cleaning of pipettes according to the suction lifter principle. A complete rinsing system consists of pipette washer, pipette soaking jar and pipette basket, please order separately. Heat resistant up to 105 °C, good chemical resistance.

Kartell

Pipette basket: For holding pipettes up to 600 mm or burettes acc. to Mohr. The basket is equipped with a handle and a height-adjustable ring. The bottom of elastic PE reduces the risk of damage to the pipettes.

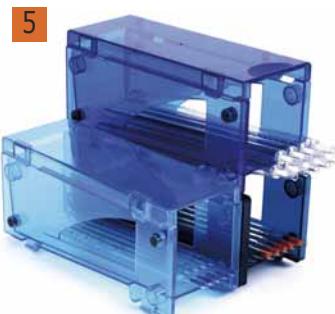

Pipette soaking jar: For pre-cleaning of the pipettes

Pipette rinser: For rinsing the pre-cleaned pipettes. The emptying siphon permits constant water exchange. The water inlet should be approx. 2 l/min.

► Further pipette cleaning devices please see chapter 11

5 Rack for serological pipettes

Ideal for your serological pipettes. Use as individual units, or click together horizontally or vertically. Magnets on both sides of units connect safely to metal surface such as file cabinets, fume hoods, refrigerators, and freezers. Angled shelves store your 0.1ml to 50ml pipettes within arm's reach for use. Protective lid encloses the unit to prevent dust build up. Colour: 3 different shades of blue. Dimensions (L x W x H): 301mm x 100mm x 127.5mm each.

Heathrow Scientific

Type	PK	Cat. No.
Cargo Manual Pipette Rack	3	9.273 930

1 Variable pipette boxes

Comprising two, sliding aluminium sections which can be gently pressed together in a telescopic fashion to fit the length of the pipettes to be sterilized. This means that only one container size for 280 to 420 mm long standard pipettes and one for 145 to 235 mm long short or pasteur pipettes are required. 2 mm thick silicone rubber pad prevents damage to pipettes when loading and transporting.

2 Pipetting aid, intraEnd

For BLAUBRAND® intraEnd micropipettes.

BRAND

Consists of the PET plastic tube, silicone adapter, and TPE suction bellows with venting hole.

Type	PK	Cat. No.
Pipetting aid, intraEnd	10	9.411 440

3 Capillary pipettes, ringcaps®

Disposable capillary pipettes with ring marks. ringcaps® are exclusively made out of DURAN® glass.

Hirschmann

The accurately designed ring mark guarantees precise determination of volume, the international color code on every single micropipette prevents the risk of confusion.

Unit = 1 box of 250 pieces.

Version 100 + 200 = 1 box of 100 pieces.

Advantages:

- No risk of cross contamination owing to single use
- DURAN® glass
- Handy length of 125mm
- Declaration of conformity acc. to DIN 12600

10.0	100	9.020 196

1 Haematocrit sealing compound

Non-drying vinyl plastic compound on a plastic plate.
For rapid and safe sealing of micro-haematocrit capillaries.
24 capillaries can be placed upright in the numbered storage places on each side of the plate.
CE marked.

BRAND

Type	PK	Cat. No.
Haematocrit sealing compound	10	9.411 240

2 Micropipette controller

BRAND

For disposable pipettes with micro ring mark and many other small glass pipettes up to 1ml.
Autoclavable (121 °C). The micropipette controller reduces risk of infection.
Contaminated disposable micropipettes can be removed using the integral ejection button.

Type	PK	Cat. No.
Micropipette controller	1	9.288 200
Spare suction system	3	9.288 201

3 Pipette controllers, micro-classic

BRAND

Comfortable and reliable. Thanks to its ergonomic design and easy handling, the micro-classic pipette controller provides the comfort needed for difficult work under the microscope. Suitable for disposable micropipettes with ring marks and other microlitre volume pipettes with a capacity up to 1ml. Suitable for left, or right-handed operation.
The adapter and suction tube are autoclavable at 121 °C.

Description	PK	Cat. No.
Micro-classic, complete, with 2 spare tubes	1	9.281 080
Spare adapter with suction tube	3	9.281 085

1 | 2 | 3 | 4 | 5 | 6 LLG single channel microliter pipettes

Available with fixed or adjustable volume.

Ergonomic shape for a very comfortable handling

The rounded shape and the unique soft grip of the LLG pipette ensures a safe and comfortable handling. A minimal effort is required for pipetting so that the risk of repetitive strain injuries (RSI) is reduced.

Maximum Precision and Accuracy

Thermal insulation of the internal components, using the innovative soft grip, improves the accuracy.

Universal Blow-out System

The two-step plunger operation allows reverse pipetting. This also facilitates last drop dispensing by soft plunger movements. High accuracy and precision are guaranteed.

Colour-coded push-button for quick operation

The colour code enables a quick choice of the right pipette depending of the volume to be pipetted (see corresponding column in the table below).

Easy Maintenance and Adjustment

The volume setting is easy and precise, using the push-button, even when wearing gloves. Maintenance and adjustment take only a few minutes with just one tool. (Included in delivery)

Contamination-free Pipetting

The pipette is fully autoclavable, ideal for applications where sterility is important.

Satisfaction Guaranteed

Each pipette is individually tested and calibrated twice, conforming to EN ISO 8655 and DIN 12600 Standards. A certificate is included.

Made in Germany, CE certified.

1 | 2 | 3 Single channel microliter pipettes LLG-proMLP

The LLG-proMLP single channel microliter pipettes combine high accuracy and reliability with ergonomic and extremely low force pipetting relieving stress from your hand and thumb. This high precision instrument has been built to maintain accuracy for many years making it the ideal choice for all scientific work requiring exact and reproducible pipetting. The LLG-proMLP pipettes are equipped with an adjustable eject button allowing right and left handed users to set the button*according to their preferences. The built in volume locking mechanism and competitive pricing complete these high quality precision pipettes. Available volume ranges from 0.2 µl to 10 ml.

1

- High quality **Made in France**
- High accuracy, reliability and reproducibility
- Extremely light weight while the robustness still remains
- Perfect ergonomics for highest comfort
- Colour-coded push-button for quick operation
- Extremely low pipetting forces
- **Built-in volume locking** for error-free results
- **Tip ejector button*, adjustable for right- and left-handed users**
- Completely autoclavable at 121°C
- Including individual calibration certificate (according to EN ISO 8655)

*not available for 5 ml and 10 ml pipettes

Scope of supply: microliter pipette, calibration tool

7 Pipette stands Flip & Grip™ for single and multi-channel microliter pipettes

Unique pipette holder that gives you the option of using on the bench top, or hanging under shelf holder to help maximize your working space available.

Heathrow Scientific

- Will hold up to 12 single channel pipette, or a combo of 3 single and 3 multichannel
- Holds most common brands. Rubber grips prevent scratching pipette
- Holder rotates for easy pipette selection and storage
- Weighted base. Fixing screw provided for under shelf option
- Dimensions (W x H): 193 x 332mm (bench top style); 193 x 187mm (under shelf style)

Microliter pipettes, Transferette® S

BRAND

The Transferette® S is available with fixed or adjustable volume. Low operating forces and a short stroke ensure relaxed pipetting, even during long pipetting series.

- One-hand operation for right- and left-handed users
- Volume-change protection
- Easy Calibration technology: Calibration without tools
- Universal tip cone
- Completely autoclavable at 121 °C
- Color code on volume adjustment wheel, shaft and volume-change protection
- DE-M marking

3 Single channel microliter pipettes, Transferette® electronic, variable

The optimal design, the arrangement of the operating keys and the adjustable finger rest allow the motorized Transferette® electronic to be tailored to the shape of your hand.

BRAND

- Motor-driven, to reduce the risk of RSI and imprecision/inaccuracy caused by operator variability
- Five operating modes: Pipetting mode, Reverse pipetting, Mixing, Dispensing, Gel-electrophoresis modes
- Easy Calibration function for rapid adjustment of the unit without tools
- Extremely fast pipetting speed
- NiMH rechargeable battery pack and battery regeneration-mode
- Optionally, the Transferette® can also be charged via the 3-fold charging stand

Items supplied: Transferette® electronic, DE-M marking, with performance certificate, battery, power supply, silicone grease.

Multichannel microliter pipettes Transferpette® -8/-12 electronic, variable

BRAND

The effortless ease of operation and its unique ergonomic shape make working with the Transferpette® -8/-12 piston-operated pipette so comfortable. The use of high-quality materials makes it exceptionally light in weight, while special FKM V-rings and the stepped shape of the ejector significantly reduces the ejection force needed. Your hand remains relaxed and loose, even during a prolonged pipetting operation.

- Individual shafts and seals can easily be replaced in the laboratory, for long instrument life
- Easy Calibration Technique: Calibration and adjustments are done in seconds without tools
- Autoclavable lower housing (121°C), freely rotatable over 360°
- Separate tip ejector: minimal tip ejection force needed
- Colored tip ejector caps indicate appropriate tips to use
- Corrosion resistant design
- CE-marked according to IVD-Directive 98/79 EC.

Items supplied: Transferpette® electronic 8 or 12 channel, DE-M marking, with performance certificate, battery, power supply, TipBox refill, 1 stand, 1 reagent reservoir, silicone grease, 1 extra set of sealing rings made of FKM and assembling aid

1 Single channel microliter pipettes Acura® manual 825/835

Available with fixed or adjustable volume. The latest Acura® manual pipette line was built with the same attention to detail that made the brand famous over several instrument generations. Introducing a smooth, modern design with easy volume reading. It also features a number of innovations enabling safe and easy, high performance pipetting.

- Effortless activation
- Smart and reliable volume adjustment
- Precision digital display visible at all times
- Justtip™ adjustable tip ejector fitting most tips
- Swift-set user calibration system
- Shock, UV-light and autoclaving resistance
- Three-year warranty

4

4 Dilution microliter pipette Acura® manual 810, fix

This air displacement micropipette allows subsequent pipetting of 1 and 0.1mL of same liquid.

Socorex

The two pre-calibrated fixed volumes eliminate any setting. A universal metal nozzle accommodates straw tips (length 190mm, diameter 4 mm), most adequate to aspirate from deep, narrow vials or Stomacher bags. Ideal alternative to conventional graduated glass pipettes when performing serial 1:10 dilutions in bacteriology.

5

5 Straw tips, PP, for Dilution pipette Acura® manual 810

Socorex

Colourless Polypropylene straw tips with a diameter of 4mm are specially designed for easy reach deep into narrow vials and Stomacher bags. Their large diametre allows pick up of particle containing liquids. Qualitix® straw tips can be used directly in microbiological tests. They are supplied sterilized, in sealed bags.

Capacity	Length	PK	Cat. No.

1 Single channel microliter pipettes Acura® electro XS 926/936, variable

Microprocessor-controlled instrument line featuring intuitive software avoiding any complicated programming steps. No particular skills are required to get quick access to six working modes and many volumes to select from. Unsurpassed metrological performance and stability.

Socorex

1

Pipetting modes:

- Forward: aspiration and pipetting of set volume
- Reverse: aspiration in excess, followed by dosing of set volume
- Stepper: tip filling and step-by-step distribution
- Dilution: aspiration of 2 or 3 different volumes for restitution in one shot
- Tactile: "start-stop-start" slow liquid measurement, titration and gel loading
- Mixing: "Up and down" liquid flow

The Acura® electro features:

- Optimal ergonomics, light weight
- Easy, intuitive, self-teaching programme
- Large display, reversible right/left reading
- Swift-interchange battery pack
- Fast charge, long working autonomy
- Adjustable tip ejector fitting most tips
- Pipetting cycle counter
- Interchangeable volumetric modules
- Two years warranty

Supplied with: Electronic pipette with 4.8V battery, operating instructions and QC certificate, Qualitix® pipette tips samples, silicone grease

Pipettes/Microlitre pipettes

GENERAL CATALOGUE EDITION 21

1 Single channel microliter pipettes Initial package Acura® electro XS 926/electro 936, variable

Initial package is recommended when purchasing an Acura® electro for the first time. Each initial package contains one electronic pipette, QC certificate and operating instructions, charging stand, power supply, additional battery pack, Qualitix® pipette tips samples. Thereafter, additional pipettes can be purchased alone and charged on existing stand.

Socorex

Initial package supplied with:
electronic pipette with 4.8V battery, additional battery pack, charging stand, power supply, operating instructions and QC certificate, Qualitix® pipette tips samples, silicone grease

2 Multichannel microlitre pipettes Acura® manual 855, variable

Socorex

- 8- and 12-channel models up to 350µl
- Light weight and perfect hand fitting
- Easy to handle
- Precision digital display visible at all times
- 360° rotation of volumetric module
- Adjustable tip ejector fitting most tips
- Integrated user calibration system
- Autoclavable at 121 °C/250 °F
- Three-year warranty

1

2

1 Multichannel microliter pipettes Acura® electro 956, variable

Microprocessor-controlled instrument line featuring intuitive software avoiding any complicated programming steps. No particular skills are required to get quick access to six working modes and many volumes to select from. Unsurpassed metrological performance and stability.

Socorex

**Pipetting modes:**

- Forward: aspiration and pipetting of set volume
- Reverse: aspiration in excess, followed by dosing of set volume
- Stepper: tip filling and step-by-step distribution
- Dilution: aspiration of 2 or 3 different volumes for restitution in one shot
- Tactile: "start-stop-start" slow liquid measurement, titration and gel loading
- Mixing: "Up and down" liquid flow

The Acura® electro features:

- Optimal ergonomics, light weight
- Easy, intuitive, self-teaching programme
- Large display, reversible right/left reading
- Swift-interchange battery pack
- Fast charge, long working autonomy
- Adjustable tip ejector fitting most tips
- Pipetting cycle counter
- Interchangeable volumetric modules
- Two years warranty

Supplied with: Electronic pipette with 4.8V battery, operating instructions and QC certificate, Qualitix® pipette tips samples, silicone grease

2 Shelf pipette holder for Single and Multi channel microliter pipettes, Type 332

Socorex

For two Acura® and Calibra® micro and/or multichannel pipettes.
Material: polycarbonate (PC). Maintenance: clean with mild detergent.
Not autoclavable.

Type	PK	Cat. No.
Shelf pipette holder 332	1	6.235 370

3 Pipette stands Twister™ universal 336 for single channel microliter pipettes

Unique design 6-position pipette work station with great characteristics.
Model fits six pipettes of most brands providing for an ideal storage solution in any laboratory.
Rotation enables quick instrument selection. Easy disassembling for simple maintenance.
Available in seven translucent colours. Discs are exchangeable.

1 Pipette stand for Single and Multichannel microliter pipettes, for Calibra® and Acura® models

Innovative design fits all Calibra® and Acura® models. Easy reach of each instrument.
Heavy base plate and anti-slip pads guarantee high stability. Polyamide construction.

Socorex

Description	PK	Cat. No.
Pipette stand 340 for 3 pipettes	1	9.411 505

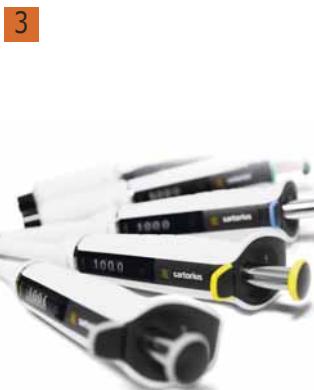

2 Pipette stands for Single channel microliter pipettes, Type 337

- Holds up to 7 single-channel pipettes of most brands
- Available in 5 attractive colours
- Space-saving table-mounted models
- Polyacrylamide (PA) material is easy to clean

3 Microliter Pipette Tacta

Sartorius Lab Instruments

Tacta is a premium mechanical pipette available in volume range from 0.1 to 10 000 µl in single channel models, and from 0.5 to 300 µl in multichannel models.

- Low pipetting cycle forces reduce the risk of WRULD (Work Related Upper Limb Disorder)
- Ergonomic design for comfortable pipetting
- Optiload feature in both single and multichannel models for easy and light tip loading with perfect tip sealing
- Optject soft tip ejection feature detaches the tip in a smooth, controlled manner
- Optilock's dual-function volume locking prevents accidental volume changes
- Easy-to-read, four-digit volume display helps to set exact volumes
- Color-coding of volumes to ease the selection of corresponding pipette tips
- Safe-Cone Filters available for models above 10 µl with convenient built-in filter ejection mechanism
- Fully autoclavable without disassembling
- Simple to clean and maintain with only three parts to disassemble
- Easy calibration adjustment with adjustment scale ensures accurate results, also in cases where factory calibration does not apply, for example when pipetting viscous liquids
- Materials have high chemical and UV-resistance to ensure a long life span for the pipette

Suitable accessories can be found in our online shop.

Single channel pipette mLine®, mechanical, variabel

The mechanical pipettes of Sartorius are known for their ergonomic, user-friendly design and reliability. mLINE® pipettes represent an ergonomic choice for quality-conscious users who perform long lasting and repetitive manual pipetting. These pipettes are used in (bio)pharmaceutical laboratories, research institutes, universities, health care and industrial laboratories for various liquid handling tasks

1 Electronic Microliter pipettes Picus®/Picus® NxT

Picus®/Picus® NxT are compact and lightweight pipettes. Fully electronic operation assures high accuracy and precision of results. Picus® NxT provides distinct advantages for highly regulated laboratories.

Fully electronic liquid handling in the volume range of 0.2 µl to 10 ml.

Sartorius Lab Instruments

- Highest level of ergonomics provided by low weight, light electronic tip ejection and comfortable handle design
- Extensive range of pipetting modes reduces the needed pipetting steps and speeds up work
- Electronic brake and piston control system provide outstanding accuracy and repeatability of pipetting results, independent of the user
- Intuitive user interface in four language options: English, French, German, Russian
- Adjustment wheel offers fast volume setting and menu navigation
- Optiload enables perfect tip sealing for accurate delivery from each channel
- Safe-Cone Filters prevent the risk of contamination cost-effectively
- Microwell plate tracker guides the user to pipette into the correct wells
- Calibration adjustment in 1, 2 or 3 points

Picus® NxT

- Certificate of accredited 3-point calibration (per ISO 17025 and ISO 8655)
- User programmable pipetting protocols enable the storage of three frequently needed pipetting workflows
- 2-level password protection for stored programs to prevent unauthorized changes (optional)
- Pipette locking, e.g. in case of contamination, increases lab safety by disabling the pipette from use.
- Service and calibration reminders help the users to remember important service dates.
- Repeated blow-out helps to dispense the last droplets of e.g. viscous liquids

2 Single channel/Multichannel microliter pipettes F1-ClipTip™

Available with fixed or adjustable volume.

The innovative ClipTip™ interlocking technology ensures a complete seal with minimal tip attachment and ejection force. Achieve newfound confidence knowing that once attached, your tips are locked firmly in place, and will not loosen or fall off regardless of application pressure. The innovative three interlocking clip design ensures the tip is held securely on the F1-ClipTip™ pipette only until it is released.

- Tip is locked and sealed in place until ejected, no dropped tips that waste valuable samples
- Complete seal to secure the sample volume in the tip, enhanced accuracy and precision
- Tips are attached and ejected with a light touch, which eliminates the frustration of banging tips on the pipette
- Ergonomic design and Soft-touch tip ejection: Offering low attachment, ejection and plunger forces for safe and comfortable use
- Remarkably lightweight: Modern design protects user from the risk of Repetitive Strain Injuries (RSI)
- Adjustable comfort: The 120° adjustable finger rest for both right- and left-handed operator comfort, allows the hand to relax during pipetting cycles
- Super blow-out: 150% increase in air boost to ensure efficient delivery of micro-volumes and prevent capillary action (Available for models up to 50µl)
- Silent, effortless volume adjustment with over 50% lower forces compared to earlier models. Improved grip on the volume adjustment knob ensures precise adjustment.
- Secure volume lock prevents undesirable volume drift during operation.
- Industry-leading lifetime warranty: With convenient online registration
- Certifications: Manufactured according to ISO 9001, ISO 14001 and ISO 13485.
- "Snap and Seal" technology uses small incorporated protrusions inside the tip that snap on the tip fitting collar. The flexible plastic lip design seals the tip against the tip fitting.

1 Pipette Tips ClipTip™

Thermo Scientific ClipTip™ pipette tips provide security with a unique and innovative interlocking technology that ensures a complete seal on every channel with minimal tip attachment and ejection force. Achieve newfound confidence knowing that once attached, your tips are locked firmly in place, and will not loosen or fall off.

- Low retention: Special technology to enable maximum sample recovery
- Versatile Tip Range: Choose from five sizes: 20, 50, 200, 300 and 1000µL
- Immediate traceability
- Compliance: The F1-ClipTip™ pipetting system is CE-marked in accordance with IVD Directive in Europe.
- Certifications: Manufactured according to ISO 9001, ISO 14001, ISO 13485 and free of RNase, DNase, DNA, ATP and endotoxin contamination

Pipette Tips ClipTip™ 20 for 96

Length 4.6cm, volume range 1-20µl, colour code pink.

Thermo Scientific

Suitable for F1-ClipTip™ Cat. No. 9.282 631, 9.282 632, 9.282 638, 9.282 639, 9.282 640, 9.282 641, 9.282 651 and 9.282 655.

1 Single Channel Microliter Pipettes Finnpipette™ Digital, variabel

The Thermo Scientific Finnpipette Digital combines robust durability and consistent performance. The lightweight design and the finger rest reduce hand fatigue to make pipetting comfortable.

Thermo Scientific

- Completely autoclavable for use in sterile lab environments
- Durable and reliable
- Precise pipetting even with low volumes
- With the improved super blow-out system
- Clearly read selected volumes while securing plunger into place to avoid volume drift
- Release tips using minimal effort with the geared tip ejector

1

1 Single channel microliter pipettes Finnpipette™ F1

The Thermo Scientific™ Finnpipette™ F1 system delivers performance with precision, all in a lightweight design that maximizes user comfort and reduces strain. It's the ideal system for applications using expensive reagents and valuable samples. The Finnpipette F1 now takes pipetting to a whole new level with significant new enhancements:

- Volume adjustment is virtually effortless and silent, also enabling one-handed volume changes for convenience.
- Textured adjustment knob provides a feel of confidence when setting volumes. Optional handle strips also enable a firmer grip.
- Lower pipetting forces now reduce Repetitive Stress Injury (RSI) even further without compromising results
- 120° adjustable finger rest - for both right- and left-handed operator comfort
- Soft touch tip ejection combined with the softer collar of Finntip Flex tips reduces ejection forces
- Super blow-out: 150% increase in air boost ensures efficient delivery of micro-volumes and prevents capillary action in 50 µL models and below
- Convenient Color-coding: Finnpipettes and Finntips are colorcoded by volume to make it easy to select the right pipette and tips
- F1 Finnpipetten are certified to meet standards - ISO 9001, ISO 14001 and ISO 13485.
- 5-year warranty with online registration

1 Single channel microliter pipettes Finnpipette™ F2

Introducing the new Thermo Scientific Finnpipette™ F2, a pipette that has all the right qualities. It has a light pipetting action, it is easy to use, and it is fully autoclavable. Furthermore, the Finnpipette™ F2 offers outstanding reliability, which we guarantee with a 5 year warranty. Add to this great accuracy and precision, and you know the Finnpipette™ F2 is a winner.

- Advanced Volume Gearing (AVG) mechanism - increased accuracy, precision and durability
- Light pipetting forces - improved ergonomics to minimise the risk of RSI
- Double-action pipetting button - prevents accidental volume alteration during pipetting
- Very large Ergovisio display - very big and clear display
- Both single channel and multichannel pipettes are fully autoclavable
- 5 year warranty

1 Single channel microliter pipettes Finnpipette™ F3

Ergonomic comfort, high accuracy and precision, reliability and easy maintenance in one of the lightest pipettes. With AVG - Advanced Volume Gearing - a self-supportive modular mechanism for light movement and smaller steps in volume adjustment.

Thermo Scientific

- Colour-coded for easy volume identification
- Large display with white digits on black background
- Built-in supporting finger rest to relax the hand and avoid RSI symptoms
- Dual-function pipetting knob with rotatable top prevents accidental volume alteration
- High-quality blow-out piston for volumes of 50 µl and below enables the safe dispensing of microdroplets
- Autoclavable (tip cone and tip ejector)

1 Electronic single channel microliter pipettes Finnpipette™ Novus, variable

Thermo Scientific

1

Thermo Scientific Finnpipette™ Novus Single Channel Electronic Pipettes offer performance with simple operation and reduced stress for comfortable, productive pipetting.

- Easy to use simple text guided user interface and operator button layout.
- Large display shows all the names of the functions without abbreviations.
- Ergonomic and lightweight design with balanced weight distribution enables longer work periods without fatigue.
- Finger rest is adjustable by 120 degrees to find the optimal pipetting position for both left hand and right hand users.
- Adjustable finger rest leaves your index finger free to control pipetting with minimum effort using the trigger action pipetting button.
- Light-touch tip ejector minimizes strain on your thumb with the very low tip ejection force and can be used with both right and left-hand.
- Finnpipette™ Novus has 10 different pipetting functions to cover most pipetting applications in the laboratory.
- 9 different speeds which can be separately adjusted for dispensing and aspirating, to optimize pipetting with different reagents.
- 9 built-in memory slots to store your own combination of the 10 different pipetting functions.
- Intuitive menu ensures easy access to pipetting functions for all laboratory pipetting applications.
- Light, long lasting battery allowing over 4000 pipetting actions.
- Fast recharge battery, fully recharged within 1 hour and the pipette is fully operational while recharging.
- Finnpipette™ Novus designed for easy in-lab calibration and service.
- The tip cone is fully autoclavable.
- Color coded buttons and color coded ring help identify the matching Finntip model.

1 Multichannel microliter pipettes Finnpipette™ F1, variable

Finnpipette™ F1 multichannel pipettes are available in 8-, 12- and 16-channel models with a wide selection of volume ranges.

Thermo Scientific

As with the single channel Finnpipette™ F1 pipettes, the AVG mechanism ensures a high level of accuracy and precision.

The soft-touch tip ejection is especially useful on multichannel models, significantly reducing the effort needed to eject multiple tips.

In addition, in the low volume models the super blow-out function ensures accurate dispensing for even the lowest volumes.

1 Electronic multichannel microliter pipettes Finnpipette™ Novus, variable

Thermo Scientific

Thermo Scientific Finnpipette™ Novus Multichannel Pipettors offer superior performance for microplate applications.

- Easy to use simple text guided user interface and operator button layout.
- Large display shows all the names of the functions without abbreviations.
- Features multi-language programming: English, French, German, Italian, Japanese, Spanish, and Swedish.
- Ergonomic and lightweight design with balanced weight distribution enables longer work periods without fatigue.
- Finger rest is adjustable by 120 degrees to find the optimal pipetting position for both left hand and right hand users.
- Adjustable finger rest leaves your index finger free to control pipetting with minimum effort using the trigger action pipetting button.
- Light-touch tip ejector minimizes strain on your thumb with the very low tip ejection force and can be used with both right and left-hand.
- Finnpipette™ Novus has 10 different pipetting functions to cover most pipetting applications in the laboratory.
- 9 different speeds which can be separately adjusted for dispensing and aspirating, to optimize pipetting with different reagents.
- 9 built-in memory slots to store your own combinations of the 10 different pipetting functions.
- Intuitive menu ensures easy access to pipetting functions for all laboratory pipetting applications.
- Light, long lasting battery allowing over 4000 pipetting actions.
- Fast recharge battery, can be fully recharged within 1 hour and the pipette is fully operational while recharging.
- Finnpipette™ Novus designed for easy in-lab calibration and service.
- The module is fully autoclavable.
- Color coded buttons to help identify the matching Finntip model.
- Wide range of multichannel models for demanding laboratory tasks.
- Lightweight handle and module has a balanced weight distribution preventing muscle stress and strain.

2 Electronic multichannel microliter pipettes E1-ClipTip™ Equalizer, variable

Perform sample transfers between virtually any tube, rack, microplate or horizontal gel box quickly and efficiently with the Thermo Scientific™ E1-ClipTip™ Equalizer Pipette.

Thermo Scientific

Adjustable tip spacing allows you to set the distance between tips by simply sliding the scale to expand or contract to the desired labware format. Feel the difference.

An ideal choice for sample transfers: Reduce repetition and save time between labware formats with adjustable tip spacing in Equalizer models.

Single channel microliter pipettes Eppendorf Research® plus (General Lab Product)

Eppendorf AG

Available with fixed or adjustable volume. The ultra light Eppendorf Research plus pipettor meets the highest requirements in precision and accuracy.

Ergonomic:

- Color-coded control buttons for volume detection
- Four-digit volume display with magnifying display
- Just a few turns to set the desired volume
- Very low operating forces (control knob, ejector)
- Spring-loaded tip cone for optimum tip fit with minimal attachment force

Flexible:

- Selection between single-channel, multi-channel and fixed volume pipettes in different sizes
- Adjustment possibilities for liquids of different density than water

Robust:

- High resistance to chemicals and mechanical stress
- Fully autoclavable

This pipette is a General Lab Product for research purposes.

Online also available as IVD version.

1

1 Single channel microliter pipettes Eppendorf Research® plus (General Lab Product), fix

- Eppendorf PerfectPiston™: ultra-light piston made of Fortron® (except 10µl pipettors)
- quick connection clip: remove lower housing easily

Single channel microliter pipettes Eppendorf Reference® 2 (General Lab Product)

The Reference® 2 is the successor to the highly successful Reference pipette, and enhances the range's already high standards with a new design, reduced weight and operating forces and multi-channel versions. As the premium product in Eppendorf's pipette portfolio, the Reference® 2 provides the most accurate results possible alongside robust, reliable handling and optimum user safety.

New features: An embedded RFID chip contains all relevant data regarding the pipette and offers with Eppendorf TrackIT a simple identification and documentation. The range of the variable single channel pipettes have been extended by the volume sizes up to 5000µl and 10.000µl.

- Color coded and volume labeled for quick identification of the volume size/ tip size
- Round upper part makes it possible to work in every position
- 4-digit display for exact volume setting (clearly visible from every angle)
- Quick and secure volume setting, include volume lock
- Fully autoclavable
- Movable parts and external edges made from stainless steel equip the pipette with outstanding robustness at potential impact sites and for internal components

This pipette is a General Lab Product for research purposes.

Online also available as IVD version.

2 Single channel microliter pipettes epReference® 2 (General Lab Product), 3-Pack

Economic package containing three variable single channel pipettes and suitable tips for each pipette.

Eppendorf AG
Option 1: 0.5-10µl, 10-100µl, 100-1000µl + 3 reusable epT.I.P.S.® boxes with 96 pipette tips each.

Option 2: 2-20µl, 20-200µl, 100-1000µl + 3 reusable epT.I.P.S.® boxes with 96 pipette tips each.

Option 3: 100-1000µl, 0.5-5ml, 1-10ml with musters of the fitting pipette tips.

3 | 4 Electronic single channel microliter pipettes Eppendorf Xplorer®, variable

The new electronic pipette Eppendorf Xplorer® sets new standards in terms of simplicity, precision and reproducibility.

Eppendorf AG

- Multifunctional rocker: "Up is up and down is down"™ principle
- Easy selection of all functions with the practical selection dial
- Operate in the language of your choice
- Clearly arranged colour display
- No sub-menus
- Help function
- Innovative rocker: When the tip is ejected, the piston automatically returns to zero position
- Tips always rest in the same position
- Volume & speed precisely and reproducibly adjustable
- Adjustable to your work environment and requirements
- Incl. 230V/50Hz charging adapter. The pipette can be charged directly with the charging adapter. Additionally the charging adapter can also be used with the optional charging stand (Cat. No. 9.283 254) which holds the pipette safely whilst charging.

2 Multichannel microliter pipettes Eppendorf Research® plus (General Lab Product), variable

Eppendorf AG

The ultra light Eppendorf Research plus pipettor meets the highest requirements in precision and accuracy - combined with ultimate ergonomics and increased flexibility. A spring loaded tip cone, a secondary calibration option, an improved volume display - and all this within a fully autoclavable pipette.

- volume adjustment: Only a few turns needed to reach your desired volume
- control button: Requires minimal operating force, colour indicates volume, ergonomically positioned for comfort
- ejector: requires minimal operating force, ergonomically positioned for comfort
- volume display: 4 digits, magnifying window
- calibration display & adjustment opening: Calibrate your pipettor to a specific liquid and volume.
- channel indicator: - use the pipette the same way round - all the time
- remove individual channels: gain flexibility for individual needs
- Eppendorf PerfectPiston™: ultra-light piston made of Fortron® (except 10µl pipettors)
- quick connection clip: Easily removable lower housing
- spring loaded tip cone: improved ergonomics, tight fit to the tip

This pipette is a General Lab Product for research purposes.

1 Multichannel microliter pipettes Eppendorf Reference® 2 (General Lab Product), variable

Eppendorf AG

The Reference® 2 is the successor to the highly successful Reference pipette, and enhances the range's already high standards with a new design, reduced weight and operating forces and multi-channel versions. As the premium product in Eppendorf's pipette portfolio, the Reference® 2 provides the most accurate results possible alongside robust, reliable handling and optimum user safety.

New features: An embedded RFID chip contains all relevant data regarding the pipette and offers with Eppendorf TrackIT simple identification and documentation. The new Reference 2 multi channel offers a channel indicator and a spring-loaded tip cone for optimum tip fit and reduced effort. The range of the variable single channel pipettes have been extended by the volume sizes up to 5000µl and 10.000µl.

- Color coded and volume labeled for quick identification of the volume size/ tip size
- Round upper part makes it possible to work in every position
- 4-digit display for exact volume setting (clearly visible from every angle)
- Quick and secure volume setting, include volume lock
- Fully autoclavable
- Movable parts and external edges made from stainless steel equip the pipette with outstanding robustness at potential impact sites and for internal components
- Channel indicator guarantees a continuously identical pipette alignment during the work process
- Spring-loaded tip cone for reproducible tip fit and reduced effort (to be switched on/off optionally)
- High flexibility and simple maintenance with the ability to remove single cones

This pipette is a General Lab Product for research purposes.

Pipette Leak Testing Unit (PLT unit)

Improved process reliability with functional validation of air-displacement pipettes.

BRAND

The most frequent cause of inaccuracy in piston-operated pipettes is leakage. This arises from damage either to the seals, pistons or tip cones. Often not detectable by the naked eye, leaks lead to significant volume errors. The BRAND pipette leak tester (PLT unit) for air displacement pipettes finds even the smallest leaks within seconds.

- Limit values for the commercially available single- and multichannel pipettes in the volume range 1µl to 10ml are pre-programmed.
- Testing with and without tips
- Test results in seconds
- Patent pending

According to monitoring of measuring instruments, air-displacement pipettes must be checked at regular intervals and the results must be compared with the ISO 8655-2 error limits. However, a calibration certificate only reflects the results at the time of testing. The time between these calibrations is crucial, since leaks can occur at any time. Well over 80% of pipettes sent in for repair have leaks and are outside their volume tolerances, even if they don't drip.

While the PLT unit cannot replace regular gravimetric testing, daily pipette checks can provide a safeguard during the periods between calibrations. Even the smallest leaks are detected. Process reliability for the pipettes is thus significantly improved.

Items supplied:

PLT unit (Pipette Leak Testing Unit) including one adapter each for testing air-displacement pipettes with tip (mounted) and without tip, 2 plugs, 3 replacement PE filters for the pipette adapters, universal AC adapter, quality certificate and operating manual.

Type	PK	Cat. No.
Pipette Leak Testing Unit	1	4.007 886

Further accessories can be found in our online shop.

E & OE.

1 Positive displacement pipettes, Transferpettlor

For easy, clean pipetting of problematic media.

Transferpettlor operates by positive displacement, which makes it ideal for pipetting:

- Highly viscous media such as oils, resins and fats up to a viscosity of 140.000mm²/sec. (dependent on instrument size)
- Media with high vapour pressure up to 500mbar (Alcohols, ethers, hydrocarbons etc.)
- Media with a high density up to 13.6g/cm³ (e.g. mercury and sulphuric acid)
- Media that tend to foam (surfactant solutions).
- Working temperature range: 15°C to 40°C

Capillary tubes and tips can be used over and over again, since residual wetting is negligible and generally has no influence on the overall result. This leads to lower material costs and reduced waste.

But: In cases, where no contamination is permitted, e.g. with infectious or radioactive media, the Brand Transferpette® is recommended, an air displacement pipettor for comfortable working with disposable tips.

Items supplied: Transferpettlor, DE-M marking, with quality certificate.

Single channel pipettes Transferpettlor Fixed-volume

With pipette caps and seals.

All pipette tips made of PP are autoclavable.

1 LLG-Labware pipette tips, economy 2.0, PP

NEW

1

The new generation of LLG Labware Pipette tips economy.

Available in bulk quantities in bags or in easy-to-open boxes with color coded racks. Racked-tip boxes are delivered in a dispenser, which can be opened from two sides facilitating the use of the product on two work spaces.

Compatible with all common pipette brands. You can find the appropriate compatibility list on www.llg-labware.com in the Downloads section.

- Improved optical clarity and pipette fit
- Colored coded rack inserts for easy identification
- Graduated (5 and 10 ml tips without graduation)
- Autoclavable
- DNase and RNase free

3 LLG-Pipette Tips ULTRALOW, bulk, non-sterile

3

All LLG-Pipette tips ULTRALOW feature an extremely low liquid retention compared to standard tips due to their hydrophobic inner side. This enables accurate, more complete and more precise dispensing of fluids, even of viscous ones. LLG-Pipette tips ULTRALOW is compatible with all major pipette brands such as LLG-proMLP, Gilson, Eppendorf, Brand, Sartorius, Socorex and others. You can find the appropriate compatibility list on www.llg-labware.com in the Downloads section.

- With easy visible volume graduations
- Universal fit tips, compatible with common pipette brands

1 LLG-Pipette tip Refill system *ULTRALOW*

The new LLG-Pipette tip Refill system *ULTRALOW* consists of racked tips and easy-to-use, environmentally friendly pipette tip refills.

All LLG-Pipette tips *ULTRALOW* feature an extremely low liquid retention compared to standard tips due to their hydrophobic inner side. This enables accurate, more complete and more precise dispensing of fluids, even of viscous ones!

LLG refills are easy to use allowing a quick filling of empty racks. Its packaging is made out of recyclable paperback which reduces the overall waste production and thus is absolutely environmentally friendly!

LLG-Pipette tip Refill system *ULTRALOW* is compatible with all major pipette brands such as LLG-proMLP, Gilson, Eppendorf, Brand, Sartorius, Socorex and others. You can find the appropriate compatibility list on www.llg-labware.com in the Downloads section.

Features:

- Ultralow retention tips with easy visible volume graduations
- Universal fit tips, compatible with common pipette brands
- Easy-to-use lift-and-load refill system
- Refill inserts are imprinted with volume and LOT No. for easy identification
- 50 % less storage space than full racks
- 70 % reduction in total materials compared to other refill systems
- environmentally friendly and recyclable packing materials made out of paperboard
- Rack footprint is compatible with automation and facilitates stacking, autoclavable

1 Pipette tips, non-sterile

Precise design and manufacture ensures highest quality tips.

- Moulded with high quality polypropylene
- Firm fit on pipettor cones
- Optimum handling due to straight shape
- Special ionization process guarantees dust free tip production
- Excellent transparency due to optimum surface quality
- Minimum fluid retention due to controlled raw material quality
- Excellent volumetric accuracy due to precisely moulded tip orifices
- Most practical tip volumes
- Non-sterile
- Autoclavable

3 Filter tips, HDPE

Pipette tips with special filters, to effectively prevent the inner pipettor shaft from contamination with aerosols and liquids to be drawn into the pipettor.

Ratiolab

- Sterile
- Free of DNA, DNase, pyrogens and ATP
- Pipette tips and aerosol filters made of ultra-hydrophobic HDPE
- Minimized retention due to special surface treatment
- Perfect and close fit on all major pipettor brands
- Packed in plastic racks with hinge lids
- *aeroject® ultra with extended length for operation with narrow vessels and reduced risk of cross-contamination

Fits pipettors: ratiopetta®, Biohit® Proline, Biohit® m-Line, Brand® Transferpette®, CappAero, Eppendorf® Research®, Eppendorf® Reference®, Finnpipette® Digital, Finnpipette® Focus, Gilson® Pipetman®, Gilson® Ultra, Labmate® and Socorex® Calibra, Labpipetten

Pipette tips and filter tips

Pipette tips and filter tips are manufactured by BRAND in a cleanroom under the most modern production conditions, and are automatically rack packed and packaged to ensure that the tips are of consistently high quality.

Quality features:

- High-purity polypropylene, free from DiHEMDA and oleamide
- Manufactured without lubricants
- Graduation for a quick volume check
- All tips and filter tips up to 1000 µl are free of DNA (<40 fg), RNase (<8.6 fg), endotoxins (<1 pg) and ATP (<1 fg)
- All sterile products in BIO-CERT® Quality: sterile acc. ISO 11 137 and AAMI guidelines, a SAL of 10^{-6} is obtained.
- Autoclavable at 121 °C (2 bar), acc. DIN EN 285
- Environmentally friendly packaging systems
- Pipette and filter tips from BRAND are tested for BRAND pipettes and most of the pipette types of Gilson®, Thermo Fisher Scientific Finnpipette®, Eppendorf® and Biohit.

The 5 ml tip is exclusively tested for BRAND pipettes and Thermo Fisher Scientific Finnpipette®. The 10 ml tip is suitable for BRAND, Eppendorf® and Gilson®.

Ultra Low Retention-tips

The surfaces of the Ultra Low Retention tips are produced through a physicochemical process.

Filter Tips

Non-self-sealing filter tips from BRAND have a PE filter that is free from chemical additives. Permeability is controlled by the combination of pore size and filter length, so that no aerosols can reach the pipette shaft.

Bulk packed in reclosable bags.

The batch number is printed on every bag.

TipBox, sterile and non sterile, BIO-CERT®

PP. Two different sizes. Stackable and repeatedly autoclavable at 121 °C (2 bar), acc. DIN EN 285.

TipStack™, non sterile and sterile, BIO-CERT®

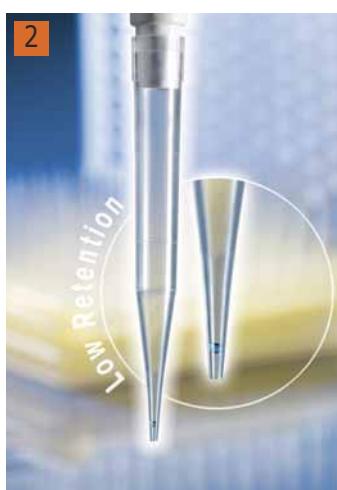

A tip tower containing 5 filled tip-trays and a TipBox constitute the new, space-saving refill system for 20 µl, 200 µl and 1000 µl tips.

TipRack, sterile and non sterile, BIO-CERT®

Refill unit for TipBox. Compared to the filled TipBoxes, the amount of waste with the new refill units is reduced by over 20%.

TipBox 5/10 ml, non sterile

The 5 ml and 10 ml tips are only available as a racked tip version in these specially corresponding TipBox.

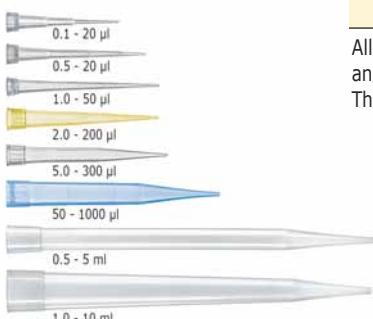

2

2

Pipette tips, bulk, in reclosable bags, non-sterile

All tips and filter tips are produced under supervised state-of-the-art Cleanroom conditions and automatically shrink-wrapped in reclosable bags and packaged in cardboard boxes.
The batch number is printed on every bag.

1 Pipete tips Optifit

Sartorius Lab Instruments

Optifit tips are designed for best possible fitting and sealing to secure the highest possible accuracy and precision. These pipette tips enable ergonomic and light tip attachment by being compatible with the Optiloading feature in Sartorius Picus® NxT, Picus®, eLINE®, mLINE® and Proline® Plus pipettes. While Optifit Tip trays are colour coded for easy matching with a corresponding, colour coded Sartorius pipette, they do also match with most other pipettes due to their universal design. Optifit tips are manufactured in an ISO 8 certified cleanroom environment and are available in various packaging types.

1 Optifit Tips in FlexiBulk Pack

The tips in FlexiBulk packs are of the same high quality as the other Sartorius Optifit Tips available in tip racks and refill packages. Optifit Tips provide the following advantages:

- Perfect fit and seal with Sartorius pipettes to ensure the highest possible accuracy and precision
- Ergonomic and light tip attachment and ejection enabled by the Optiload feature in Sartorius Picus® NxT, Picus®, eLINE®, mLINE® and ProLine® Plus pipettes
- Compatibility with most other pipette brands
- Materials, including the FlexiBulk PET pack, 100% suitable to be used as energy waste
- Compliance with ISO 9001, ISO 14001 and ISO 13485 quality standards

2 Pipette tips Finntip Flex

The Thermo Scientific Finntip Flex system offers flexible, soft and sophisticated high-end tips for discerning users. Finntip Flex system consisting new-generation tips and easy-to-use operation rack and space-saving refill kit. All elements in the system have been designed to fulfill the most demanding requirements for ergonomics and flexibility in pipetting tasks for todays fast-paced laboratories.

- Low attachment and ejection forces
- High precision molding with virgin polypropylene
- Smooth surface for low liquid retention
- Non-slip rack with hinged cover
- Easy to use and economical refill system

4 Pipette tips Finntip Wide

With its wide orifice tip, the Finntip Wide was designed especially for pipetting fragile cell suspensions and macromolecules like genomic DNA. This tip eliminates the mechanical shearing that causes cell fragmentation.

1 MBP Filter Tips, ART™

Manufactured using a special process, tips are furnished with a unique ART™ filter to eliminate any risk of cross-contamination between samples, which is particularly important in molecular biology. They are suitable for applications involving the use of DNA or RNA, as well as radioactive and infectious samples.

Thermo Scientific

- Certified free of RNase, DNase, DNA and pyrogens
- Sterile tips: Sterilised by gamma radiation
- Low Retention tips: Extremely hydrophobic surface for lower retention, superior precision and reproducibility of measurements

3 epT.I.P.S. Reloads (General Lab Product)

Eppendorf AG

- Practical refilling system for epT.I.P.S box
- Trays supplied either double-sided or as stack packs, depending on tip size
- Contamination-free transfer to the trays into the work box
- Autoclavable trays are available
- Colour-coded trays for simple identification of the tips.

This pipette tips are General Lab Products for research purposes.

2

3 | 4 epT.I.P.S. Dualfilter tips

- Pipette tips boxed in racks with integral, twin-layer ep Dualfilter made from hydrophobic polyethylene without additives. One layer protects the user against aerosols, the other against airborne microbes

Eppendorf AG

- All tips are **sterile, pyrogen-free** and **PCR clean** (free from human DNA, DNase, RNase, PCR Inhibitors)
- Batch specific certificate available on request
- The filter doesn't retain liquid when accidentally wetted during aspiration, the whole sample can be recovered easily

1

1 | 2 Pipette tips epT.I.P.S. LoRetention

Eppendorf AG

Ideally suited for all applications with samples that contain detergents:

- PCR and real-time PCR preparation of enzyme solutions and master mixes
- Isolation, purification and denaturation of proteins
- Restriction digestions and ligations
- Pipetting DNA ladders during gel electrophoresis

Features:

- Ultrahomogeneous surface for maximum reproducibility
- Ultrahydrophobic surface for minimum loss of sample
- Air bubbles and foaming are significantly reduced during pipetting
- Autoclavable, high chemical resistance - 5 year shelf life

2

Simple differentiation of racks and reloads through a new, clear lid with a white seal. When open, the text **LoRetention** can be seen from the inside. The reusable seal makes it also possible to label existing ep T.I.P.S. boxes.

Robotic Tips blackKnights

Due to an increased level of automation within pipetting processes there is a growing demand for high-quality consumables. With blackKnights robotic tips even smallest volumes can be pipetted precisely and without contamination. Conductive robotic tips are used to recognize the liquid level automatically, therefore the tips dip into the liquid only as far as necessary for a secure pipetting and dispensing.

- Material: virgin polypropylene
- Packed in racks, blister packs or in a PE-bag
- Volumes: 10, 50, 200, 300, 1000, 1100, 1200 and 1300 µl
- High compatibility

Depending on the type of robotic tips, they are compatible with the following robotic systems:

Type Tecan®: Tecan: Genesis, Freedom EVO, MiniPrep, Cavro/Qiagen/Corbett: CAS1200/4200/4800, QIAgility/PerkinElmer: Multiprobe II, Janus (with Multiprobe-head), only tips without filter/Abbott Diagnostic: m2000#

4 Reagent Reservoirs

Disposable Reagent Reservoirs with a V-shaped bottom to ensure that all the reagent is accessible and can be easily aspirated. Thick wall construction and wide base adds stability and durability making the reservoir easy to handle without product deformation.

Heathrow Scientific

- Graduation markings allow for measurement of the liquid
- With pour-off spouts on all corners
- Stackable, with nesting system for easy separation
- Sterile versions are sealed in bags, electron beam sterilised and Dnase, Rhase and pyrogen-free
- Quality certificate available on request

1 Reagent Reservoir Coolers

Ice-free, non-toxic way to extend working period for temperature sensitive reagents.
Suitable for Heathrow Scientific 50, 55 or 100 ml reservoirs.

Heathrow Scientific

- Reagents are kept at less than 5 °C for approximately 3 hours
- Ice-free solution eliminates the risk of contamination from ice baths
- Non-toxic blend of water and bacteriostatic agent chills and freezes quickly
- Leak-free due to sonic welded polypropylene
- Not intended for autoclave, do not use with liquid nitrogen
- Stackable
- 2 year warranty

1 Manual Serial Dispenser LLG-uniDISPENS pro

The **ergonomically designed** manual dispenser LLG-uniDISPENS pro enables single-handed volume selection, loading and dispensing. Due to its lightweight design, it is ideally suited for serial dosing. You can flexibly select your desired dosing volume from **120 dosing programs** for 12 tip sizes and with 10 stroke adjustments. You can view all settings and volumes at a single glance through the viewing window of the manual dispenser. The dispenser is **compatible with Ritips® from Ritter, PD-Tips® from Brand, Combitips® and Combitips advanced® from Eppendorf™**. Thanks to a purely mechanical, maintenance-free construction, the manual dispenser is a practical and convenient device for daily laboratory use. **Dosing volume 1 µl to 5500 µl.**

Scope of supply: Dispenser, adapter for 25 ml tips, 3 years warranty

2 Manual step dispenser, ripette®

Ritter ripette® is a very comfortable device for hand dispensing of long series. A special technical mechanism guarantees the precision of all selected dosage volumes: 1 to 5000µl.

Ritter

Product advantages:
 - Chart with dosage setting volumes incorporated into each dispenser.
 - Lightweight (approx. 100g)
 - Easy-to-use adjustment dial for the selection of dosage volume and the number of steps
 - No mechanical parts that wear out, no maintenance

Dispenser tips ritips® 25ml and 50ml cannot be used without adapter (Adapter included in delivery).

MEDICAL

1 Dispenser Tips Ritips® Evolution

Universal dispenser tips for a variety of steppers. The nine tip sizes are equipped with colour-coded adapters for faster identification.

- Easy, high-precision work even in the low μl range
- Suitable for viscous, infectious and volatile liquids due to direct displacement method
- Tips individually and mechanically tested for safe and repeatable application
- Available in standard and bioclean® quality (individually wrapped and sterile)
- bioclean® label is certified by accredited laboratories and means sterilized, pyrogen-, ATP-, RNase- and DNA-free
- A batch certificate is available on request
- Lot number on each box

Suitable for Ripette®, Ripette® pro, Ripette® genX (Ritter), eLineTM Dispenser (Sartorius), Multipette® 4780, Multipette® plus (Eppendorf), Minilab 100, Minilab 101, Minilab 201, Distriman®(Gilson), StepMate, EasyStep, EasyStep electronic, RepeatOne®(Starlab), Handrop, HandyStep®, HandyStep® S, HandyStep® electronic (Brand).

Please note: Dispenser tips 25 ml and 50 ml cannot be used without adapter.
If necessary, please order Cat. No. 6.310 203 or 6.310 548 separately.

1 Manual repetitive pipette HandyStep® S

HandyStep® S - the repetitive pipette for any occasion!

BRAND

Ideal for routine or research applications in diagnostics, molecular biology, environmental analysis, and many more. HandyStep® S and PD-tips work on the direct displacement principle. This offers the highest-precision dispensing of liquid media with high viscosity, high density, or high vapor pressure. Direct displacement permits contamination-free operation, since no aerosols are formed.

More data and facts:

- increased chemical resistance through innovative plastic materials
- easy tip mounting - PD-tip is now simply inserted from below
- dispensed volume range from 2 µl to 5ml
- up to 49 dispensing steps
- weighs only 108g
- suitable for use with BRAND PD-tips, Encode™ tips, Repet tips, Combitips®, Combitips® plus and other compatible dispenser tips
- CE- IVD -compliant

Items supplied

HandyStep® S, DE-M marking, with serial number, performance certificate, operating manual, shelf/rack mount, 3 PD-Tips: 0.1ml, 1ml and 10ml.

9.284 015

Repetitive pipette HandyStep® touch/HandyStep® touch S

Repetitive pipette with colour touch display and automatic tip size recognition.

BRAND

The automatic tip size recognition of the PD-Tips II, with patented coding on the piston, automatically displays the tip size after inserting the tip. By inserting a new PD-tip of the same size, all instrument settings are maintained.

HandyStep® touch with the standard modes Multi-Dispensing, Auto-Dispensing, Pipetting and Favorites
HandyStep® touch S with the additional functions Sequential Dispensing, Multi-Aspiration and Titration

- Touchscreen operation with intuitive menu navigation and integrated help function
- Important functions and parameters visible at a glance
- Automatic tip ejection by the press of a button
- Ergonomically arranged STEP button
- Variable volume adjustment from 1.0 µl to 50 ml
- USB-C connection for quick charging by cable
- Inductive charging with optional charging stand
- Compatible third party tips can also be used

Scope of supply: Repetitive pipette, includes universal AC adapter (for Europe, UK, USA, Japan, Australia and New Zealand), shelf/rack mount, sample PD-Tips II, operating manual, performance certificate

1 Dispenser tips, PD-Tips II

Thanks to patented size coding, HandyStep® touch, HandyStep® touch S, HandyStep® electronic, Gilson® Repetman® and Rainin AutoRep™ E automatically detect the tip volume. The tips are also compatible with all other instruments of the HandyStep® family and with repetitive pipettes from other manufacturers.

- Cylinder: PP/piston: HDPE, 0.1 ml piston: LCP
- Volumes from 0.1 ml to 50 ml
- Available in BIO-CERT® quality (free of DNA, RNase, endotoxins and ATP)
- Comply with the requirements of ISO 8655
- Supplied with batch certificate
- Adapter for sizes 25 ml and 50 ml included
- PD-Tips II cannot be autoclaved; the adapters are autoclavable

1

1 Dispensers Multipette® M4

On the Multipette®/Combitip system, volumes are dispensed using the positive displacement principle. The liquid is directly dispensed without an air cushion, ensuring the correct volume is always dispensed regardless of the density and viscosity of the liquid.

Eppendorf AG

In addition to serial dispensing, the Multipette is also the perfect instrument that is able to go beyond the limitations of a standard pipette.

- Light and ergonomic
- Stress-free work via integrated step counter: dispensing procedures can be continued error-free after an interruption or distraction
- Central Combitip ejector: fully emptied Combitip can be easily ejected with one hand using the operating lever
- Step counter: Displays the number of executed dispensing steps
- Only suitable with Eppendorf Combitips advanced
- Combitip sensor: Automatic Combitip recognition and volume display

Applications

- Repetitive Dispensing of volumes in long series such as plate filling or when aliquoting
- Contamination-free dispensing of toxic, radioactive and/or other hazardous liquids
- Precise and accurate dispensing of viscous solutions (e.g. glycerol) or liquids with high vapor pressure (e.g. ethanol)

2

2 Dispensers Multipette® E3 and Multipette® E3x

The new generation of Multipette®, E3 and E3x, exhibit an enlarged color-display and have an intuitive and user-friendly software. No multiple assignment of keys. The Multipette® E3x has a new aspirate and dispensing feature which allows uptake and volume calculation of an unknown volume with immediate dispense in desired partial volumes. In addition to this, up to 225 different parameter settings can be stored saving programming time for routine applications. A new sleep mode saves energy when the Multipette® E3x is not used.

Eppendorf AG

Applications

- Dispensing volumes in long series
- Electronic dispensing with memory functions
- Contamination-free dispensing using positive displacement principle
- Ideal for viscous solutions (e.g. glycerol, oil) or liquids with high vapour pressure (e.g. acetone, ethanol)

Product features, Multipette® E3 and E3x

- Dispensing and pipetting according to positive displacement principle
- Automatic dispensing
- Eight different speed levels for different applications
- One-button tip ejector
- Li-Ion battery
- Selection wheel
- Automatic Combitip® plus tip recognition
- Volume range from 1µl to 50ml
- Charging possible whilst in use
- incl. charging adapter (100-240V), Multipette® E3/E3x Bundle, additionally with charge stand

Additional Multipette® E3x features:

- Aspirate (pipetting of supernatants)
- Titrate
- Sequential dispensing
- Combined aspiration and dispensing mode

E3 Basic and E3x Basic: only available in exchange for a defective electronic hand dispenser.

1 Bottletop dispenser LLG-uniTOPDISPENS 2

The combination of a springless PTFE valve and **PTFE piston** with chemically resistant ETP O-ring enables dispensing of both organic reagents as well as bases, thus, eliminating the need to buy different dispensers for different applications. The improved design of the uniTOPDISPENS 2 bottle top dispenser including a **re-circulation valve** allows a smooth, precise and reliable bubble free dispensing without any loss of reagent. The specially designed bottle adaptor which permits a 360° rotation of the unit, the easy volume setting as well as the flexible delivery nozzle underline the user friendliness of this bottletop dispenser. Available in six volume ranges.

- Springless PTFE valve, PTFE piston with chemically resistant ETP O-ring enables **high chemical compatibility**
- Glass cylinder from borosilicate glass 3.3
- Re-circulation valve enables easy priming and bubble free dispensing
- Smooth, reproducible and effortless dispensing
- 360° rotation possible due to specially designed bottle adapter
- Flexible and adjustable delivery nozzle provides **dispensing angle flexibility** to the user
- Specially designed volume adjustment knob for quick and easy volume setting
- **The telescopic extractable intake tube can be easily adjusted to varying bottle heights**
- Nozzle cap reduces contact with air and prevents drying and dripping if the tip cover is attached
- Five bottle adaptors included (28 mm, 32 mm, 37 mm, 40 mm and 45 mm). Standard thread: 30 mm.
- Fully autoclavable at 121 °C, 15 psi for 10 to 15 min
- Individually calibrated in accordance with ISO 8655 standards and each unit is supplied with an individual calibration certificate
- You can find the appropriate compatibility list on www.llg-labware.com in the Downloads section.
- 3 years warranty

2 Bottletop dispenser LLG-uniTOPDISPENS with glass piston and clear glass cylinder

The LLG-uniTOPDISPENS is a **reasonably priced** bottle-top dispenser with **glass piston**. Available in 2 sizes (2-10 and 10-50 ml). Precise, reliable and robust. The high quality of the material used and the precision of the grinding ensures the perfect seal of the complete dispensing system. 3 years warranty.

- Precise and reliable volume setting
- Visible dosing procedure
- Valve block made of PP gives optimised protection of the glass made dosing cylinder
- Precise grinding of the glass piston into the glass cylinder forms a perfect seal
- Ergonomic finger guard
- Delivered with 2 PP-adapters GL 40 and 45
- With glass piston and clear glass cylinder
- You can find the appropriate compatibility list on www.llg-labware.com in the Downloads section.

Scope of supply: dispenser, 1 bottle adapter each 28 mm, 32 mm, 37 mm, 40 mm, 45 mm

Dispensing/Bottletop dispensers

1 Dispensers, VITLAB® SIMPLEX²

VITLAB

With variable volume and calibration mechanism.

- quick, easy and precise volume adjustment due to interior scalloped track and practical screw mechanism
- no drips after tube has been capped
- easy calibration adjustment
- high-quality materials (PTFE, PFA, FEP, borosilicate glass, platinum-iridium) ensure high chemical resistance against most acids, solvents and bases
- a positive displacement plunger with a PFA seal minimizes the crystallization of liquids and thus the clogging of the plunger
- easy to dismantle for cleaning, no tools necessary
- completely autoclavable at 121°C
- device can be rotated 360° on bottle
- DE-M marked
- with GL 45 thread
- with screwable discharge valve

Scope of supply: 3 respectively 5 threaded adapters*made of PP, 1 telescopic filling tube, 1 mounting tool, operation manual, quality certificate

Nominal volume 25 - 100 ml: with adapters GL 32, GL 38, S 40 and telescopic intake tube (length 170 - 330 mm).

**Accuracy and Coefficient of variation according to DIN EN ISO 8655-5.

2 Bottle top dispenser VITLAB® genius²

VITLAB

With recirculation valve and calibration mechanism.

- Quick, easy and precise volume adjustment due to interior scalloped track and practical screw mechanism
- Innovative recirculation valve avoids reagent waste
- No drips after tube has been capped
- Easy calibration adjustment
- High-quality materials (PTFE, PFA, FEP, borosilicate glass, platinum-iridium) ensure good chemical resistance to most acids, solvents and bases
- A positive displacement plunger with PFA seal minimizes the crystallization of liquids and therefore the possibility of the plunger jamming
- Easy to dismantle for cleaning, no tools necessary
- Completely autoclavable at 121 °C
- Can be rotated 360° on bottle
- Certificate of conformity according to DIN 12600 DE-M marked
- Margin of error according to DIN EN ISO 8655-5
- With recirculation valve and calibration mechanism
- With GL 45 thread
- With screwable discharge valve

Items supplied: 3 respectively 5 threaded adapters*made of PP (see chart), 1 telescopic filling tube, 1 mounting tool, operation manual, quality certificate stating all test values

1 Dispensers, bottle-top, POLYFIX®

For dispensing of all chemicals, where polypropylene is resistant. With glass dispensing barrel. Valve block not detachable for safety reasons.

Poulten & Graf

- conformity-certified
- ergonomically designed plunger handle for comfortable operation
- user-friendly, volume setting with easy movement and rotatable fine adjustment
- PP valve block (GL32) with FIX adapter which aligns the dispenser on the bottle.

Supplied with 2 x PP bottle adapters (GL40 and GL45).

***For dispensing light sensitive liquids

2 Dispensers, bottle-top, FORTUNA® OPTIFIX® BASIC

Poulten & Graf

For problem-free dispensing of aqueous media and acids as well as solutions subject to crystallization. With solid, PTFE-sleeved dispensing piston, highly polished, 100 % corrosion-free, plastic-coated, precision glass cylinder (visible dispensing process). Black-graduated, dispensing cylinder. PTFE valve block (no metal springs to contaminate the dispensed liquid). With colour-coded handle inscriptions. Sizes 2 to 100 ml autoclavable (Please read the autoclaving instructions carefully before proceeding). Sizes 200 to 500 ml in autoclavable version only available on request.

Items supplied: Dispenser without reservoir bottle, PTFE suction and discharge tube and two PP bottle adapters (GL40 and GL45). Conformity-certified, with precision certificate.

2

2 Dispensers, bottle-top, FORTUNA® OPTIFIX® SAFETY

Poulsen & Graf

For strong acids (excl. HF) and aggressive chemicals. Visible dispensing process, dispensing piston made of PTFE-sleeved, solid glass, with additional sealing lip at the end of the piston to prevent acid fumes and odours from escaping. No metal springs in the valve block (no contamination of the dispensed liquid). With colour-coded handle inscriptions.

Items supplied: Dispenser without reservoir bottle, 1 discharge tube, incl. 2 PTFE-adapters (GL 40+45), 1 PTFE suction tube.

1 Bottle-top dispensers Calibrex™ *organo* 525/Calibrex™ *solutae* 530

1

Calibrex *organo* 525 models include a ground glass plunger, best suited for organics, non-crystallizing acid and base solutions. Calibrex *solutae* 530 dispensers have a PFA coated plunger preventing plunger and barrel from seizing together. This enables trouble free distribution of salt solutions, weak and strong acids, as well as bases.

Socorex

- 45 mm base thread
- Integrated calibration system
- Autoclavable at 121°C fully assembled

Scope of delivery: Delivery jet and stopper, feed tube, 3 alternative adapters (25, 28, 32 mm for 1 and 2.5 ml versions; 28, 32, 40 mm for 5 and 10 ml version; 32, 38, 40 mm from 25 ml onwards), QC certificate and operating instructions

1 Dispensers, bottle-top, ceramus® classic

With ceramic pistons. High precision, bottle-top dispensers adjustable in fixed steps for the reproducible dispensing of liquids. Declaration of conformity acc. to DIN 12600.

Hirschmann

With patented, high-purity, alumino-ceramic pistons and highly polished, DURAN® glass cylinders, guaranteeing continual durability and precision.

- no surface abrasion
- no sticking due to plastic swelling
- no thermal expansion problems

Ratchet adjustment mechanism prevents accidental adjustment of the set volume. When not in use the pistons can be locked and the delivery tubes capped to prevent loss of reagent. The glass cylinders are encased in plastic for added safety and have a window for viewing the contents. Autoclavable up to max. 121°C/2 bar.

- inlet and outlet valves are easily replaced
- fully supported delivery jet prevents 'side fling' of reagent
- screw-fixed, inlet suction tube
- High-grade materials (ECTFE, DURAN® glass, FEP) are used throughout.
- Discharge valves and valve seats consisting of high-purity aluminium oxide ceramic

Supplied with: complete with thread A 32 mm, 3 thread adapters (A 28, A 45, S 40), 1 screw-coupled suction tube, 1 discharge tube unit, one spanner for valve, with individual serial number and Single Calibration Report.

2

2 Dispensers, bottle-top, ceramus®

New dispenser technology from Hirschmann laboratory apparatus, with ceramic pistons. ceramus® are a high-precision, bottle-top dispenser range for almost all liquids.

Hirschmann

- Environmentally-friendly, reagent-saving, recirculation valves
- Tough, ceramic pistons
- Simple, self-locking volume selection
- When not in use, pistons can be locked and delivery tubes capped to prevent loss of reagent.
- Fixed interval graduations give excellent reproducibility
- 45mm screw neck and adapters supplied allow use with a variety of reservoir bottles
- Smooth-action piston minimises operator fatigue during serial dispensing
- High-grade construction materials provide long operational life
- autoclavable at 121°C

Supplied with: ceramus® complete with thread adapters A 45mm, 3 thread adapters (A 32, S 40 Merck bottles and A 38), 1 screw-coupled suction tube, 1 discharge tube unit complete, 1 spanner for valve, with individual serial number and single calibration report.

1 Bottle-top dispensers Dispensette® S

The Dispensette® S bottle-top dispenser makes liquid dosing easy and secure.

- Discharge tube, with and without recirculation valve
- Valve system - tight sealing without additional sealing rings
- Fast venting through improved aerodynamics
- Minimal force needed to operate - especially with high-volume devices
- Secure volume fixing with analog slide
- 1 ml dispenser - available as digital and analog version
- Autoclavable (121 °C)
- Easy to calibrate and adjust in order to comply with ISO 9001 and GLP guidelines
- Easy to disassemble for cleaning
- Removable filling and exhaust valve with safety bulb (closes when discharge tube is not mounted)
- To allow the bottle label to face the user, the valve block can be rotated by 360 °
- Telescope filling tube easily adjusts to different bottle sizes
- DE-M marking
- Analog volume display
- Quickly adjustable dosing volume

Included items:

Bottletop dispensers Dispensette® S, DE-M marked and supplied with performance certificate, telescope filling tube, recirculation valve (optional), mounting tool and adapters made of PP.

2 Bottle-top dispenser Dispensette® Analog S

Red color code. Wide range of applications, ideal for dispensing aggressive reagents, e.g. concentrated bases and acids such as H₃PO₄, H₂SO₄ (except as HCl, HNO₃ and HF), saline solutions and a variety of organic solvents.

2 Bottle-top dispensers, seripettor®/seripettor® pro

The economy dispensers for routine dispensing.

BRAND

The seripettor® and seripettor® pro are innovative bottle-top dispensers with a special design. A lifting spring provides automatic filling. When the piston seal is worn out, the entire dispensing unit can be exchanged by the user rapidly and easily, without tools. Eliminating expensive repairs!

- low-cost replaceable dispensing cartridge with wiping seal. One spare dispensing cartridge included.
- semi-automatic dispensing. The spring loaded piston refills the cylinder after dispensing.
- volume setting. Toothed setting track allows quick and precise adjustment of desired volume.
- disassembles without tools. All parts can be replaced quickly. The innovative design of seripettor®/seripettor® pro makes cleaning and maintenance easy
- fits most bottles

seripettor®

For dispensing alkaline, buffer and vitamin solutions, as well as culture media, e.g. agar nutrient medium, up to 60 °C.

seripettor® pro

Broader scope of application compared to the seripettor®, for dispensing many acidic, alkaline and saline solutions, and solvents.

Scope of supply: Discharge tube, filling tube, spare dispensing cartridge and adapters, PP (GL 45/32, GL 45/S40 and GL 45/38).

Type	Volume ml	Grad. ml	Accuracy (\pm R%)	Precision (\leq CV%)	PK	Cat. No.

End test values relate to the nominal values (= max. volume) printed on the dispenser when the temperature (20 °C) of the device, environment and distilled water is uniform, and when operated smoothly.

Suitable accessories can be found in our online shop.

1

1 Bottle-top dispenser opus®

opus® dispenser for motor-powered dispensing directly from the reagent bottle. In conjunction with the "dispenser" touch screen containing the complete electronic control, it represents an extremely sensitive precision dispensing instrument that guarantees excellent degrees of accuracy (e.g. during serial dispensing). With USB interface for linking to a PC.

Outstanding features:

- Simple menu-guided user instructions with tab cards on an external coloured TFT touch screen. Screen legibility is also guaranteed in even strong daylight
- Versatile application options, thanks to superior quality materials (ECTFE, DURAN glass, FEP); media-conveying components are suitable for steam sterilisation (121°C)
- Configuration of up to 9999 dispensing repetitions possible, intervals of up to 9999 seconds can be selected between individual dispensing operations
- Stepper function: Dispensing of several volume dosages (differing volumes possible) from a single cylinder charge (10ml, 20ml or 50ml)
- Individual problem-free calibration options
- Individual adaptation options, e.g. language selection (DE, UK, FR, ES), specification of charging and dispensing velocity in ml/sec (option for coordination with medium viscosity)
- Method memory, capacity for up to 9 different settings (e.g. volume, velocity, cycle duration, etc.).
- Accessories: pedal switch for triggering dispensing, USB interface connection cable 750, 2000 or 5000mm long touch screen connection cable, special lengths available, silicone system platform with bottle holder, batteries available for selective battery operation
- Discharge valves and valve seats consisting of high-purity aluminium oxide ceramic
- Saving of last setting ensures speedy further processing when the instrument is reactivated
- Declaration of conformity acc. to DIN 12600
- Quality assurance in compliance with DIN EN ISO 8655
- Power supply 100-240V, with EU, UK, US plug

Supplied with: opus® dispenser, complete with thread A 45 mm, 3 adapters (A 32, A 38 and S 40 Merck bottles), 1 screw coupled suction tube, 1 dispensing discharge unit and 1 power supply, 1 brown light protection window, touch screen module "dispenser", Data Power Cable 0.75 m, instruction manual, single calibration report.

Further accessories can be found in our online shop.

2

2 Dispenser/bottle-top flasks, amber soda-lime glass

Available ethylene-acrylate-coated or uncoated. The coating envelops the glass bottle like a protection skin. Should the bottle break, the splintering hazards are reduced considerably. To preserve the coating, do not clean at temperatures exceeding 60 °C.

- PP screw cap
- LDPE pouring ring
- Space-saving square design
- The maximum operating temperature for coated bottles is 80 °C

1

1 Burette with straight standard ground stopcock, DURAN®, class AS

The original DURAN® burettes are manufactured from chemically highly resistant borosilicate glass 3.3. Thanks to the precise scale, they are ideal for titration. Calibration is based on the released volume ("Ex") at a + 20°C reference temperature. This means the fluid quantity released can be taken exactly from the scale, as the liquid adhesion to the glass is taken into account in the calibration. Volume content tolerances conform to DIN and ISO accuracy limits. From now on the approved DURAN® burettes are also available with PTFE keys. Unlike the glass keys, the PTFE keys need not be greased, which makes work in the laboratory easier.

DWK Life Sciences

- Available in three sizes, the right burette for each application
- Proven DURAN® properties
- With Schellbach stripe and main graduations as circular divisions
- Conforms to ISO 385
- Autoclavable
- Corresponds to USP/EP and JP guidelines

1 Burettes, with lateral stopcock, borosilicate glass 3.3, Class AS

All BLAUBRAND® burettes are supplied with batch number and an accompanying batch certificate in the original packaging. On request, they are also available with an individual certificate, USP individual certificate or DAkkS calibration certificate.

BRAND

Batch and individual certificates can also be downloaded at the supplier's website.

- BLAUBRAND®
- DIN EN ISO 385
- DE-M marking
- Graduations and inscriptions in high contrast blue enamel
- With Schellbach stripe
- Calibrated to deliver (EX)

1

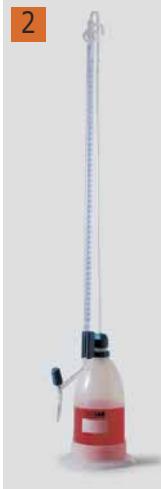

1 Automatic burettes with splinter protection, Schilling pattern, borosilicate glass 3.3

Burette according to Dr. Schilling with splinter protection, with Schellbach stripes, automatic zero point extraction and Bürkle dosing device. The glass burette is covered with a plastic sheet which increases the tensile strength and serves as splinter protection. The probability that the burette breaks is reduced compared to conventional burettes and even in case the burette breaks, no dangerous splinters will be produced. The dosing device allows precise dosage via the pushbutton or via the micro-screw as well as precise dispensing via a fine spout tip.

Bürkle

- With splinter protection
- Adjusted to Ex
- Shatterproof, resistant to chemicals
- Exact spout tip, fine droplet formation
- Parts in contact with the medium: PE, natural rubber, PP, Borosilicate glass

3

2 | 3 Automatic burettes, schilling pattern, borosilicate glass 3.3/LDPE

- Described as automatic burettes with fast titration and practical usage.
- Especially suitable for field analysis where there is a risk of breaking.
- The entire system consists of a burette tubing with automatic zeroing system together with a valve stopcock, a reservoir bottle and a bottle stand.
- Rapid filling by squeezing the bottle and fast titration by valve stopcock
- Inscriptions and graduations are printed either with blue enamel or with white enamel which is specially designed for glass use.
- Clear burettes are manufactured with schellbach stripe.
- Amber burettes are manufactured without schellbach stripe.
- 10ml burette has a polyethylene reservoir bottle of 500ml volume whereas 25 and 50ml burettes are used with bottles of 1000ml volume.

1 Automatic burettes, glass, Schilling pattern, borosilicate glass 3.3/HDPE, class B

SILBERBRAND. Tolerances to class B, DIN EN ISO 385. Borosilicate glass 3.3 burette. PVC filling tube and silicone outlet tubing. HDPE reservoir bottle with HDPE base. Brass/PP micrometer screw. Graduations and inscriptions are in highly contrasting black enamel. With Schellbach stripes. Squeezing of bottle allows rapid filling. Fine titration is easy using the micrometer screw. Coarse titration is achieved by removal of the micrometer screw and using the push button. Calibrated to deliver (EX).

2 Automatic burettes, Schilling pattern, borosilicate glass 3.3, class B

Conformity with DIN ISO 384. Class B. With easily readable, black scaling. Calibrated to deliver, EX. VITLAB Automatic zeroing. The burette stopcock is made of high quality plastic. Its PTFE key turns easily and allows fine titration. Special protection against breakage if the apparatus gets knocked over: A small bumper has been attached to the upper end of the upright measuring tube. This feature reduces the chance of breakage.

Materials: burette of borosilicate glass 3.3, burette made of amber glass for light sensitive substances, PP filling tube, PTFE burette stopcock, PMP titration tip, LDPE reservoir bottle.

Type

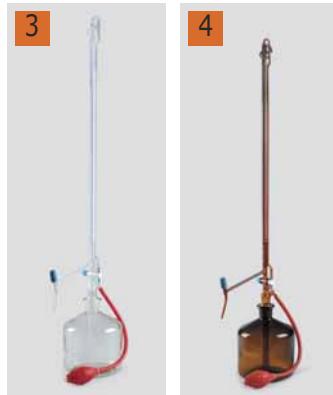

- [1] With plastic coating, with Schellbach stripes (blue/white)
- [2] Without plastic coating, with Schellbach stripes (blue/white)
- [3] Amber glass, without plastic coating, without Schellbach stripes

3 | 4 Automatic burettes, borosilicate glass 3.3, class AS

- Manufactured from pre-vacuum calibrated borosilicate glass. They meet the highest quality standards according to DIN EN ISO 385 ISOLAB
- Permanent quality control through all steps eliminates possible deviations from nominal values
- Calibrated to deliver (Ex) and the tolerances are according to DIN/ISO Class "AS" standards
- Conformity ("DE-M") certified, with a batch number printed on the body. Batch certificate can be downloaded from the suppliers website
- Supplied with an automatic zeroing system, VALVE stopcock and also an intermediate PTFE stopcock to recirculate the remaining liquid
- Clear burettes are manufactured with schellbach stripe
- Inscriptions and graduations are printed with special blue enamel. For amber burettes, white enamel is used to maximise visibility and durability

Glass bottle - Please order separately.

1 Automatic burettes, Pellet pattern, borosilicate glass 3.3, Class AS, with stopcock

BLAUBRAND®. Class AS, to DIN EN ISO 385. Boro 3.3. With intermediate stopcock. DE-M marking. **BRAND**
With batch number. Graduations and inscriptions in highly contrasting blue enamel. With Schellbach stripes.
Intermediate stopcock allows residual reagent in the burette after titration to be recycled into the reservoir.
Automatic zero point setting. Calibrated to deliver (EX). Choice of models, either with needle-valve stopcock with PTFE spindle (intermediate stopcock with PTFE-key) or with NS glass stopcock (intermediate stopcock with glass key).

Complete with 2 litre, soda-lime glass reservoir (160mm dia. x 200mm height, with 29/32 ground glass neck).
Overall height with bottle approx. 1m. All BLAUBRAND® burettes are delivered with batch number and one batch certificate included per pack. Also available with individual works, USP or DAkkS (former DKD) calibration certificate, please enquire. The batch certificate is also available to download from the manufacturer's website.

1 | 2 Digital Burettes, VITLAB® continuous

The pulse-free, dispensing operation of the Continuous burettes makes titration safer at high-level precision. The Continuous series can be used for titration agents up to a concentration of 1 Mol/l. The patented dual pistons pump provides permanent and pulse-free the liquid requested. Refills are not necessary. The Continuous burette series undercuts the margins of error defined by DIN EN ISO 8655-3 especially in partial volumes. All operation controls and the digital display have an ergonomic and functional design and are arranged clearly.

- Pulse-free dispensing technique for continuous and quick titration
- patented recirculation valve avoids reagent waste
- Clear and precise display of titrated volume
- Battery-operated, easily replaceable micro-batteries (1.5V)
- Dispensing volume per hand wheel revolution: 2.5ml (Continuous E), 5.0ml (Continuous RS)
- Device can be rotated on the bottle 360°
- Telescopic discharge tube extendible from 140 to 220mm
- Telescopic filling tube extendible from 200 to 350mm
- Adapters for drying tube and filter
- Certificate of conformity according to DIN 12600

Supplied with: Burette continuous, 3 PP adapter (GL 32, GL 38, S 40), 1 teleskopic suction tube, 1 teleskopic discharge tube, 2 micro batteries 1.5 V (LR 03/AAA), manual, quality certificate.

3 Digital burettes, solarus®

A titration unit with a reagent recirculation system for manual titration directly from the reagent bottle. *Hirschmann* Power supplied by a solar cell. Available in three volumes (10 ml, 20 ml and 50 ml). The world's first digital burette with integrated solar cell. The power supply for the electronics and display is derived exclusively from an integrated solar cell. Easily replaceable valves. The vivid digital display prevents meniscus reading errors and is always clearly legible, regardless of the viewing angle. The handwheels with soft touch surface are ergonomically optimised for particularly precise control.

- Power supplied by a solar cell
- Free rotation
- Media recirculating system for simple and rapid venting without reagent loss
- Handwheels with soft touch surface
- Clearly legible display, regardless of the viewing angle
- A light protection window for the valve block is also included in the scope of delivery
- Individual calibration of user-specified adaptations with "Quick-Cal"
- Discharge valves and valve seats consisting of high-purity aluminium oxide ceramic
- Serial bidirectional interface (RS 232 and USB)

Supplied with: solarus® with A 45 mm thread, 3 thread adapters (A 32, A 38 and S 40), discharge tube, 1 suction tube with retainer screw, 1 spanner for valve, brown light protection window, with individual serial number and single calibration report.

1 Bottle top burette Titrette®

For quickly and reliably titration with highest precision, even in close quarters, with no mains supply needed - in the lab, in production, or in the field! The Titrette® bottle-top burette has an innovative new measuring system which matches the Class A accuracy of glass burettes and, if needed, can offer the precision of 3 decimal places below 20ml. This is an important feature for users who need to work within the Class A error limits as with glass burettes according to DIN EN ISO 385 (e.g., pharmaceutical work). The titrating tube can be adjusted horizontally and vertically. This provides flexibility when positioning the instrument, e.g., when using a magnetic stirrer or different bottle sizes.

- High accuracy
- Smooth-running operation for sensitive, drop-wise titration and fast filling of the device
- Compact design
- Light and stable, easy handling
- No switching between fill and titrate
- Simple maintenance
- Cleaning and parts replacement right in the lab
- Titrette® SH to determinate the acid content of milk and liquid dairy according to Soxhlet-Henkel ($4^{\circ}\text{SH} = 1\text{ml}$)

Items supplied: Titrette® bottle-top burette, DE-M marking, performance certificate, telescoping filling tube (170 to 330 mm), recirculation tube, 2 x 1.5V batteries (AAA/JM4/LR03), 4 x PP bottle adapters (GL45/32, GL 45/38, GL 45/S40 and GL32/NS 29/32), 2 coloured light shield inspection windows, operating manual.

2 Digital-burette, opus®

A titration unit with a reagent recirculation system for motor-powered titration directly from the reagent bottle. Available in three volumes (10 ml, 20 ml and 50 ml). Electronic control of titration enables the achievement of reproducible results and precisely defined dynamics each time. Time-saving rapid titration with subsequent fine titration enhances accuracy and efficiency. The titration impulse triggered by the motor enables the achievement of a droplet break-up with output volumes from 10 μl to 99.999 ml and delivers resolutions up to the third decimal place.

Hirschmann

- Electronic control and dispensing of volumes
- A light protection window for the valve block is also included in the scope of delivery
- Titration impulse triggered by the motor enables the achievement of a droplet break up from 10 μl for precision determination
- Media recirculating system for simple and rapid venting without reagent loss
- Free rotation
- TFT touchscreen with user-friendly menu
- Method memory for nine different titration procedures with storage of all settings
- USB and RS232 interface for PC connection
- Integration in automated procedures possible
- Discharge valves and valve seats consisting of high-purity aluminium oxide ceramic
- Power supply 100-240V, with EU, UK, US plug

Supplied with: opus® titration complete with thread 45 mm, 3 adapters (A 32, A 38 and S 40), 1 screw coupled suction tube, 1 titration discharge unit and 1 power supply, 1 brown light protection window, touch screen module "titration", Data Power Cable 0.75 m, instruction manual, single calibration report.

1 Motor-driven piston burette Titronic® 300

SI Analytics

Motor-driven piston burette with 20 or 50ml dosing unit. For manual titrations and highly precise dosing tasks. The TITRONIC® 300 can be completely controlled from a PC via the USB- or RS-232-interface. Up to 16 burettes can be connected to one another via the RS232 interface according to the daisy chain principle.

T 300/20 M1: Basic unit without magnetic stirrer with ready to use assembled 20 ml dosing unit TZ 3130 with hoses, fittings and titration tip, controller TZ 3880, titration clamp Z 305, stand rod TZ 1748 and power supply 100-240 V

T 300/50 M1: as T 300/20 M1, only with ready to use assembled 50 ml dosing unit TZ 3160

T 300/20 M2: as T 300/20 M1, additionally with magnetic stirrer TM 50

T 300/50 M2: as T 300/20 M2, only with ready to use assembled 50 ml dosing unit TZ 3160

Specifications

Interfaces:	USB A and B, 2x RS 232
Stirrer connection:	TM 50 power supply directly through piston burette
Keyboard connection:	The unit is operated using the keys on the device itself, the controller TZ 3880 and optional PC-keyboard (USB)
Display:	graphics-capable TFT display
Volume indicator:	000.005 to 9999.999 ml
Display resolution:	0.005
Dosing speed:	max. 100ml/min (with 50 ml unit)
Fill time:	30secs. to 999secs. adjustable (time depends on cylinder volume)
Dosing units:	20ml or 50ml dosing unit, interchangeable
Burette resolution:	8000
Dispensing accuracy:	0.15% system measurement deviation, 0.05% accidental measurement deviation determined in accordance with EN ISO 8665, Part 3
Supply requirements:	230V, 50/60Hz
Conformity:	ISO 8665, Part 6
CE mark:	EMC: 2004/108/EG; safety EG- Directive 2006/95

Type	Burette attachment ml	PK	Cat. No.
T 300/20 M1	20	1	9.863 180

1 Motor-driven piston burette TITRONIC® 500

Motor-driven piston burette with intelligent exchangeable doing units with automatic recognition of unit size and reagent data.

SI Analytics

Besides manual titration and highly precise dosing tasks the TITRONIC® 500 can also be used for the preparation of solutions by entering the weights. The connection of an analytical balance allows the easy automatisation of the solution preparation. The TITRONIC® 500 can completely controlled from a PC via the USB- or RS-232-interface. Up to 16 burettes can be connected to one another via the RS232 interface according to the daisy chain principle.

T 500: TITRONIC® 500 basic unit without magnetic stirrer, with stand rod TZ 1510, titration clamp Z 305, controller TZ 3880, power supply 100 - 240 V

T 500-M1: TITRONIC® 500 basic unit with magnetic stirrer TM 235, with stand rod TZ 1510, titration clamp Z 305, controller TZ 3880, power supply 100 - 240 V

T 500-M2/20: TITRONIC® 500 basic unit with magnetic stirrer TM 235 and exchangeable unit WA 20, with stand rod TZ 1510, titration clamp Z 305, controller TZ 3880, power supply 100 - 240 V

Technical specification

Interfaces:	3x USB (2 x USB A and 1x USB B), 2 x RS-232-C, 1 x LAN
Stirrer connection:	TM 235 or alternative paddle stirrer
Keyboard:	The unit is operated using the keys on the device itself., the controller TZ 3880 and optional PC-keyboard (USB)
Display:	graphics-capable 3.5" TFT display
Volume display:	00.00 to 999.9ml
Display resolution:	0.001ml (depending on exchangeable unit)
Dosing speed:	max. 100ml/min (with 50ml unit)
Filling speed:	min. 20 to 999 sec adjustable (time according to the cylinder volume)
Exchangeable units:	5, 10, 20ml or 50ml exchangeable units with reagent recognition
Burette resolution:	20000 steps
Dosing accuracy:	systematic error 0.15%, random error 0.05% in compliance with EN ISO 8655-6
Power supply:	100-240V; 50/60Hz
Conformity:	ISO 8655, part 6
CE-mark:	EMC: 2004/108/EG; safety EG- Directive 2006/95

1 Automatic Titrators TitroLine® 5000

SI Analytics

1

Very compact titrator for simple routine titrations. Thanks to the standard methods the creating of methods is no longer required. Just load the method and press the start button. GLP compliant results with titration curve can be documented on a connected printer or USB-memory stick.

- Following titration modes are possible:
- Titrations to pH, mV and µA endpoint (2 EP)
- Titrations to one equivalence point (pH und mV) with dynamic or linear titration addition
- Manual titrations with the controller
- Dosing tasks
- Number of methods: 5

Typical applications for the TitroLine® 5000 are:

- Salt content in foodstuffs (cheese, soy sauce, ketchup)
- Total acidity in wine and beverages
- Nitrogen according to Kjeldahl
- Chloride in drinking water and other samples
- Alkalinity (p + m-value)
- FOS/TAC

Supplied with:

TL 5000/20 M1: Basic unit without electrode, with ready to use assembled 20 ml dosing unit TZ 3130 with hoses, fittings and titration tip, controller TZ 3880, titration clamp Z 305, stand rod TZ 1748 magnetic stirrer TM 50 and power supply 100-240 V

TL 5000/50 M1: as TL 5000/20 M1, only with ready to use assembled 50 ml dosing unit TZ 3160

TL 5000/20 M2: as TL 5000/20 M1, additionally with pH combination electrode and buffer set

TL 5000/50 M2: as TL 5000/20 M2, only with ready to use assembled 50 ml dosing unit TZ 3160

TL 5000/20 M3: as TL 5000/20 M1 additionally with Ag electrode and electrode cable

Specifications

Measuring input electrode	pH/mV-input with DIN or BNC socket
Measuring input Pt 1000/NTC 30:	Temperature sensor connection for resistance probes Pt 1000 or NTC 30 (socket: 2 x 4 mm)
Interfaces:	1 x USB A und 1 x USB-B 2 x RS-232-C
Stirrer connection:	TM 50 power supply directly through piston burette
Keyboard:	The unit is operated using the keys on the device itself, the controller TZ 3880 and optional PC-keyboard (USB)
Display:	graphics-capable TFT display
Dosing units:	20 ml or 50 ml dosing unit, interchangeable
Burette resolution:	8000
Dosing accuracy:	systematic error 0.15 %, random error 0.05 % in compliance with EN ISO 8655-6
Supply requirements:	230V, 50/60Hz

1 Automatic Titrators, TitroLine® 7000

Compact titrator with intelligent exchangeable units with automatic recognition of unit size and reagent data.

SI Analytics

Thanks to the modern USB- and additional RS232 interfaces, connection of printer, balance and further accessories are possible at the same time.

The brilliant, very high-contrast TFT-display allows the easy parameterisation and tracking of the titration curve.

Supplied with:

TL 7000-M1/10: basic unit with magnetic stirrer TM 235 and 10ml exchangeable unit WA 10, incl. amber glass bottle for titration reagent, GL 45 and S 40-bottle adapter, tubes, drip off tube and titration tip.

TL 7000-M1/20: basic unit with magnetic stirrer TM 235 and 20ml exchangeable unit WA 20, incl. amber glass bottle for titration reagent, GL 45 and S 40-bottle adapter, tubes, drip off tube and titration tip.

TL 7000-M1/50: basic unit with magnetic stirrer TM 235 and 50ml exchangeable unit WA 50, incl. amber glass bottle for titration reagent, GL 45 and S 40-bottle adapter, tubes, drip off tube and titration tip.

TL 7000-M2/20: basic unit with magnetic stirrer TM 235 and 20ml exchangeable unit WA 20, incl. amber glass bottle for titration reagent, GL 45 and S 40-bottle adapter, tubes, drip off tube and titration tip. With pH-combination electrode IL-pHT-A120MF-DIN-N and buffer set.

Technical specification

Measuring input pH/mV:

pH/mV-input with DIN or BNC socket, **TitroLine® 7000 additionally with**

ID function for automatic detection of electrode

Measuring input Dead Stop:

µA-input for double platinum electrode (socket 2 x 4mm), pole voltage adjustable

Temperature:

for resistance probes Pt 1000 (socket: 2 x 4mm)

Interfaces:

3 x USB (2 x USB-A und 1 x USB-B), 2 x RS-232-C, 1 x LAN

Stirrer connection:

TM 235 or alternative paddle stirrer

Keyboard:

The unit is operated using the keys on the device itself, the controller TZ 3880

Display:

and optional PC-keyboard (USB)

Exchangeable units:

graphics-capable 3.5" TFT display

Burette resolution:

5, 10, 20ml or 50ml exchangeable units with reagent recognition

Dosing accuracy:

20000 steps

systematic error 0.15%, random error 0.05-0.07% in compliance

with EN ISO 8655-6

Supply requirements:

KF Titrators TitroLine 7500® KF/TitroLine 7500® KF trace

You cannot go wrong with the TitroLine® KF titrators from SI-Analytics. The TitroLine® 7500 KF is the volumetric generalist for a wide range of use and the TitroLine® 7500 KF trace is the specialist for low water contents.

SI Analytics

Both titrators are to be characterized by following features:

- Fast, easy and precise
- With standard methods for different applications (titer determination, blank value...)
- High visible full color display, that can be easily viewed from a distance and extreme angles
- Storage of results via USB and LAN port (PDF and CSV -format)
- with online curve
- With intelligent interchangeable modules (only TitroLine® 7500 KF)

Applications TitroLine 7500® KF: KF volumetry, dead-stop-titrations (SO_2 , bromine number)

Applications TitroLine 7500® KF trace: KF coulometry, bromine number

Volumetric KF-Titrators supplied with:

TL 7500 KF 05: titrator unit, interchangeable module WA 05, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1770, micro-dual platinum electrode KF 1100 and starter kit, power supply 100-240 V

TL 7500 KF 10: titrator unit, interchangeable module WA 10, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1770, micro-dual platinum electrode KF 1100 and starter kit, power supply 100-240 V

TL 7500 KF 20: titrator unit, interchangeable module WA 20, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1770, micro-dual platinum electrode KF 1100 and starter kit, power supply 100-240 V

Coulometric KF-titrators supplied with:

TL 7500 KF trace M1: titrator unit, generator electrode TZ 1752 without diaphragm, magnetic stirrer TM 235, titration vessel TZ 1751, micro-dual platinum electrode KF 1150, support rod

TL 7500 KF trace M2: titrator unit, generator electrode TZ 1752 without diaphragm, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1754, micro-dual platinum electrode KF 1150, support rod

TL 7500 KF trace M3: titrator unit, generator electrode TZ 1753 with diaphragm, magnetic stirrer TM 235, titration vessel TZ 1751, microdual platinum electrode KF 1150, support rod

TL 7500 KF trace M4: titrator unit, generator electrode TZ 1753 with diaphragm, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1754, micro-dual platinum electrode KF 1150, support rod

TL 7500 KF trace M6: titrator unit, generator electrode TZ 1752 without diaphragm, titration stand TM 235 TO, titration vessel TZ 1754, micro-dual platinum electrode KF 1150, connection cable TZ 3094

Specifications

Measuring range TitroLine 7500® KF:

10ppm - 100%

Dosing accuracy:

<0.15%

Measuring range TitroLine 7500® KF trace:

1ppm - 5% (10 μg to 100mg)

Accuracy:

0.3% at 1mg water

Number of user methods:

50

Printer:

HP PCL, Seiko DPU S 445, PDF

Interface:

1 Titrators TitroLine® 7750®

Titroline® 7750 is the all-rounder for both potentiometric titration and volumetric KF titration.

The TitroLine® 7750 combines the features of the potentiometric titrator TitroLine® 7000 and the volumetric Karl Fischer titrator TitroLine® 7500.

SI Analytics

The new TitroLine® 7750 is characterized as follows:

- Highly visible full color display, that can be easily viewed from a distance and extreme angles
- With new interchangeable modules which all relevant reagent and unit data can be stored
- Thanks to the 2 x USB-host, 1 x USB-PC and 2 x RS232 ports, very communicable. Connect for example, USB keyboard, USB printer, barcode reader, USB flash drives, balances, PC und further SI Analytics devices such as piston burettes and sample changers
- Storage of results via USB and LAN port (PDF and CSV -format) including method transfer
- With standard methods for potentiometric and KF titration

Supplied with:

TL 7750: Basic unit without magnetic stirrer, with stand rod TZ 1510, titration clamp Z 305, keyboard TZ 3835 and power supply 100-240 V

TL 7750-M1: as TL 7750, additionally with magnetic stirrer TM 235

TL 7750-TitriSoft: as TL 7750-M1, additionally with TitriSoft 3.0 (TZ 3071)

TL 7750 KF 05: Titrator unit, exchange unit WA 05, TM 235 KF titration stand with integrated stirrer and pump, titration vessel TZ 1770, micro double platinum electrode KF 1100 and starter kit, power supply 100-240 V

TL 7750 KF 10: as TL 7750 KF 05, only with exchange unit WA 10

TL 7750 KF 20: as TL 7750 KF 05, only with exchange unit WA 20

2 Titrators TitroLine® 7800

The TitroLine® 7800 is the new all-rounder for potentiometric titration with an additional digital measuring input.

SI Analytics

That enable for example the connection and use of pH and conductivity sensors at the same time.

An additional external conductometer is not required anymore. The TitroLine® 7800 can also be used as volumetric KF titrator.

The TitroLine® 7800 is to be characterized by following features:

- High visible full color display, that can be easily viewed from a distance and extreme angles
- With intelligent interchangeable modules and storage of all relevant reagent data
- Includes two USB-A, one USB-B, two RS-232 and one LAN port for expansion and connection of devices such as keyboard, printer, barcode reader, memory sticks, balances, PC an further SI Analytics devices
- Storage of results via USB and LAN port (PDF and CSV -format) including method transfer
- With one analogue and one digital measuring input. The digital input allows the connection of digital (IDS) pH and conductivity sensors.
- With standard methods for potentiometric and KF titration

Supplied with: Basic unit with or without magnetic stirrer, with stand rod TZ 1510, titration clamp Z 305, keyboard TZ 3835 and power supply 100-240 V

Type	PK	Cat. No.
TL 7800 (without magnetic stirrer)	1	9.863 168
TL 7800-M1 (with magnetic stirrer)	1	9.863 169

1 Drum pump Pump-it®

For rapid and clean emptying from cans, drums and small barrels up to 60L.

Bürkle

- Precise dosing, without dripping
- Pump connection suitable for 64mm dia. (BSI) container threads
- stepless length adjustment of immersion tube
- Threaded adapters for most commercially-sold containers available
- Not suitable for HCl

1

Immersion depth mm	Flow rate L / min.	Material	PK	Cat. No.
1000	8	PP/FKM	1	9.001 110

2 Adapter set for Pump-it® container pump

Adapter set consisting of:

Bürkle

- 2" Coarse thread, Mauser, green
- 2" coarse thread, Tri-Sure®, brown
- 2" Fine thread steel drum, blue
- DIN 60, black
- DIN 51, black

2

Type	PK	Cat. No.
Adapter set for Pump-it can pump	1	9.001 111

3 Drum Pump PumpMaster

Drum pump PumpMaster with gasket of FKM for acids and chemical liquid. The manual pressure pump is ideally suited for drawing off, decanting and emptying canisters and barrels. The hand pump is used to create excess pressure that forces the liquid out of the container. The stopcock also allows extraction of small quantities of liquid. The PumpMaster container pump is mounted on the container using a flexible stopper with a variable and adjustable diameter. No special thread adapters are required. PumpMaster fits all commercial container openings with a diameter from 46.5 mm to 60 mm. The immersion tube has a length of 95 cm and it can be shortened depending on the size of the container.

Bürkle

3

Scope of supply: Complete with three bungs in different sizes.

*Miniature pump for container openings 20 to 36mm.

2 OTAL® disposable pumps with PE conveying pipes

NEW

Space-saving container pump for single use. The medium to be filled only comes into contact with the conveying pipe. The conveying pipe is made of one piece and can easily be shortened to the respective container height with the supplied cutter for good residual emptying. The disposable conveying pipe can be replaced quickly and easily after use.

Bürkle

Scope of supply: Pump ball, universal plug made of soft PVC for container openings of 30 - 70 mm Ø, cutter and 10 disposable conveying pipes

Type	Diam. mm	Immersion depth mm	Flow rate L / min.	PK	Cat. No.
OTAL® disposable foot pump	12	90	14	1	4.670 768
OTAL® disposable hand pump	12	90	14	1	4.670 769 2

3 Siphons

Transparent with stopcock. Simple to use, suitable for occasional dispensing of non-aggressive liquids from a higher drum to a lower vessel, following the siphoning principle.

Bürkle

Diam. mm	Immersion depth mm	Material	PK	Cat. No.
15	1000	9 LDPE/PVC	1	9.001 355

4 Barrel pumps, stainless steel

Stainless steel V2A and PTFE.

Bürkle

For safe dispensing of liquids with a low flash point . Electrostatic charge can be dissipated through accessories antistatic set and drum screwthread connection. Not suitable for acetone.

Description	Diam. mm	Immersion depth mm	PK	Cat. No.
rigid dispensing tube	32	570	1	9.001 340

5, 6 Barrel pumps, screw joints

Barrel screw joints for stainless steel drum pumps.

Bürkle

Constructed in nickel-plated brass. For containers with R2", internal steel barrel thread.

Description	PK	Cat. No.
Barrel screw joint 2"	1	9.001 345 5
Barrel screw joint, gas-tight 2", hermetic sealing	1	6.090 497 6

1 Barrel pumps, PP

- For decanting acids, caustic solutions and aggressive detergents
- Excellent recovery of residual liquid in the barrel provided by base-sitting, non-return valve and steplessly adjustable immersion tube
- For barrels and tanks from 30 to 1000l.

Bürkle

Type A: With rigid, angled, dispensing nozzle.

Type B: With flexible, PVC dispensing hose and stopcock.

Barrel screw joints and thread adapters for standard containers are available as optional accessories.

Please order separately.

Immersion tube diam.: 32mm

Max. pump capacity: up to approx. 12 L/min.

2 Barrel pump, PTFE

- For ultrapure and aggressive liquids
- Made of solid, pure white PTFE, giving an excellent chemical resistance to all media (with the exception of elemental fluorine)
- With stopcock to prevent the escape of harmful or hazardous liquids and unwanted drips
- Barrel screw joints are available as accessories

Bürkle

1 Mini solvent pump

The self-closing discharge (with auto-stop function) of the Mini solvent pump ensures absolutely precise filling with no dripping at all. Dosing is even easy in very small containers such as test tubes, which present no problems. A hose can optionally be fastened onto the discharge spout (internal Ø 6 mm), thus making it possible to fill the container from a greater distance.

Bürkle

The Mini solvent pump is especially compact and very well balanced, which makes it possible to fill without tipping, even from very small containers.

Thanks to its sturdy design and high-quality materials, the Mini solvent pump consistently ensures neat and reliable filling throughout its long service life, easily and conveniently.

- Ideal for 1-5 l containers
- Connecting thread GL 45
- Parts in contact with medium made of PTFE and stainless steel (1.4301, 1.4404)
- PTFE hose (6 x 8 mm) 0.4 m
- Including grounding cable 2 m
- Adapters available as accessories for S 40, GL 38 and GL 32

Description	Flow rate l / min.	PK	Cat. No.

4 Drum pumps GLP 25

GLP 25 is your ideal helper for clean and safe liquid transfer from small containers and drums up to 220 litres. Various media such as acids and bases low concentrated, dies, emulsions, dispersions and low-viscosity liquids can be measured out without any problems. Wetted materials are PP, stainless steel and Viton®. The pump is therefore additionally media resistant against aggressive liquids. Driveshaft made from stainless steel. Delivery rates from 1 to 20 l/min adjustable. Pump Set supplied with: motor, pump unit, PP, ¾" dia. inlet tubing (length 500, 700 or 1000mm), PP discharge tubing, 250mm long and adapter for drum necks of 40 to 58mm.

3 | 4 | 5 Barrel pumps AccuOne and EnergyOne

The pumps are equipped with two different power supply systems: AccuOne, driven by a high-performance rechargeable battery or EnergyOne, with a power cable for direct connection to mains electricity. Innovative new feature: The power supply units are interchangeable! The rechargeable battery or the power supply unit are fitted with a clip lock and are removable. They can be exchanged quickly and easily. Thus AccuOne can also be operated with the power supply cable unit and EnergyOne can be operated with the rechargeable battery. The drive can also be disconnected quickly and easily from the pump station with a clip lock. This makes it possible to use one drive for filling at several stationary pump stations. AccuOne and EnergyOne are designed for applications in which even very small amounts of liquid can be added to small containers with narrow openings. The TouchPanel is sealed against dust, dirt and water. By a foil Keyboard it can be used to regulate the flow rate continuously and precisely from 0.4l/min to 12 l/min. The light and powerful pumps are made of high-quality materials, PP, PTFE and Hastelloy C, to ensure outstanding chemical resistance. Please make note of detailed information related to chemical resistance!

Pumps/Drum pumps-Peristaltic pumps

1

1 Drum pumps, mains-powered

Lightweight and powerful pump for transferring small amounts of aqueous liquids up to 300 mPas from cans and drums with infinitely variable speed controller.

Lutz Pumpen

- Motor 230 V, 200 W (IP 24)
- Seal less pump tube
- Suitable accessory flow meter required
- Pump with tubing connection

Two options:

- Polypropylene version for acids and alkalis
- Stainless steel version for low-viscosity lubricants

Available as a set (9.880 310-9.880 315) with 1.5 m PVC tubing, nozzle in polypropylene, wall bracket.

Set accessories: Lutz nozzle, 1.5 m PVC hose 3/4", hose connection, hose clamps, wall bracket (for pump B2 Vario PP-SL Ø 32 mm).

9.880 360

Horizontal centrifugal pumps, magnetically coupled

These new magnetic drive pumps are designed for pumping acids, bases, mixtures of acids and bases, solvents, photochemicals into alkali stripping baths, galvanic baths, as well as radioactive, sterile, expensive or highly corrosive liquids. The pumps are sealless. The impeller is driven by the magnetic force of the outer magnets, therefore no mechanical seal is required. As the pump housing is hermetically sealed no leaks can occur. The use of high performance, permanent magnets, ensures high transmission forces even at elevated temperatures.

- viscosity up to 20 mPas
- pump complete with flanged-to motor

Magnetic drive pump 15 Watt: Motor 230V, material PP (fibre-glass reinforced), stainless steel (shaft), Viton® (O-ring), tubing connection 14mm

Magnetic drive pump 29 Watt: Motor 230V, material PP (fibre-glass reinforced), ceramics (shaft), Rulon (guide bearing), Viton® (O-ring), suction/discharge G 3/4" OT (BSP)

1 Peristaltic pump LLG-uniPERISTALTICPUMP 1

1

The extra compact peristaltic pump. Ideal for continuous dosing applications.
Space-saving, robust and with a wide range of easily exchangeable pump heads.

- Stable flow rates
- **Compact design**
- Reversible working direction
- Pump heads easily exchangeable
- Various pump heads with different hose diameters available as accessory
- Low power consumption
- Corrosion-resistant ABS housing
- OLED display for indication of speed and working direction

Scope of supply: Pump, pump head, Pharmed® hose connectors 3 mm ID, 5 mm AD

Specifications

Speed range:	0.1 ... 150 min ⁻¹
Speed accuracy:	±0.1 min ⁻¹
Flow rate range:	0.004 ... 63.69 ml/min
Weight:	0.8 kg

1 Laboratory peristaltic pumps, PLP

The behrotest peristaltic pumps PLP are suitable for the transport of watery solutions/non aggressive applications. They find their application in the laboratory, the food industry as well as in the analytical, medicinal or biological field.

The RPM (rotation per minute) can be adjusted manually and the flow direction can be amended.

These PLP pumps have angle connectors to which tubing can be attached either with or without additional brackets, depending on the tube size.

Dülabo Laborgeräte

PLP 1000	250 - 1000	1440	1	9.700 423

2

6.287 159

Laboratory peristaltic pumps PLP 38

For the Dülabo peristaltic pump PLP38 there are different pump heads which can be used, this results in flexibility in your day to day usage, enabling multiple tubing sizes being applicable.

Depending on the tubing material in use, this pump type can be used for various chemicals, corrosive and aggressive as well as sterile solutions.

The user friendly membrane keyboard enables the user to regulate the flow speed (RPM) using the switch arrays. Furthermore the user can make use of the special button on the membrane keyboard which activates a "quick flow mode".

Via RS485 or other external adapters for other signals, steering the pump externally is also possible. Additionally a foot switch can be attached to the pump to enable the pumping function as long as the foot switch is activated.

Specifications:

Speed:	0.1 to 100 rpm, reversible
Speed precision:	0.1 rpm
Speed control:	Membrane keypad
Display:	3-digit LED displays current rpm
Communication interface:	RS485

Pumps, peristaltic, Ecoline

Flow rate 0.003 to 5400 ml/min. Robust and economical tube pump with a large flow rate range. Stainless steel housing.

Cole-Parmer GmbH

Easy handling. For all applications in laboratory and industry. Microprocessor-controlled drive and 2-digit digitpot for precise speed

adjustment. Analogue interface for start/stop and direction of rotation (potential-free contact) as well as speed (0 to 5 V, 0 to 10 V or 0 to 20 mA, 4 to 20 mA). Variable speed drive.

Ecoline VC-280:

Economical, basic, single-channel drive model for flow rates up to 5.4 l/min with variable speed.

Ecoline VC-280, Ecoline VC-360 and VC-380:

1-channel tubing pumps, for 1.6 mm wall thickness tube.

Ecoline VC-281 and VC381:

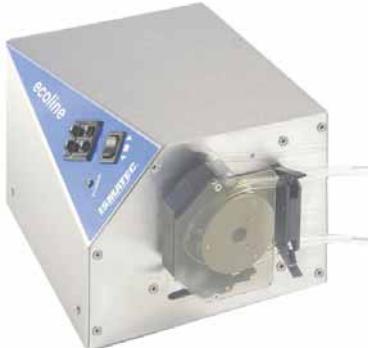

1-channel tubing pumps, for 2.4 mm wall thickness tube.

Ecoline VC-drive without pump heads:

- combinable with Easy-Load®, MS/CA 8-6 and MS/CA 4-12 pumpheads.

4.671 781

Peristaltic pump-Sets rotarus®

NEW
Hirschmann

Sets with peristaltic pump and pump head. The speed and the most important parameters can be programmed directly on the housing front on a TFT touchscreen. Simple and easy loading of the tubing.

Peristaltic pump smart 30 + Single-channel pump head PKF 60-16-3: For endless hoses, for low viscosity media.

Peristaltic pump smart 30 + Multi-channel pump head MKF 60-4-8: For stopper hoses, for low viscosity media.

Sturdy hose cassettes with screws for precise adjustment of the delivery rate.

Peristaltic pump smart 40 + Single-channel pump head PKF 60-24-3: For endless hoses. Due to the 2-stage planetary gearbox ideally suited for media with higher viscosity.

Please order tubing separately.

Pump heads rotarus®

Hirschmann

For use with all rotarus® peristaltic pumps.

PK: With double-pivoted rollers made of high-grade, medical stainless steel. With RFID-technology for detection and monitoring of pump head and tubing.

MKF 4/8/12: With components made of anodized aluminum and stainless steel. For tubing cassettes, with lateral set screw for the adjustment of the flow rate. With RFID-technology for detection and monitoring of pump head and tubing.

PKF 60/MKF 60: With components made of durable PPS plastics. Simple and easy loading of the tubing. For attaching the pump heads to the rotarus® drives a PKF/MKF 60 adapter set is required. Please order separately.

1 Peristaltic pump tubing, Tygon® LMT-55 with 2 colour-coded bridges

With 2 colour-coded bridges (international standards). Shore: 55. Fits most common peristaltic pump models, e.g. Verder, Ismatec, Watson-Marlow, IKA and Heidolph.
Standard tubing, transparent. Length 380mm. Long working lifespan. Good resistance to acids and alkalis. Food-safe.

1 Pumps, peristaltic, multichannel, precision, IPC, IPC-N-IP and IP-N

IP and IP-N series, without dispensing features

- Microprocessor controlled
- very precise pumping

Cole-Parmer GmbH

IPC and IPC-N series, with dispensing features

- Microprocessor controlled
- very precise pumping
- with "standby-mode" (prevents draining the tubing line e.g. overnight)
- with dispensing and calibration functions

IPC-N and IP-N series

- 4, 8, 12, 16 or 24 channels
- 8 actively driven stainless steel rollers
- Transparent keyboard and LED-display
- Clickánago cassettes providing defined and repeatable occlusion conditions.
- different tube sizes can be inserted in each channel.
- 2 Stopper tubes
- Differential pressure: 1.0 bar

Specifications IPC and IPC-N:

Motor type:	d.c. motor
Speed:	IPC: 0.4 up to 44 rpm IPC-N: 0.11 up to 11.25 rpm
Speed setting:	1 to 100 %, resolution 0.1 %
Flow rate setting:	in μ l/min to ml/min
Input:	30W
Supply requirements:	230V 50Hz, 115V 60Hz (selectable)
Protection class:	IP 30

1 Peristaltic pump drives, BVP-Standard/BVP-Process

Can be combined with over 20 pump-heads for **flow rates of 0.001 to 3700 ml/min (depending on pump-head)**.

Cole-Parmer GmbH

For the continuous pumping of liquids and suspensions with up to 60 % solids content according to capacity or time. Analogue interface for Start/Stop, rotation direction, autostart. LED display on BVP Process. Stainless steel housing, dust-tight and water-proof. Dimensions (W X D x H): 155 x 220 x 260mm (without pump-head).

1

Specifications: BVP Standard

- speed 3.8 to 240 rpm
- speed setting: 1-99.9 %, resolution 0.1%
- protection rating: IP30
- power supply: 230 V/ 50 Hz - 115 V/60 Hz
- weight: 5.7kg (without pump head)

Specifications: BVP Process

- speed 1 to 240 rpm
- speed setting: rpm, resolution: 0.1 rpm
- LED display
- protection rating: IP65
- power supply: 100 - 230 VAC/50 - 60 Hz (autom. switching)
- weight: 6.9 kg (without pump head)

1 Peristaltic pump drives, MCP standard/MCP process

Can be combined with over 20 pumpheads for **flow rates of 0.001 to 3700 ml/min (depending on pump-head)**.

Cole-Parmer GmbH

Combined peristaltic pump and precise dispenser. Microprocessor controlled, with precise controlled rotation speed and metering unit for 1 to 24 pump channels. The speed (1rpm to 240rpm) is adjustable to 0.1rpm, key-pad with LED-display, programmable. Different dosing modes supply very exact and reproducible results. With RS232 interface, tubing valve operation, dosing handle and foot switch. Can be used for sterile dosing up to 135°C (with adequate tubing). Dimensions (W x D x H): 155mm x 220mm x 260 mm (without pumphead).

Programmable functions:

- ml/min
- drive speed
- drop-free (roller reverse step)
- calibration ml/min (flow rate); ml (volume)
- drive unit on/off

Dosing:

- volume ml
- volume/time unit
- dosing time (0.1s to 999 h)
- intermittent dosing with pre-set pause time; number of dosing cycles selectable

Additonal functions MCP process:

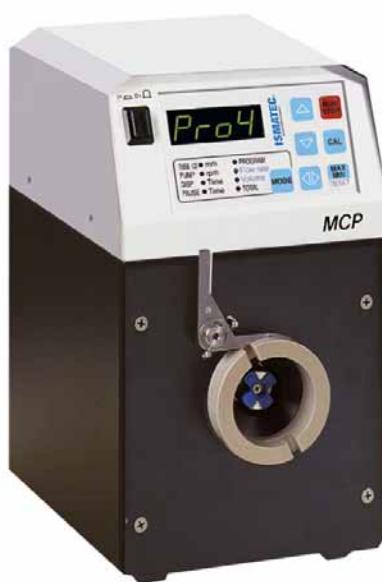

- programmable sequences
- dust-tight and water-proof

Analog Pump Drive Hei-FLOW Value

Feed pump for standard applications. The speed is adjustable with the analog control knob and stays constant even under changing loads.

Heidolph

- Smooth start operation prevents from spills and splashing media
- Feed direction reversible
- For safety in unattended continuous operation, the motor will be switched off in case of an overload situation to prevent overheating
- Optional footswitch to operate pump drive in closed fume hoods and to facilitate filling operations
- Pump heads with convex rollers for cell protection are available for use in cell biology

The pump head is not included. Please order separately.

Specifications

Control accuracy motor:	±2 %
Flow rate accuracy (water without counter pressure):	±5 %
Motor power:	100 W
Permissible ambient conditions:	5 ... 31 °C
Permissible rel. humidity:	80 %
Dimensions (W x D x H):	166 x 256 x 225 mm
Weight:	7.6 kg
Protection class DIN EN 60529:	IP 55

1 Analog Pump drive Hei-FLOW Value 06

This pump drive is only suitable for use with single-channel pump heads.

Heidolph

Specifications

Speed range:	50 ... 600 rpm
Flow rates single-channel pumps:	4.0 ... 4151 ml/min

Single-channel Pump Heads SP standard and SP vario for Pump drives Hei-FLOW

SP standard

- Recommended for standard applications
- Convex rollers do not squeeze or crush organic cell cultures
- Pump head features ball bearings
- Rollers made of stainless steel and polyamide
- For tubes with a 1.6mm or 2.5mm wall thickness (wt)
- Depending on drive and tubing, the flow rate ranges from 2.0 to 4151 ml per minute

Heidolph

2

9.829 254

SP vario

- Suitable for most Heidolph tubing due to adjustable roller spacing
- Convex rollers do not squeeze or crush organic cell cultures
- Pump head features ball bearings
- Rollers made of stainless steel and aluminum
- Depending on drive and tubing, the flow rate ranges from 2.0 to 4151 ml per minute

3

SP vario**	var.	0.5 to 3644	1	9.829 256

* for simple flow requirements.

** rotor with adjustable roller distance.

1 Single-channel Pump Heads SP quick for Pump drives Hei-FLOW

- Fast and convenient tube changes
- Low pulsation due to 5 roller system
- Pump head features ball bearings
- Rollers made of stainless steel
- For tubes with a 1.6mm or 2.5mm wall thickness (wt)
- Depending on drive and tubing, the flow rate ranges from 0.38 to 3436 ml per minute

1

Multi-channel Pumps for Pump drives Hei-FLOW

- These pump drives are able to be configured for multi-channel use: Value 01, Advantage 01, Precision 01
- Increased output by running up to 12 individual cassettes on one single pump drive and pump head system
- Separate metering into multiple vessels with different feed rates at the same time by using different tubing dimensions to adjust flow rates
- Easy and quick tubing change
- In addition to standard pump heads which feature a 4 roller system, 8 roller pump heads are available for low pulsation
- Easy change of cassettes, even during operation
- Cassettes adjustments and changes are simple due to click system
- With possibility to upgrade the pump drive with an adapter for multi-channel operation

2 3 Chemically-resistant Diaphragm Dosing Pumps SIMDOS® 02/10

- Application: Metering liquids
- Flow rate from 0.03 up to 100 ml/min/Pressure head 60 mWg, suction head 2 mWg and 3 mWg respectively
- Pump heads available in your choice of PP, PVDF or PTFE-diaphragms available in PTFE, valves in FFKM
- Flow rate can either be set manually (Version S) or both manually and via an external control device as well as with interface RC 232 (Version RCP)
- Additional safety diaphragm for maximum security
- Easy exchange of the transfer diaphragm by activating the maintenance command in the operating program

KNF

Advantages:

- Intuitive operation, easy calibration
- Adjustable to liquid characteristics
- Self-priming and dry-running
- Spray water protected IP 65
- Small size

1 Pumps, liquid, ceramic piston, MCP-CPF Process and Reglo-CPF Digital

Flow-rate from 0.025 to 2300 ml/min (depending of the pump head). Operate on a valveless rotating piston principle with liquid pathway materials made of sapphire-hard, chemically inert ceramic (99.7 % Al₂O₃). Ideal for chemically aggressive and viscous or crystallizing materials. Differential pressure up to 6.9 bar.

Cole-Parmer GmbH

Industrial process-adapted drive, dust- and water-tight, with washdown (IP 65) capability due to completely sealed stainless steel housing. PC-programmed routines can be stored in the pump memory and run without needing a PC.

Specifications

	MCP-CPF Process // Reglo-CPF Digital
Motor:	d.c. motor
Rotation speed:	10 to 1800 rpm. // 40 to 1800 rpm
Speed resolution:	1rpm, 0.1 rpm selectable.
Flowrate setting:	µl/min, ml/min, l/min // µl/min, ml/min
Power rating:	100 W // 50 W
Overall (W x D x H):	155 x 220 x 260 mm* // 100 x 175 x 135 mm*
Safety protection:	IP 65 // IP 30
Weight:	6.9 kg* // 2.5 kg
Supply requirements:	100 to 230V a.c. 50/ 60 Hz
* without pumphead

Syringe Pumps Legato®

The Legato® series syringe pumps provide the smoothest most accurate flow available. The intuitive, chemically resistant touch screen enables the user to quickly create configurations and recall them for ease of use. Single syringe, single remote syringe, dual syringe and multirack configurations are available along with the infuse only or infuse/withdraw/continuous operation (model dependent).

KD Scientific

- Single and dual syringe infuse, infuse withdraw & continuous models
- Holds syringe sizes from 0.5ul to 140 ml (Model dependent)
- Flow rates down to the picoliter/min (Model dependent)
- Programmable interface without the need for a PC (Model dependent)
- USB/RS-232/TTL Interfaces for external control (RS232 available on Legato® 200 Series Only)
- Rugged construction with cold rolled steel chassis

Applications: Electrospinning, Flow Cytometry, Microfluidics, Mass Spec, Drug Discovery, Organic Synthesis, Nanofluidics, Stereotaxic Injections

Legato® 100 Single Syringe Infusion Pump: This pump is ideal for applications where a single syringe is used.

Legato® 101 Dual Syringe Nanoliter Pump: This infusion only pump is ideal for applications where dual syringes are required with small volumes under 10ml.

Legato® 110 Single Syringe Infusion/Withdraw Pump: The Legato® 110 is based on the Legato® 100. It offers infuse/withdraw flow control and programmability for up to two multi-step programs of 50 steps each. This pump is ideal for more complex multi-step dosing and has multi-mode operation.

Legato® 110 DRS Dual syringe pump combination: Two Legato® 110 pumps connected by an input/output cable. Both pumps can be started synchronously and operated at different flow rates.

Legato® 180 Dual Syringe Picoliter Infusion/Withdraw Pump: For low flow with program options for 2 programs. 50 steps each. User definable flow rates with selectable target volume or time values to control the total infusion volume.

Legato® 185 Single Syringe Infusion/Withdraw Pump: It offers infuse/withdraw flow control and programmability for up to two multi-step programs of 50 steps each. This pump is ideal for more complex multi-step dosing and has multi-mode operation. Minimum flow rate only 0.54 pl/min.

Legato® 200 Dual Syringe Infusion Pump: This unit supports infuse only. User definable flow rates with selectable target volumes or time values to control the total infusion volume.

Legato® 210 Dual Syringe Infusion/Withdraw Pump: This unit supports infuse only, withdraw only, infuse/withdraw, withdraw/infuse and continuous mode. User defined flow rates with selectable target volumes.

Legato® 210P Dual Syringe Infusion/Withdraw Pump: as Legato® 210, features additional multi-step programming with user defined configurations/programs of up to 1000 steps. Up to 40 programs of 25 steps each can be stored in memory.

Legato® 270P Dual Push/Pull Syringe Pump: as Legato® 210, features additional user defined configurations/programs of up to 800 steps. Up to 40 programs of 20 steps each step can be stored in memory.

Syringe Pumps Legacy®

The simple and easy to use Legacy® pumps are a high value solution for delivering precise and smooth flow in research and production applications. The KDS 100 pump gives customers the most cost effective solution for infusing fluids. Alternatively, the KDS 200 gives advanced features with RS232 and TTL interfaces and can be daisy chained together to create a pumping network. KDS 220 holds up to 10 syringes.

- Vibration Elimination System
- Flow Direction Indicator
- Fast Forward/Reverse
- Power Recovery Diagnostics
- Syringe Library
- Flow Rate Selection
- Volume Dispense Mode
- Direct Entry Syringe Diameter
- Optional: Foot Pedal Interface, NIST Certificate, Alarm

KDS 100 Single-Syringe Infusion Pump: Economical pump combining precision flow with outstanding ease-of-use and exceptional durability.

KDS 101 Two-Syringe Nanoliter Pump: For microdialysis and similar applications which require virtually pulseless flow at very low flow rates.

KDS 200 Two-Syringe Infusion Pump: Programmable pump for daisy chain connection. Feature-laden and with a broad speed range and a wide range of syringe sizes it meets the requirements of most laboratory applications.

KDS 220 Multi-Syringe Infusion Pump: For applications requiring multiple syringes. This pump has been modified to hold up to 10 syringes.

Type	For syringes	Flow rate	Dimensions (W x D x H) mm	Weight kg	PK	Cat. No.

Multi-Rack for syringe pumps Legato® 200 and Legato® 210

Modular syringe racks can be purchased to create a multichannel syringe pump. These racks will work with the Legato® 200 or Legato® 210 only. All of them could be for infuse only as well.

KD Scientific

Small Syringe Multi-Rack: The small syringe multi-rack will accommodate up to six 30ml to 60ml syringes or up to ten 0.5µl to 20ml syringes. For Infuse/Withdraw applications.

Large Syringe Multi-Rack: The large syringe multi-rack will accommodate up to four 60ml to 140ml plastic syringes. For Infuse/Withdraw applications.

Microliter Syringe Multi-Rack: The microliter syringe multi-rack will accommodate up to four 0.5µl to 10ml syringes. For Infuse/Withdraw applications.

Description	PK	Cat. No.
Small Syringe Multi-Rack	1	6.267 703

Microliter Syringe Multi-Rack	1	6.267 705

► Disposable syringes please see page 1460.

1 Syringe pump Legato® 130

The Legato® 130 Nanoliter pump is ideal for stereotaxic and micro manipulator devices.

KD Scientific

The Legato® 130 is an infuse/withdraw single syringe pump. It works with micro syringes from 0.5 to 1000 µl. Any type of syringe can be used including glass and plastic. It has a remote pump head which can be placed close to the experiment to eliminate dead volume with long tubing. The remote pump head is ideal for use with a micromanipulator, stereotaxic and other clamping devices. Syringe size and flow rates are easily displayed as well as the volume delivered and the elapsed time. A wide dynamic flow range from picoliters per minute to milliliters per minute can be programmed into the pump.

- Remote pump head
- Large colour touchscreen display
- 2 programs with 50 steps each
- Icon driven software
- USB, RS-232 and RS485 interface
- Precise and smooth flow

Specifications

Flow rate:	3.66 pl/min to 3.82 ml/min (depending on syringe size)
Accuracy:	±0.5 %
Syringe size:	0.5 to 1000 µl

4 Tubing Versilic®, Silicone

Versilic® 60 shore tubing is biologically inert and does not inhibit cell culture. It stays flexible down to -50 °C and maintains its chemical, mechanical and electrical performance up to +200 °C. Versilic® meets the European Pharmacopoeia requirements for silicone elastomer for closures and tubing, USP Class VI biological tests and ISO 10993 biocompatibility (systemic toxicity, irritation, sensitization, citotoxicity, hemocompatibility and Ames test).

Water jet pumps/Water jet pumps

1 Water jet pump, PP

This pump will work on pressures up to 10 kg/cm². With built-in, non-return valve to eliminate back flow. Useful for vacuum removal of spilt chemicals, as well as for filter work. Easily dismantled for cleaning.

Kartell

Description	PK	Cat. No.
Water jet vacuum pump	1	9.303 031
Tubing connectors	1	9.303 032

2 Water jet pumps, PP

With constant ultimate vacuum, high suction flow rate and very low water consumption. Can be connected to mains water system in a number of different ways using the adapter supplied and reducing adapters that are available as accessories. For continuous use at temperatures up to 80 °C max. High chemical resistance as the media being pumped only comes into contact with PP, FKM and PTFE. Integral non-return valve increases safety.

BRAND

Comprises: Water jet pump, including:
Mains water connections: R 3/4" sleeve nut, R 1/2" reducing adapter and flexible tubing connection (nozzle) with external diameter from 10 mm to 12 mm.
Vacuum connection: Detachable nozzle with external diameter from 6mm to 9mm and GL 14 screw cap.

Type	PK	Cat. No.

1 Piston pump LLG-uniVACUUPUMP 1

1

The **portable** piston pump LLG-uniVACUUPUMP 1 has been developed **for vacuum and pressure applications** in the laboratory, in particular in the field of Life Science. Typical applications for this low-cost vacuum pump are the single funnel filtration of aqueous and buffered solutions, SPE, as well as any applications where no harmful gases are conveyed. The LLG-uniVACUUPUMP 1 operates oil-free and can also be used as a compressor to a pressure up to 3.3 bar. This allows you, for example, pressure filtration, if vacuum filtration is not sufficient. Not recommended for pumping organic, acidic, or basic vapours.

Advantages:

- Dry-running technology for physical applications
- Can be used as a vacuum pump and compressor
- Cost-effective alternative for water pumps
- Sound suppressor for quiet operation
- Compact, light weight and portable
- Oil-free, suitable for continuous operation
- Suction/pressure connection: hose nozzle DN 6 for hose inner diameter 6 mm

Scope of delivery: Pump, incl. 2 hose clamps, EU + UK-plug power cord.

Specifications

Pump speed 50/60 Hz at atmospheric pressure:	9.2/11 l/min
Final pressure:	292 mbar
Max. overpressure:	3.3 bar
Max. operating gas temperature:	60 °C
Permissible ambient temperature:	10 ... 40 °C
Suction/pressure connection:	DN 6
Noise emission:	<45 dB(A)
Motor power:	25 W
Dimensions (W x D x H):	194 x 114 x 191 mm
Weight:	2.0 kg
Power supply:	230 V/50 Hz
IP code:	IP 20
Warranty:	3 years

Type	PK	Cat. No.
LLG-uniVACUUPUMP 1	1	6.263 580

2 Piston pump, complete

2

Piston pumps are a reliable partner for physical applications, notably with aqueous solutions. Being a vacuum pump and compressor, it can be used for a wide variety of applications such as filtration, gas sampling, vacuum drying, desiccation and automation technology. The integrated vacuum and pressure gauges and regulators allow the pressure to be continuously monitored and adjusted. For use with dry or aqueous vapor applications only.

Welch Vacuum

- Oil free
- Easy to clean
- Easy maintenance
- Easy handling and control features
- Robust construction
- Pressure connection with exhaust silencer
- Suction/pressure connection: hose nozzle DN 8 for hose inner diameter 8 mm

Scope of delivery: vacuum pump, vacuum and pressure regulators with gauges, inlet water trap and muffler

Specifications

Suction/pressure connection:	DN 8
Ambient temperature:	10 ... 40 °C
Max. Operating gas temperature:	60 °C
Noise DIN EN ISO 2151:	56 dB (A)

IP code: IP 20

9. Vacuum technology, Drying, Dry storage

Diaphragm pumps/Pumps

Diaphragm pumps, Aluminium PTFE design, ME 1, MD 1

The diaphragm pumps ME 1 offer a compact and high performance solution.

VACUUBRAND

With their easy-to-use functionality, they are a perfect partner for both single and multiple filtrations.

One-stage diaphragm pumps are an excellent solution for continuous, oil-free pumping of gases and vapors for modest vacuum requirements. In contrast to water-jet pumps, they do not consume water and therefore do not produce any contaminated waste water in daily use.

Vacuum filtration is frequently used for sample preparation in chemistry, microbiology, waste water control and analysis. Typical applications for the ME 1 are aqueous filtrations. The PTFE diaphragm and valves are rugged and provide high chemical resistance. If aluminium has the required specific resistance, solvent-containing samples can also be filtrated.

Diaphragm pumps chemistry design, ME 1C, MZ 1C, MD 1C

The diaphragm pumps ME 1C offer a compact and high performance solution. With their easy-to-use functionality, they are the perfect partner for both single and multiple filtrations.

VACUUBRAND

One-stage diaphragm pumps are an excellent solution for continuous, oil-free pumping of gases and vapors for modest vacuum requirements. In contrast to water-jet pumps, they do not consume water and therefore do not produce any contaminated waste water in daily use.

Vacuum filtration is frequently used for sample preparation in chemistry, microbiology, waste water control and analysis. In the chemistry diaphragm pumps ("C") all major parts in contact with pumped media are made of chemically resistant fluoroplastics. The ME 1C is also often used for solid phase extraction (SPE).

An optional manual regulator valve with dial gauge enables variable fine adjustment of the pumping speed and the ultimate vacuum.

Diaphragm pumps, Aluminium

- Improved performance, increased pumping speed (up to 16 m³/h) and better ultimate vacuum (up to 0.5 mbar).
- Extend applications with non-aggressive gases whether used in the laboratory or for industrial processes.
- Very low leak rate due to enhanced leak-tight tubing connections, resulting in consistent performance characteristics
- even after many years of operation. Ideal for analytical applications.
- Long diaphragm and valve lifetimes: made of highly flexible FPM, with fabric-reinforced double diaphragms for improved long term stability.
- Very quiet and ultra low vibration due to compact drive with patented motor drive system. Ideal as a built-in component for sensitive analytical equipment.
- Easy to clean due to smooth surfaces. A robust solution for numerous applications in industrial environments

The VARIO® design provides vacuum control by precise and continuous adaption of the diaphragm pumps motor speed, and includes the vacuum pump, as well as the VACUU-SELECT controller.

9. Vacuum technology, Drying, Dry storage

Diaphragm pumps/Pumps

1 Diaphragm vacuum pumps -NT Series, Chemistry design

- Improved performance, increased pumping speed and lower ultimate vacuum extends applications in both the laboratory and in industrial applications.
- Long-life diaphragm with PTFE sandwich construction and unstressed diaphragm support.
- Easy service/exchange of diaphragm or valves due to novel integrated valve head assembly. Easy dismantling, cleaning and reassembly without requiring readjustment.
- Very quiet and ultra low vibration due to compact drive with patented motor control system. Ideal as a built-in component for sensitive equipment in both the laboratory and in industry.
- Superior vapour tolerance due to integral tubing connections and gas ballast valve for continuous purge (at ME 16C NT, MZ 2C NT, MD 4C/12C NT and MV 10C NT).
- Easy to clean due to smooth exterior surfaces.

VACUUBRAND

The VARIO® design provides vacuum control by precise and continuous adaption of the chemistry diaphragm pumps motor speed, and includes the vacuum pump, as well as the VACUU-SELECT controller.

* diaphragm pump with reduced leakage rate (mbar x l/s). Country-specific power cord versions available on request.

2 Diaphragm pump MPC 101 Z

The two-stage pump is designed for pumping and compressing gases and vapours and generate vacuum e.g. for rotary evaporators, vacuum ovens and vacuum filtration.

Welch Vacuum

Their electrical conductivity prevents electrostatic charging and minimizes the risk of the gas mixture igniting inside the pump.

- For tubes with ID = 8 mm
- Chemically resistant
- Resistant to aggressive solvents and acid vapours
- Elastomer diaphragms with PTFE layer
- Pump and connection heads are carbon fibre reinforced
- Integrated motor protection switch
- Vibration isolating feet

Scope of delivery: 2-head chemical diaphragm pump, external power supply and device connection cable with plug (EU, UK).

Specification

Pump speed 50/60 Hz:	16.7/18.3 l/min
Final vacuum (abs.):	< 8 mbar
Suction/pressure connection:	Hose nozzle DN 8
Noise:	< 44 dB(A)
Motor power:	60 W
Voltage/frequency:	230 V/50/60 Hz
Dimensions (W x D x H):	225 x 195 x 147 mm

Diaphragm vacuum pumps LABOPORT® N820G/N840G, chemically-resistant

The compact pumps feature a control knob for manual adjustments of the flow rate, making them well suited to a wide variety of applications, e.g. rotary evaporation, distillation, gel drying, degassing as well as the use with vacuum ovens and vacuum concentrators. Due to the manual rotational speed control, the pumps are quiet, very energy efficient, and can be optimally adjusted in accordance with the application.

- Easy-to-clean surface
- Adjustable in flowrate due to manual rotational speed control
- Combination of PTFE pump head and PTFE-coated diaphragm makes the pump ideal for extremely aggressive/corrosive gases and vapors
- High level of compatibility with vapor and condensation
- Integrated gas ballast valve
- 3-color status display: In operation/Standy/Error
- ATEX-compliant in accordance with II 2-G IIB+H2 T3 internal atmosphere only
- 100 % oil-free transfer to ensure uncontaminated transfer, evacuation and compression
- Optional: Easily expandable with separators and/or condensers

Specifications

Ultimate vacuum (abs.):	6 mbar
Operating pressure:	0.1 bar
Connectors for tube:	ID9/10 mm
Permissible ambient temperature:	5 ... 40 °C
Pump head:	TFM™ PTFE
Diaphragm:	PTFE-beschichtet
Valves:	FFPM

9. Vacuum technology, Drying, Dry storage

Diaphragm pumps/Pump units-speed controlled

Vacuum Pumps Rotavac Vario

Suitable for Rotary evaporators Hei-VAP series. Controllable vacuum pumps for digital regulation of the vacuum via operation panel or directly at the unit.

Heidolph

- High distillation rates and reduced process time by 30 %.
- Solvent recovery up to 99 %.
- Pump stops automatically as soon as the set vacuum is reached and reliably holds the vacuum constant
- Increased diaphragm performance life due to periods of non-operation
- Low energy consumption
- Significant noise and vibration reduction
- The pumps can be combined with a condenser

1 Vacuum Pumps Rotavac Vario Control

- 3-stage diaphragm pump
- High suction capacity for fastest evacuation
- Even if the gas ballast valve is open an excellent ultimate vacuum is reached when working with easily condensable vapors. This makes distilling high boiling point solvents such as DMF or DMSO possible at low bath temperatures

Heidolph

Specifications

Suction capacity:	1.7 m ³ /h
Ultimate vacuum:	2 mbar
Power input:	160 W
Dimensions (W x D x H):	167 x 236 x 196 mm
Weight:	5.4 kg

Chemistry Pumping Units VARIO® select

NEW

The combination of speed controlled VARIO® chemistry diaphragm pumps and the new VACUU·SELECT vacuum controller makes the VARIO® select chemistry pumps the ideal solution for chemical processes that require precise vacuum, such as rotary evaporation, vacuum drying or vacuum concentration.

VACUUBRAND

- High chemical resistance and therefore ideally suited for pumping aggressive gases and vapours.
- Short process times and smooth running due to optimal setting of the pressure via the VACUU·SELECT controller.
- The VARIO® technology controls the vacuum precisely and efficiently via motor speed.
- Power consumption, maintenance and noise are exceptionally low.
- The outlet catchpot and solvent condenser combine to prevent solvent vapor emissions into the lab, allowing for nearly full recovery of solvents.

Diaphragm pumps/Pump units-speed controlled-Pump units-valve controlled

1 Chemistry Pumping Unit PC 3001 VARIO® select with condenser Peltronic®

The PC 3001 VARIO® select pumping unit precisely controls the vacuum level in order to achieve unparalleled process control.

VACUUBRAND

This pump is suitable for even high boiling point solvents. The integrated VACUU-SELECT controller provides an easy-to-use, application based interface that covers all common lab applications. The pump's variable motor speed responds to demand, reducing energy waste and mechanical wear, ensuring unrivaled service life for the diaphragms.

- For solvent evaporation, the controller detects solvent boiling and automatically adjusts the pump's motor speed to maintain process control
- User-defined applications with simple drag-and-drop editing
- Small footprint and low weight for flexible use in the laboratory
- The inlet separator, made of glass with a robust protective coating, prevents particles and liquid droplets from entering the pump
- The included emission condenser Peltronic® works without any cooling media like water or dry ice.

Scope of supply: Chemistry pumping unit PC 3001 VARIO® select completely mounted with condenser Peltronic®, ready for use, with manual.

Without mains cable, please order separately.

Vacuum Pumps Rotavac Valve

Suitable for all Hei-VAP Rotary evaporators.

Heidolph

- Vacuum can be controlled manually or via valve operated vacuum controllers.
- With two-stage diaphragm pump
- All components which come in contact with media are built from chemically resistant fluoropolymer
- The durable PTFE design guarantees an superior diaphragm lifespan
- The head cover and clamping disc have a stable core made of metal which offers unsurpassed long-term performance of your operational parameters
- The direct pump drive (without belt) is exceptionally quiet, creates a very low vibrational environment and reduces the need of wear and tear parts to a minimum
- The gas ballast valve has been optimized to prevent media condensing in the pump
- The pumps can be combined with a condenser
- For combination with the Hei-VAP Precision Rotary evaporators a vacuum valve is necessary.

1

1 Vacuum Pumps Rotavac Valve Control

- High suction capacity for fast evacuation
- Suction capacity for up to 3 rotary evaporators at the same time
- Depending on your application you can switch on and off the vacuum pump via switchbox

Heidolph

Specifications

Suction capacity:	2 m ³ /h

9. Vacuum technology, Drying, Dry storage

Diaphragm pumps/Pump units-valve controlled

Chemistry Pump Units and Vacuum Systems

Compact design, ready to use, no set-up required. Constructed in chemically resistant materials.

VACUUBRAND

Quiet operation.

- 100 % oil-free pumping of gases
- gas ballast as standard for working with condensable vapours
- good vacuum even with gas ballast
- high vapour tolerance for water and solvents
- long service life, low maintenance

Features:

2AK: Inlet and outlet separator

AK + EK: Inlet separator, exhaust vapour condenser

PC 510 select (two-stage)/610 select (three-stage) : with AK + EK; 1 electronically controlled vacuum port

PC 511 select (two-stage)/611 select (three-stage) : with AK + EK; 1 electronically controlled and 1 manually controlled vacuum port

PC 520 select (two-stage)/620 select (three-stage) : with AK + EK; 2 electronically controlled vacuum ports

Characteristics and applications:

Without vacuum control:

MZ 2C NT +2AK: e.g. filtration, distillation without condensation at the outlet

MZ 2C NT +AK+EK: Well-proven unit for a wide range of applications for the single-user, e.g. gel drying, distillation, vacuum concentrator. For solvents with medium to low volatility.

MD 1C +AK+EK: Space-saving single-user configuration. For high-boiling-point solvents.

MD 4C NT + AK+EK: Larger or multi-user applications, the local vacuum network VACUU-LAN®.

For high-boiling solvents.

MV 10C NT +EK: Four-stage diaphragm pump with exhaust vapour condenser. For particularly high demands regarding low ultimate vacuum and pumping speed in chemistry laboratories, pilot plant or small production units.

With vacuum controller:

PC 510 select/511 select: Well-proven units for a wide range of processes in chemistry laboratories, e.g. all common solvents. PC 511 select with additional manually controlled vacuum port.

PC 610 select/611 select: Proven solution for supporting electronically controlled evaporation or drying processes even with many high boiling point solvents. PC 611 select with additional manually controlled vacuum port.

PC 520 select/620 select: Compact solution for simultaneous operation of two electronically controlled vacuum applications with one single pump.

Rotary vane pumps/Pumps

GENERAL CATALOGUE EDITION 21

1

1 Rotary vane pumps

Vacuubrand rotary vane pumps encompass one and two stage pumps with throughputs from 2 to 9 m³/h.

VACUUBRAND

Typical rotary vane pump applications include, use as a backing pump for turbomolecular pumps but also serve in diverse chemical laboratory applications.

Features and important characteristics: high water vapour tolerance, vacuum tight pumping mechanism when switched off, high performance gas ballast mechanisms. These increase the overall performance potential of these pumps, the service life of mechanical parts, increase oil-change intervals and reduce maintenance overheads.

Rotary vane pump CRVpro 2/4/6/8

The Welch CRVpro pumps are high-performance two-stage vacuum pumps.

Welch Vacuum

They impress with their long service life, high reliability and low maintenance requirements.

The CRVpro series are the perfect partners for freeze dryers, vacuum concentrators, Schlenklines, glove boxes and vacuum ovens, as well as industrial applications.

- Cool running operation for less oil consumption
- Coated oil case to slow metal corrosion
- Extended oil change intervals for less maintenance costs
- Dual voltage

Scope of supply: Every pump is supplied complete with Director™ Premium vacuum pump oil, centering rings, clamping rings and motor overload protection.

9. Vacuum technology, Drying, Dry storage

Rotary vane pumps/Pumps-Accessories/for vacuum pumps

1 Rotary Vane Vacuum Pump RC 6

The Rotary Vane Vacuum Pump RC 6 has been designed to minimise the adverse effects of condensable and corrosive vapours. Its main components are a two-stage rotary-vane pump and a two-stage chemistry diaphragm for optimised corrosion resistance. The diaphragm pump continuously evacuates the oil reservoir of the rotary-vane pump in order to keep the partial pressures of solvent vapours, oxygen and corrosive gases at a low level and/or below their condensation point. The RC 6 is a low-maintenance pump for freeze-drying and other applications requiring an ultimate vacuum in the 10^{-3} mbar range.

Scope of supply: Pump, overload circuit breaker and mains cable (2 m), centering and clamping ring for inlet, particulate filter, operating instructions, oil (bottle of 500 ml).

1

Specifications

Pumping speed 50/60 Hz:	98.33/115 l/min
Ultimate vacuum (partial) without gas ballast:	0.0004 mbar
Ultimate vacuum (total) without gas ballast:	0.002 mbar
Ultimate vacuum (total) with gas ballast:	0.01 mbar
Oil capacity (B-Oil):	min. 0.34 l; max. 0.53 l
Inlet connection:	Small flange NW 16
Outlet connection:	Hose nozzle NW 8-10 mm
Motor rating:	0.37 kW
Nominal speed 50/60 Hz:	1500/1800 rpm
Dimensions (L x W x H):	510 x 305 x 230 mm
Weight:	24.2 kg
IP code:	IP 40

Type	Plug type	PK	Cat. No.

Country-specific power cord versions available on request.

Chemistry pumping units

Vacuubrand chemistry vacuum systems and chemistry pumping units for fine to high vacuum ranges. Complete chemical vacuum systems and chemical pump stands offer the advantages of practical, connection-ready units.

VACUUBRAND

- compact structure, little space requirement and a high degree of mobility
- the great convenience of proven pump stand configuration
- good ultimate vacuum even with gas ballast and smooth running
- high tolerance to water and solvent vapours due to efficient gas ballast

3

3 Chemistry pump device GP3

The mobile chemistry pump stand has a cold trap and a pump fork with a separate aeration cell. The pump fork has four independently switched vacuum valves and additionally four independently switched aeration valves. So can every sample holder get individually evacuated or aerated without affecting the vacuum of the other sample holders. You can also connect an electronic vacuum gauge.

NEW

KGW

The vacuum pump is not included in the delivery.

- Small flange KF-NW 16 with vacuum manometer
- GL18 glass screw thread
- 10 mm PTFE-olive
- PE-table plate
- Aluminum-rack
- Four lockable guide rolls

Specifications

2 Cold traps, borosilicate 3.3, one-piece

Borosilicate 3.3 glass, one-piece, with GL 45 neck and cap closure, GL 14 threaded side connections with caps and plastic tubing adapters.

Capacity ml	PK	Cat. No.
250	1	9.305 349

Cold traps with Dewar flask, borosilicate glass 3.3

Cold traps with Dewar flasks are made from 3.3 DIN/ISO 3585 borosilicate glass to hold LN₂ for vacuum applications.

KGW

The flasks are vacuum insulated and silver-plated. They are encased in metal sheet, blue coated for protection and have a plastic ring collar, into which the cold trap is inserted. Thus no additional support is needed for the cold trap.

The Dewar flask has got a theoretical coolant capacity of 1.0 L or 2.0 L respectively.

The cold trap has got a theoretical condensate capacity of 150 ml or 250 ml respectively.

Items supplied: Cold trap, Dewar-flask, plastic ring.

Dewar type 12C/18C: see no. 9.032.024/9.032.030

Versions Cold trap joints:

S29 = spherical joints

GL18 = glass screwhead with PTFE olive 10 mm

O 29 = spherical joints S29 with O-ring seal

The standard assembly is designed for use with LN₂ as coolant. When using CO₂ and acetone please order CO₂ grid separately (Dewar Type 12 C Cat. No. 9.032 081 and Dewar Type 18 C Cat. No. 9.032 082).

1 LLG-Vacuum measuring instrument DVR 2 pro

Versatile vacuum gauge for vacuum measurement between atmospheric pressure and 1 mbar.

- Mains independent due to battery operation
- Large display
- High measuring accuracy
- Optimal menu navigation
- With support rod
- All parts in contact with media are made of chemically resistant materials

DKD initial delivery calibration (Cat. No. 7.059 540) please order separately.

Scope of supply: Vacuum measuring instrument with connections for small flange D16, compression fitting and tubing nozzle for tubing with 6 to 10 mm ID.

Specifications

Measuring range:	1080 to 1 mbar (hPa), 810 to 1 Torr
Measurement principle:	Capacitive; gas type-independent absolute pressure measurement
Measuring accuracy:	< 1 mbar (0.75 Torr) ±1 digit
Power supply/battery:	9 V battery

6.268 865

Vacuum measuring instrument VACUU·VIEW

The rough vacuum gauge VACUU·VIEW covers the measuring range from atmospheric pressure down to 0.1 mbar very precisely. The combined rough and fine vacuum gauge VACUU·VIEW extended works in the enhanced range from atmosphere down to 10^{-3} mbar.

VACUUBRAND

The illuminated displays of both vacuum gauges enable comfortable reading.

- Compact design with integrated sensors one piece equipment for direct connect at point of interest
- Chemically resistant, heavy duty vacuum sensors highly reliable at harsh laboratory conditions even in case of very aggressive chemicals
- High repeatability and long-term accuracy under all typical conditions reliable and repeatable results
- Display with menu driven handling, easy to use e.g. for unit settings
- Compatible to gauge DCP 3000 and controller CVC 3000 or VACUU·SELECT
- The product is delivered ready for use

VACUU·VIEW

Chemically resistant ceramic diaphragm sensor for measurement in the rough vacuum range. VACUU·VIEW provides gas-independent pressure indication with precise capacitive readout. Highest precision and chemical resistance in the range from atmosphere down to 0.1 mbar, a perfect gauge for all rough vacuum applications.

VACUU·VIEW extended

The heavy duty combination of ceramic diaphragm sensor and ceramic jacketed Pirani sensor ensures reliable readings in the wide range from atmosphere down to 10^{-3} mbar. Precision and chemical resistance in an exceptionally wide range, one gauge covers all applications in the fine and rough vacuum range

3

9. Vacuum technology, Drying, Dry storage

Vacuum controller/Sensors and Controllers

Vacuum Controller VACUU·SELECT®

Fully equipped vacuum controller with capacitive, gas type-independent absolute pressure measurement using an alumina-ceramic diaphragm. While the base unit

VACUUBRAND

Vacuum Controller VACUU·SELECT® still requires a separate vacuum control valve as an accessory, there is the fully equipped Compact controller VACUU·SELECT® as two-point vacuum regulator with chemical suction line valve.

With connected vacuum valve the VACUU·SELECT® automatically detects the boiling point during solvent evaporation and switches to two-point control mode. The graphical user interface offers predefined vacuum processes for all common laboratory applications. Applications, such as desired vacuum and other parameters can also be put together and controlled individually.

- Interactive, graphic touch display for easy operation
- Touchscreen display can be operated with safety gloves
- Predefined vacuum processes for reproducible results and time savings in the laboratory
- Fully automatic evaporation at the touch of a button
- Easy-to-use application editor for creating your own processes
- Integrated help function
- Integrated ventilation valve also for inert gas
- Ethernet/USB (Type A) interface
- EX approval: II 3/- G IIC T4 X Internal Atm. Only

Specifications

Measuring range:	0.1 ... 1080 mbar
Accuracy:	<±1 mbar/±1 digit (after adjustment, constant temp.)
Housing:	Plastic, good chemical resistance
Connection venting valve:	Hose nozzle DN 4-5 mm
Vacuum connection (Compact controllers only):	Hose nozzle DN 6/10 mm
Ambient temperature range:	10 ... 40 °C
Dimensions (W x D x H):	152 x 127 x 41 mm
Weight:	0.745 kg
Power supply:	100 ... 230 V, 50/60 Hz
IP code/IP code front side:	IP 40/IP 42

Compact Vacuum Controller VACUU·SELECT®

Fully equipped two-point vacuum controller with capacitive, gas type-independent absolute pressure measurement using an alumina-ceramic diaphragm. Available as benchtop or stand version and ready to use due to standard laboratory connections.

VACUUBRAND

Scope of delivery: Vacuum controller VACUU·SELECT® with chemistry suction line valve, check valve, integrated ceramic vacuum sensor, venting valve and power supply.

1 Vacuum measuring instrument DCP 3000 with Pirani sensor VSP 3000

The Pirani-type vacuum sensor VSP 3000 offers an outstanding corrosion resistance and mechanical robustness for fine vacuum measurements. It is primarily designed for applications in chemistry and process engineering.

VACUUBRAND

The vacuum gauge DCP 3000 is now also available with this new Pirani sensor VSP 3000 for an increased measuring range down to the 10^{-3} mbar range. Up to eight external gauge heads (four of ceramic diaphragm-type VSK 3000 and four VSP 3000) can be connected simultaneously to the DCP 3000 vacuum gauge for easy measurements at multiple points. Communication between the DCP 3000 and the external components is provided by the especially developed bus control system VACUU-BUS®. It is self-configuring, easy to use due to standardized plug connectors and allows cable extensions up to 30 m. The large illuminated display, controlled by a simple jog wheel, displays the readings from each gauge head.

Performance features

- brand new rugged vacuum sensor VSP 3000 made of plastics and ceramics with high chemical resistance
- wide measurement range from atmospheric pressure to fine vacuum (10^{-3} mbar) due to Pirani measurement system (thermal conductivity)
- upto 8 gauge heads VSP 3000 (Atm. to 10^{-3} mbar), VSK 3000 (Atm. to 0.1 mbar) can be connected (4 of each)
- rugged, splash-water proof vacuum sensor, also for rough operating conditions
- with vacuum controller CVC 3000, VSP 3000 and vacuum solenoid valves of type VV-B vacuum control from atm. to 10^{-3} mbar is achieved

Specifications:

Upper measuring limit mbar/hPa/torr:	$1 \times 10^3 / 7.5 \times 10^2$
Lower measuring limit mbar/hPa/torr:	$1 \times 10^{-3} / 1 \times 10^{-3}$
Measurement principle	Thermal conductivity acc. to Pirani
Measurement uncertainty	$\pm 15\%$ of indicated value in the range 0.01-10 mbar/hPa/torr
Vacuum connection	Small flange KF DN 16 and hose nozzle DN 6/10 mm
Control connections:	1 socket for supply/Vario pump 2 expandable sockets for external sensors/valves
Rated mains voltage	100-230 V 50/60 Hz /CEE/CH/UK/US/AUS
Dimensions (desktop unit, L x W x H):	144 x 124 x 114 mm
Weight (without mains adapter):	0.44 kg

7 Glass drying pistol

Ideally suited for drying of small sample volumes. This sample dryer, for analysing substances and synthetic products, uses heat, desiccant and vacuum at the same time for optimum results. Its temperature range can be adjusted between +30 °C to +160 °C, with a temperature stability of ±1 °C.

LABC-Labortechnik

The two-part drying vessel is approximately two parts of DURAN® glass:
1) Drying tube with an outer diameter of 44 mm, length inside 200 mm, joint NS45.

7

2) Ground flask with stopcock for connection to a vacuum pump.
The glass drying oven needs to be fixed with screw stand rod at the laboratory stand to be secured.

Dimensions (without mounting for tripod and Flask): H 120 mm x B 195 mm x T 185 mm. Weight: 2 kg

Supplied with: Glass drying oven consisting of heating element with support rod and glassware with ground drying tube and ground flask with stopcock.

9. Vacuum technology, Drying, Dry storage

Desiccators/Desiccators - plastic

GENERAL CATALOGUE EDITION 21

1

1 LLG-Vacuum desiccators, polycarbonate, round form, "Heavy Duty"

Cost effective alternative to glass desiccators. Highly transparent, lightweight, shatterproof, made of polycarbonate. Silicon O-ring and specially designed 'locking clip' allows use without grease and ensures an airtight seal. Flange lock holds the bottom and the lid together during non-vacuum conditions. Three-way stopcock provides great convenience for consistent vacuum draw, vacuum release or gas exchange e.g. inert gas. Maximum vacuum of 1.3 mbar (1.3×10^{-4} MPa) for more than 72 hours. Wide base provides superior stability. Hose connection outer diam. 9.5 mm.
Also available in brown with UV-blocking effect for light sensitive samples.
G Models will be delivered with a vacuum gauge.

Included in delivery: Drying agent tray, perforated sample tray, O-ring and flange locker.

3

3 Portable Desiccator DURAPorter™, PC

Heathrow Scientific

Ideal for transporting biological and clinical samples, as well as instruments and products that you want to keep clean and dry under testing environmental conditions.

Are light weight and easy to carry; they are ideal for moving samples that must be protected from humidity, dust and other environmental influence. The clarity of the DURAPorter™ enables the user to visibly check sample integrity, so that it can be opened using the right precautions.

- Polycarbonate construction are available in three colours for use/owner identification
- Silicone water-tight seal and three lid clasps provide secure closure
- Carry handle folds neatly into body space allowing the units to be stacked
- Lid opens a full 180°, allowing total access to contents and making it easier to clean
- Will accommodate 13 and 16 mm tubes in a 72-place one rack®, or similar sized/brand of rack
- Use the separators provided to create your own compartment sizes, or use empty to transport larger products and equipment
- Autoclavable

Matching rack (e.g. Cat. No. 9193 997, 9193 998) please order separately.

Further colours available on request.

Desiccators/Desiccators - plastic-Desiccator cabinets

1 Desiccator Nalgene™, Type 5311, PC

Transparent, lightweight, unbreakable, for vacuum or non-vacuum use. With stopcock.
Large, stable base. No danger of implosion. Capable of maintaining 0.95 bar negative pressure over a 24 hour period. With silicone O-ring, no lubrication required.
Suitable for 230 mm diameter desiccator discs or plates. Max. height over plate 195 mm. Plate not included.
External diameter: 280 mm
Internal diameter: 251 mm

Thermo Scientific

2 LLG-Vacuum desiccator cabinets, polycarbonate, square form, "Heavy Duty"

High-quality and stable construction made of polycarbonate. Highly transparent, lightweight, shatterproof and stackable. The Silicon O-ring and specially designed locking clip allow use without grease. Three-way stopcock provides great convenience for consistent vacuum draw, vacuum release or gas exchange e.g. inert gas. Stopcock outer diameter: 9.5 mm. Hose connection outer diam. 9.5 mm. Maximum vacuum of 1.3 mbar (1.33×10^{-4} MPa) for more than 72 hours, with built-in vacuum gauge. Also available in brown with UV-blocking effect for light sensitive samples.

Included in delivery: Vacuum gauge, O-ring, drying agent tray, 2 x perforated sample trays (VDC-11 and VDC-21) or 3 x perforated sample trays (VDC-31 and VDC-41).

3 LLG-Desiccant drying agents, silica gel, self-indicating

With orange indicator colour. Grain size 1 to 3 mm or 2 to 5 mm. Self-indicating drying agent free from any heavy metals and therefore environmentally compatible. The gel is naturally orange when active and at a 6 weight-% saturation level. As the gel adsorbs moisture, the colour changes into green.

The range of application is identical with that of white silica gel. The colour change, however, represents a great advantage since it allows monitoring of the saturation level. The gel can be regenerated when heated at a temperature of maximum 120 °C until it turns to its original orange colour.

Absorption capacity (RH : residual moisture)	RH 20 % 12 weight %
	RH 35 % 20 weight %
	RH 50 % 27 weight %

2 3 Filament Dry Cabinet for 3D-Printing

The Dry Cabinet provides low humidity environment and is suitable for storing various types of filament material. 4 filament feed ports supporting up to 3 mm filaments allows direct printing of dry filament from the cabinet while in humidity controlled storage. Adjustable hanging rod will allow hanging of dry filament spools up to 330 mm in diameter. Air tight cabinet will prevent moisture and dust from contaminating your printed project. Low energy consumption. Convenient design with no consumable parts nor desiccants to replace, no water tanks to empty. Powerful molecular sieve desiccants keeps filament dry without heat to maintain tensile strength.

Taiwan Dry Tech Corp.

- <20 % RH Low Humidity Storage
- 4 filament feed ports for direct printing
- Dries without heat: Maintains tensile strength
- Standalone Hygrometer for Active Monitoring
- Fast 2 Hour Recovery
- Fully adjustable spool hanger

9. Vacuum technology, Drying, Dry storage

Laboratory Freeze drying/Freeze dryers

Laboratory freeze dryer VaCo Series

Freeze dryer in modular design for routine applications in the laboratory. Cooling is done by air-cooled compressor with direct temperature measurement at the cooling surface. Pre-cooling of the condenser is possible to avoid a delayed start or thawing of the samples. Further functions are the display of the vacuum and temperature curves, an error message memory and an operating hours counter.

Zibus Technology

- 3 program places with 3 drying stages each
- Operation via 4.3" colour touch screen
- Adjustable parameters for each drying stage: Hold-up time, vacuum setpoint, (shelf space temperature (with the option heated shelf spaces) for VaCo 5/VaCo 10)
- Displayed actual values during operation: Condenser temperature, vacuum (mbar), time
- Automatic defrosting of the ice condenser (VaCo 10)
- Variable shelf space (VaCo 10)
- Stainless steel housing resistant against commercial disinfectants
- CFC-free refrigerant

Operating language: English or German, other languages on request.

Laboratory Freeze drying/Freeze dryers

GENERAL CATALOGUE EDITION 21

1 Laboratory freeze dryer VaCo 5

NEW

Zibus Technology

Required for operation: Basic unit VaCo 5, ice condenser (-50 °C or -80 °C) and optional accessories.
Please order components separately.

Specifications

Ice condenser

Temperature:	-50 °C or -80 °C
Ice condenser capacity:	5 kg/24 h
max. ice capacity:	8 kg
Volume:	16 l
Cooling system:	one-stage (-50 °C)/two-stage (-80 °C)
Material:	Stainless steel 1.4404/AISI316L
Dimensions (Ø x H):	270 x 280 mm

Basic unit

Weight:	60 or 75 kg (depending on the version ice condenser)
Dimensions (W x D x H):	800 x 530 x 400 mm
Power supply:	230 V, 50/60 Hz

Type	PK	Cat. No.

2

2 Illuminated magnifying lens Lux-50

Orange body colour, with illuminator and plastic lens. Requires 2 x 1.5 V AA batteries for operation (included).

Lens	Magnification	PK	Cat. No.
mm			
Ø 50	2.5x - 5x	1	9.151 817

3

3 Handheld magnifier with illumination

- Hand held magnifier with magnification of 3X and 5X (depending of the view location)

ISOLAB

- Ergonomic handle design
- Aspherical lens provides spherical aberration and distortion free images with edge-to-edge sharpness.
- LED bulb with on/off control.
- Adjustable angle of illumination.

Description	PK	Cat. No.
3X / 5X magnification	1	6.267 407

4

9.151 680

4 Magnifying lens, economic

With practical additional lens in the handle. Particularly suitable for those who require a low level of magnification. An additional high-magnification lens enables small details to be read. Transparent plastic frame ensures easy orientation on the reading material. With eyelet in the end of the handle for round-the-neck cord which is supplied. The biconvex reading magnifiers offer a large visual field in a medium magnification range. Plano-convex additional lens with 5x magnification in handle.

Optical instruments/Magnifiers

1

1 Micromagnifier with illumination

NEW

Eschenbach

Suitable for inspecting a wide variety of surfaces such as metals, textiles, minerals, varnishes, etc. The wide focusing range enables raised or depressed features (e.g. holes) to be examined in detail.

- Precise focusing with adjustable wheel
- Wide adjustment range is able to compensate for a high level of visual impairment
- High brightness level due to large lens aperture
- The LED light can be used when required
- Magnification 30 x, glass lenses

Specifications

Colour temperature: 6500 K
Battery: 2 x AA (not included)

Description	Magnification	PK	Cat. No.
with illumination	30x	1	6.313 363

2

2 Light Boxes slimlite plano

Super flat light boxes, only 8 mm thin, with built-in rechargeable battery.

Kaiser Fototechnik

Illumination by daylight-type LEDs (approx. 5000 Kelvin).

Touch switch for ON/OFF and brightness control, cm and inch scales. Optional mains or battery operation.

Lithium ion battery: 1050 mA. Mains/charging adapter included.

Binocular Microscopes for Schools/Laboratories B1-220E-SP

Established Quality with a new design. The B1 series covers a wide range of the daily work for Laboratory and University use. The Elite Series with improved optics and mechanics enables efficient work for many years.

Motic

- Observation Tube Binocular 45°/Phototube 30°, 360° rotating
- Widefield eyepieces WF10X/18 mm
- Quadruple revolving nosepiece
- Semi-Plan objectives SP 4X, 10X, 40X S, 100X S-Oil
- Coaxial coarse and fine focusing system with tension adjustment
- Built-in low position coaxial rackless mechanical stage
- Focusable 1.25 N.A. Abbe condenser with iris diaphragm
- LED illumination 3 W with intensity control
- Power supply 100-240 V
- Dust cover and immersion oil

1

6.284 968

2 Educational Stereomicroscopes, RED 30S

With independent LED illumination. Innovative and user-friendly. Motic's "One-touch" sample clip helps to fix the specimen easily. Fixed arm type stand with large integrated carrying handle for a stable stand and easy transportation.

Motic

- With magnification changer (2x, 4x)
- Binocular head, 45° inclined
- Widefield eyepieces WF10X/20 mm
- Objective turret magnification changer (2X, 4X)
- Coarse focusing system with tension adjustment
- Base with fixed arm and carrying handle
- Incident and transmitted rechargeable LED illumination with independent intensity control
- Power supply 100-240 V (CE), charger and batteries included
- Black/white and frosted stage plates, "one-touch" sample clips and dust cover
- 10 years warranty

Type	Description	PK	Cat. No.
RED 30S	Binocular	1	6.281 648

2

Basic Biological Microscope for Education and Routine, BA210E

Compact and robust, the BA210E is ideal for the requirements of colleges and universities as well as for medical training institutes.

Motic

- Infinity Optics [CCIS®]
- Observation Tube Siedentopf Type, Binocular -/Phototube 30°, F.N. 20
- Interpupillary Distance 55-75 mm
- Eyepieces High-Eyepoint N-WF 10x/20 mm with dioptre adjustment on both eyepieces and rubber eyecups
- Reversed quadruple revolving nosepiece
- Objectives CCIS EC Plan 4x, 10x, 40x-S, 100x-S-Oil
- Built in low position coaxial, rackless mechanical stage (right hand control)
- Focusable Abbe condenser N.A. 1.25 with iris diaphragm and slot
- Illumination 3 W LED
- Universal power supply 100-240 V (CE)
- Scope of supply: Immersion oil (5 ml), power cord, Allen hexagonal key, thumb crew, vinyl dust cover
- 6 V/30 W HAL illumination available as an option

Optional, available: Phase-contrast 10x/40x, DF 10x-40x, Polarization

Light microscopes Panthera C

1

Motic

Upright light microscopes for education, research and diagnostics.

Due to high quality optics and digital features especially suited for professional users.

- Tube type Siedentopf, swiveling
- Widefield oculars for spectacle wearers with diopter adjustment on both oculars
- CCIS® Plan achromatic objectives UC PL
- Reversed coded nosepiece
- Focusable Abbe condenser with iris diaphragm and slot
- Illumination acc. to Köhler, with interchangeable illuminator
- With Motic LightTracer (Intelligent Light Management): LED light intensity, light memory, sleep mode (auto on-off), mode indicator
- Coaxial coarse and fine focusing system with tension adjustment
- Compact, built-in mechanical stage
- Integrated power supply with sleep mode

Additional equipment depending on the model with common contrast methods such as phase contrast, darkfield, single polarization or LED fluorescence (single-channel) possible.

4.668 673

Microscopy/Light microscopes

Light Microscopes Lab-Line OBL

The flexible laboratory assistant with infinity optical system and fixed, pre-centred Koehler illumination.

Kern & Sohn

- Tube 30° inclined, 360° rotatable
- Widefield eyepiece: WF 10x/20 mm
- Diopter adjustment at one eyepiece tube
- Quadruple nosepiece (backward inclined)
- Objectives 4x, 10x, 40x, 100x (Oil immersion), (different Quality objectives in different series)
- Infinity Optical System and Infinity corrected lenses
- Objective quality: Infinity E-Plan
- Coaxial pre-and fine focussing
- ABBE 1.25 N.A. condensor with aperture diaphragm, focusable and pre-centered koehler illumination
- Lightfield diaphragm
- Available with 20 W Halogen or 3 W LED illumination
- Available as phase contrast microscope (OBL 145 und OBL 155) or individuell phase contrast units.
- Dust cover, eyepiece rubber caps and manual instruction included
- Additional eyepiece and filters available as accessoires

1

1 Light Microscopes Lab-Line OBL

NEW

- Binocular Tube (OBL 125, OBL 127, OBL 145)
- Trinocular Tube (OBL 135, OBL 137, OBL 155)
- OBL 145 and OBL 155 are equipped with 4x/100x Infinity E-Plan objective for brightfield and 10x/40x Infinity Plan Phase Contrast objective

Microscopy/Stereomicroscopes

Compact Zoom Stereo Microscope with LED, SMZ-161 Series

Convincing optical performance combined with compact footprint and robust mechanics makes the SMZ-161 the ideal stereo microscope for teaching environments in High Schools and Universities.

Motic

- SMZ-161-LED(R2LED)
- Greenough zoom optical system
- Fixed optical split 50:50
- Widefield eyepieces WF10X/20 mm, incl. rubber eyecups
- Diopter adjustment on both eyepiece tubes
- 6:1 Zoom ratio, WD=110 mm
- Objective magnification range: 0.75X-4.5X
- R2LED: Compact incident/transmitted illumination stand
- Coarse focusing system with tension adjustment
- 3W incident and transmitted LED illumination with intensity control
- Main supply 100 V-240 V (CE)
- Black/White and frosted glass stage plates and dust cover

Microscopy/Digital microscopes and cameras

1 | 2 Microscope Camera Moticam 1080

A multi-output camera with Full-HD resolution. This multifunctional camera with integrated software offers a new quality for interactive microscopy in educational, laboratory and industrial environments and allows working without additional computer. The HDMI signal delivers a fast live image with 1080 (60P) resolution and high color fidelity. Still images and videos are stored either at 2 MP or 8 MP format on MicroSD card. Especially for the visualisation of fast, moving samples in biology and industry 60 full frames per second are ideal system preconditions. The on-board software is controlled via WiFi mouse. As an alternative, the USB port of the camera can be used, also simultaneously to the HDMI port, to run the camera with the new Motic Images Plus 3.0 software with all its measuring tools. A HDMI video projector allows to present the impressive live image to a greater public. The delivery package includes the software Motic Images Plus 3.0, calibration slide, eyepiece adapters as well as macro tube with focusable lens.

Microscopy/Digital microscopes and cameras

1

6.285 935

USB Hand held fluorescence microscopes

The Dino-Lite fluorescence microscopes are considered the smallest fluorescence microscopes. They are flexible, compact, user-friendly and economical. With excitation LEDs from 400 to 620 nm, they are suitable for viewing a wide range of luminophores for applications in biology, pathology and anatomy.

Dino-Lite

- USB 2.0, 30 fps
- 1.3 megapixel (1280x1024) image resolution
- Light source switchable from fluorescent LEDs to a white LED for localisation and focussation of the object
- Long-pass emission filter
- Guarantee: 2 years

Scope of supply: Carrying pouch, Software CD for Windows and Mac OS, calibration slide, manual

4.661 946

USB Hand held microscopes Dino-lite Edge 3.0

The Dino-lite Edge 3.0 high-speed series with its USB 3.0 connection offers uncompressed transmission of images with high resolution and color accuracy. It achieves a maximum speed of 45 fps. The built-in polarizing filter make this models ideal for working with shiny or reflective objects such as metal, plastic, glass, jewelry, electronics, etc. Special features such as Automated Magnification Reading (AMR) for making easy and accurate measurements or Extended Depth of Field (EDOF) for combining a series of images with different focus levels, are available on selected models.

Dino-Lite

3

4.661 952

- USB 3.0, maximum 45 fps
- 5 Megapixel Edge sensor
- Extended Depth of Field (EDOF)
- Extended Dynamic Range (EDR)
- Automatic Magnification Reading (AMR)
- Adjustable Polariser
- Flexible-LED-Control (FLC)

Scope of supply: Carry pouch, USB cable, Software for Windows and Mac OS (not for EDOF, EDR models), open and closed cap, diffuser and side light cap, extension and long cap, calibration slide and manual.

Liquid Dispenser, ESD

Ideal-tek
Ideal for a wide range of applications in chemistry and medical laboratories.

Made of antistatic HDPE with Teflon tube inside, for a great chemical resistance, ESD-safe.

With hinged lid. Just touch the dispensing dish with a brush, cloth or other applicator and solvent is brought to the surface the instant it is needed. Stainless steel valves seal contents in bottle until used, preventing spills, dripping and escaping fumes from endangering the user.

Fluid pumped into the dish does not drip back into the bottle, keeping stored liquids uncontaminated.

Suitable accessories can be found in our online shop.

Cold Light Sources

For sample illumination in microscopy, clinical diagnostics, dental technology, photography or mineralogy. Cold light sources filter out heat-producing, infra-red radiation and offer significantly higher intensities at magnifications over 30x magnification. Compact, easy to use and maintenance-free. KL 300 LED without fan otherwise with a low-noise fan with air vented at the rear of the casing. Power supply: 100-240 V, 50/60 Hz

SCHOTT

9.705 204

KL 300 LED - compact

Cost-effective LED light source with easy handling and continuous dimming. Convection cooling for silent and vibration-free operation. Max. light intensity: 80 lm. Incl. wide-range power supply with international plug system.

Adapter or stand-alone stand sold separately.

KL 1600 LED - economy

Standard LED light source with continuous dimming, filter slider and multi-chip white light engine for a homogeneous illumination. Max. lighting intensity: 680 lm. Incl. wide-range power supply without cable.

KL 2500 LED - advanced

Professional LED light source, additionally, with extra-fine dimming option (0.1 % steps), LCD display for reproducible settings and USB-connectivity. Max. light intensity: 1100 lm. Incl. wide-range power supply and USB connection cable, without power cable. Footswitch optional.

KL 1500 HAL - natural colour

150 W halogen light source with continuous dimming and full halogen spectrum (colour rendering index CRI=100) for natural colour reproduction. Colour temperature indication on integrated LCD display. Maximum lighting intensity: 600 lm. Incl. wide-range power supply without cable.

Please order Fibre optic ring light or gooseneck light guide separately.

Please order a country-specific power cable for KL 1600 LED, KL 2500 LED and KL 1500 HAL separately.

2 Cold Light Source KL 1600 LED Packages

The KL 1600 LED is an innovative fiber optic light source which uses cold light to illuminate all types of objects in industrial and life science applications.

SCHOTT

- Powerful illumination system with a brightness of 680 lm
- Ergonomically placed dimming control
- Ripple free illumination for digital imaging applications
- Colour temperature of 5.600 K does not change when the light source is dimmed
- Maintenance free due to long lifetime LEDs of 50.000 hours

Scope of supply:

LED Cold light source KL 1600 LED incl. 2-armed gooseneck light guide, 2 focus lenses and according power cord

Specifications

Microscopy/Cold light sources

LED Illumination, direct

EasyLED Ringlight/EasyLED Ringlight Plus: Powerful and robust LED ring light with continuous dimming.

SCHOTT

Ringlight Plus version with basic segment features and segment rotation. Easy and intuitive operation via integrated jog dial wheel.

Including wide input range power supply with world wide plug (clip system). External/internal diameter 114/66 mm.

If necessary, please order the necessary lens adapter separately.

EasyLED Spotlight Plus (Single/ Double): Advanced high power LED gooseneck system with integrated controller and continuous dimming.

With the Spotlight Plus Double, the two spots can also be activated individually. Including wide input range power supply with world wide plug (clip system).

Please order mounting bracket or column adapter separately (same adapter as for KL 300 LED).

LED ringlight illumination VisiLED Packages

Answering the needs of the most specialised tasks, the modular VisiLED series is built on flexibility and quality. Molding the lighting setup to each application, a number of high performance ringlights in combination with the separate Controller MC 1100 enable high intensity illumination. Diffusers and polarizer sets, which are optional available, allow a combination of different techniques right at the point of examination.

SCHOTT

- Homogeneous and shadow free illumination
- Segmentable, in 1/8 steps rotatable, different segment modes available
- Actively controlled LED temperature for a long lifetime of 50000 hours
- Package 1 is ideal for unrestricted work on object preparations and the use of revolving nosepiece due to a slim ring light design (AD 92 mm)
- Optionally available adapter rings for connecting the ring lights to all common Stereomicroscope lenses with diameters up to 66 mm

Scope of supply:

Package 1: Controller VisiLED MC 1100, power adapter, LED Ringlight S40-75

Package 2: Controller VisiLED MC 1100, power adapter, LED Ringlight S80-55

6.275 482

If applicable, order necessary lens adapter separately.

Please order a country specific power cable separately.

GENERAL CATALOGUE EDITION 21

Microscopy/Counting chambers

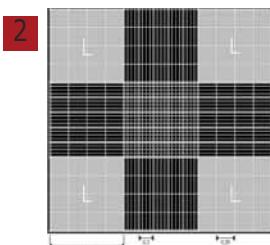

1 Counting chamber, Improved Neubauer

With double ruling. Calibratable. Cell depth 0.1mm.

BRAND

Counting grid with 9 large squares each 1 mm². The 4 large squares in the corners for counting leucocytes are each subdivided into 16 squares with a side length of 0.25 mm. The large square in the middle is subdivided into 25 squares each with a side length of 0.2 mm. Each of these is further subdivided into 16 smaller squares each with a side length of 0.05 mm and an area of 0.0025 mm². The 5 group squares marked with an 'E' are used to count thrombocytes and erythrocytes. All group squares have triple boundary lines on each side.

Type	PK	Cat. No.
Without snap-on clips	1	7.020 270
With snap-on clips	1	7.020 272

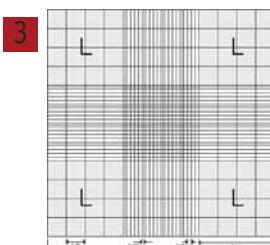

2 Counting chamber, Improved Neubauer, bright line

Bright line. With double ruling. Calibratable. Same counting grid as the

BRAND

Improved Neubauer cell, but with rhodium coated chamber base. Rulings are engraved into the Rhodium layer and appear bright under normal microscope settings. By altering the contrast it is possible to reverse the image under the microscope to make the rulings appear brighter or darker as required.

Description	PK	Cat. No.
Without snap-on clips	1	7.020 271

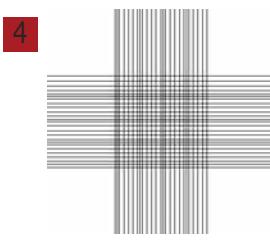

3 Counting chamber, Improved Neubauer

With double ruling. Calibratable. Cell depth 0.1 mm. Same ruling as Improved Neubauer,

BRAND

but the large square in the centre is divided into 16 squares each with a side length of 0.25 mm. Unlike the more modern Improved Neubauer counting chambers, the counting area of each group square is limited by the outermost of the triple border lines.

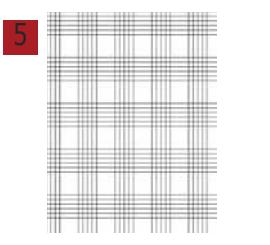

Description	PK	Cat. No.
without clamp	1	7.020 277
with clamp	1	7.020 278

4 Counting chamber, Thoma

Double ruling. Without snap-on clips. Calibratable. Cell depth 0.1 mm. Grid is the same as the grid in the centre of large square in the Neubauer chamber. The area of the small square is 0.0025 mm². Since the large outer squares are not included, the Thoma system is only used to count thrombocytes and erythrocytes.

Description	PK	Cat. No.
double ruling, without clamp	1	9.161 080
double ruling, with clamp	1	7.607 192

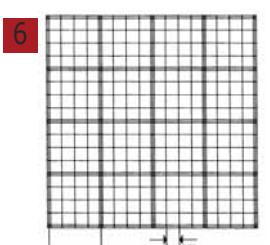

5 Counting Chamber, Malassez

BLAUBRAND®. Double ruling. Without snap-on clips. Cell depth 0.2 mm.

BRAND

The ruling is rectangular, covering an area of 5 mm². The large rectangles measure 0.25 x 0.20 = 0.05 mm². They are each subdivided into 20 mini squares with an area of 0.0025 mm². This chamber is commonly used for counting cells in the cerebrospinal fluid, or for counting nematodes. CE-marked according to IVD-Directive 98/79 EC.

Description	PK	Cat. No.
Without snap-on clips	1	7.020 281

6 Counting chamber, Fuchs-Rosenthal

With double ruling. Without snap-on clips. Calibratable. Cell depth 0.2 mm. Grid has 16 x large 1 mm² squares. Each square is divided into 16 smaller squares each with a side length of 0.25 mm and an area of 0.0625 mm². These counting chambers are commonly used to count cells in cerebrospinal fluid.

Description	PK	Cat. No.
double ruling, without clamp	1	9.161 098
double ruling, hell-lining, with clamp	1	6.050 057

10. Optical instruments and Microscopes

Microscopy/Counting chambers

1 Counting Chambers according to McMaster

For veterinary medicine (e.g. helminth eggs counting) with 2 counting areas, cover glass with 2 counting grids glued on 3 supports. Counting area: 10 x 10 x 0.5 mm.

Hecht

2 LLG-Slide mailers

Manufactured from high density polypropylene, for shipping, storing or staining slides.

Flat mailers can hold 1, 2, 3 or 5 standard (up to 76 mm x 26 mm) slides securely.

- Light weight and flat
- With marking area and "Top" printed on top surface
- With large, easy-to secure snaps.
- Slotted channels inside mailer keep slides safely separated

To hold microscope slides	PK	Cat. No.

LLG-Staining jars, soda-lime-glass

The Schiefferdecker Staining Jar is suitable for holding 76 mm x 26 mm slides horizontally.
This staining jar has 10 grooves which can accommodate 20 slides back-to-back.
The Hellendahl Staining Jar is suitable for holding 76 mm x 26 mm slides vertically.
This staining jar has 8 grooves which can accommodate 16 slides back-to-back.
The "Macro" Staining Jar is suitable for holding 20 slides with 76 mm x 26 mm (please order rack separately).
This Stainless Steel rack for "Macro" has 20 grooves which can accommodate 20 single slides.
Each staining jar is supplied with a glass lid.

Microscopy/Staining racks

1 Disposable Staining Slide Tray

Stain, rinse, and dry your slides on a single working tray. Made of a polypropylene and polyethylene blend, this rugged staining tray is an economical alternative to metal versions offering a clean and fresh working surface area every time. Up to eight slides fit comfortably onto the base and the deep well holds liquid waste up to 38 ml. Two convenient pour spouts make it easy to dispose of unwanted liquid waste. Unique dark lid protects slides when used with light sensitive applications. Supplied with 4 Base Trays and 1 Lid.

GENERAL CATALOGUE EDITION 21

Refractometers/Hand held refractometers

Refractometers, hand-held, precision

For simple, manual measurement of concentrations and refractive indices of liquids. Hand-held, precision refractometers with focussing eyepiece, soft rubber eyecups (to reduce straylight ingress, also spectacle lenses do not slip off and are not scratched), case and conversion tables. Hand-held refractometers cannot be fitted with a thermostatic controller and so measurements have to be temperature compensated.

Refractometers/Hand held refractometers

1 LLG-uniREFRACTO 5 pro

NEW

1

LLG-uniREFRACTO 5 pro is a compact digital 3-scale handheld refractometer for measuring, e.g. Brix and refractive index of liquids. Two scales are pre-set to 0 - 95 % Brix and 1.33 - 1.54 RI, the third scale can be freely selected from more than 45 different scales, including Brix, refractive index, AdBlue®, °Baume, °Butyro, Ethylene Glycol %, Calcium Chloride % and specific gravity. All three scales can be freely selected and changed. The operation is quick and easy, calibration can simply be done with distilled water. The waterproof housing (IP 65) allows cleaning under running water.

- Easy switching between the three scales
- 4-digit LCD display
- Automatic temperature correction
- Sample plate made of stainless steel

Scope of supply: refractometer, protective cover

Specifications

Resolution:	0.1 % Brix/0.0001 RI
Accuracy:	±0.2 % Brix/±0.0003 RI
Operating temperature:	5 ... 40 °C
Measuring temperature sample:	5 ... 80 °C
Rel. Humidity:	< 95 %
Dimensions (W x D x H):	120 x 55 x 35 mm
Weight:	180 g
Power supply:	2 x AAA/LR03
IP code:	IP65
Warranty:	3 years

Type	PK	Cat. No.
LLG-uniREFRACTO 5 pro	1	6.263 632

Digital Hand-held Pocket Refractometer PAL series

For measurement of various high concentration samples such as jam, marmalade, jelly, honey, concentrated juice or acidity and salinity. Ingress Protection class IP 65 means that they can be cleaned under running water. Easily calibrated since "zero-setting" (calibration) is achieved using water. Temperature measurement with Automatic Temperature Compensation. Various models for a variety of applications, e.g. measurement of urine, salt, sugar. With data transmission via near field communication (NFC).

Digital refractometers

ATAGO

Type PR-32α
Can be used to measure fruit juices, soft drinks, diluted soluble oils, aqueous cleaning solutions, etc.

Type PR-101α

Applications include measuring fruit juices, lemonade, coffee, diluted soluble oils and anti-freeze solutions.

Type PR-201α

It can be used for accurately measuring jams, concentrated fruit juices, coolants and similar products.

Type PR-301α

Especially suited to measuring jellies, liquid cane sugar,etc.

Type PET-109

This model is used for simply determining the concentration of ethyl alcohol, which is used in foods and for cleaning, cooling and other purposes.

Type PR-RI

A new Refractive Index model has been added to the popular long-selling "Palette Series". It is suitable for measuring the refractive indices of liquid samples in pharmaceutical and chemical products. Ambient temperature: 10 to 40 °C.

All models are with data transmission via near field communication (NFC).

Digital portable refractometers Refracto 30PX/30GS

Portable device for determining refractive index and derived concentration values.
Simple operation and fast results: the sample is either dripped onto the measuring cell or the instrument is immersed directly in the sample liquid. Suitable for laboratory and field measurements, e.g. in food processing or industry.

Mettler-Toledo Online

3

- Automatic temperature compensation
- Suitable for measurement of dark samples
- Backlit LCD display shows values and menu functions
- Calibration with water
- Memory for up to 1100 measured values, together with sample ID, unit, temperature compensation coefficient, time and date
- Individual formulas for calculation of user-defined concentration data can be defined in the device
- Measuring units: nD, nD temperature compensated, Brix%, temperature compensated, HFCS42, HFCS55, °Baumé, °Oechsle (D, CH), °KMW (Babo), T.A. 1990, weight %, vol.-%, specific weight and freezing point (in °C or °F) for ethanol and NaCl, weight %, volume % and freezing point (in °C or °F) for ethylene glycol and propylene glycol, weight % and volume % for isopropyl alcohol, user-defined unit
- Values can be transferred to the PC via IR interface

Refracto 30PX: Optical glass measurement cell**Refracto 30GS:** Sapphire measurement cell for larger measuring range and faster temperature compensation

Scope of delivery: Refracto 30PX/GS, pipette for sample handling, cleaning towels, operating instructions, flasks for sample and cleaning solutions, CD-ROM with software for data transmission, transport case

Digital Refractometer RX-5000i/RX-5000i-Plus

The most accurate refractometer in the world is now even more stylish, smart, and functional. Featuring intuitive touch screen technology, the new RX-i series makes navigation and selection a breeze. The RX-5000i measures with the same accuracy level as the RX-5000alpha ($\pm 0.03\%$ Brix and ± 0.00004 nD). The RX-5000i-Plus measures with the same accuracy level as the RX-5000alpha-Plus ($\pm 0.010\%$ Brix and ± 0.00002 nD). The RX-i series come with newly added functions, such as USB flash drive and self-diagnosis capability. These products come standard with a 2 year warranty. The warranty period can be extended to 3 years if the product is registered with ATAGO.

ATAGO

FDA 21 CFR Part 11 Software Included in Standard Delivery

Modes:

- Displays the measurement value once the sample reaches the target temperature
- Measures refractive index and temperature at fixed intervals and displays the estimated measurement value at the target temperature
- The thermo-module can be turned off. Without temperature control, the measurement value is displayed in 4 seconds after the START key is pressed
- Displays the measurement value once a certain level of sample stability is achieved.
- Only on the RX-5000i-Plus: Measuring of Low Brix Liquid Samples (such as teas), obtaining highly repeatable results (0.010 % Brix).

Specifications

10. Optical instruments and Microscopes

Refractometers/Benchtop refractometers

Digital Laboratory refractometers

The DR6000 refractometers work with hardly any service and are very quiet, good for long-term work in the lab. Very easy to operate due to an intuitive touch screen. Optional connections to printer, PC or network provide highest flexibility. High precision through integrated peltier thermostat (T-model). Flow measurement cells enable continuous measuring (TF-model). The devices are used wherever a substance in watery solutions has to be measured. Areas of usage: beverage, chemistry, pharma, food, paper, sewerage, textile, petrochemistry, cosmetics.

Digital Laboratory refractometers Abbemat 3000/3100/3200

The laboratory refractometers Abbemat are equipped with the most important refractometric concentration beams, whereby further methods can be installed. They are characterised by fast measurements with high accuracy and are maintenance-free. For Abbemat 3200 and 3100 the built-in temperature control unit regulates the temperature, while the Abbemat 3000 provides automatic temperature correction.

1 Circulation thermostat PT31

The PT31 circulation thermostat is equipped with high performance functions.

The device is ideally suited for applications requiring a temperature range at a constant level. The robust locking mechanism of the PT31 provides a sturdy connection and ensures constant temperature control of the medium.

A.KRÜSS Optronic

- Temperature control using Peltier technology
- Space-saving, sturdy design
- Suitable for operation with non-flammable liquids (water or water/glycol mixture)

Specifications

Temperature range:	8 ... 35 °C

2 Circulation thermostat PT80

The PT80 circulation thermostat is an extremely quiet, energy-efficient and handy device that has been specially developed for small temperature control tasks in the laboratory.

A.KRÜSS Optronic

Fast temperature control is also possible due to the low filling volume of only 250 ml. With an accuracy of ±0.1 °C, the PT80 is ideally suited to high laboratory standards for the temperature control of polarimeters and refractometers. The PT80 is also very well equipped for efficient and environmentally friendly cooling of condensers (e.g. Liebig or reflux condensers) in thermal separation processes on a laboratory scale.

- Circulation thermostat with Peltier technology
- Rapid temperature control and high temperature accuracy
- Extremely quiet and low-vibration operation
- Environmentally friendly, due to 50 % lower energy consumption and elimination of refrigerants
- Suitable for operation with non-flammable liquids (water or water/glycol mixture)

Specifications

Temperature range:	5 ... 80 °C
Accuracy:	±0.1 °C
Resolution:	0.1 °C
Pump performance:	60 l/h
Max. pump pressure:	110 mbar
Cooling power at 20 °C:	40 W
Heating power:	120 W
Power supply:	100 ... 240 V AC, 50/60 Hz, 2.5 A
Dimensions (W x D x H):	170 x 244 x 225 mm
Weight:	2.7 kg

Type	PK	Cat. No.
PT80	1	6.273 831

3

3 Abbe refractometer ORT 1RS

Universally applicable, analogue table-top Abbe refractometer for use in industry, pharmacy and laboratory.

Kern & Sohn

- Measurement of Brix and refractive index
- Compact and robust design
- For the measurement of liquids, solids and pasty samples
- With digital thermometer

Scope of supply:

Refractometer, calibration solution, calibration block, pipette, screwdriver, cleaning cloth, digital thermometer

Specifications

Measuring temperature:	20 °C
Dimensions (W x D x H):	180 x 90 x 240 mm
Weight:	1950 g

ORT 1RS	0 ... 95 % / 1.3000 ... 1.7000 nD	0.1 % / 0.0002 nD	1	4.657 752

10. Optical instruments and Microscopes

Refractometers/Benchtop refractometers

1 Abbe Refractometer Model RMT

Laboratory refractometer for precisely measuring liquids, solids, semi-liquids and powders. Optical refraction index and Brix scale reading system, with an excellent boundary line brightness and contrast. Prism with large windows, equipped with movable shrouds to keep out light. Focussable eyepiece.

Exacta Optech

Standard accessories: Calibrating glass prism, thermometer, dust cover, calibrating screw driver, wooden case.

1

RMT	1	9.801 257

Abbe refractometer AR4/AR2008

Classic refractometers for solids and liquids. With integrated digital thermometer. Optionally they can be combined with a thermostat.

A.KRÜSS Optronic

2

2 Abbe refractometer AR4

- Scales can be adjusted manually using the drive knob
- Measured value can be read via an eyepiece
- Temperature is shown on the LCD display
- Optionally: In combination with the circulation thermostat PT31 the temperature can be maintained at 20 °C or 25 °C

Specifications

Dimensions (W x D x H):	100 x 190 x 270 mm
Weight:	2.5 kg

GENERAL CATALOGUE EDITION 21

Refractometers/Benchtop refractometers

1

1 Digital Abbe refractometer, DR-A1-Plus

Very simple operation, where only the refraction boundary line has to be moved to the measurement cross hairs. The refractometer displays measurements directly (as a refractive index or in Brix (%)) in digits together with temperature.

ATAGO

Measurements can be taken easily by anyone using this refractometer without taking an analogue scale reading in advance. Dispersive value can not be measured using this refractometer.

Specifications

Measurement range:	1.3000 - 1.7100 nD 0.0 - 100.0 Brix
Resolution:	0.0001 nD 0.1 % Brix
Accuracy:	0.0002 nD 0.1 % Brix
Temperature range:	0 to 50.0 °C
Power supply:	a.c. adapter (100 to 240 V 50/60 Hz)
Dimensions:	130 x 290 x 310 mm
Weight:	6.0 kg

Type	PK	Cat. No.
DR-A1-Plus	1	6.283 092

2

2 Sucrose (Brix) Standards

Certified stabilized Sucrose (Brix) Standards.

Reagecon

- ISO17025 accredited
- Uncertainty of measurement of 0.11 % for all Brix values at 20 °C
- Equivalent Nominal Refractive Index values from ICUMSA published tables reported on Certificate of Analysis
- Compatible with any brand of Refractometer
- 12 month shelf life
- Provided in high quality HDPE 15 ml dropper bottles

10. Optical instruments and Microscopes

Photometers/Polarimeters

Digital Refractometer/Polarimeter RePo

All-in-One refractometer and polarimeter hybrid unit. Only 3 ml sample is needed. With the press of a button, purity, international sugar scale, specific rotation and concentration can be displayed. Users can also set an upper and lower measurement limit. An indicator light alerts the user if a measurement value is within the limits.

ATAGO

6.266 905

RePo-1: can measure both brix and optical rotation of the sample.

RePo-1 Package includes: Main unit, 100 ml beaker, 50 x Syringe Filters orange 45, 3 x 20 ml Syringes, 100 x Easy filter.

RePo-2: As RePo-1, additionally the RePo-2 also determines and displays the amount of fructose (%) within HFCS. The RePo-2 is ideal for various industries such as food and beverage, or sugar refining.**RePo-3:** As RePo-1, additionally the RePo-3 also determines and displays the amount of invert sugar (%) derived from sucrose. The RePo-3 is ideal for various industries such as sugar refining.**RePo-4:** As RePo-1, additionally the RePo-4 also determines and displays the amount of fructose (%) and honey moisture (%). The RePo-4 is ideal for total quality control of honey.**RePo-5:** As RePo-1, additionally the RePo-5 can also display the refractive index (nD) of a sample. The RePo-5 is ideal for quality control in various industries such as fragrances, cosmetics, or pharmaceutical.

Polarimeter P1000-LED

A.KRÜSS Optronic

Specifications

Scale:	Optical rotation (°)
Measuring range:	2 graduated circels (0 ... 180°)
Resolution:	1°
Accuracy:	0.05° (with nonius)
Light source:	1 LED with filter
Wavelength:	589 nm
Dimensions (W x D x H):	140 x 430 x 330 mm
Weight:	4.3 kg
Power supply:	110 ... 250 V, 50/60 Hz

Type	PK	Cat. No.
P1000-LED	1	6.059 874

2 Polarimeter P3000

Technologically high-quality polarimeter for standard applications for which a measurement accuracy of $\pm 0.01^\circ$ is sufficient and a temperature control can be omitted. Typically, the P3000 is used in the quality control of food industry.

A.KRÜSS Optronic

- Measurement of optical rotation
- Very short measurement time of approx. 1 s
- Easy, menu-driven adjustment
- Display of measured values in optical rotation or international sugar scale
- Suitable tubes for any type of sample
- Measurement up to an optical density of 3.0
- Temperature measurement with calibratable temperature sensor
- Reliable temperature compensation
- Chemical-resistant measurement tubes
- Compliance with GMP/GLP, pharmacopoeias [USP, BP, JP, Ph. Eur. (with tempering)], FDA, ISO, HACCP, OIML, ASTM, ICUMSA, NIST

Specifications

Scales:	Optical rotation [°], int. sugar scale [°Z]
Measuring range:	$\pm 90^\circ$ $\pm 259^\circ Z$

Spectrophotometer Libra S4+ Vis/S6+ Vis

These universal spectrophotometers are designed for a variety of applications in education, quality control and routine laboratories. They measure absorbance, transmission and concentration as well as simple kinetics. The large display allows to view the results in numerical as well as in graphical form. Stored methods can also be locked by using a pin protected password, as well as unlocked and deleted. The PVC (Print Via Computer) software is included with the instrument and providing the user with the option to transfer data directly to a PC. Data can be easily stored on a USB memory stick and analyzed at a later date.

Biochrom Ltd.

- Large LC display
- Interfaces for PC and USB stick
- Simple operation
- Small, lightweight device

1 Spectrophotometer Libra S4+ Vis

Ideal instrument for education and QC laboratories.

Biochrom Ltd.

Compact and lightweight for simpler applications.

Up to 72 methods can be stored, providing a fast and easy way to recall frequently used methods.

Scope of supply:

Libra S4+, PVC software (Print Via Computer), data cable USB to PC, starter pack of 8 disposable cuvettes

Specifications

Optical system:	Single beam
Wavelength range:	325 ... 1100 nm
Accuracy:	±2 nm
Reproducibility:	±1 nm
Photometric range:	-0.300 ... 2.500 A
Accuracy:	< 0.002 A to 0A at 546 nm
Reproducibility:	< 0.002 A to 0A at 500 nm
Stray light:	< 1 %T at 340 nm
Light source:	Tungsten halogen
Outputs:	Export to PC with USB cable, USB memory stick
Dimensions (W x D x H):	325 x 225 x 133 mm
Weight:	1.6 kg
Power supply:	90-265 V, 50/60 Hz

Type	PK	Cat. No.
Libra S4+	1	4.668 614

2 Spectrophotometer Libra S6+ Vis

Fulfils the requirements of routine spectroscopy. Small and lightweight instrument with many functions. It also includes sorted methods for Bradford, BCA, Biuret and Lowry assays.

Biochrom Ltd.

Up to 90 methods can be stored, providing a fast and easy way to recall frequently used methods.

Scope of supply:

Libra S6+, PVC software (Print Via Computer), data cable USB to PC, starter pack of 8 disposable cuvettes

Specifications

6.263 610

Spectrophotometer LLG-uniSPEC 2 and 4

High-quality and cost-efficient UV/VIS spectrophotometers for pharmaceutical, biochemical and clinical lab applications. Suitable for different measurement types such as kinetics, wavelength scans, quantitative analysis, multi-wavelength and DNA/Protein analysis.

Available in two versions:

LLG-uniSPEC 2 for standard routine measurements and uniSPEC 4 suitable for complex measurements e.g. required for quality controls. LLG-uniSPEC 4 features a small band width and a high wavelength accuracy. Both units can store and save 200 calibration curves. A pre-adjusted lamp design allows a fast and easy lamp replacement. Both lamps can be individually turned on/off to extend the durability. Both versions can be used either as stand-alone units or can be operated via a PC by using the supplied software.

- Single beam system, grid with 1200 lines/mm
- Silicon photodiode detector
- Parallel port for printer output
- USB port
- 4 position cell holder (10 mm) included
- Additional cell holders optionally available
- LCD display
- Deuterium and tungsten lamp
- Automatic wavelength adjustment

Scope of supply: LLG-uniSPEC 2 or 4 Photometer, software for connection to PC, 4 glass cells and 2 quartz cells.

Photometers/Spectrophotometers

Spectrophotometer Models 6300 VIS/6305 UV-VIS

Models 6300 and 6305 are general purpose visible and UV/Visible range spectrophotometers which are suited to a wide range of applications in education and quality control.

Jenway

9.775 411

- Simple operation
- Versatile sampling system
- G.L.P. compliant
- Full interfacing capability
- Simple keypad and operating protocols designed to enable reliable operation by unskilled operators
- LCD gives simultaneous readout of wavelength and photometric result
- Error messages, prompts, mode indication and a choice of concentration units are presented in an easily understood format
- Cuvette holder allows 10 mm to 100 mm cells
- 3 year warranty

Supplied with: Mains lead, pack 100 disposable cuvettes, 10 x 10mm cell holder, PC Application Software on CD-ROM and operating instructions.

Various accessories e.g. siphon pump, cells, cell holders, cuvettes and lamps available on request.

Scanning Spectrophotometers Series 72, VIS and UV-Vis

Scanning spectrophotometers from Jenway for measurements in the visible and UV range.

Jenway

Model 7200 (VIS): wavelength range of 335 to 800 nm with a spectral bandwidth of 7 nm.
Model 7205 (UV-VIS): wavelength range of 198 to 800 nm with a spectral bandwidth of 5 nm.

Both spectrophotometers are ideal for a variety of applications in education and routine testing in clinical, veterinary, pharmaceutical and QC laboratories.

The 72 series spectrophotometers offer measurement modes for single wavelength with basic absorbance and % transmittance; concentration determination (via reference standards or calibration curves with up to 6 standards), full spectrum scanning and kinetics for up to 3 simultaneous wavelength measurements.

The colour touchscreen user interface provides fast and easy set up and navigation of the instrument. The 4" display allows full spectrum scans, quantitation curves and kinetics runs to be viewed easily. The sample chamber lid can also be left open during measurements which is ideal for samples in tall test tubes.

Including two USB ports for data storage and printer connectivity.

Optional heated 10x10 mm cuvette holder for thermostated measurements at 37 °C.
More accessories available on request.

- Scanning diode array detector (DAD)
- Colour Touchscreen navigation
- Small footprint and lightweight
- Fast scan speed
- Multiple USB ports for data storage and printer connectivity
- 2 year warranty on the instrument

1 Spectrophotometer Model 6850

Double beam spectrophotometer with a variable spectral bandwidth. The highly stable optics and two detectors measure the sample and reference simultaneously optimising measurement accuracy. The 6850 has measurement modes for photometrics, concentration, multi-wavelength, spectrum scanning, kinetics, quantitation, DNA/RNA and protein analysis. Jenway Prism PC software is supplied as standard and offers additional functionality with preloaded methods for DNA/RNA and protein analysis, as well as extensive post-measurement tools, unlimited results saving and easy export of data. The 6850 double beam spectrophotometer is ideal for quality control, general research, pharmaceutical, biochemical and clinical laboratory applications. Installation Qualification and Operation Qualification (IQ/OQ) is available for the 6850.

Jenway

- Double beam spectrophotometer with highly stable optics
- Variable spectral bandwidth 0.5, 1, 2, 4, 5 nm
- Analysis: Auto peaks and valleys, zoom, addition, subtraction, peak ratios, smoothing, area under curve, wavelength table, derivatives, overlay with PC software
- Integrated user interface
- USB port for data storage
- Conforms to European Pharmacopeia requirements
- Jenway Prism PC software included as standard
- 1 year warranty

1 Spectrophotometer BioDrop DUO

Biodrop Duo is a service-free bench-top instrument with a cuvette holder and a micro-volume sample port. The port enables absorption measurements in just 0.5 µl sample volume without cuvettes. Ideal for rapid serial measurements of DNA, RNA or proteins. The cuvette holder offers the possibility for measurements with larger volumes with conventional 10 mm cuvettes. The instrument has a large colour touchscreen and preprogrammed applications for the measurement of DNA, RNA, oligos and proteins. Generated data can be stored internally or transferred from the instrument using a USB flashdrive. The photometer can be operated with a PC and the supplied BioDrop Resolution Software via a USB connection. A built-in printer can also be selected for a complete stand-alone solution.

Biochrom Ltd.

- Micro-volume sample port for minimum sample volume
- High-resolution, colour touchscreen
- Software package with preprogrammed methods for sample analysis
- USB connection for PC control and data export
- No calibration needed
- Easy cleaning of the sample port with a lint-free tissue

Specifications

Maximum concentration dsDNA:	2500 ng/µl
Detection limit:	1 ng/µl
Absorbance range:	0.3 to 2.5 A (0.3 A to 50 A, 10 mm equivalent)
Absorbance accuracy:	±0.005 A or 1 % of the reading, whichever is the greater at 546 nm
Spectral bandwidth:	5 nm
Stray light:	<0.5 %T at 220 nm and 340 nm using NaNO ₂
Wavelength range:	190 bis 1100 nm
Wavelength accuracy:	±2 nm
Light source:	Pulsed Xenon lamp
Dimensions (W x D x H):	260 x 420 x 185 mm
Weight:	3 kg
Power supply:	90-250 V, 50/60 Hz, max 50 VA

Description	PK	Cat. No.

BioDrop DUO with printer	1	6.313 968

2

2 Spectrophotometer 7415 nano

For accurate, fast and reproducible measurement of sample volumes from 0.5 µl to 5 µl. Programmed for the measurement of nucleic acid concentration and purity as well as protein assays. The direct application of the sample on the measuring head eliminates the need for cuvettes or sample dilution. Single measurements are performed in less than 6.5 seconds. Fast cleaning of the measuring optics simply by wiping off. Customized Android-based user interface to control the instrument, set measurement modes and retrieve results. Ethernet and USB interfaces for transfer of results, updates and printer connection as well as networking with cloud services.

Jenway

- Ideal for DNA, RNA and protein determination
- Only 0.5 µl sample volume required
- For DNA concentrations up to 2 ng/µl
- 7" color touch screen
- Multilingual user interface
- 10 GB internal memory for methods and results
- 3 years warranty, also on the xenon lamp
- Stainless steel measuring head with quartz lens

Specifications

Wavelength range:	198 ... 1000 nm
Wavelength accuracy:	±2 nm
Spectral bandwidth:	5 nm
Absorbance accuracy:	±0.01 at 1.0 A
Transmittance range:	0 ... 199.9 %
Concentration range:	2 ... 6000 ng/µl dsDNA
DNA measurement modes:	dsDNA, ssDNA, RNA, Oligonucleotides, 260/280, 260/230, variable ratio
Protein measurement modes:	BCA, Bradford, Lowry, Biuret, direct UV
Light source:	Xenon lamp
Dimensions (W x D x H):	275 x 400 x 220 mm
Weight:	7.7 kg
Power supply:	100 ... 240 V, 50 ... 60 Hz

Photometers/OD-Measurement

Densitometer DEN-1/DEN-1B

Compact and efficient benchtop densitometers for measuring turbidity of cell suspensions in a variety of life science applications. The densitometers are designed and factory calibrated to measure turbidity in the range of 0.3 to 5.0 McFarland units (DEN-1) 0.00 to 6.00 McFarland units (DEN-1B) with a small standard deviation. If required, they can deliver a wider measurement range (up to 15.00 McFarland units), but with a greater standard deviation.

Grant

Specifications

Light source:	light diode
Wavelength:	565 nm ±15 nm
Measuring range DEN-1:	0.3 to 15.0 McF
Measuring range DEN-1B:	0.0 to 15.0 McF
Standard deviation at 3.00 McF units:	±0.1 McF
Precision:	±3 %
Measurement time:	1 sec
Tubes diameter, external:	18 mm
Tube diameter with D16 adapter (included):	16 mm
Sample volume:	≥2 ml
Dimensions (W x D x H):	165 x 115 x 75 mm

3 Densitometer WPA CO8000, Cell density meter

The single-beam cell density meter measures the optical density at 600 nm using an LED. This LED light source has a long life span and requires little maintenance. The CO8000 is a robust, easy to use instrument dedicated to the measurement of the density of cells in suspension such as E.coli, yeast cells and other cell cultures. Once all measurements have been completed, up to 99 results can be displayed on the easy-to-read screen.

NEW

Biochrom Ltd.

- Small, portable size
- Stores up to 99 results
- Rechargeable battery
- Easy to use, clean and sterilise
- No warm up time

Specifications

Optical system:	Single beam
Wavelength:	600 nm
Photometric range:	-0.3 ... 1.99 A
Accuracy:	±0.02 A at 1 A
Reproducibility:	0.02 A at 1 A in 10 mm cuvette
Stray light:	< 1 %T
Light source:	LED
Outputs:	Store, *Print, *Export to PC (*optional)
Dimensions (W x D x H):	150 x 180 x 60 mm

Photometers/Microplate reader and washer

1 Microplate Reader EZ Read 400

The EZ Read range provides a comprehensive range of robust, fast and accurate microplate readers for absorbance assays. They come in several application focused models.

Biochrom Ltd.

Applications:

- Measures flat, round and v-bottomed 96-well microplates with standard SBS footprints
- Accurate measurements ensured by automatic lamp calibration prior to each reading
- USB 2.0 PC connection
- Create new plate layouts
- Add multiple assays to a plate
- Add multiple plates per analysis
- Easy to create new methods
- Select only the data you want for data reporting
- Windows 7 and 8 compatibility as well as older Windows OS from XP
- So easy you will not need to export your data into Excel

EZ Read 400 ELISA: ELISA assays

EZ Read 400 Research: ELISA, total protein and cell proliferation assays.

The EZ Read 400 microplate readers are PC-controlled using intuitive Galapagos software to simplify data acquisition and analysis.

Further EZ Read models on request.

Specifications

Detection System:	Single channel silicon photodiode filters

2 Microplate Reader 800 TS

The 800 TS with high-resolution colour touchscreen is designed for applications within the clinical and life science research laboratory. Its compact footprint and proven robust design makes it an ideal solution for many microplate-based assays.

BioTek Instruments

- Reliable 1-channel Absorbance Microplate Reader for endpoint, kinetic and well scanning read modes
- Compatible with 6 to 384-well formats
- Wavelength range: 400-750 nm or 340-750 nm
- Filter wheel capacity: 5 positions, up to 5 filters supplied
- Dynamic range: 0.0 to 4.0 OD, Resolution: 0.0001 OD
- Easy-to-use Gen5 Data Analysis Software for easy data collection, analysis, export and printing

Typical Applications: ELISA, protein quantification and cytotoxicity assays.

Photometers/Microplate reader and washer

1 Microplate Reader ELx808

High quality optics, fast measurement and superior incubation are the hallmarks of the ELx808 Absorbance Microplate Reader. These and other top features make it suitable for a wide array of applications, from endpoint ELISAs to kinetic cell growth studies.

BioTek Instruments

- 8-channel Absorbance Microplate Reader for endpoint, kinetic and linear well scanning read modes
- Compatible with standard 96-well, flat- or round-bottom plates
- Wavelength range: 380-900 nm; 340-900 nm (ELx808IU)
- Filter wheel capacity: 6 positions, up to 5 filters supplied
- Dynamic range: 0.0 to 4.0 OD
- Linear shaking and 4-Zone incubation to 50 °C (ELx808IU)
- Easy-to-use Gen5™ Data Analysis Software for rapid data collection, export and printing

Typical applications: ELISA, enzyme kinetics, protein assay, endotoxin (LAL) assays, cell growth studies and agglutination assays.

Type	Filter nm	Measuring range nm	PK	Cat. No.
ELx808	405, 450, 490, 630	380-900	1	6.283 100

2 Micro-Volume Plate Take3

Nucleic acid and protein quantification is fast and easy with the Take3 Trio Micro-Volume plate, used in BioTek microplate spectrophotometer. Up to sixteen 2 µl samples can be measured at a time, without dilution or additional specialized equipment.

BioTek Instruments

- Compatible with Epoch, Synergy and Cytaion readers from BioTek
- 16 microspots for 2 µl samples, 1 location for standard cuvette and 2 locations for BioCell™ measurements
- Pre-programmed DNA, RNA and protein protocols in Gen5 make quantification fast and easy
- Easy routine cleaning using laboratory wipe

Typical Applications: -Micro-volume DNA, RNA and protein quantification, Spectral scanning in micro-volume, cuvette or BioCell™.

Type	PK	Cat. No.
Micro-Volume Plate Take3	1	6.283 109

3 Microplate Spectrophotometer Epoch

Epoch™ is a monochromator-based microplate spectrophotometer that offers superior functionality at an accessible price. Controlled by the easy-to-use Gen Data Analysis Software, Epoch is designed for a wide range of applications, from nucleic acid and protein quantification to cell-based assays and ELISAs.

BioTek Instruments

- Spectrophotometer for single, dual and multi-wavelength measurements in endpoint and kinetic read, as well as spectral and well area scanning
- Wavelength range: 200 - 999 nm, selectable in 1 nm increments
- 6- to 384-well plate reading capability
- Xenon flash lamp to last the instrument's lifetime
- Robust housing design for longevity even under heavy usage
- Full Gen5 Data Analysis Software for data collection, export and printing included
- Compatible with Take3 Plate for direct nucleic acid and protein quantification in up to sixteen 2 µL samples at a time

Typical Applications: ELISA, nucleic acid quantification, DNA purity measurements, protein quantification, cytotoxicity, cell proliferation and spectral scanning.

1 Microplate washer CAPPWash

NEW
AHN

The microplate washer is ideal for small scale work. It can be purchased individually or as a set, including all components necessary for the set up. The Two-in-One Design of Capp elisa plate washer offers two functions: add the washing solution to the well and aspiration of the used solution back to the waste collection bottle.

- Produced from stainless steel and polypropylene
- Resistant to aggressive chemicals

Scope of supply:

CAPPWash kit 8 channel: Plate washer 8 channel, vacuum pump 230V, bottle for washing solution (5 l), waste collection bottle (2 l), vacuum trap, silicon tubing (3 m)

CAPPWash kit 12 channel: Plate washer 12 channel, vacuum pump 230V, bottle for washing solution (5 l), waste collection bottle (2 l), vacuum trap, silicon tubing (3 m)

2 Microplate washer Atlantis 2/4

NEW
Biochrom Ltd.

Microplate washer for 96-well plates with flexibility in washing options, simple operation and digitally controlled aspiration and dispensing pumps.

- 8-channel manifold
- Up to 50 wash programmes
- Auto rinse function prevents clogging
- Reduced aerosols due to cover and pumping technology
- Low noise, pressure-free aspiration and dispensing pumps
- Detachable plate carrier for easy cleaning

Scope of supply:

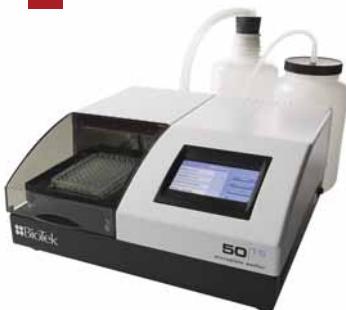

Atlantis 2: With 2 liquid lines, two 2 l wash-bottles, 2.5 l waste-bottle

Atlantis 4: With 4 liquid lines, four 2 l wash-bottles, 2.5 l waste-bottle

Maintenance kit: 2 x T 2.5 A spare fuses, 2 cleaning needles, tubing sets for all bottles, cleaning tool for needles, tubing set for manifold, spare tubing set for manifold

3 Microplate Washer 50 TS

BioTek Instruments

The 50 TS Microplate Strip Washer is a truly flexible platform that provides washing capabilities unsurpassed in its class. As a welcome upgrade from manual processing, the 50 TS is ideally suited for academic, clinical and veterinary diagnostic laboratories.

- Compact and robust microplate strip washer with 8-, 12- or 16-tube washing manifold
- Compatible with 96/384 well plates or single strips
- Integrated syringe pump for precise control over all fluid flow rates
- Automatic buffer switching for up to 3 wash buffers
- Total programming control for all wash parameters, like number of cycles, dispense volume, dispense rate, aspiration rate, etc. via touchscreen user interface
- Programmable shaking duration and intensity
- Many built-in maintenance programs

Typical Applications: ELISA assays, Cell-based assays

Photometers/Colour measurement

Colorimeters, Lovibond® PFXi series

The PFXi series of spectrophotometric colorimeters introduces a unique concept in liquid colour control: RCMSi technology (Remote Calibration & Maintenance Service via internet). **Lovibond®**

Users can benefit from the capability for remote calibration and servicing via the internet - eliminating any costs and time delays associated with servicing and guaranteeing compliance with standards. The PFXi range is supplied with a full range of colour scales for specific markets including, but not limited to, Petroleum, Edible Oils, Pharmaceuticals, Brewing and Honey. Users can upgrade scales remotely at any time. Every PFXi is supplied with colour control software for data analysis (LAN & USB cable provided). Optical glass cells, a certified glass calibration filter, a spare lamp and user instructions included. The PFXi-880 and -995 series are available with an optional integrated heater unit. (This is not available for the PFXi-195). This is a critical feature when dealing with materials such as fats and waxes where temperature needs to be maintained at a constant temperature +10°C above the "Cloud Point" of the material.

Please Note: CIE values and spectral data readings are standard on all the instruments listed below.

Flame Photometers FP8000 series

A.KRÜSS Optronic

Even the lowest concentrations of alkali and alkaline earth elements in aqueous solutions can be determined cost-effectively and user-friendly. Simultaneous measurement of the elements Na, K, Ca and Li in the laboratory and process analysis (others on request).

Thanks to proven measuring methods and modern instrument electronics, the flame photometers achieve precise and reproducible measurement results in a matter of seconds with maximum operational reliability. Suitable for individual measurements, fully automatic measuring operation, continuous operation and use as a process instrument.

- Economic, user-friendly and durable solution for use in laboratory and process operation
- Simultaneous measurement of up to four alkaline and alkaline earth elements, depending on model up to 300 measurements per hour
- Maximum operational safety through intelligent security mechanisms
- Simple operation through touch screen and intuitive software
- To use with Propan/Butan (alkaline elements) and Acetylene (alkaline earth elements)
- Interfaces: 2 x USB, 1 x Ethernet, 1 x RS-232 for printer, FP8500 additionally: Upgrade 4 to 20 mA analogue, passive current interface
- Compliance with international norms and standards

Specifications

Measuring ranges:

Na/K/Li 0.01 ... 4500 ppm

Ca 0.50 ... 4500 ppm

Calibration: Linear with 2 standards

Not-linear with 6-8 standards, cubic approximation

Drift: 1 % in 60 min

Reference: Lithium guideline with 5 mmol/l

2 Standards for Flame photometers

Suitable for calibration, control, IQ/OQ and method validation. Compatible with all Flame Photometry Instruments. Available as single element analytical standards (in ppm) or Multi-element clinical standards (in mmol/l). NIST traceable. HDPE bottles of 500 ml.

GENERAL CATALOGUE EDITION 21

Photometers/Glass cuvettes

Cells for spectrophotometer

High precision standard cells for routine analysis. Suitable for most spectral photometers, using rectangular cells. Available with cover or with stopper for a liquid-tight seal. Cover and stopper made of PTFE.

Starna Scientific

Glass types

Type G: Optical glass, 334 to 2500 nm

Type SOG: Special optical glass, 320 to 2500 nm

Type Q: Spectrosil® For UV Quartz glass, 190 to 2700 nm

Specifications

Windows parallel to:	< 3 arcmin
Window polish:	60/40 scratch/dig
Window thickness:	1.25 mm
Window flatness to:	< 4 Newton fringes

Calibration - Qualification of spectrophotometers with the certified reference materials from Hellma Analytics

To maintain constant good measurement results, a regular review of the accuracy of the spectrophotometer is required. With the use of certified reference materials from Hellma Analytics, you make sure that your equipment qualifications meet the requirements of the pharmacopoeias and fulfill your internal quality requirements, at the same time you reach the international comparability of your measurement results. The certified reference materials (calibration standards) of the DIN EN ISO 17025 accredited Hellma Analytics calibration laboratory are traceable to the primary standards of NIST (National Institute of Standards and Technology) and meet the requirements of the major pharmacopoeias (e.g. EP, DAB, USP).

Your benefits:

- High quality of the measurement results
- International comparability of measurement results
- Meeting the requirements of the major pharmacopoeias (EP, DAB, USP)
- Results traceable to NIST primary standards
- 30 years warranty on the reference materials

Scope of delivery:

- Certified reference materials (Calibration Standards) in quality storage box
- DAkkS Calibration Certificate (DIN 17025)
- Handling guidelines

6 Micro Volume Analysis TrayCell

Fibre-Optic Micro Measuring Cell. Accessory for standard spectrophotometer for droplet analysis.

Hellma Analytics

Sample volume 0.7 µl to 10 µl.

Typical applications are:

- nucleic acid analysis.
- determination of the incorporation frequency of fluorescent dye labels (FOI).
- protein analysis (A280, BCA, Lowry etc.).
- all UV/Vis analysis utilising wavelength range 190 nm to 1100 nm.
- material: Quartz glass High Performance.

Please state the required cell centre height (8.5 mm, 15 mm or 20 mm) when placing your order!
TrayCell is supplied as standard with caps for both 0.2 mm and 1 mm light path.
Additional light path of 0.1 mm and 2 mm are available.

10. Optical instruments and Microscopes

Photometers/Plastic cuvettes

1 LLG-Disposable plastic cells, PS

The shape and narrow wall thickness of the cuvettes enable an excellent heat transfer resulting in constant sample temperatures during photometric measurements.

1

- Cavity sorted
- Glass clear polystyrene (PS)
- Applicable wavelength range 340 nm to 900 nm
- Very low variation of extinction values
- Excellent optical transmission range
- Path length 10mm
- Overall dimensions 12.5 mm x 12.5 mm x 45 mm
- Styrofoam racks: 100 cuvettes in a styrofoam box with cover

Description	Capacity ml	Path length mm	Operating range nm	Material	PK	Cat. No.
Macro	4.0	10	340 to 900	PS	100	9.406 011
Semi-micro	1.6	10	340 to 900	PS	100	9.406 012

2 Disposable cuvettes

Disposable cuvettes for spectroscopy, in optical-quality PS and UV grade PMMA with optical windows for optimum transmittance when using wavelengths from 340nm to 800 nm (PS) and from 280 nm to 800 nm (PMMA). Moulding and quality control determine the reproducibility of cuvettes. Kartell cuvettes are strictly controlled and variations should be within the range ±1% absorption. This is the vital when batch analysis is being undertaken. Dust proof packaging: 100 pcs in expanded polystrene box with lid, 5 boxes in inner carton and 12 inner cartons (60 boxes) per case.

VIS cuvettes Eppendorf®, PMMA

The Eppendorf® Vis Cuvettes are disposable cuvettes made of clear plastic with a light transmission of 300 nm to 900 nm. They are the perfect tool for applications outside of the UV range, for example, colorimetric protein assays (Bradford, Lowry, etc.), determining of the optical density of bacterial cultures (OD600 methods), kinetic and fluorescence measurements. Based on the volume you would like to measure, you can select semi-micro or macro cuvette.

Photometers/Plastic cuvettes

1 Macro and semi micro cuvettes

Sorted by mould cavity number. PMMA or PS.

BRAND

Quality characteristics:

- Minimal extinction value variation.
- Optically perfect transmission range
- Recessed window, to protect against scratches
- Arrow head marking shows the direction of transmission.

Advantages to user:

- Ideal for kinetics measurements
- 1000 cells from the same cavity in each pack
- Practical packaging: clear, re-closable.

Polymethylmethacrylate (PMMA) cuvettes

Typical operating range: from 300 nm to 900 nm.

Standard deviation at 320 nm ± 0.004 extinction units.

Polystyrene (PS) cuvettes

Typical operative range: from 340 nm to 900 nm.

Standard deviation at 360 nm $\leq \pm 0.005$ extinction units.

Macro cell with 4 optical windows, PS/UV-transparent

Particularly suitable for fluorescence spectroscopy. The UV version can be used from a wavelength of 230 nm and shows minimal autofluorescence. Standard deviation: Cuvettes of Polystyrene (PS) at 360 nm $\leq \pm 0.005$ extinction units, cuvettes UV-transparent at 240 nm $\leq \pm 0.007$ extinction units and at 300 nm $\leq \pm 0.005$ extinction units.

Dimensions:

12.5 mm x 12.5 mm x 45 mm

Window:

Macro cell 10 mm x 35 mm

Semi micro cell 4.5 mm x 23 mm

2 Macro and semi micro cuvettes, plastic

NEW

Ratiolab

For photometric measurements even in the UV range.

- Applicable wavelength range 220 to 900 nm
- Low variation of extinction values
- Good optical transmission range
- Sorted by mould cavity number

Scope of supply: 100 netidentical cuvettes in styrofoam box with a resealable cover

Description	Nominal capacity ml	Operating range nm	Path length mm	Dimensions (W x D x H) mm	PK	Cat. No.
Macro	4.0	220 ... 900	10	12,5 x 12,5 x 45	100	6.225 579
Semi-micro	1.6	220 ... 900	10	12,5 x 12,5 x 45	100	6.243 404

1 Plastic disposable UV-Cuvettes for the UV/VIS range

UV-transparent plastic Brand cuvettes replace fragile glass or quartz cuvettes in many applications that were previously beyond the range of plastic cuvettes.

Designed for single use, they eliminate time-consuming washing, and the cross-contamination risk associated with washing and re-using cuvettes. Their very high chemical resistance allows use with most polar solvents, acids and alkalis (e.g. Acetone, Butanone, DMF, hydrochloric acid).

The UV-uvette micro has a working range from 230 nm - sample volumes as small as 70 µl are sufficient. The UV-Cuvette is also available in macro and semi-macro sizes for applications from 230 nm to 900 nm.

- Specially designed for photometric determination of proteins, ssDNA, dsDNA, TNA and oligonucleotides in the UV range.
- Ideally suited for measurements at 260 nm, 280 nm and in the visible range.
- Two different centre heights (8.5 mm and 15 mm) allow use in most commercial spectrophotometers without adapters (for more information please visit the Brand website, www.brand.de).
- Round caps provide a tight seal and allow storage of samples at -20 °C.
- Coloured caps are available for easy sample identification.
- Grouped by mould cavity number to minimize extinction value variation.

The UV cuvette is also available as a macro and semi-microscope cuvette for analyzes from 230 to 900 nm.

Made of plastic for the UV/VIS range. For analyzes from 230 to 900 nm

- Compatible with most polar solvents, as well as acids and alkalis (eg acetone, butanone, DMF, concentrated HCl, etc.)
- Ideal for the determination of proteins, DNA, RNA
- number-sorted to reduce extinction deviations
- Verified windows to protect against scratches

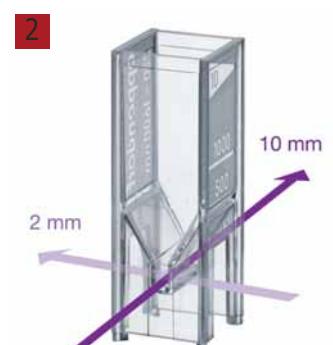

Description	Capacity	Path length	Operating range	PK	Cat. No.

2 | 3 UV cuvette UVette®

The plastic material of the UVettes® provides a transparency range of 220 nm to 1600 nm. It is possible to carry out measurements in the UV range as well as the entire VIS range.

Eppendorf AG

- Suitable for measuring small volumes, min. 50 µl
- Individually blister-packed for sterile work
- DNA-/RNase- and protein-free
- Choice of two optical path lengths: 2 mm and 10 mm
- UV- and VIS-transparent between 220 nm and 1600 nm
- Volume markings at 500 µl and 1000 µl
- Total transparent material with outstanding surface properties
- Optimal filling guaranteed by tapered cuvette base
- Recessed optical window prevents scratches
- Self-standing design
- Marking possible on frosted gripping surface
- Optimal use in BioPhotometer and in most common spectrophotometers, using adapters.

1 HELLMANEX® III liquid

Cleaning:

HELLMANEX® III is an alkaline liquid concentrate used for the highly effective cleaning of glass or silica cells and other sensitive optical components. Laboratory equipment made of glass, quartz, sapphire and porcelain can also be cleaned using the solution.

Hellma Analytics

Characteristics:

Hellmanex® III significantly reduces the surface tension of water. The removal of dirt particles is also assured by the good wetting action of a Hellmanex® III aqueous solution, whilst its high emulsifying and dispersing capabilities prevent the re-deposition of the loosened particles. Special surface-active substances facilitate the residue-free rinsing of the optical components once they have been cleaned.

Cleaning and Dilution:

The optimal dilution depends on several factors, such as the hardness of the water, the degree and type of contamination, the temperature, etc. The use of demineralised water improves the cleaning characteristics.

Available in 1.3kg PE-bottle.

The following treatments have been proven at a **concentration (vol%) 0.5 to 2** in practice.

1 | 2 LLG-Dispenser system Wiper Bowl® Safe & Clean for cleaning tissues

The economical "building block solution" for thorough disinfection and cleaning of sensitive areas in the medical and foodstuff industries. Can be filled with all commercial disinfectant and cleaning agents.

The fine perforated structure of Multitex® cleaning tissues ensures an even distribution of the surface disinfectant. These tissues are also ideally suited to the cleaning of grossly soiled surfaces. Easy handling thanks to tear-off perforation. After cleaning the lid can be closed and the tissues stay moistened for more than 30 days ensuring a constant cleaning and disinfection performance.

LLG-Dispenser bucket Wiper Bowl® Safe & Clean:

Empty. For 1 roll Multitex® DR. Made of plastic, dia. approx. 21cm, resealable and reusable.

LLG-Cleaning tissues Multitex® DR:

Viscose fleece for LLG-Dispenser bucket Wiper Bowl® Safe & Clean.

White, fine, tear-resistant, absorbent and lint free.

3 Spray disinfectant Meliseptol®

Ready-to-use alcoholic disinfectant for all non-invasive medical inventory, medical devices e.g. examination chairs, hospital beds, theatre equipment and other kinds of surfaces.

B. Braun Deutschland

- Highly efficient based on a mid level alcohol concentration - active within 1 minute
 - Enhanced cleaning performance, even on shining metallic surfaces
 - Without additional antimicrobial ingredient (like aldehydes, QAC)
 - Pleasant, lemon-like smell
 - Fast and comprehensive activity spectrum incl. Mycobacteria and non-enveloped viruses as Rota-, Adeno- as well as Norovirus (MNV)ation
- Use disinfectants safely. Always read the label and product information before use.

This product is a disinfectant containing biocides. Please inquire its availability and legal information.

3 Surface disinfection Pursept®-A Xpress

Pursept®-A Xpress is a ready-to-use preparation for rapid disinfection and cleaning of surfaces and instruments (e.g., liquid handling instruments).

Schülke & Mayr GmbH

It works in only 15 secs. - even before the surface dries. DGHM tested and RKI compliant. Dermatologically tested for skin tolerance. Aldehyde-free

For RKI compliant use, apply Pursept®-A Xpress full strength to a disposable cloth. Then thoroughly wipe off the area to be disinfected with the wet cloth. Be sure to wipe everything completely. The surface should remain moist during the entire working time.

Use disinfectants safely. Always read the label and product information before use.

This product is a disinfectant containing biocides. Please inquire its availability and legal information.

H phrases: H226|H319

Contents per 100g:

55g ethanol, 0.03g N-alkyl aminopropyl glycine; auxiliary agents.

Surface disinfection:

Bacteria and fungi with little organic burden with mechanics acc. to DGHM/VAH*directives:

15secs.

Limited virucidal efficacy** (incl. HIV, HBV, HCV):

15secs.

Effectiveness against TbB:

30secs.

Liquid:

colourless, transparent

Density:

approx. 0.9g/cm³

pH value:

approx. 7.5

1 Surface disinfection concentrate, Pursept® AF

For alcohol-resistant worktops and equipment surfaces in microbiological and medical laboratories. Cleans and disinfects floors, walls and equipment in one operating cycle. Effective against bacteria, fungi and viruses, in particular Hep.-B and HIV. Tested and certified in accordance with the guidelines of the DGHM (German Hygiene and Microbiology Society). Particularly gentle on surfaces, kind to skin and has a pleasant, fresh fragrance. Use disinfectants safely. Always read the label and product information before use.

This product is a disinfectant containing biocides. Please inquire its availability and legal information.

H phrases: H302|H314|H400

Contents per 100g:

12.5g didecyl dimethyl ammonium chloride
< 5% NTA,
< 5% non-ionic surfactants, auxiliary agent
1.5g (aminopropyl)-lauryl amine, auxiliary materials

Microbiological power/application concentration Surface disinfection:

Bacteria and fungi in acc. with DGHM: 0.25%/4 hrs., 0.5%/60 min., 1%/30 min., 2%/15 min.
Limited virucidal efficacy* (incl. HIV, HBV, HCV): 1%/15 min.
Inactivating human rotaviruses: 0.25%/2 mins.
Concentration for TbB: 2%/60 mins.
Liquid: clear, green
Density: approx. 1g/ml
pH value (1%): approx. 10

1 Universal cleaner, neodisher® LaboClean A 8

Alkaline universal detergent for the automated cleaning of laboratory glassware and other utensils for laboratories, powder.

Dr. Weigert

Universally applicable, with excellent cleaning performance and dirt carrying capacity. Removes blood, serum, food residues, pharmaceuticals, paints, varnishes, gelatine and other organic residues. Free of surfactants.

Danger

H phrases: H290|H314|H318|H411|H335

1

2 Special cleaner, neodisher® LaboClean GK

Mildly alkaline detergent for the automated cleaning of laboratory glassware and other utensils for laboratories, powder.

Dr. Weigert

Especially for the automated cleaning of glassware for cell and tissue cultures, in the field of microbiology and nuclear medicine as well as in isotope laboratories. Removes residues of culture media, residues of cell and tissue cultures, radioactive contamination, organic colour and pigment contamination. Easy to rinse off. Free of surfactants.

Warning

H phrases: H315|H319|H335|H411

2

3 Special cleaner, neodisher® LaboClean LA

Highly alkaline intensive detergent for the automated cleaning of laboratory glassware and other utensils for laboratories, powder.

Dr. Weigert

With a highly emulsifying, dispersing and defoaming action. Especially suitable for the removal of fat, oil, resins and paraffin. Free of oxidising agents.

Danger

H phrases: H290|H314|H318|H335

3

4 Special cleaner, neodisher® MA

Mildly alkaline detergent for the automated reprocessing of surgical instruments and anaesthesia materials, and other medical technological utensils, powder.

Dr. Weigert

Excellent cleaning action and material compatibility. Free of oxidising agents.

Cleaning implements/Brushes-Hair brushes

1 LLG-Cleaning brushes

Excellent tools for washing and cleaning of all type of laboratory bottles, flasks, tubes, condensers, burettes, etc. Brush material is manufactured from highest quality of fibre/perlon for long life cycle. Brush stem is manufactured from corrosion proof twisted steel wire. Brush handle is manufactured from polypropylene and offers extreme easy handling and use of the brush. Unique handle design enables hanging of the brush to a convenient place for easy reach. Spherical sponge top part enables access to every corner of the labware and guarantees perfect cleaning results.

1 | 2 Mini-Ultrasonic Cleaner LLG-uniSONIC 1

For convenient cleaning of goggles or smaller laboratory instruments. Eco-friendly, only needs warm water. By ultrasonic sound millions of small air bubbles are generated. Combined with a very high pressure these achieve a fast, efficient and effortless cleaning.

- Ready to use, no assembly required
- Automatic 3-minute-operation can be stopped anytime
- Removable lid
- Stainless steel tank

Scope of supply: ultrasonic cleaning device, lid

3 Ultrasonic Baths, SONOREX SUPER

These devices work at 35kHz and have transducers for maximum cleaning power.

Bandelin

SweepTec® for permanent sound field oscillation ensures even and gentle cleaning.

Available with heating with adjustable temperature range from 30 to 80 °C .

Power information: High ultrasonic peak power and nominal ultrasonic power 230V, 50/60Hz.

All models are spill-proof with stainless steel tanks (RK 102H hard-chromium plated) and outer cases, drip proof (IP32).

For cleaning of technical glassware like burettes, pipettes, petri dishes and laboratory flasks, metal parts of all kinds, electronic components. Also suitable for cleaning and disinfection of medical instruments and acceleration of suspending processes, production of emulsions.

Type RK 102 H and above supplied with outlet

Ultrasonic Baths, SONOREX SUPER

Heavy duty ultrasonic baths for cleaning or sample treatment in aqueous liquids.
 Suitable for laboratory and respiratory protection area, industry, workshop and service area.
 - Stainless steel tank and housing
 - Drip water protected
 - With integral tank drain tap (G 1/2) for easy emptying (RK 106 with G 1/4)
 - Radio shielded

Bandelin

Models with Type addition H with adjustable temperature range.

Specifications

HF-Frequency:	35 kHz, SweepTec®
Temperature range:	30 ... 80 °C

Ultrasonic Baths Sonorex Digitec DT ... F - Basic equipment

Flat ultrasonic baths with fast degassing and for sample preparation.

Bandelin

- Sample preparation in laboratory flasks
- Fast degassing of samples at the push of the button
- Homogenising
- Same power density in all ultrasonic baths
- Reproducibility of results in the different bath sizes
- Uniform sonication of samples irrespective of size and arrangement of the flasks

Scope of delivery:

DT 510 F: flask holder GL 510 F and 250ml Tickopur R 33

DT 1028 F: 2 x flask holder GL 510 F and 250ml Tickopur R 33

Spring clamps EK or flask holders ZF are necessary to fix the laboratory flasks.

2 Ultrasonic pipette cleaner PR 140 DH

Ultrasonic cleaning of plastic or glass pipettes, burettes and other glassware.

Bandelin

Short cleaning times, no time-consuming washing.

- Gentle cleaning of volume-measuring devices and parts with lengths up to 755 mm
- Pulse function
- With heating for dissolving grease residues
- Robust tank of stainless steel 1.4301, 1.5 mm
- Tilt handles for easy transport
- Placement on the floor nearby the drain
- Cleaning liquid for multiple use, fast emptying by ball valve

Scope of supply:

Ultrasonic bath PR 140 DH incl. pipette basket K 140 B, lid 140 D, cleaning concentrate TICKOPUR R 33 (5 l) and TICKOPUR TR 3 (1 l)

H phrases: H315|H318

1 Ultrasonic Bath with Shaking Device SONOSHAKE

Consisting of:

Bandelin

- Ultrasonic bath Sonorex Digitec DT 1028 F
- Low-profile, ultrasonic bath with stainless steel tank, inner dimensions 500mm x 300mm x 65mm (L x W x D)
- Housing made of stainless steel, protected against spray, 535mm x 325mm x 205mm (L x W x H)
- Outlet: G½ ball valve
- Timer: 1, 2, 3, 4, 5, 10, 15, 30 min, or continuous
- Ultrasonic peak power 1280W
- Ultrasonic nominal power 320W
- Working frequency 35kHz, SweepTec®
- Current consumption 1.4A

Shaking device SA 1028

- Analogue setting of time (1 to 15 min, or continuous) and shaking frequency
- Reciprocating motion: settings in 4 steps possible of up to 200/min
- Constant amplitude of 20mm independent of loading
- Rack easy to remove - easy mounting of the laboratory clamps EK 10-250 (separately to order)
- Footprint approx. 410mm x 280mm (L x W)
- Holds 36 x 10ml, 36 x 25ml, 18 x 50ml, 12 x 100ml or 10 x 250ml flasks
- Bench space required for Sonoshake approx. 850mm x 360mm (L x W)

An existing SONOREX DIGITEC DT 1028 F ultrasonic bath can easily be retrofitted with the shaker attachment SA 1028.

Sound proof boxes USBB series

The USBB series has been developed especially for the noise insulation of ultrasonic baths in the laboratory.

Sonation GmbH

Advantages:

- High noise reduction up to 30dB(A). That means a drop in noise of 90 to 95%
- Available in four different sizes for mostly all ultrasonic baths, compatibility list for Bandelin Ultrasonic baths on request
- The cover can be completely opened, so the removal of the basket is very easy to handle
- Smooth and easy handling of the cover, no additional space needed when opening, so the box can be placed and operated under extractor hoods
- Control panel stays visible. Thanks to the transparent front, the progress of the washing program can be observed anytime
- Equipped with fast access openings on the front and both sides to operate the ultrasonic bath or to drain the cleaning agent
- Integrated fan to remove vapors
- Recessed grips on the sides for easy transportation
- Powder coated, robust and easy cleanable surface

Type	External dimensions (W x D x H) mm	Internal dimensions (W x D x H) mm	Weight kg	PK	Cat. No.

TICKOPUR R 33: Universal cleaner, concentrate. Properties: mildly alkaline pH 9.9 at 1%, dosage 3 to 5%. For: metal, light metals, glass, ceramics, plastic, rubber, e-filters, respirators. Against: grinding, polishing and lapping residues, oily and greasy soiling, waxes, silicone films, ink.

TICKOPUR RW 77: Special cleaner with ammonia, concentrate. Properties: mildly alkaline, pH 9.9 at 1%, dosage 5%. Based on: surfactants, ammonia. For: metal, glass, ceramics, plastic, rubber, boards, watches, test sieves. Beware of light metals. Against: resin, soot, pigments, polishing and lapping residues, greases, oils, waxes, stains, flux.

Concentrates for ultrasonic baths STAMMOPUR

STAMMOPUR concentrates have been especially developed for ultrasonic application and are marked CE according to the Medical Devices Directive (MDD). All solutions are environmentally friendly, biodegradable and easy to dispose. STAMMOPUR contains special active substances and adjuvants which achieve an optimal disinfecting and cleansing effect while at the same time sparing the instruments

Bandelin

Strong and flexible: Miele lab washers in three size categories

Miele Professional. Immer Besser.

Miele sets new standards with three model series when it comes to performance, safety and user-friendliness in the reprocessing of laboratory glassware.

- PLW 86* large-chamber lab washers in two widths
- Space-saving SlimLine units with ample capacity on a small footprint
- Compact lab washers* – also as undercounter models
- With EasyLoad – Miele's highly flexible loading system

**Perfectly matched
System4Lab -
Single-source supply**

1 | 2 Washer-disinfector PG 8583/PG 8583 CD/PG 8593

PG 8583

- Capacity per cycle: e.g. 128 laboratory flasks or 98 pipettes together with other laboratory glassware
- Efficient use of resources with the variable speed heater pump
- Monitored for reliability: Wash pressure and spray arm monitoring
- Convenient drying assistance: EcoDry function
- Total security: Link to process documentation possible
- Depending on version, up to 2 integrated dispenser pumps for liquid products

Miele

PG 8593

- Additionally with integrated DryPlus hot-air drying

PG 8583 CD

- Additionally conductivity monitoring
- Efficient hot air drying: Dry Plus
- Two integrated dosing pumps (liquid detergent, neutralising agents)
- Setting options for chemical agents (3 x 5l/2x 10l)

In several countries different machine versions of Miele washer-disinfector are available (type, electrical connections etc.)

CertoClav tabletop autoclaves

Its versatility and compact construction make autoclaves especially interesting for small labs or they can be used as an optimal addition to a large autoclave.

CertoClav

All models: Low-maintenance. No water connection required. Compliant with 2014/35/EU Low Voltage Directive, 2014/30/EU EMV Directive, 2011/65/EU Directive on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

Vertical models: Class N steam sterilisers. Venting procedure: free steam flow process or fractional flow procedure. A heater is integrated in the bottom of the chamber, but it is not exposed. Therefore, it cannot calcify. The autoclaves are easy to transport and location independent. All you need is a power supply and a mixture of tap water and demineralised water. Safeguarded by a multiple safety system. In aluminum models, it consists of an overpressure valve, a pressure valve, a safety lock inside the lid to prevent opening under pressure and the overpressure safety cavity. In stainless steel models, it consists of an overpressure valve, a pressure valve, a safety lock inside the lid to prevent opening under pressure and a two-bimetal safeguard to prevent overheating of the device.

1 Tabletop autoclaves CertoClav EL

The vertical laboratory autoclave with valve control is suitable for sterilisation of unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials, food preservation, culture media preparation and waste. A precision manometer with drag pointer and a precision thermometer ensure that operations and processes are precise. This autoclave is available in two versions, each with two temperature levels. Pressure control via valve, temperature control via thermostat. Pressure valves are not interchangeable, because the thermostat of the device is perfectly adapted and calibrated to the valve.

Scope of supply: Autoclave, stable instrument panel with 3 feeds, minimum water level indicator, power cable

Specifications		EL 12 // EL 18

2 Tabletop autoclaves CertoClav Classic

CertoClav Classic is the result of further development of the EL, but made of corrosion resistant, electropolished stainless steel. Suitable for sterilisation of unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials, food preservation, culture media preparation and waste. A timer is integrated.

Scope of supply: Autoclave, stable instrument panel with 3 feeds, minimum water level indicator, power cable

Laboratory autoclaves CertoClav MultiControl 2

The PT100 sensor-controlled, vertical laboratory autoclave is suitable for extended/long-term cycles, material tests, HAST test, pressure vessel test und ICP - TM 650, food preservation, culture media preparation, sterilisation of waste, unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials and rubber. Basic version of PC software for data monitoring is included. With this software, you can only set single-step programs. For multi-step programs, PC software professional version is required.

CertoClav

The CertoClav MultiControl 2 Touch is additionally equipped with a 7-inch robust high-resolution tablet. The operating steps are explained with videos on the screen.

- Programmable from 1 minute to 30 days and from room temperature to 140 °C
- Automated process control and error detection
- USB port
- Printer port (RS232) for printing sterilisation protocols

Scope of supply:

MultiControl 2: Autoclave, stable instrument panel with 3 feeds and minimum water level indicator, power cable, MC2 controller

MultiControl 2 touch: Autoclave, stable instrument panel with 3 feeds and minimum water level indicator, power cable, MC2 controller, tablet

Laboratory autoclaves CertoClav Connect

The fully automated, vertical laboratory autoclave is suitable for extended/ long- term cycles, material tests, HAST Test, pressure vessel test, ICP - TM 650, food preservation, culture media preparation, sterilisation of waste, unpackaged solids without hollow bodies, liquids, bottles, instruments, synthetic materials and rubber. It is operated via of a 7-inch high-resolution tablet. All operating steps are explained with videos directly on the tablet. Compliance with GLP requirements through automatic documentation of users and cycles. Process protocols are stored in the CertoCloud for 10 years. Integration into laboratory data systems possible. For autoclaving liquids, a PT100-media sensor is optionally available.

Tabletop autoclaves CertoClav Vacuum Pro series

CertoClav

Due to the intelligent combination of vacuum, pressure and steam, the autoclaves are suitable for liquids and solids of all kinds. The additional media sensor guarantees a complete sterilisation of liquids such as culture media. Solids of all kinds and hollow materials are optimally sterilised with the help of a vacuum pump. The preheatable chamber, cooling-ventilation and vacuum pump guarantees short cycle times from 20 minutes including drying time.

- 7-inch touchscreen
- Including free CertoCloud software for all protocols and programs
- Remote maintenance, alarm system via PC, tablet or smartphone
- Notification by e-mail and SMS
- 12 customisable programs (45 l version with 8 customisable programs)
- Interfaces: USB, WiFi, Ethernet, Bluetooth, SD-Card
- Integrated documentation (GMP/GLP conform)
- Standard interfaces for bar scanner, protocol and label printer

Digital horizontal autoclave Type AH

This autoclave is microprocessor controlled and monitored with 10 sterilisation programmes of which 4 are fixed and 6 are freely selectable and has bacteriological filters included by default.

Raypa

- Operating temperature range 100 °C to 134 °C
- On request, also available with B Class
- RS 232 interface
- Fully automatic functions
- With water reservoir, pre-vacuum and drying
- Case and lid shrouding are AISI 304 stainless steel
- Sterilisation chamber, lid and sealing system are AISI 316 stainless steel
- Electrical heating with protected heating elements
- Safety pressure valve
- Safety thermostat
- Automatic steam controlled by Touch Screen microprocessor
- Manual valves for emptying the sterilisation chamber and for draining steam
- Equipped with mesh stand on the chamber base and trays
- Supply requirements: 230 V 16 A single phase

Type	Capacity	Chamber diam. x depth	Width	Length	Height	Rating	PK	Cat. No.

On request also available counter-pressure, steam generator or without vacuum and drying.

6.267 579

Digital vertical autoclaves, AES series

These autoclaves are microprocessor controlled and monitored with 10 sterilisation programmes of which 4 are fixed and 6 are freely programmable.

Raypa

- Operating temperature range 100 °C to 134 °C
- On request also available with vacuum pump and steam generator
- Agar modus (40 °C to 80 °C)
- RS 232 interface
- Timer
- Programmable auto-start (24 h)
- Fully automatic functions
- Case and lid shrouding are AISI 304 stainless steel
- Sterilisation chamber, lid and sealing system are AISI 316 stainless steel
- Electrical heating with protected heating elements in the interior of the chamber
- Safety pressure valve
- Safety thermostat
- Automatic steam controlled by microprocessor
- Manual valves for emptying the sterilisation chamber and for draining steam
- **Supply requirements:**

AES-12 and AES-75: 230 V 16 A single phase

AES-110 and AES-150: 400 V + Neutral (3-phase)

Steam sterilisers - Autoclaves/Instruments

GENERAL CATALOGUE EDITION 21

1 | 2 Smart vertical autoclaves, TLV series

NEW

Raypa

These autoclaves are microprocessor controlled and monitored with 50 sterilisation programmes and comes with bacteriological filters included by default.

- Operating temperature range 100 °C to 140 °C
- With vacuum pump and steam generator
- Maximum working pressure 2.6 bar (37psi)
- RS 232 interface, USB and WiFi
- Timer
- Fully automatic functions
- PT 100 temperature sensor
- Case and lid shrouding, stainless steel
- Sterilisation chamber, lid and sealing system, stainless steel
- Electrical heating with protected heating elements in the interior of the chamber
- Safety pressure valve
- Safety thermostat
- Automatic steam controlled by microprocessor
- Pressure gauge
- 4 casters (with brakes in two of them)
- 7" capacitive colour touch screen
- Power Supply: 230V 50/60 Hz
- Remote maintenance and diagnosis via cloud
- Remote operation monitoring via cloud

1 Steam sterilizers (autoclaves), HG series

- Certified according to the Pressure Equipment Directive 2014/68/EU
- Available in 4 sizes with 50, 80, 113, 133 liters of effective usable volume
- Innovative locking system with motorized lid including pressure and temperature monitoring
- Steam generation in the chamber
- High energy efficiency and long service life
- Rapid cooling for short cooling times
- Also available with flexible temperature sensor for the sterilization of liquids
- Timer function and 4 program groups with 3 sub-groups each, including night and dissolution program, adjustments for customized programs are always possible
- No water/waste-water installation required
- Castors for mobile use
- Easy to clean plastic surface with rounded edges in contact areas (no burns or injuries).
- Electrical, mechanical and constructional factors guarantee the highest level of quality and user protection
- The accessories make it possible to configure the autoclave according to your wishes
- Exhaust air filters for laboratories of safety level S2 and higher are also available

Steam sterilisers - Autoclaves/Instruments

GENERAL CATALOGUE EDITION 21

1 Steam sterilizers (autoclaves), HV series

Tireless, durable and ingeniously simple

HMC-EUROPE

- Certified according to the Pressure Equipment Directive 2014/68/EU
- Available in 4 sizes with 25, 50, 85 and 110 liters of effective usable volume
- Simple, reliable and with a long service life, your perfect choice for standard tasks
- Optionally available with flexible temperature sensor for the sterilization of liquids
- For all devices up to 110 liters only a single-phase power supply (220/240 V; 50/60 Hz) is required
- Timer function and 3 program groups with a max. of 6 programs including dissolution program, adaptions for customized programs are always possible
- No installation to a feed water supply required
- Castors for mobile use
- Easy to clean plastic surface with rounded edges in contact areas (no burns or injuries)
- Electrical, mechanical and constructional factors guarantee the highest level of quality and user protection
- The accessories make it possible to configurate the autoclave according to your wishes
- Exhaust air filters for laboratories of safety level S2 and higher are optionally available

Benchtop-Autoclaves HMT FA/-MA and -MB series

HMT 230/260 FA - for standard tasks:

- Certified according to regulation 93/42/EEC
- Available in 2 sizes with a volume of 16 or 24 liters
- 9 sterilization programs, fully automatic: 121 °C wrapped/unwrapped solid items; with or without drying, 135 °C wrapped/unwrapped solid items; with or without drying, Liquid program: 121 °C, 40 min.
- Controlled by a microprocessor
- Simple digital display
- Water tank
- Electromechanical overheating protection
- Safety valve
- Mechanical pressure-dependent door lock
- Reset/emergency button
- Easy maintenance

HMC-EUROPE

1

7.980 101

HMT 230/260/300 MA - versatile table-top autoclave:

- Certified according to regulation 93/42/EEC
- Available in 3 sizes with a volume of 16, 24 or 40 liters
- Powerful integrated vacuum pump, an essential feature for sterilizing tubes and hollow components
- 7 sterilization programs, fully automatic: 121 °C wrapped/unwrapped (vacuum), 134 °C wrapped/unwrapped (vacuum), Liquid and prion programs, Bowie-Dick test
- Controlled by a microprocessor
- Progress indicator
- Internal water tank
- Electromechanical overheating protection
- Electronic overpressure protection
- Pressure safety valve
- Mechanical pressure-dependent door lock
- Reset/emergency button
- Easy maintenance

2

4.655 164

HMT 260/300 MB - premium table-top autoclave:

- Certified according to regulation 93/42/EEC
- Available in 2 sizes with a volume of 24 or 40 liters
- Powerful integrated vacuum pump, an essential feature for sterilizing tubes and hollow components
- 5 sterilization programs, fully automatic: Sterilization of wrapped items: 121 °C - 30 min.; 134 °C - 15 min., Sterilization of unwrapped items: 121 °C - 15 min.; 134 °C - 4 min., Individual temperature selection from 105 to 135 °C, Preset prion program
- 3 test programs: leakage test, helix test, Bowie-Dick test
- Controlled by a microprocessor
- Easy operation with a LCD display
- Documentation/data storage via SD card and printer
- Drying program, 1- 60 minutes
- 4 literwater tank, to be filled manually or automatically (purified water)
- Various safety features, e.g. safety valve or pressure-dependent door lock
- With modern design, easy maintenance

GENERAL CATALOGUE EDITION 21

Steam sterilisers - Autoclaves/Instruments-Accessories

1

1 Autoclave thermometer

Durable bi-metal thermometer with a maximum registering pointer (red), moved up by the temperature measuring pointer, (black), to indicate the highest temperature achieved, and remains there until it is manually reset.

Bel-Art Products

- Traceable to NIST Standard
- Threaded connection (1/4" NPT), screws directly into in-line processes, can be used to mount thermometer on included stand
- Waterproof and pressurised, withstands autoclave cycles and has a removable protective silicone sleeve to prevent moisture from making contact with the dial
- Constructed from 304 stainless steel with a glass lens; withstands pressure, high temperatures and rust
- Tested and inspected in the USA
- Includes a multi-language (English, French, German, Italian, Portuguese, and Spanish) Statement of Accuracy and instructions
- Available as an option with an individual Thermometer Calibration Report

Specifications

Measuring range: -20 to +150 °C
Probe length: 50 mm

2 Biological Indicators Attest™ for Control of Steam Autoclaves

Biological control involves the use of indicators, which check whether all microorganisms were killed during the sterilisation process. The bio-indicators are unique, as they directly indicate how many microbial spores have actually been killed. Thanks to the reliability and quality of the information, the regular use of a bio-indicator can lead to an improvement in the performance of the sterilisation process and thus to better results.

3M Deutschland

Features:

- No external laboratory is required for performance evaluation
- Easy handling
- Reasonable to use after repairs or maintenance of autoclaves

Application:

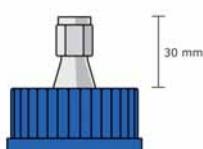

- Program 3.5 minutes, holding time at 121 °C or 134 °C
- After sterilisation, break the vial in order to bring the nutrient solution into contact with the spore strip
- Results in 48 hours
- Meets EN ISO 11138 standard

3 | 4 Screw Cap GL 45 with temperature probe holder, DURAN®

The DURAN® temperature probe holder GL 45 consists of a stainless steel holder that is permanently fitted into a blue DURAN® polypropylene GL 45 cap. The holder will accept the 6.0 mm metal temperature measuring probes that are commonly used in laboratory autoclaves and sterilizers.

DWK Life Sciences

Applications

- Routine sterilization /autoclave cycles
- "Loaded Chamber heat penetration" tests during Performance Qualification (PQ)
- Performance tests after autoclave maintenance or repair

Features

- Usable with DURAN® original GL 45 laboratory bottles (1000 ml or less).
- The depth of the probe can be adjusted to suit the bottle size
- Adjustable ferrule suitable for 6.0 mm diameter probes
- Retrace code for product traceability and downloadable certificate
- Easy positioning of the sensor in the middle of the bottle

11. Cleaning and sterilisation

Steam sterilisers - Autoclaves/Accessories

GENERAL CATALOGUE EDITION 21

1 polySteribox® sterilisation containers with permanent filter

The polySteribox® from Ritter Medical for sterilisation of instruments, storage and transportation of sterile goods is a secure solution in line with the requirements of validated processes in sterile goods provision. The polySteribox® is available in 4 different standardized sizes (SH, M, L and XL) which are suitable for all current sterilisation automats. polySteribox® is produced out of a transparent, dimensionally stable and high temperature resistant (up to 150 degrees celcius) material. It is therefore suitable for autoclave vacuum sterilisation at 121°C or 134°C depending on the sterilisation method recommended by relevant authorities such as the Robert Koch Institute in Germany. In addition the polySteribox® can be used for plasma sterilisation (STEARRAD®) as well as for gas sterilisation (formaldehyde and ethylene oxide) at a maximum of 65°C. Lid and bottom close hermetically and include a built-in bacteria barrier. The patented interlocking system is compatible within all different models and prevents from accidental opening of the box. The boxes are space-saving and easy to stack, therefore they are well suited for storage of sterile goods.

Type	External dimensions (W x D x H) mm	Internal dimensions (W x D x H) mm	PK	Cat. No.

Multiparameter Indicator 3M™ Comply™

Class 4 indicators with endpoint reaction. With chemical coating, change their colour when the sterilization cycle is successfully completed. *3M Deutschland*

- Steam sterilization colour change from yellow to black
- EO sterilization colour change from red to green
- Economical due to the possibility of cutting in half
- Complies with EN ISO 11140-1

1 Self-Seal Sterilization Pouches

Self-seal sterilization pouches are pre-folded and assure accurate and fast closing without the requirement of a heat sealing device. They are especially suited for use in small general practices, dental surgeries and by users who want to avoid costs of additional sealing equipment. The self-seal sterilization pouches are constructed from transparent PET/PP multi-layer copolymer film, medical grade paper and adhesive strip which provides excellent resistance to over-exposure of steam and clean opening. Water based, non-toxic process indicators for steam and ethyleneoxide sterilization complying with ISO 11140-1 are applied on the paper surface and help to differentiate between processed and unprocessed packages.

- Reinforced film to avoid tearing during opening
- Clean and accurate indicator color change
- Tear, fibre-free opening and aseptic presentation
- Triple band seal for higher package integrity

Heat-Sealable Sterilization Pouches and Reels

Heat-sealable sterilisation pouches and reels as a packaging solution for sterilisation applications, ensure reliable protection of the medical device against contamination with bacteria from the time of sterilisation until use of the sterile medical device. Flat and gusseted type and wide range of standard sizes allow optimum choice of correct sized packaging of each item. The sterilisation reels and pouches are constructed from transparent PET/PP multi-layer copolymer film and medical grade paper. Water based, non-toxic process indicators for steam and ethylene oxide sterilisation (complying with ISO 11140-1) are applied on the paper surface. This helps differentiating between processed and unprocessed packages.

- Reinforced film to avoid tearing during opening
- Clean and accurate indicator colour change
- Tear, fibre-free opening and aseptic presentation
- Triple band seal for higher package integrity

The sterilisation pouches and reels are effective barriers against germs and according the requirements of ISO 11607, EN 868-5 and ISO 11140-1 standards.

1 Sterilisation Pouches Qualitix®

Suitable for many laboratory instruments. The disposable bags are used for simple and effective wrapping of sterilization goods that are visible through the transparent PET/CPP film. With the self-sealing strip they can be closed safely and quickly.

Socorex

- Intended for steam and EO gas sterilization
- With two colour indicators
- Robust, durable material
- Wide, self-sealing strip
- Thumb notch for easy opening
- ISO 17665-06 and ISO 11135 conform

2 Roll dispenser with Cutter

The dispenser frame is made of stainless steel and steel rods with nylon bearings for hygienic use at CSSDs. The integrated cutting unit includes an accurate and high quality cutting blade, providing safe and secure handling, as well as easy replacement. The roll dispenser and cutter is an useful addition to rotary sealing machines. It's renewed and the modular design makes it an ergonomic and economic tool which can be used as single or double rack model on working stations or just mounted on the wall.

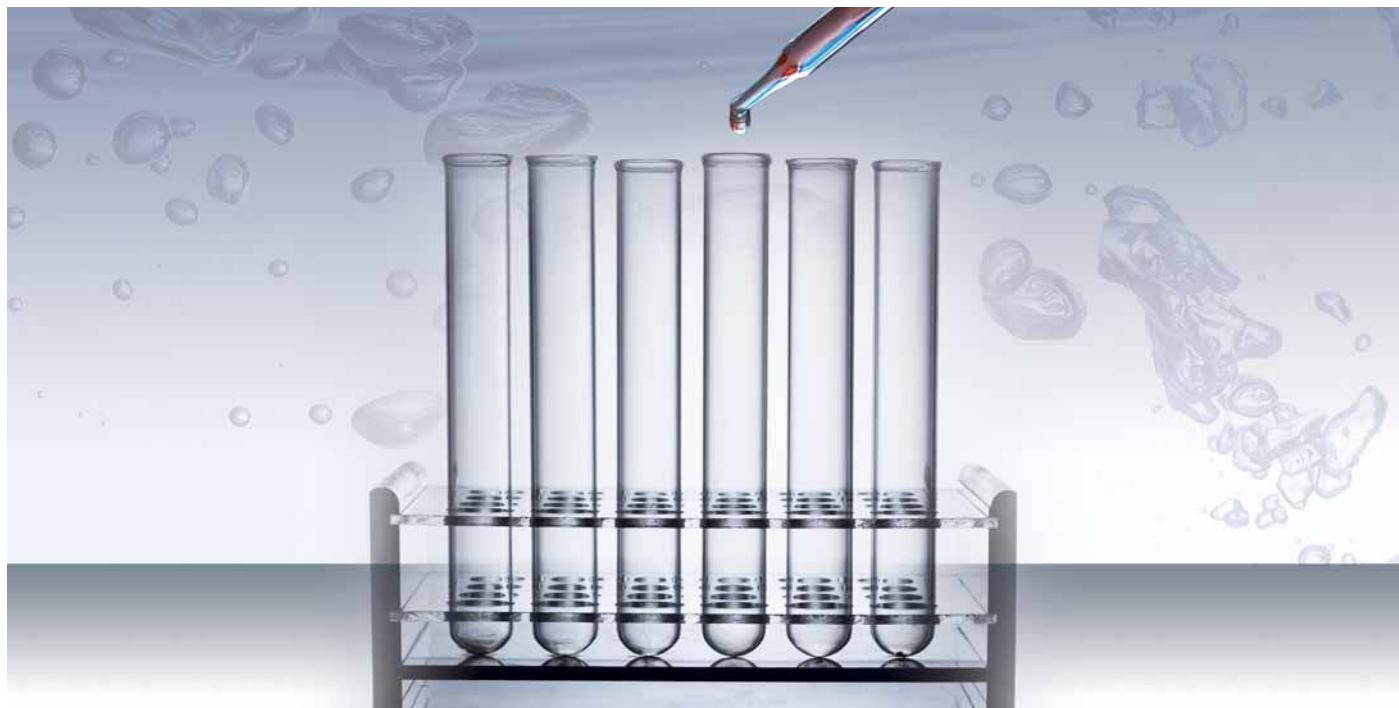

Description	PK	Cat. No.
Roll dispenser with cutter	1	6.272 287

3

3 Rotary Sealer

This Rotary Sealer is an entry model which is solid, durable and extremely easy to use. Once power is on and the variable temperature adjustment has been done, the Rotary Sealer works when it's needed and stops automatically when the work is done. The basic rotary sealer is microprocessor controlled and the temperature can be adjusted anytime easily. The sensitive temperature ranging between 50 °C and 250 °C provides the user with flexibility to seal different kinds of packaging such as paper/film and Tyvek® pouches. Automatic feeding driven by optical sensors and multiline sealing technique ensure optimum seal strength at continuous operations. This sealing system is validated, calibrated and in compliance with international standards.

GENERAL CATALOGUE EDITION 21

1 Sampling bags, PVDF

Reusable bags made of 2 mil (50 µm) PVDF fluoropolymer film, Chemware® Gas Bags offer an economical alternative for analysis of noncorrosive gases. Durable, heat-sealed seams ensure leak-proof operation. Available with either a nickel-plated, brass on/off valve that accepts 6.4mm I.D. flexible tubing or with a PTFE/silicone septum in a polypropylene housing for use with a hypodermic needle. Applications include sampling carbon monoxide, sulfur dioxide, hydrogen sulfide, radon and mercaptan. The bags are individually packaged. When used for liquid samples, bags should be supported with a tray. Custom sizes and configurations available on request.

Saint Gobain

- Flexible
- Will not contaminate sample
- Choice of fitting style: on/off or septum
- For use in gas sampling trains
- Use for gas or liquid sample containment

Capacity L	Size mm	Connection	PK	Cat. No.

2 Sampling bags, FEP

Made from 5 mil (125 µm) FEP fluoropolymer film, these flexible, sturdy bags are heat sealed on all four sides for complete chemical resistance and leak-proof operation. They are inert to most chemicals and have low permeability which limits sample loss. Available with either a nickel-plated, brass on/off valve that accepts 6.4mm I.D. flexible tubing or with PTFE/silicone septum in polypropylene housing for use with a hypodermic needle. These FEP bags are easy to use. They can be stored for an unlimited period prior to use. Applications include gas sample analysis, extracting air samples from smokestack exhaust systems, monitoring air quality or calibrating instruments in the field. The bags are individually packaged.

3 Air Flow Tester

In many fields, such as mining or industry, it is very important to detect even the smallest air flows, in order to quickly and reliably evaluate the possible diffusion of dangerous substances. With the air flow test tubes, the source, direction and speed of the air flow are visible immediately.

3 Dräger Sampling Tubes

Using the Dräger activated charcoal tubes or silica gel tubes, hazardous substances in the air are collected using a suitable medium via adsorption or chemisorption.

Dräger

The sample is then analysed in the laboratory by means of various analytical methods such as gas chromatography (GC), high performance liquid chromatography (HPLC), UV-VIS photometry, or IR spectroscopy.

GENERAL CATALOGUE EDITION 21

1

1 Dräger-Tubes®

The Dräger-Tubes® measuring system is the safe method for measuring pollutants in the soil, water and air. More than 500 substances can be measured in varying concentrations.

Dräger

The long-established principle of Dräger-Tubes® is still the same. A defined volume of gas/air must be pumped through the sampling tube. This can be achieved by using the Accuro® gas pump. On contact with the substance under test the reagent system contained in the tube reacts and displays a colour. The strength of the concentration of the substance is shown by the length of the colour band displayed and can be read directly from the scale. The Dräger-Tubes® sampling system provides accuracy, efficiency, quick and easy handling. Over 250 tubes are available on request for all substances and measuring fields. Further sampling devices, diffusion tubes for long-term measurements as well as sampling systems with activated carbon tubes, ORSA collector and TDS thermodesorption tubes are also available.

Dräger Aerotest Alpha

The Dräger Aerotest Alpha allows the quality of breathing air supplied by a compressor or compressed gas cylinder to be determined. Use of the test system performs a reliable check in accordance with the breathing air standard EN 12 021.

Dräger

Dräger Aerotest Alpha

comprising of 1 pressure reducer, measuring device for 4 tubes, impactor adapter, coupling, barbed nipple, stopwatch, tube opener Dräger TO 7000, bubble test hose, pack of 5 sintered filters, instruction for use, transport case (black)

Dräger Aerotest Alpha, with Dräger Tubes:

Dräger Aerotest Alpha

- + box of 10 Dräger Oil Impactors,
- + box of 10 Dräger-Tubes carbon dioxide (CO₂) 100/a-P,
- + box of 10 Dräger-Tubes carbon monoxide (CO) 5/a-P,
- + box of 10 Dräger-Tubes water vapor (H₂O) 20/a-P

Specifications

Dimensions of carrying case (L x W x H)	350 x 300 x 85 mm
Weight, including contents	approx. 3.0 kg
Max. supply pressure	15 bar
Supply pressure (set on delivery)	3.0 bar
Pressure gauge	0.3 to 15 bar
Connection for compressed air supply	barbed nipple 9 mm
Flow rate	0.2 and 4.0 l/min

Automatic tube pump Dräger X-act® 5000

The automatic tube pump Dräger X-act® 5000 is the first all-in-one solution designed for measurements with Dräger short-term tubes and for sampling tubes and systems.

Dräger

Ease of operation and a high degree of reliability compliment the measurement and sampling of gases, vapors and aerosols.

- New Pump Concept
- Simplicity of Operation, even with protection gloves
- Automatic Transfer of Measurement Parameters with barcode reader
- Measurement in Technical Gases
- Direct Settings for Sampling
- Simple and intuitive menu structure

Specifications:

Number of strokes:	adjustable, 1 to 199 strokes
Stroke volume:	100 ml
Sample taking	
Flow rate range:	0.1 to 2.0 L/min Resolution 0.1 to 1.0 L/min: 0.1 L/min ±5 % Resolution 1.0 to 2.0 L/min: 0.2 L/min ±5 %
Sampling time:	adjustable, up to 12 hours, depending on flow rate Resolution in steps of 15 minutes (default) or 1 minute
Display:	two parts: segment and matrix
Menu languages:	Danish, Dutch, English, Finnish, French, German, Italian, Norwegian, Polish, Spanish, Swedish
Dimensions (H x W x D):	approx. 175 mm x 230 mm x 108 mm
Weight (without battery pack):	approx. 1.6 kg
Temperature during storage:	-20 °C to 55 °C
Temperature during operation:	5 °C to 40 °C
Humidity:	0 to 95 % r. h., non-condensing
Pressure:	700 to 1300 hPa

1 Carbon Dioxide Safety Monitor AX60

1

Gas warning device for precise measurement of the amount of CO₂ in the air.
 3 alarm settings factory set: Time-weighted average (TWA) alarm (5000 ppm; 0.5 % CO₂),
 Low alarm (15.000 ppm; 1.5 % CO₂) and High alarm (30.000 ppm; 3 % CO₂)

- No calibration required (unless local regulations state otherwise)
- Very long life sensor can last up to 15 years
- Up to 4 x CO₂ sensors and 8 x CO₂ alarms can be used per Central Display Unit
- Supplied with a relay on each alarm which can be used to trigger ventilation, extraction or a building management system
- Easy installation and maintenance can be conducted by the user
- Additional (quick connect) CO₂ sensors and alarms available if more than one entrance to the laboratory or more than one risk area
- Assists in compliance with Exposure Limit regulations such as EH40

Scope of delivery: wall-mounted central display unit, CO₂ sensor and CO₂ alarm which can provide an early warning of a CO₂ leak.

Specifications:

Range:	0.1 to 5 % CO ₂
Accuracy:	±5 % of alarm setpoint
Alarm intensity:	88 dbA
Monitor Display:	16 digit 2 line LCD in ppm
TWA Alarm:	5.000 ppm (0.5 %) over 8 hours
CO ₂ Alarms:	15.000 ppm (1.5 %) and 30.000 ppm (3 %)
Operating Temperature:	-5 to 50 °C
Central Unit Dimensions:	175 x 110 x 75 mm
Sensor & Alarm Dimensions:	72 x 170 x 45 mm
IP Rating:	IP55 (IP54 Central Display Unit)
Warranty:	5 years for electronics and sensor

2 behrotest® waste water mixers

behrotest® homogenisers. With transportable sample vessels. Homogenisers for pre-treatment, splitting and homogenization of heterogeneous water samples in accordance with the quality assurance and quality control standards for wastewater examinations. The vessels of the homogenizers are protected against damage in the yolk type frame and can be carried easily by the two handles. They can be filled at the sampling location by a flattened inlet connection. Capacities from 2 to 25 l permit extraction and collection of multiple samples. Exact measurement of the sample quantities due to graduation. Subsequently, the transport rack is just placed on the magnetic stirrer in the laboratory or in the sampling vehicle and the homogeniser is immediately ready for use. The speed of the magnetic stirrer can be adjusted by a controller. The user can thus comply with the specified cone height in all cases. Oxygen is thus prevented from entering the samples. Dosed extraction of the homogenised sample via PTFE spindle stopcock. 12 V, with adapter for mains connection.

3 Distillation unit FBA

Determination of the inorganic total fluoride FBA distillation unit behrotest® distillation unit to determine inorganically bound total fluoride

behr

In highly contaminated inorganic wastewater with a fluoride ionic concentration greater than 0.2 mg/l determination of the inorganic bound total fluoride takes place after digestion and distillation. The behrotest® distillation unit combines all components required for distillation on a stable laboratory stand. The unit is also suitable for larger analysis series due to the heating control system.

The single components are: Distillation equipment made of borosilicate glass for acid steam distillation, contact thermometer, heating mantles for distillation flasks and volumetric flasks.

1 Extraction unit EX 1000

Determination of hydrocarbon EX 1000 extraction unit

behr

The PFL sampling bottle is ideal for direct extraction in terms of ISO 9377-2. With its solid glass stopper, in addition it offers a decisive advantage in handling and safety.

The funnel separator facilitates the separation of the organic phase. The individual functional parts of the separator can be easily separated. The user can thus transfer the organic phase quickly and simply in one step to the clean-up column. In addition the individual functional parts are particularly easy to clean.

behrotest® column elution unit for the elution of soil samples

2

behr

Column elution unit: Column elution unit in acc. with the LUA recommendation with 4-channel hose pump with controllable speed. The unit consists of:

- Assembly stand for the system
- Controllable 4-channel hose pump with fixed speed
- Storage vessel, 20 l
- 4 elution columns, internal diameter 6 cm, 32 cm long, with 2 screwed joints (GL 45, with PTFE inserts) for simple filling of the columns
- 4 collection bottles for the column eluate, 2 l, with screwed joint (GL 45) and deaeration
- Supply tube made of TYGON and PVC, with non-return valve in the supply to the column
- PTFE tubes between columns and collection vessels
- Flow rate 0.003 to 35 ml/min
- Range of speed 2 to 100 min⁻¹
- Simultaneous control of all 4 channels

GENERAL CATALOGUE EDITION 21

1 CUS 2 clean-up-station

The behrotest® clean-up column with glass frit corresponds exactly to the provisions of ISO 9377-2.

behr

The practical twin stand provides safe support for two complete clean-up units with dropping funnel, clean-up columns and Kuderna-Danish flasks. Thus, the complete clean-up procedure can be carried out for two samples simultaneously - without delays due to time-consuming equipment or sample manipulation.

Clean-up-Station, supplied as: stand, 2 graduated round bottom flasks, 100 ml, 2 columns with grade 2 frits

Type	Description	PK	Cat. No.
CUS 2	Clean-up-Station	1	9.843 801

2 KOSTA 2 nitrogen station

The two-stage concentration of the organic phase is concluded by reducing the extract down to less than 1 ml under a mild nitrogen flow. In the behrotest® nitrogen station, a distributor leads the nitrogen flow via two individually adjustable tubes into the Kuderna-Danish flasks. Thus, two samples can be reduced simultaneously in accordance with ISO 9377-2.

Products made of PFA

Products made of PFA are chemically inert and highly suitable for applications requiring high purity, such as for environmental and trace analysis. They are heat resistant and have a non-stick, easy to clean surface. Due to the extremely hydrophobic, anti-adhesive and smooth surfaces, it has no carry-over, no cross contamination and no memory effects. High thermal stability from -200 °C to + 260 °C. Products made of PFA are ideal for storage of almost all corrosive chemicals, including hydrofluoric, nitric and perchloric acid.

Saint Gobain

Features

- Very low level of metal ions
- High mechanical strength and dimensional stability
- Can be used in the microwave
- Unbreakable, transparent
- Can be used for cryogenic applications down to -200 °C
- Heat resistant up to 260 °C

1 | 2 Test Tubes, PFA

These unbreakable test tubes are excellent for trace metal analysis. They are inert, non-contaminating, and transparent for easy viewing of contents.

Saint Gobain

They withstand temperature extremes. Can be sterilized repeatedly.

Available with or without PTFE-stopper.

- Made from fluoropolymer PFA resin
- Low metal ion content
- Inert

3 Autosampler-vials, PFA

VITLAB

Raised graduation with 1 ml subdivisions. Translucent material. Conical interior. Optionally available with snap cap for long term storage or lid with knob for fast opening and closing (dust protection) of the vial. Scope of delivery is without lid or cap. Please order the fitting lid (Cat. No. 6.283 275 resp. 6.283 276) separately.

- No memory effects
- Practically no carryover due to the extremely hydrophobic, anti-adhesive, smooth surfaces
- High thermal stability, from -200 °C to +260 °C
- Chemical inertness against nearly all chemicals
- Easy to clean

2 Watch Glasses, PTFE

Saint Gobain

This ultra-shallow, concave dish is ideal for holding, weighing, crystallizing, evaporating and drying small samples of liquids, powders and solids. It can also be used as a convex cover for beakers and Erlenmeyer flasks to limit airborne contaminants, while still allowing gas exchange. All sizes are molded to the same contour for easy stacking. Shatter-proof PTFE material is chemical resistant and easy to clean.

- Inert, chemically resistant
- Smooth and unbreakable
- Use as beaker covers

3 Evaporating Dish, PFA

Saint Gobain

The PFA Evaporating Dish design promotes evaporation of excess fluids to produce a concentrated solution or solid precipitate. The flat bottom provides good surface contact with a heat source, while the non-stick angled walls direct fluids to the base, which limits condensation on the dish wall. This PFA dish can be used in a wide range of temperatures, from cryogenics to 260 °C. The dish is also ideal for holding solid samples or small volumes of liquid. Features a broad spout for easy pouring.

- Chemically inert
- Ideal for trace metal analysis
- Transparent for easy viewing
- Perfect for microwave use
- Smooth, non-stick surface

Capacity ml	Height mm	PK	Cat. No.
100	29.5	1	6.267 447

4 Evaporating Dish, PTFE

Saint Gobain

This PTFE Evaporating Dish can be used to concentrate a solution or to create solid precipitates. The evaporating dish can also be used as a shallow bath, as a drying dish or as a beaker cover to protect contents from dust and other contaminants. PTFE material is unbreakable, chemically inert, and withstands temperatures up to 288 °C. The non-stick surface is stain resistant and easy to clean. Features a broad spout for easy pouring.

- Chemically inert
- Ideal for ultra-pure samples
- Withstands temperatures up to 288 °C

1 Griffin beakers, PFA

VITLAB

Transparent. With a raised scale. Excellent chemical resistance and very high thermal stability from -200 °C to +260 °C. Autoclavable at 121 °C (2 bar) according to DIN EN 285.

The advantages of PFA:

- Specially suitable for use in trace analysis
- Ideal for sensitive and valuable samples
- Long-term maintenance of low-concentration reference materials in PFA containers
- No memory effects
- Practically no carryover, no contamination due to the extremely hydrophobic, anti-adhesive and smooth surfaces
- Chemical inertness against nearly all chemicals
- Good transparency and dimensional stability
- Easy to clean
- Use of high purity raw materials

3 Erlenmeyer flasks, graduated, PFA

Erlenmeyer flasks, PFA are chemically inert for ultra-pure applications. The neck of each flask is slightly rounded for pouring and can be plugged with a stopper.

Saint Gobain

The conical shape and neck design allow contents to be mixed or stirred with reduced risk of splashing. The narrow neck also helps limit evaporation and contamination. PFA material has the lowest metal ion content of any fluoropolymer. Ideal for use in titration and for the preparation of microbial cultures.

- Chemically inert for ultra-pure applications
- Graduated
- Transparent for easy viewing
- Non-stick PFA surface-easy to clean
- Can be used in a microwave

4 Narrow-mouth bottles with cap, PFA

These unbreakable PFA bottles can be used for storage of virtually all corrosive chemicals, including hydrofluoric, nitric, and perchloric acids. PFA bottles are chemically inert, heat resistant with a non-stick, easy-to clean surface and are ideal for environmental sampling. The inert fluoropolymer cap liner ensures leak-proof sealing. Supplied with PFA caps.

Saint Gobain

- Ultra-pure, the lowest metal ion content of all fluoropolymers
- Unbreakable
- Chemically inert
- Non-stick, easy to clean
- Use for storage in pharmaceutical and semiconductor processing (intermediate stages)

2 Wide-mouth bottles with cap, graduated, PFA

These PFA graduated bottles have a convenient wide-mouth opening for easy filling and pouring. These unbreakable, chemically inert bottles can be used for storage of virtually all corrosive chemicals. PFA material is heat resistant, non-stick and easy-to-clean. Each includes a PFA cap with an inert fluoropolymer cap liner to ensure leak-proof sealing. Ideal for environmental sampling, or for storage in pharmaceutical and intermediate-stage semiconductor processing applications.

Saint Gobain

- Wide-mouth for easy filling

3 Wash bottles, PFA

These wash bottles feature a wide-mouth opening for convenience in filling and pouring of all types of liquids. Non-stick and easy to clean, fluoropolymer construction provides superior flex life and mechanical strength. As PFA contains the lowest concentration of trace metal ions of all fluoropolymers, these bottles are ideal for ultra-pure applications and environmental work.

Saint Gobain

- Wide-mouth for easy filling
- Chemically inert and leak-proof
- Flexible nozzle with 360° swivel; small orifice allows accurate content dispensing
- Transparent and break resistant
- Molded-in graduation marks

3 Volumetric flasks, PFA, class A, with screw cap

Highly transparent. Class A tolerances according to DIN EN ISO 1042. VITLAB
The PFA screw cap guards against contamination. Outstanding chemical resistance,
can be used with strong oxidants, highly concentrated acids and alkalis, hydrocarbons,
and ketones. With laser-engraved lot number and batch certificate.
Thermal stress up to 121 °C (autoclaving) does not permanently exceed the tolerance limit.
To preserve the ring mark, do not clean at temperatures exceeding 60°C.

The advantages of PFA

- Long-term maintenance of low-concentration reference materials in PFA containers
- No memory effects
- Practically no carryover, no cross-contamination due to the extremely hydrophobic,
anti-adhesive and smooth surfaces
- High thermal stability, from -200 °C to +260 °C
- Chemical inertness against nearly all chemicals
- Good transparency and dimensional stability, suitable for volumetric instruments
- Easy to clean
- Use of high purity raw materials

3 Jars, PFA

PFA jars store solutions, paste and bulk materials with no concern about leaching, corrosion, contamination or evaporation. They are resistant to corrosive liquids, acids, solvents, sensitive reagents, and staining solutions. PFA jars feature a large mouth for easy access and non-stick surface for easy cleaning. There is an area for identification marking on the side of the jars. Stackable, these jars have a knurled top for secure grip to facilitate easy opening and closing.

Saint Gobain

- Chemically resistant
- Ultra-pure
- Heat resistant and usable to cryogenic temperatures
- Secondary inner seal design for safety and integrity
- Ideal for storing digestion samples

Colourless pouring ring TpCh260, height 4 mm.

DWK Life Sciences

Temperature resistant from -196 °C to +260 °C.

Neck thread GL	PK	Cat. No.
45	1	6.803 677

3 DURAN PURE Premium lip seal cap, GL 45, PFA

Consequently the DURAN PURE premium lip seal cap is particularly suitable for use in the pharmaceutical, chemical and food industries. Due to the integrated lip seal, no further seal is needed to provide tight sealing of the bottles. Therefore it is ideal for storage and transport of sensitive products.

DWK Life Sciences

- Made from PFA and available for all GL 45 threads
- Produced and packed under Class 7 Cleanroom conditions
- Exceptional temperature resistance from -196 °C to + 260 °C
- Ideal for dry heat sterilization/depyrogenation
- Very high chemical resistance
- Conforms to FDA 21 CFR Section 177.1550 and USP class VI
- Simple cleanable and autoclavable

4 Sealing tape, PTFE

For covering areas which require protection against chemicals of all types at temperatures of -150 to +260 °C.

Non-swelling. Easy loosening of seams even after continuous operation.

Supplied in rolls as outlined below.

Width mm	Length cm	Wall thickness mm	PK	Cat. No.

6	6	300	9.012 476

12. Environmental-, soil-, water-, food analysis

Trace analysis/Accessories

GENERAL CATALOGUE EDITION 21

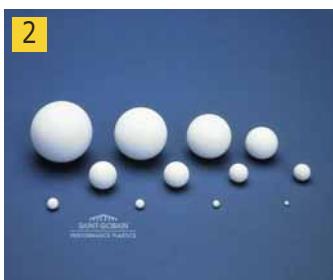

1 Boiling Stones, PTFE

Ultra-pure, virgin PTFE chips promote gentle, efficient boiling and help prevent overheating, even of highly volatile liquids. Ideal for continuous extraction methods. Stones minimize "bumping" during reflux and distillation. The boiling stones are not affected by acids, hydrocarbons, ketones, esters, alcohols or alkalis. They are easily cleaned and non-contaminating. Shows no trace of free acidity or alkalinity. They will not scratch or abrade glassware and leave no residue. Usable up to 288 °C.

- Chemical resistant
- Ideal for boiling organic liquids
- Minimizes superheating

Saint Gobain

Weight g	PK	Cat. No.
450	1	9.012 310

2 Balls, PTFE

PTFE balls minimize "bumping" during boiling. They are inert and can be used up to 288 °C. 100 balls per package.

- For column packing and mixing beds
- Resistant to most chemicals
- Non-contaminating

Saint Gobain

Diam. mm	PK	Cat. No.
3.2	100	9.012 453
6.4	100	9.012 456
9.5	100	9.012 459

3 Spatulas, PTFE fluoropolymer, coated

These spatulas are designed for use in the most severe laboratory conditions. They are made of nickel-plated stainless steel and fluoropolymer coating. The coating eliminates surface buildup or loss of valuable sample due to sticking. Will not scratch or damage delicate surfaces.

Saint Gobain

- Extra heavy-duty PTFE coatings
- Resistant to low and high temperatures
- Use for handling chemically active materials

Description	Length mm	Figure	PK	Cat. No.
Double-ended spatula	200	a	1	9.220 940
Spoon spatula	225	b	1	9.220 945

4 Stirrers, PTFE

These stirrers are ideal for scraping precipitates and residues. Chisel tip on one end and diagonal cut on other end permits applications in confined vessels. Chemically inert PTFE offers resistance to adhesion of any material. Unbreakable and heat resistant to 288 °C, they will not crack or break under severe conditions, such as thermal and mechanical shock, and will not scratch glassware.

Saint Gobain

- Highly inert PTFE coating
- Non-stick, easy to clean
- Low and high temperature resistant

Length mm	PK	Cat. No.
200	1	6.267 606

5 Stirring Rods, PTFE® Fluoropolymer

Contains fully enclosed steel insert for stiffness, yet can be bent to various shapes for use as a powered stirrer. Heat resistant to 288 °C and completely inert to highly corrosive reagents. Antistick properties facilitate cleaning.

Saint Gobain

- Inert to corrosives
- Easy to clean
- Bendable into shapes

Length mm	PK	Cat. No.
204.8	1	6.267 420
255.6	1	6.267 421
306.4	1	6.267 422
410.6	1	6.267 423

1 Forceps, PTFE Fluoropolymer, coated

Forceps are made of nickel-plated steel and have an extra heavy-duty coating of PTFE. The forceps have the same great features as the spatulas and tongs.

Saint Gobain

- Ridged grips prevent slips
- Inner pin retains closed position
- Rounded precision tip for accuracy and safety

Length mm	PK	Cat. No.
116	1	9.171 555

**2 Forceps, PTFE**

Made from PTFE resin with an encapsulated metal insert for strength. Chemically inert and non-contaminating, these forceps are ideal for laboratory work involving hot, cold, delicate or highly reactive materials.

Saint Gobain

- Chemically inert
- Non-contaminating
- Will not scratch delicate surfaces

Length mm	PK	Cat. No.
150	1	6.267 478

**3 Tong, PTFE fluoropolymer, coated**

The stainless steel tongs are covered with extra-heavy, non-stick PTFE coating and have the same great feature as the PTFE coated spatulas.

Saint Gobain

- Opposing grip handle for easy operation
- Coated tension screw will not corrode
- Contoured jaw enables handling of crucibles and other objects
- Tapered tips for enhanced grip; rounded for safety
- Use for handling chemically active materials

Length mm	PK	Cat. No.
240	1	6.267 479

**4 Dipper/Sieve Chemware®, PFA**

Resistant to most chemicals, the articles are ideal for ultra-pure applications and use with aggressive media. Handle design allows dipper to hook over edge of vessel, eliminating dripping of corrosive fluids onto surrounding surface. Use with containers that have at least an 80 mm opening. The sieve mesh size is available in 1.0 mm.

Saint Gobain

- Non-contaminating and resistant to most chemicals
- Superior chemical resistance
- Lowest concentration of metal ions of any fluoropolymer
- Ideal for coarse sorting or draining of aggressive media
- Handle hooks over edge of vessel for draining

Diam. mm	Length mm	Description	PK	Cat. No.
76	180	Dipper	1	6.267 475

**5 Sampler LiquiSampler, PTFE/FEP**

Bürkle

DIN 53242. For liquids. Made of ultra pure and chemically inert PTFE/FEP for contamination-free sampling. Practical push button, single-handed operation. Suitable for point, cross-sectional, and bottom sampling.

Ideal for sampling from open and closed drums, kegs, tanks, silos, water sources (ponds, lakes, streams, rivers). Suitable for all commercial kegs and drums with openings of at least 25 mm diameter.

All surfaces are non-porous and crevice-free preventing accumulation of dirt.

Only round-profile screwthreads, suitable for food hygiene applications, are used.

Simple to dismantle and clean.

1

Sampler ViscoSampler, PTFE/FEP

Bürkle

9.303 960

Ultra-pure sampler with powerful suction for tough substances. Specially designed for tough substances, such as slime, slurries, wet clay and soil samples, sediments, oils, emulsions and creams.

The filter flask sucks up and discharges the material. All surfaces are non-porous and crevice-free, preventing dirt accumulation. Only round-profile threads, suitable for food hygiene applications, are used. Allow easy dismantling and cleaning.

2 Bottle-top dispensers Dispensette® S

The Dispensette® S bottle-top dispenser makes liquid dosing easy and secure.

- Discharge tube, with and without recirculation valve
- Valve system - tight sealing without additional sealing rings
- Fast venting through improved aerodynamics
- Minimal force needed to operate - especially with high-volume devices
- Secure volume fixing with analog slide
- 1 ml dispenser - available as digital and analog version
- Autoclavable (121 °C)
- Easy to calibrate and adjust in order to comply with ISO 9001 and GLP guidelines
- Easy to disassemble for cleaning
- Removable filling and exhaust valve with safety bulb (closes when discharge tube is not mounted)
- To allow the bottle label to face the user, the valve block can be rotated by 360 °
- Telescope filling tube easily adjusts to different bottle sizes
- DE-M marking
- Analog volume display
- Quickly adjustable dosing volume

Included items:

Bottletop dispensers Dispensette® S, DE-M marked and supplied with performance certificate, telescope filling tube, recirculation valve (optional), mounting tool and adapters made of PP.

3

3 Bottle-top dispenser Dispensette® S Trace Analysis Analog

Dispensette® S Trace Analysis is ideal for precise volume dosing of high purity media for trace analysis. Can be used as hydrofluoric acid dispenser with Pt/Ir valve.

BRAND

Included items: Bottle-top dispenser Dispensette® S TA, DE-M marked and supplied with performance certificate, telescope filling tube, recirculation valve (optional), mounting tool and bottle adapters GL 28/S 28 (ETFE), GL 32 (ETFE) and S40 (PTFE), operating manual.

4 Test papers, potassium iodide starch

This test paper allows the quick and easy detection of strong oxidizers such as nitrite and free chlorine. Potassium iodide starch paper is also used to control diazotization reactions. Nitrite or free chlorine oxidize potassium iodide to form elemental iodine which reacts with starch to a blue-violet complex. Potassium iodide starch paper may be used by dipping it into the sample or by applying drops of the sample onto the paper. To detect gaseous oxidizers, the paper is moistened with distilled water and then exposed to the gas in question.

GENERAL CATALOGUE EDITION 21

1

1 LLG Photometers PrimeLab 1.0

The first and only photometer using just one LED and one (JENCOLOR) sensor, simultaneously covering 400 wavelengths in one go.

The JENCOLOR sensor allows self-calibration of the unit in seconds. More than 100 test methods are available to be individually selected when device is purchased. User can choose to either use tablet, liquid or powder reagents. Users can create and export test reports per "account" via software and/or App, where it can also store individual water treatment chemicals to create dosage recommendations. Using the PrimeLab adapter for Turbidity (NTU), PTSa and Fluorescein, even those parameters can be tested by the PrimeLab whereas user normally needs to purchase a second device. A full range of available test information can be found at www.primelab.org.

PrimeLab 1.0 Multitest Photometer BASIC-KIT 0-in-1

Without activated parameters and without reagents

PrimeLab 1.0 Multitest Photometer BASIC-KIT 3-in-1 (Chlorine/pH/Chlorine dioxide):

ID11 - Chlorine (free/combined/total) using DPD tablets

ID16 - Chlorine dioxide using DPD tablets

ID38 - pH using Phenol Red tablets

Reagent tablets to do 50 tests

More combinations of measurement methods on request.

PrimeLab 1.0 Multitest Photometer ALL-IN-KIT (all current and future parameters activated):

Contains the measurement methods of BASIC-SET 3-in-1 and same content as basic (over 100 parameters).

All available parameters are activated on the device and will be automatically added and activated while performing an update through PC-software or App.

Please order reagents separately.

Specifications

Optic:	JENCOLOR Multispectral sensor, covering 380 ... 780 nm

Sample analysis/Photometers

1 Photometers MD 110

Photometer for the analysis of determined parameters in drinking, industrial and waste water. Different models are available for common analyses as well as for special applications.

- Ergonomic, waterproof design
- Accurate, reproducible measurement results
- User calibration and single point calibration
- Measurement results are displayed directly in ABS or %T
- Zero value remains valid for all tests with the same sample thanks to the one-time zero (OTZ) function
- Automatic storage of measured values with time and date stamp and optional data transfer (IRiM module)
- Bluetooth® interface
- Scroll memory
- Automatic shutdown
- Adjustment function display

Scope of supply: Photometer, carrying case, reagents for 100 tests, cuvettes, batteries, standard accessories

Further photometers available on request.

1 Photometer system MD 600/MD 610

Modern, mobile photometers for rapid, reliable water testing

Lovibond®

All important water analysis parameters from Aluminium to Zinc are covered by these two devices. Combined with the high precision of Lovibond® reagents, a reliable and quick analysis of water samples is guaranteed. Reagent tablets, powder reagents, liquid reagents, or cuvette tests are used depending on the method. Please order separately. Six long-lasting LEDs serving as a light source in combination with interference filters guarantee the highest precision. The devices are designed without moving optical parts and thus have a maintenance-free measuring unit. Up to 1000 data records can be stored in the MD 600, MD 610 stores 500 data records.

- Highest/reproducible precision with interference filter
- Display with background lighting
- More than 120 pre-programmed methods
- Automatic selection of wavelength
- User guidance in German, English, French, Spanish, Italian, Portuguese and Polish
- Buffer for up to 1000 data records
- More than 35 user-specific methods possible
- Waterproof housing (as defined in IP 68, 1 hour at 0.1 meter)
- Handheld format, portable

MD 600 only:

- Infrared interface

MD 610 only:

- Bluetooth interface for connection to smart phones and tablets
- Cost-free iOS®- and Android™-App for data management and email delivery

Scope of supply: The instrument is supplied complete and ready-to-use in a carrying case, incl. 4 batteries, 3 vials diam. 24 mm, 3 vials diam. 16 mm, 1 adapter each for 16 mm and 13 mm vials. Please order reagents separately.

Specifications

Optics:	High-quality Interference Filters
Power Supply:	4 batteries (Mignon AA/LR6)
Operation time:	approx. 26 hours; continuous operation or 3500 tests
Dimensions (W x D x H):	approx. 210 x 95 x 45 mm (unit) approx. 395 x 295 x 106 mm (case)
Wavelengths:	530/560/610/430/580/660 nm
Wavelength Accuracy:	±1 nm
Photometric Accuracy:	0.005 A

2 Waste Water Set-Up MD 610

NEW

Flexible wastewater measuring station with mobile photometer MD 610 and thermoreactor RD 125, complete with reagents for COD measurement and the appropriate accessories. With the MD 610, the measurement results of the wastewater can be called up and evaluated on a smartphone or tablet. The RD 125 thermoreactor is equipped with 24 holes for 16 mm cuvettes.

- Data transfer via Bluetooth® and AquaLX® app
- Interference filter for increased reproducibility of the results
- Memory for 500 measurement results
- 120 pre-programmed methods

Scope of supply: Photometer MD 610, standard accessories, Thermoreactor RD 125, Cuvette tests: COD (0 ... 150 mg/l, 0 ... 1500 mg/l), ammonium VARIO HR (1 ... 50 mg/l N), nitrate VARIO (1 ... 30 mg/l N), nitrite LR VARIO Powder Pack (0.01 ... 0.3 mg/l N), nitrogen VARIO Total HR (5 ... 150 mg/l N), phosphate VARIO Total HR (0.02 ... 1 mg/l P/0.06 ... 3.5 mg/l PO4), cuvette stand, membrane filtration set, operating instructions, warranty declaration

1 Photometer system MultiDirect

With Dual Beam Technology. The MultiDirect is a modern, microprocessor-controlled photometer with ergonomically designed keypad and large-format graphic display. It is equipped with a wide range of pre-programmed methods (e.g. ammonia, COD, phosphate) based on the proven range of Lovibond® tablet reagents, liquid reagents, vial tests and powder reagents. The calibration and software-supported control options mean that the unit is also suitable for use as a testing instrument. The seven standard rechargeable batteries (supplied) ensure easy mobile use.

Lovibond®

- Wide range of pre-programmed methods
- Large, graphics display
- RS232 interface
- Suitable for use with standard rechargeable batteries
- Updates for new methods and languages via the Internet
- 1000 data set memory
- Custom method recall is also possible

Scope of supply: MultiDirect, ready-to-use incl. 7 x rechargeable batteries and battery charger for 100 - 240 V, 3 each 24 mm and 16 mm cuvettes, 16 mm cuvette adapter, 3 x syringes, 1 x 100 ml plastic beaker and case with waterproof insert. **Without reagents and without battery** (please order separately).

Verification Standard Kit: The verification standard kit for the MultiDirect is designed to reassure the user about the accuracy and the reliability of the results. The shelf life of the standard kit is two years from the date of production, provided that storage and use are in accordance with the instructions provided. Measurements are taken in mAbs.

Specifications

Optics:	Dual-Beam Technology, High-quality Interference Filters
Measuring time:	approx. 10 seconds
Power supply:	7 Ni-MH-battery pack (1.5 V AA), charged in the unit using external power pack
Dimensions (W x D x H):	265mm x 70mm x 195mm
Ambient operating conditions:	up to max 90 % humidity (non condensing), approx. 5 ... 40 °C
Approval:	CE
Wavelengths:	430/ 530/ 560/ 580/ 610/ 660 nm

MultiDirect	1	9.699 230

We can supply this manufacturer's whole product range !

Spectrophotometers XD 7000 VIS and XD 7500 UV-VIS

UV-VIS and VIS spectrophotometers with dual beam optics. The instruments benefit from a barcode test recognition system, over 150 pre-programmed analytical methods and automatic cuvette detection. Analytical quality assurance procedures include checks of the photometer, the total system (including methods) and sample matrix effects. Further functions of the spectrophotometers include measurement of transmission and absorbance, scanning of spectra, kinetics analysis and creation of user-defined methods.

- Premium optical system with reference beam
- Automatic test recognition with internal barcode reader
- Supports round cuvettes with 13, 16, 24 mm and rectangular cuvettes with 10, 20, 50 mm
- Automatic cuvette type detection
- More than 150 analytical methods implemented
- 7" colour display and keypad
- Ethernet, USB
- 20 user profiles possible
- Up to 1000 user programmes
- Creation of up to 100 further user-defined methods
- Password protection possible

6.272 436

Specifications

Optical System:	XD 7000 VIS // XD 7500 UV-VIS grid monochromator with reference beam
Wavelength range:	320 - 1100 nm // 190 - 1100 nm
Bandwidth:	4 nm
Wavelength accuracy:	±1 nm on all Holmium peaks
Wavelength repeatability:	better than 0.5 nm
Photometric range:	-3.3 to +3.3 Abs
Photometrical resolution/Transmission:	0.001 Abs/0.1 %
Photometric accuracy/repeatability:	0.003 Abs below 0.6 Abs 0.5 % from 0.6 to 2.0 Abs
Photometrical linearity:	<1 % up to 2.0 Abs between 340 to 900 nm
Drift:	<0.005 Abs per hour after 15 minutes heat up time
Internal Storage:	40 MB for approx. 5000 data sets
Lamps:	Tungsten-halogen-lamp // Xenon flash lamp
Dimension (W x D x H):	422 x 323 x 195 mm
Weight:	approx. 4.5 kg
Power supply:	100 - 240 V, 50/60 Hz
Protection class:	IP 30

Handheld photometers pHOtoFlex® series, with/without pH and turbidity measurement

Handheld photometers for use in a wide range of areas such as process control, mobile water testing or wine industry. Easy operation with menu driven, user guidance.

WTW®

9.923 625

- Smart cuvette adapter: holds 28 mm or 16 mm round cuvettes with height 91 to 104 mm; to be used with a variety of different test types
- Optics: LED's with filters, accuracy < 2 nm
- Available wavelengths: 436 nm, 517 nm, 557 nm, 594 nm, 610 nm and 690 nm
- Concentration, Absorption, Transmission
- Methods can be downloaded from the Internet
- 35 (pHOtoFlex® STD) 100 user defined routines
- 100 (pHOtoFlex® STD)/1000 data sets, RS 232 interface
- pH range: pH 0 to 16.00 (± 0.01) for DIN standard combination electrodes
- incl. calibration interval and calibration protocol
- Batteries: 4 button cells

Optional: LabStation with rechargeable battery and power plug, GLP-compliant software LSdata for simplified laboratory evaluation and operation, charging function; accu and power supply separately. LSdata is also available as stand-alone package

- IP code IP 67

pHOtoFlex® STD

Water Analysis purely w/o pH- and turbidity measurement for standard parameters

pHOtoFlex® pH

Just like the standard version of pHOtoFlex STD plus full electrochemical pH-and ORP measurement via electrodes. This allows also the measurement of the parameters NH₃ and CO₂.

9.923 601

- pH 0 ... 16.00 (± 0.01) for Standard-DIN pH-electrodes with automatic temperature compensation ATC and automatic buffer recognition
- Calibration intervall setting and calibration record
- 1-3 point calibration

2

pHOtoFlex® Turb:

Generally as pHOtoFlex® STD, with additional turbidity measurement:

- IR light source acc. DIN 27027 /ISO 7027
- Measuring range: 0 to 1100 NTU/FNU
- Resolution: 0 to 9.99 NTU: 0.01; 10 to 99 NTU: 0.1; 100 to 1100 NTU: 1NTU
- Accuracy: 0.01 NTU or 2% of measured value
- 3 point calibration
- Standard set with traceable AMCO® Standards (0.02 - 10 - 1000 NTU)

Complete pHOtoFlex® Sets:

The mobile laboratory: smart with integrated lab table to hold instrument, cuvettes, beaker and stand for pH electrode.

Complete sets with:

- pH electrode SenTix 41 with technical buffers
- 1 adjustable pipette with 5ml volume for pHOtoFlex® models
- Calibration standard kit for pHOtoFlex® Turb and Turb® 40 IR/T

pHOtoFlex® pH Set:

Field case with pHOtoFlex®, table insert, pH electrode Sentix® 41 and stand, TEC buffer, 5 ml variable pipette, and accessories, PC cable and LSdata software.

pHOtoFlex® Turb Set:

Field case with pHOtoFlex® Turb, table insert, pH electrode Sentix® 41 and stand, TEC buffer, 5 ml variable pipette, and accessories, PC cable and LSdata software.

1

1 Photometer photoLab® S6 and S12 - Filter photometer

High-precision, laboratory photometers with multilevel AQA/IQC functions.

WTW®

Features easy operation, GLP-conforming documentation, simultaneous turbidity

compensation: open cover, place cell, measure! Automatic selftest and zeroing of the optical systems during start up. AutoSelect for cuvettes recognition via barcode; all necessary settings automatically of more than 150 programmed methods with automatic cuvette detection. Unique barcode-support for 10, 20 und 50 mm cuvette for high quality and economic reagent test kits. The RS232 interface transfers data to the user's PC. With real time clock and memory (incl. date/time) for 500 (S6) or 1000 (S12) data records. To be used with 16mm round cells and rectangular cells (only S12) 10, 20 and 50mm path length. Autozeroing. CE, UL, CUL tested.

photoLab® S6

With 6 interference filters for 340/445/525/550/605/690 nm ± 2 nm.

For routine applications with round cuvettes in waste water analysis.

photoLab® S12

With 12 interference filters ± 2 nm. Wavelength according to S6 with additional filters for 410/500/565/620/665/820 nm. All test kits can be used (round cuvettes and reagent test kits), 50 user defined methods, Kinetic functions.

2 Cells for Photometer photoLab®

Cuvettes for photometric routine and water analytics in the UV-VIS and VIS range.

WTW®

Cells with matt side surface are suitable for the automatic cell detection of the photoLab® filter and spectral photometer. The glass and quartz cuvettes have a marking in order to place the cuvettes into the photometer in the same direction for an even higher precision.

- Automatic cell detection
- Glass and quartz cells with marking for higher precision
- High quality optical glass for VIS
- High quality quartz glass for UV-VIS

Spectrophotometer photoLab® 7100 VIS and photoLab® 7600 UV-VIS with OptRF

1

WTW®

6 268 620

COD measurement without reagents.

The spectrophotometer of the photoLab® 7000 Series are universally usable and offer complete photometric functionality with lauded user-interface and guidance on a brilliant HD 7" color display. Pioneering is the optical reagent-free measurement (OptRF) of COD, Nitrate and Nitrite. No time-consuming digestion and no harmful chemicals required.

- Proven routine analysis for waste and drinking water, aquaculture, food & beverage, environmental monitoring and production
- Cost saving reagent-free OptRF measurement
- Universal for industrial, research and educational use
- Lab quality in the field: 4.5 kg light weight, with car battery and field case option
- Linking lab with Online-system WTW® IQ SENSONET via IQ LabLink
- For 16 mm round cuvettes and 10, 20 and 50 mm rectangular cuvettes with automatic recognition
- Memory for 5000 values, spectra and kinetics approx. 40 MB, equivalent to approx. 500 spectra (300-900 nm) and 400 kinetics with 150 measured values
- More than 200 programmed methods, 1000 user defined methods, 20 profiles each for kinetics and absorption spectrum, extensive programming options

Routine Analysis:

- More than 250 programs for commercial test kits, standard parameters, direct readings of coloration, SAK, etc. as well as user-defined programming of routines
- Barcode recognition for tests in vials and rectangular cells and automatic cell recognition for 16, 10, 20 and 50 mm without adapter and automatic measurement range selection
- Up to three parallel timers
- Optional PC-Software Package for Brewery and color measurement from CIE to Yellowness

Spectral and universal analysis from 190 to 1100 nm:

- Spectral scans in various nm-steps, 700-2000 nm/min
- Kinetics and multi-wavelength readings including special methods like chlorophyll and ADMI color measurement
- Extensive programming tools for multistep and multi-wavelength functions with user guidance

AQA: Multi-level user-friendly AQA functions with administration tools and comprehensive checking aids for meter and reagents.

Data Management:

- Measurement data, PDF documents, spectra and kinetics data, with data filter for pre-selected data management
- External barcode reading option for uncoded test kits and sample ID
- Optional: PC-Software for GLP compliant data management

Specifications

Optics:	Split beam
Wavelength range:	320 to 1100 nm (VIS)/190 to 1100 nm (UV-VIS)

1 Thermoreactor RD 125

Chemical digestion of samples is required for the photometric determination of COD, TOC, total chromium, total phosphate and total nitrogen. The required temperatures and reaction time can be selected by using the membrane keypad of the reactor RD 125. The unit works at three different temperatures (100/120/150 °C) and three pre-set reaction times (30/60/120 minutes). When digestion is complete, the reactor automatically switches off and gives a corresponding LED indication with short beep alarm. The RD 125 reactor is fitted with 24 holes for 16 mm diameter vials.

Lovibond®

**Specifications**

Power supply:	230 V/50-60 Hz or 115 V/50-60 Hz (switchable)
Power:	550 W
Dimensions:	248 x 219 x 171 mm
Weight:	3.9 kg
Holes in the aluminium block:	24 holes, 16.2 mm ±0.2 mm
Selectable temp.:	100/120/150 °C
Selected time:	30/60/120/min. and continuous operation (∞)
Heating up:	from 20 °C to 150 °C in 12 min.
Protection against overheating	
Beeper	
Environmental conditions:	10 - 40 °C max. 85 % rel. humidity

Thermoreactor CR 2200/CR 3200/CR 4200

CR 2200:

WTW®

- Routine unit for waste water analysis
- Stored programs for all important digestions
- Thermoblock with 12 holes for 16mm o.d. reaction tubes
- Temperatures: 100 °C, 120 °C, 148 °C and 150 °C
- 8 fixed heating programmes: 148 °C and 2 hours, 148 °C and 20 minutes, 120 °C and 30 minutes, 120 °C and 60 minutes, 150 °C and 120 minutes, 120 °C and 120 minutes, 100 °C and 60 minutes, 30 minutes
- Automatic temperature switch-off after end of set programs

CR 3200:

CR 3200 thermoreactor for thermal digestion with 2x12 round cuvettes with 8 fixed/8 user-defined programs with temperatures of up to 170 °C and AQA

9.920 806

CR 4200:

- Professional unit for waste water analysis
- 2 thermoblocks with 12 holes each for 16mm o.d. reaction tubes,
- 8 fixed heating programs (as CR2200) and 8 user-defined programs (from room temperature (25 °C) to 170 °C and 0 to 180 minutes)
- High Temperature Capability
- 2 different programs and temperatures can be used simultaneously (CR 4200 only)
- Automatic temperature switch-off after end of set programs
- Optional: External temperature probe TFK CR

Sample analysis/COD

GENERAL CATALOGUE EDITION 21

1 COD measuring station MD 200

According to ISO 15705. This measuring station from Lovibond® allows the accurate, rapid, and economical determination of meaningful waste water COD levels (Chemical Oxygen Demand). Easy operation, even by unskilled operators. Comprises of COD photometer, 25 tube tests covering lower measuring ranges, a reactor block for sample digestion and a tube stand. Waterproof acc. to IP 68, 1 hour at 0.1 meter.

Lovibond®

Scope of supply: Instrument in carrying case, 4 batteries (AA), adapter for round vials diam. 16 mm, 2 sets of tube tests 0-150 mg/l and 0-1500 mg/l, thermoreactor RD 125, tube stand, 2 syringes, instruction manual.

Danger

3 COD sample digestion units PA-CSB

Unit configuration for simultaneous digestion of maximum 6 or 12 COD samples in acc. with ISO, DIN etc.

behr

A digestion unit consists of the following components:

- TRS 300 microprocessor-controlled time and temperature control unit with COD program
- CSB/E Precision heating block for RG 2 reaction vessels
- E/B Insert and yoke type frame for RG 2 reaction vessels
- KW/N Cooling trough with holder and stands for E/B
- RG 2 Reaction vessels
- LK 1 COD air coolers
- LS Air cooler stands for LK COD air coolers

Type	PK	Cat. No.
PA-CSB 6	1	9.920 540
PA-CSB 12	1	9.920 541 3

COD workstations, PB-CSB/M

For COD determination. Complete workstations for simultaneous determination of maximum 6 or 12 samples in acc. with ISO, DIN etc. Manual metering and titration.

behr

A workstation consists of the following components

- TRS 300 Microprocessor-controlled time and temperature control unit with COD program
- CSB/E Precision heating block for RG 2 reaction vessels
- E/B Insert and yoke type frame for RG 2 reaction vessels
- KW/N Cooling trough with holder and stands for E/B
- SM 12/N Series magnetic stirrer for E 12/B insert/yoke type frame (only for PB-CSB 12/M)
- RG 2 Reaction vessels
- MRST 2 Magnetic stirrer rod set, 12 rods
- SIST 100 Boiling stones, contents 100 g
- LK1 COD Air coolers
- LS Air cooler stand for LK COD air coolers
- PTFE 29 PTFE Collars for LK 1, set of 12 collars
- TS COD Transport stands for E/B insert/yoke type frame
- HTI 1 Manual titration station

2 behr COD Heating Blocks

COD acc. to ISO Precision heating blocks with 6, 12 or 24 sample positions.

behr

Flat surface heater for even temperature distribution to each sample position.

Stainless steel and powder coated steel casing. Extensive insulation provides for inoffensive temperatures of the casing surfaces. End-to-end grooves in the precision aluminum plate at the bottom of the bores simplify sample handling and provide for exemplary safety of the analyst:

- During sample insertion the grooves cause pressure compensation. Thus even the most accurately fitting reaction vessels slip easily into the bores, which is required to effortlessly handle the behr insert and yoke type frames for RG 2 reaction vessels.
- When inserting the samples into the hot heating block adherent moisture on the vessel surface evaporates in sudden bursts. The grooves drain off the vapor which otherwise might cause the vessels to jump up and down which might eventually lead to the destruction of the vessels.
- In case of one or more vessels overflowing the liquid COD samples discharge through the grooves minimizing the danger of damages inside the block caused by acids.

Type	Description	Power consumption W	Temp. range max. °C	PK	Cat. No.

3 TRS 300 programmable temperature and time control unit

Programmable control unit for behrotest® digester blocks.

behr

behr one-button operation for particularly easy and quick programming.

Menu navigation in the language of the country. 10 optionally configurable programs for block temperature and digestion time. The TRS 300 has a special COD program which has already been set by the plant.

Therefore in the operation mode "COD" it heats up to a temperature which is 20 °C above the set target temperature. After inserting the samples, the 20 °C higher target value remains for another 6 minutes. This procedure ensures heating up to 148 °C within 10 minutes which is specified by the ISO norm, and at the same time causes extremely high temperature constancy during the subsequent reaction process. The supplied Windows software permits the user to transfer time/temperatures profiles, which are specifically for the application, via the RS232 interface in both directions between one or more units (TRS 300) and a PC. Temperature data can also be transmitted from the unit to the PC via the RS232 interface while operating. The user can save them if necessary and print them out as graphics. Integrated safety function switches the connected units off if there is a short-circuit and an interruption of the temperature sensor.

Sample analysis/COD

GENERAL CATALOGUE EDITION 21

1

1 behrotest ® HTI 1 manual titration station

The HTI 1 manual titration station consists of
- a burette with digital display and
- a magnetic stirrer with a precisely fitting holder for COD reaction vessels. A screen serves as a neutral background and allows the user to determine the colour change at the end of the titration precisely. Therefore a titration could always be carried out under similar visual conditions. This improves the precision and the reproducibility of the results.

The precise positioning of the reaction vessels in the holder on the top of the magnetic stirrer also contributes to this. The angled wing of the screen protects against lateral dazzling light.

Specifications

Voltage	230 VAC/ 115 VAC
Frequency	50/60 Hz
Weight	approx. 3.5 kg
Dimensions in mm (W x D x H)	approx. 330 x 200 x 600

Sample analysis/COD

1 HCl-absorber

To expel chloride, e.g. when determining the COD of sea water.

behr

1

Type Description

PK Cat. No.

HCL 29	HCL absorber to expel chloride	1	6.060 789
--------	--------------------------------	---	------------------

2 Automatic metering and titration unit DT 20

Dosage:

Time optimized COD interval dosage. The addition of sulfuric acid is carried out in several steps, while the samples are constantly cooled and stirred. This method accelerates sample preparation and at the same time prevents non-standard overheating of the samples during acid addition.

Titration:

Instead of the commonly known over-titration, the behr-specific dynamic titration guarantees the exact end-point recognition, even in the case of the typical COD edge steepness, and thus particularly accurate test results

1 BOD measurement systems OxiTop®-IDS

BOD measurement system for all types of respirometric measurements, e.g. soil respiration, microbiological activity measurement, biogas determination as well as extended BOD measurement for the industrial waste water plants and further degradation tests in 3 selectable measuring types, BOD standard, BOD special and pressure. With the proven Bluetooth® connectivity and the convenient operation via MultiLine® multi parameter instrument Multi 3620 IDS or Multi 3630 IDS. Using a Multi 3620 IDS or Multi 3630 IDS in BOD special mode the BOD measuring range extends to 400000 mg/l. For an already existing Multi 3620 or 3630 IDS, a firmware update is sufficient. Herewith beneath the OxiTop® applications also measurement of pH, conductivity, solved oxygen and turbidity are available. All heads can be used independently for routine BOD measurements from 1 to 7 days.

WTW®

- Bluetooth® connectivity
- Direct calculation of all results in the meter
- Representation of curves for monitoring
- Parallel measurement of different examinations and methods
- Export to data acquisition programs

Specifications

Pressure range:	500 ... 1250 hPa
BOD range:	0 ... 4000 mg/l
Measurement period:	0.5 h ... 180 d
Memory:	360 values
Display:	LCD
Power supply:	100 ... 240 VAC, 50/60 Hz

2

6.314 040

BOD measuring system OxiTop®-IDS for determination of aerobic degradation

These tests quantify the biological degradability of chemicals. The OxiTop®-IDS A12 is also suited for high dilutions.

WTW®

- Respirometric degradability tests according to OECD 301F/DIN EN ISO 9408
- Versatile measurement by using the BOD special mode

Scope of supply:

OxiTop®-IDS Set 6: 6 x OxiTop®-IDS measuring heads, 6 x bottles PF600 (510 ml), 6 x rubber sleeves, nitrification inhibitor, overflow measuring flask, 6 x magnetic stirring bars, stirring bar retriever, stirring platform IS 6

OxiTop®-IDS Set 12: 12 x OxiTop®-IDS measuring heads, 12 x bottles PF600 (510 ml), 12 x rubber sleeves, nitrification inhibitor, overflow measuring flask, 12 x magnetic stirring bars, stirring bar retriever, stirring platform IS 12

Extension set for OxiTop®-IDS 6/12: 6 resp.12 OxiTop®-IDS measuring heads, 6 resp.12 bottles, universal power adapter, 6 resp.12 rubber sleeves, 6 resp.12 magnetic stirring bars, stirring platform IS 6 resp. IS 12

OxiTop®-IDS A6: 6 x OxiTop®-IDS measuring heads, 6 x bottles PF45/1000 (1000 ml), 6 x adapter OxiTop® AD/SK, nitrification inhibitor, 6 x magnetic stirring bars, stirring bar retriever, stirring platform IS 6-Var

OxiTop®-IDS A12: 12 x OxiTop®-IDS measuring heads, 12 x bottles PF45/250 (250 ml), 12 x adapter OxiTop® AD/SK, nitrification inhibitor, 12 x magnetic stirring bars, stirring bar retriever, stirring platform IS 12

Please order CO₂ absorber NHP 600 (9.303 403) separately.

The IDS multi parameter measuring instruments Multi 3620 IDS Set WL or Multi 3630 IDS Set WL are required. Please order separately.

2

2 BOD measurement system OxiTop®-i IS 6/12

Easy-to-use, respirometric measuring system for determining the biological oxygen demand (BOD). The method is based on changes of pressure in a closed system using measuring heads attached to the sample bottles. The BOD can be determined simultaneously in up to 6 or 12 samples.

WTW®

- No dilution of the sample required
- Direct reading of the BOD, the time course and the intermediate values on the graphical display of the measuring heads
- Input of the used sample volume directly at the measuring head
- Monitoring time between 1 and 7 days
- Permanent display of the current status at each measuring head
- Coloured measuring heads with adjustable, numerical sample identification

Scope of supply:

OxiTop®-i IS 6: 6 x measuring heads (3 x blue, 3 x grey), 6 x sample bottles PF600, 6 x rubber quivers, CO₂ absorber, nitrification inhibitor, overflow measurement flasks, 6 x stirring rods, stirring rod remover, stirring platform SI 6
 OxiTop®-i IS 12: 12 x measuring heads (6 x blue, 6 x grey), 12 x sample bottles PF600, 12 x rubber quivers, CO₂ absorber, nitrification inhibitor, overflow measurement flasks, 12 x stirring rods, stirring rod remover, stirring platform SI 12

An incubator is required to operate the OxiTop®-i IS. Please order separately.

2 BOD sensor system

Measuring systems for the reliable determination of 90 to 999 ppm BOD.
Complete with sensor heads and multi-position magnetic stirrer.

Velp Scientifica

- The sensor heads are screwed directly onto the BOD bottles
- Automatic storage of 5 results in 24-hour intervals
- Measured readings in mg/l (ppm) can be read directly on the sensor at any time
- Protected against splashing water (IP 54)

Scope of supply BOD sensor system 6: 6-position magnetic stirrer, each 6 BOD sensors incl. batteries, 500 ml brown glass bottles, KOH reservoirs and magnetic stirring rods

Scope of supply BOD sensor system 10: 10-position magnetic stirrer, each 10 BOD sensors incl. batteries, 500 ml brown glass bottles, KOH reservoirs and magnetic stirring rods

Specifications

BOD sensor	Single sensor		1	4.666 790

3 BOD EVO Sensor System 6

Measuring systems for the reliable determination of 90 to 999 ppm BSB.
Complete with sensor heads and multi-position magnetic stirrer.
With wireless data transfer and monitoring function on connected PCs.

Velp Scientifica

- An existing Wireless DataBox™ can monitor up to 80 BSB EVO sensors
- BSB EVO sets without Wireless DataBox™ can be purchased to expand an existing measurement system
- Data visualisation on the PC with software BODsoft™
- The sensor heads are screwed directly onto the BSB bottles
- Configurable measuring intervals and automatic data storage
- Measured readings in mg/l (ppm) can be read directly on the sensor at any time
- Protected against splashing water (IP 54)

Scope of supply: 6-position magnetic stirrer, each 6 BSB EVO sensors
incl. batteries, 500 ml brown glass bottles, KOH reservoirs and magnetic stirring rods

Sample analysis/BOD

GENERAL CATALOGUE EDITION 21

1 BOD-Measurement-System BD 600

BOD measurement is an important measurement of the effects of domestic and industrial waste water on sewage plants and outflow points.

Lovibond®

The sensor system BD 600 is a 6 sample system that allows precise measurements of BOD based on the manometric principle. Manometric respirometers relate oxygen uptake to the change in pressure caused by oxygen consumption while maintaining a constant volume. Due to the modern integral pressure sensors, it is not necessary to use mercury for the measurements. The BOD values are stored automatically in the sensor memory at regular intervals and can be called up on the large-format display at any time without the need for time-consuming conversion using factors. This means that test series that end on a Sunday can be evaluated during the following week without any problem. Measurement series can be stored on USB stick/ SD card or transferred via USB cable to evaluate the data on a computer. The measurement period is user-selectable between 1 and 28 days to suit the application. While short measurement periods are useful for scientific applications, standard BOD measurements typically extend over a period of 5 days - and manometric determination of OECD, for example, generally takes place over a period of 28 days.

Scope of supply:

- BD 600, complete unit with 6 or 12*sensor heads and control unit with batteries
- Power supply unit incl. Y-cable for common power supply of BD 600 and stirring unit
- Inductive stirring unit
- 6 or 12*sample bottles
- 6 or 12*rubber gaskets
- 6 or 12*magnetic stirring rods
- 1 overflow flask, 157 ml
- 1 overflow flask, 428 ml
- 1 bottle, 50 ml potassium hydroxide solution
- 1 bottle, 50 ml nitrification inhibitor solution
- 1 instruction manual
- remote control

2 Dissolved oxygen bottles, Winkler pattern

Winkler pattern. Soda-lime glass.

For determination of dissolved oxygen in water. The measured capacity is specified to ± 0.01 ml.

With white labelling area. Solid, bevelled glass stopper, secured with an accessory spring clip.

Each bottle is adjusted to the relevant stopper. Stoppers and bottles are therefore not interchangeable.

Each bottle and its stopper is marked with a unique, matching identification number.

Controlled Temperature Cabinets BOD

Compact temperature cabinets with internal plugs for the use of OxiTop® IS 12 stirring platforms. Depending on the size of the model 2 to 4 shelves are included.

WTW®

So up to 48 standard BOD samples or 4 stirring platforms can be accommodated.

5

For special applications the largest Model TS 1008-i is required, having enough space between the shelves for 1.5L bottles. Models with insulation glass door allow for visual control of the OxiTop® heads without opening the door.

- Incubation conforming to standards
- Suited for BOD, OECD 301F, soil respiration, anaerobic degradation
- Temperature adjustable in steps of 1 K between 10 and 40 °C
- Eco-friendly refrigerant R600a

Note: The necessary temperature constancy will only be achieved in combination with the samples.

TS 608/2i: Model for standard applications, with 2 internal plugs, incl. 2 shelves

TS 608-G/2i: As TS 608/2i, but with door made of insulation glass

TS 608/4i: Model for extensive sample processing, with 4 internal plugs, incl. 4 shelves

TS 608-G/4i: As TS 608/4-i, but with door made of insulation glass

TS 1008i: Model for particular applications with special vessels e.g. biogas or soil respiration measurement, with 4 internal plugs, incl. 4 shelves

1 Thermostatic cabinets

The incubators from Lovibond® are designed for continuous tempering for different applications, mainly for the determination of BOD, the storage of wastewater samples, and the determination of enzymatic activity. The temperature range is +2 °C up to +40 °C and can be regulated in steps of 0.1 °C. Temperature tolerance is defined with ±1 °C respectively ±0.5 °C (at 20 °C). Low energy consumption due to reinforced isolation. The interior of the cabinets is equipped with sockets for connecting stirrers. There are 3 models available with standard doors from 135 to 445 litres net capacity, and 2 models with glass doors with 140 and 255 litres net capacity. Illuminated LED display with actual/setpoint display.

Lovibond®

- Temperature range 2 °C to 40 °C, continuously adjustable in steps of 0.1 °C
- Low power consumption
- Illuminated LED display of preset and current temperatures
- Ideal for BOD determination at 20 °C
- Power sockets inside the incubator
- 5 models in 3 sizes
- Standard door or glass door

5 Stand for Imhoff Sedimentation cones, PP

The stand for sedimentation funnels is used to keep, hold or store Imhoff funnels safely and reliably during sedimentation. Two funnel holders ensure that Imhoff funnels will be held safely and securely and can be placed in an absolutely vertical position. Stand with two holders for sedimentation funnels, suitable for funnels 90 mm or more in diameter. Thanks to an innovative magnet concept no clamping screws are necessary. The height of the funnel holder can be adjusted easily and flexibly with one hand. With the corresponding accessory the holders for Imhoff funnels can also be replaced by holders for all-purpose funnels.

- PP, chrome-plated steel
- Adjustable height up to 450 mm
- For funnels with Ø 90 mm or more

2 Turbidity meter TB 211 IR

The compact infrared turbidity meter TB 211 IR is designed to allow fast, precise on-site testing. The unit measures the scattered light at an angle of 90°, as stipulated in EN ISO 7027. The wide measuring range from 0.01 to 1100 TE/F = NTU = FNU permits use of the unit for various media, ranging from drinking water to waste water. As infrared light is used for measurement, the unit can be used to test both coloured and colourless liquids. The standards required for calibration of the unit are also supplied. A second adjustment mode allows alternative adjustment with user-defined turbidity standards.

- measuring ranges from 0.01 to 1100NTU (autorange)
- measurement with infrared light at an angle of 90°
- easy operation
- 600 tests between battery charges

Scope of supply: Turbidity meter, 4 turbidity standards <0.1, 20, 200 and 800NTU, battery, USB cable (1.5 m), test vial, manual, warranty statement, case

Specifications:

Measurement cycle:	approx. 9 seconds
Display/Function:	LCD
Optics:	temperature-compensated LED and photosensor amplifier in waterproof sample chamber
Keypad:	4 key polycarbonate membrane
Measuring range:	0.01 to 1100 NTU (autorange)
Resolution:	0.01 to 9.99 NTU = 0.01 NTU 10.0 to 99.9 NTU = 0.1 NTU 100 to 1100 NTU = 1 NTU
Accuracy:	±2.5 % of measuring value or ±0.01 NTU (0 to 500 NTU) ±5 % (500 to 1100 NTU)
Interface:	Micro USB
Housing:	ABS
Dimensions (L x W x H):	190 x 110 x 55 mm
Weight (Basis unit):	approx. 0.4 kg
Temperature:	0 to 40 °C
Humidity (rel.):	30 to 90 % R.H.

Turbidity meters Turb® 430

The turbidity meters Turb® 430 IR acc. to DIN ISO 27027 and Turb® 430 T acc. to US EPA 180.1 meet the requirements of the nephelometric measurement at 90° stray light for drinking water with highest precision, especially in the range < 1 NTU. The measuring range comprises 0-1100 NTU/FNU with automatic measuring range switching and is therefore suitable for water analysis as well as quality control, such as gasoline, cell cultures, as well as in the food and beverage industries. The measurement and automatic 3-point calibration runs self-explanatory and menu-controlled. The calibration takes place via an AMCO Clear® standard set (0.02-10-1000 NTU). Up to 1000 data sets including sample ID numbers can be stored and later put out GLP-compliant via the PC software LSdata. The quality assurance of the measured results is supported by calibration interval setting with documentation.

AS/IDS-1.5	Cable with plug head, 1.5 m	1	7.642 673

2 Turbidity meter Turb® 355

Battery-operated portable turbidity meter with infrared LED for nephelometric measurements as per ISO 7027/DIN EN 27027 (EN ISO 7027) or as a white light model with tungsten lamp as per US EPA. It is handy, light and simple to operate and is suitable, primarily for applications to monitor > 1 NTU. With smaller samples of 15 ml, it is also very suited for applications in fermenters and cell cultures at good precision.

WTW®

2

Scope of delivery: Turbidity meter in a handy small case with quick instructions, calibration standards 0.02-10.0-1000 NTU, empty cuvettes and batteries.

Specifications

Measuring range:	NTU 0 to 1100 FNU 0 to 1100
Resolution:	0.01 NTU in the range 1 to 9.99 0.1 NTU in the range 10.0 to 99.9 1 NTU in the range 100 to 1000
Accuracy:	0 to 500 NTU/FNU: ± 0.1 NTU/FNU or $\pm 2\%$ of measured value 500 to 1100 NTU/FNU: $\pm 3\%$ of measured value
Reproducibility:	0.05 NTU or $\pm 1\%$ of measured value
Cell size:	25 x 45 mm, 15 ml sample volume
Power supply:	4 x AAA batteries for approx. 1500 measurements

Type	Description	PK	Cat. No.
Turb® 355 IR	with infra red LED	1	6.902 303
Turb® 355	with tungsten lamp	1	6.236 840

3 Turbidity Standards

Highly accurate turbidity standards composed of suspended microspheres, suitable for Instrument calibration and control of all turbidity meters. Stable, shelf life of 2 years (from Date of Manufacturing). NIST traceable, US EPA approved and tested in compliance with ISO 7027. HDPE bottles of 100 ml.

Reagecon

3

Two ranges available:

- Ratio range for Ratio Turbidity Measuring instruments (measure of the scattered light from the sample at a 90° angle from the incident light, plus at additional angles (several detectors)
- Non Ratio for Non Ratio Turbidity Measuring instruments will measure the scattered light from the sample at a 90° angle from the incident light (one detector)

Description	Volume ml	PK	Cat. No.

*Fits Soxtec™ extractor

4

E & OE.

1 Extraction thimbles, Borosilicate glass

Recommended for Soxhlet extraction with solvents, which are incompatible with cellulose fibres and for filtration of air and gas streams.

Hahnemühle

- Made of 100 % pure borosilicate fibres, without binding elements
- High loading capacity and highly permeable to air
- Thickness is 1.5 mm (diameter < 33 mm)
- High retention of small particles, > 99 % according to BS 4400
- Good stability at high temperatures up to 500 °C
- Recommended for hot, moist, and acidic gases
- Gravimetric determination of particles in hot gases

1

1 behrotest® WD 30 Cooling Monitor

With emergency shut-off function for power and water intake

behr

- The behrotest® WD 30 is a user-friendly device for monitoring cooling circuits in the laboratory.
- In case of a system leakage the WD 30 shuts off the water intake as well as the electrical heating device and thus prevents damages in the laboratory caused by water.
- The behrotest® WD 30 is position-independant, i.e. it can be run anywhere in the lab in any position.
- An audible warning signal provides additional safety.

Included in delivery of the behrotest® WD 30 coolant monitor are:

- Monitor unit with two flow sensors and solenoid valve, incl. cable connection for the controller (1.5 m)
- Controller with isolated ground receptacle for the connection of heating devices, etc.
- Hose kit with connections
- Adapter kit for the connection to the water supply and the behrotest® UK circulation cooling unit.

Power supply	230 VAC, 50/60 Hz
System pressure	0.2 ... 10 bar
Flow rate	5 ... 30 l/min.

Description	PK	Cat. No.
behrotest® WD 30 Coolant Monitor	1	6.286 375

2

2 behrotest® CF 2+2 and CF 6, Semi-automatic Crude Fibre Extraction

They are ideally suited for:

behr

- total crude fibre determination (part of the Weender animal feed analysis as performed in Europe)
 - neutral detergent fibre and acid detergent fibre determination (NDF and ADF according to Van Soest)
 - acid detergent lignin determination (ADL according to Van Soest)
 - different fractions of fibre (cellulose, hemicellulose and pectin) behrotest® semi-automatic crude fibre extraction units simplify everyday life in the lab:
 - Easy operation
 - The analyst is guided through the procedure by messages on the display.
- behr ABP ("acknowledge before proceeding") method for optimum analytical safety.
Possible manual operation of air and suction pumps.

Type	Description	Dimensions (W x D x H) mm	Weight kg	PK	Cat. No.

3

3 Extraction Unit for the Randall Method

Manual apparatus for hot extraction according to Randall. Several times faster than a customary Soxhlet extraction. Incl. 1 set of extraction thimbles, 100 ml.

behr

- Optimal safety thanks to screw-fastened extraction units

Multiple position extraction units:

- Every extraction thimble with sample can be independently adjusted
- The user can lower and raise all the extraction units into/out of the heating chamber with a single lever
- Every heating position has a separate temperature control

Infrared rapid digestion system with temperature control

The temperature-controlled InKjel TC-series devices combine the advantages of infrared and block digestion in one system: Fast Infrared digestion at defined temperatures ensures high sample throughput.

behr

In the programmable version InKjel TCP, the user has a choice of 25 freely configurable programs for temperature and digestion time.

The high-quality quartz infrared heaters of InKjel TC reach 830 °C in a minute and achieve uniform heating at all sample positions.

3 Micro Kjeldahl block digestion systems K 6, K 24 and K 40

Block digestion systems with high-quality corrosion-resistant block housing made of stainless steel. With 16, 24 or 40 sample slots for micro Kjeldahl digestion vessels with a volume of 100 ml. High-efficiency heating and extraction hood with exhaust collector.

behr

- behr single-knob control for particularly easy and fast programming.
 - Menu navigation in national language.
 - 25 freely configurable programs for block temperature and digestion time.
 - Applications can be saved.
 - USB interface.
 - The removable inspection door on the insertion rack enables the progress of the digestion to be observed.
- Complete systems with digestion vessels, rack and extraction hood.

Type	Description	PK	Cat. No.
K 16	with 16 sample slots, for digestion vessels with a volume of 100 ml	1	9.843 903
K 24	with 24 sample slots, for digestion vessels with a volume of 100 ml	1	9.843 904
K 40	with 40 sample slots, for digestion vessels with a volume of 100 ml	1	9.843 905

Accessories for Kjeldahl rapid sample digestors

behoitest® standard digestion vessels have standard dimensions. That means they fit into digestion and distillation units of most brands. Of course, it also means that standard digestion vessels of most brands can be used with behr distillation units.

GENERAL CATALOGUE EDITION 21

1

1 Steam distillation unit D1 and D2

- Alcohol
- Volatile acid contents
- Fermentation process (beer, etc.)
- Ammonium chloride in liquorice products

behr

Distillation units for determining alcohol and volatile acid content in wine and other alcoholic drinks. Complete glassware, with volumetric flasks and pycnometer. Because of its rapidity, the behr D 1 and D 2 are especially suitable for high sample throughputs.

Type	Description	PK	Cat. No.
D1	for determining alcohol content, distillation into a pycnometer	1	9.843 830
D2	for determining Volatile acid content, distillation into an erlenmeyer flask 500 ml	1	9.843 831

2

2 Compact systems for sulphur dioxide determination, KSO/SO

For determination of sulphur dioxide (total SO₂), 2 absorption units per sample.

behr

With base unit, heating mantle, mounting frame and glassware, including 500 ml reaction flasks.

Systems with adsorption units or other flask sizes on request.

Type	Description	PK	Cat. No.
KSO 2 N	Complete compact system	1	9.920 546
SO 2-6	System for 6 working units	1	9.920 547

3

3 Compact system for determination of water content

Compact system for determination of water content by azeotropic distillation.

behr

Suitable for non-homogeneous and irregularly shaped food such as dried fruit and vegetables, Sauerkraut etc. With base stand, heating mantle, mounting frame and glassware.

Type	PK	Cat. No.
KWA 500	1	9.920 548

1 Centrifuge Micro III

Small centrifuge for the determination of fat in milk and dairy products acc. to Gerber or Babcock.

Gerber

- Microprocessor control with actual display in minutes and seconds, adjustable from 1 to 99 minutes
- Heating with 2 segment advertisements, adjustable from 0 to 65 °C
- Increased precision thanks to the controlled speed
- Unbalance shswitch-off in case of uneven filling or sudden glass breakage
- Incl. Rotor (aluminium) and bushing (brass)

1

Specifications

Speed (fixed):	1280 rpm
Dimensions (W x D x H):	450 x 530 x 290 mm
Weight (with rotor and sleeves):	up to 34 kg
Power supply:	115-230 VAC, 50/60 Hz

Type	PK	Cat. No.
Centrifuge Micro III with Gerber-Rotor and 8 butyrometer sleeves	1	6.286 207
Centrifuge Micro III with Gerber-Rotor and 12 butyrometer sleeves	1	6.286 208

Universal Gerber Centrifuge

Multipurpose centrifuge for the dairy laboratory.

2

- Timer 0 to 255 minutes
- Automatic brake
- Heating (option) with variable temperature setting up to 65 °C (1200 W)
- Microprocessor control with an LED display to show speed, run time, temperature and error messages
- Cover lock
- Unbalance cut-off
- Emergency release

3 pre-programmed speeds for:

- Gerber Butyrometers (350 x g)
- Solubility in milk powder (164 x g)
- Extraction tubes Roese-Gottlieb/Mojonnier (80 x g)
- 1 variable speed range (200 to 1100 rpm), on request

GENERAL CATALOGUE EDITION 21

Water purification/Distillation-Pure and ultra-pure water

Type classes for Pure and Ultrapure Water Systems

Type I: Ultrapure Water for analytical applications such as cell culture, tissue culture and HPLC (high-performance liquid chromatography) as well as for molecular biology techniques.

Type II: Pure Water for buffers and pH repairs, as well as for applications in histology, general reagent preparation and chemistry.

Type III: Water from reverse osmosis, for rinsing water baths, autoclaves, hydroponics and glassware and as feed water for Type I Ultrapure Water Systems.

1

1 Distilled water

Deionized and UV irradiated. Acc to DIN 43530/EN 385. In plastic canister.

Specifications

pH value:	<7.0
Conductivity:	<5 µS/cm
Hardness:	<0.02 mmol/l
Chlorine content:	<2 mg/l

Capacity L	PK	Cat. No.

20.0	1	6.280 900
60.0	1	6.289 280

Deioniser, behropur®

behropur® mixed-bed ion exchangers deliver de-ionized water according to Grade 3 of the ISO 3696 standard, -Water for analytical laboratory use; Specification and test methods.

The resins inside the behropur® ion exchangers are of certified quality.

The completely equal distribution of water inside the ion exchanger leads to the maximum utilization of the exchange capacity of the unit. Thus the user benefits from very low conductance water throughout the life cycle of each exchanger charge.

2

2 Deioniser, behropur®

Heavy-walled, robust and practical mixed bed deioniser in blue polyethylene with free flow output to the reservoir. Also ideal for the post desalination of reverse osmosis systems or for aquariums.

behr

- Can be directly connected to the water supply and is immediately ready for operation.
- Automatic venting as water is supplied from below.
- Minimal risk of contamination due to slotted filter in the raw water inlet.
- Nozzles are durable and easy to clean. Highly resistant to abrasion or shocks.
- Extremely sturdy, heavy-duty nozzle welding by the manufacturer's own welding process.
- Resistivity meter fitted.
- B5 and B10 can also be used as wall mounted devices (wall mounting included).
- Also available with water quality cut-out and solenoid valve which engages if specified limits are exceeded and reservoir level control.
- Resistivity control available directly on the unit or remotely at any location.

Water purification/Pure and ultra-pure water

1 Deionisers, pressure-resistant, behropur®

Compact and secure mixed bed deionisers for small to medium-sized volumes of ultra pure water. Ideal for feeding laboratory washing machines, general requirements in the laboratory, low level consumption in industry and for post-treatment desalination of the output from reverse osmosis systems.

- Optimal utilisation of the deioniser due to totally uniform water distribution in the resin chamber.
- Can be connected directly to the raw water mains without a pressure reducer.
- Back pressure resistant.
- Also available with water quality cut-out and solenoid valve, which engages if specified limits are exceeded, and reservoir level control.
- Resistivity control available directly on the unit or remotely at any location.

3 Mixed-bed ion exchanger made of stainless steel

Standard cartridge made of V4A stainless steel for general purpose application:
To supply laboratory glassware washers, for general laboratory maintenance and
for small industrial consumers. For subsequent demineralization of reverse osmosis systems.

- pressure resistant to 10 bar /8 bar at E40dA
- optimum exploitation of the ion exchanger capacity due to absolute uniform water distribution in the unit
- flow rates up to 700 litres/hour
- the unique behropur® jet nozzle system distributes the raw water over the entire resin bed.
This ensures an optimum exchange capacity and quality
- can be connected to the raw water network directly and without a pressure reducer
- resistant to alternating pressure
- hard rubber collars vulcanized to the base and top of the unit offer effective protection
- convenient transport thanks to the handles embedded into the top part of the unit
- conductivity is controlled directly on the unit (installed measuring equipment) or with remote location meter
- Also available with shut-off when the limit value is reached and limit control

Analogue conductivity meters AC 100/AW 100/AE 100

Analog conductivity meter for easy and reliable conductivity measurement of pure water.
Analogue display of measurement value in µS/cm.

Stakpure GmbH

Scope of delivery: Measuring cell and set of two 1.5 m hoses.

Specifications:

Measuring range:	0.1 ... 50 µS/cm
Connection:	R 3/4"
Power supply:	230 V/50 ... 60 Hz

Type	Description	Dimensions (W x D x H) mm	PK	Cat. No.
AC 100	For cartridge installation	93 x 123 x 170	1	6.291 567 4
AW 100	For wall installation	93 x 125 x 96	1	6.310 992
AE 100	For front panel mounting	60 x 43 x 46	1	6.310 993

Water purification/Pure and ultra-pure water

Digital conductivity meters DC 400

For online measurement of pure and ultrapure water downstream of ionexchange cartridges and for monitoring ring-main systems.

Stakpure GmbH

1

6.291 566

- Large, 2-colour, back-lit graphic digital display
- Direct connection of peripheral equipment at potential-free contact (optionally)
- Wall mounting

Scope of delivery: DC 400, connecting cable, plug-type power supply unit, set of two 1.5 m hoses and measuring cell.

Specifications:

Conductivity measuring range:	0.1 ... 300 µS/cm
Temperature measuring range:	0.1 ... 50 °C
Conductivity limiting value setting:	0.1 ... 30 µS/cm, infinitely variable
Temperature limiting value setting:	1 ... 50 °C infinitely variable
Signal when limiting value is exceeded:	red/green LED indicator + buzzer (both can be deactivated)
Connector:	R 3/4"
Interface:	potential-free contact (optionally)
Dimensions (W x D x H):	73 x 32 x 141 mm
Power supply:	110/230 V, 50 ... 60 Hz

Filter for behropur® mixed-bed ion exchanger

Filter for pressure-resistant behropur® mixed-bed ion exchangers. Transparent casing. *behr*
Once added to the ion exchanger, it completely retains even the finest particles and
protects your high-quality equipment. Due to the transparent casing of the FG 130,
you can see the state of the filter insert at any time and at a glance. Depending on the requirements,
you can use a universal filter (5µ) or a carbon filter (20µ). Downstream filters may only be used on pressure-resistant
behropur® ion exchangers. Pressure-free exchangers are destroyed by the counter pressure.
It could also subsequently result in expensive damage.

2

9.915 736

- FG 130** behropur® filter housing for filter inserts with a length of 5". Transparent casing made of PP.
Connections 3/4", maximum operating pressure 8bar, max. temp. 50°C
FE 130 behropur® filter insert, PP, 5µ, length 5", max. pressure 6bar, max. temp. 80°C
AF 130 behropur® filter insert, carbon, 20µ, length 5", max. pressure 6bar, max. temp. 50°C

GENERAL CATALOGUE EDITION 21

Water purification/Pure and ultra-pure water

1

1 Ultra pure water system OmniaTap

For pure water and ultra pure water Type I + II.

Stakpure GmbH

OmniaTap is the ideal system when both pure water and ultrapure water are required, but in relatively small amounts. It provides both types from a single system. These also make it possible to connect the system directly to a drinking water tap. A touch on the flexible OptiFill dispenser button activates dispensing of ultrapure water type I via the digital dispenser control. The recirculation of the pure water held in the installed 10 litre tank keeps it permanently at type II quality.

Applications:

OmniaTap 6/12: AAS, IC, ICP, buffers and media preparation

OmniaTap 6 UV/12 UV: Ultra-trace analysis, ICP-MS, HPLC, TOC-analysis

OmniaTap 6 UV/UF/12 UV/UF: Life science and microbiology, cell culture media

Scope of supply: Instrument incl. filter cartridges and sterile filter capsule 0.2 µm

Water purification/Pure and ultra-pure water

1 Ultra pure water system OmniaPure

For ultra pure water Type I.

Stakpure GmbH

For ultra pure water system of highest quality that fulfils the demands of analytical and life science laboratory requirements. Versatile in configuration, flexible in function, economical in operation. The incorporated pre-treatment constantly ensures the reliability of your experimental results and reduces running costs. Wall-mounting or, to save bench space, in a base cabinet.

The standard OptiFill dispenser and monitoring unit enables convenient and precise filling into laboratory vessels.

Applications:

OmniaPure: AAS, IC, ICP, buffers and media preparation

OmniaPure UV: Ultra-trace analysis, ICP-MS, HPLC, TOC-analysis

OmniaPure UV/UF: Life science and microbiology, cell culture media

OmniaPure UV-TOC: Ultra-trace analysis, ICP-MS, HPLC, TOC measurement

2 Ultra pure water system OmniaLab^{ED+}

For pure water and ultra pure water Type I + II.

Stakpure GmbH

Delivers the complete laboratory pure water and ultra-pure water supply. The system complies with international water standards such as ASTM, ISO 3696 and CLSI. The economy of it is maximized by the inclusion of a continuously self-regenerating electrodeionizer. Further to this, each OmniaLab^{ED+}-system holds 100 litres of pure water type II ready for withdrawal in a storage tank that is equipped with quality recirculation. The flexible positioning of the purification modules enables OmniaLab^{ED+} to be supplied as a tower-unit (mobile on castors) or, to save space, for fitting in a base cabinet. OmniaLab^{ED+} is exactly right as pure water supplier to autoclaves, laboratory washing machines and the dispensing of type I ultra pure water for analytical and bioscience applications.

Application: Complete laboratory supply

Water purification/Pure and ultra-pure water

1 Ultrapure water system, arium® pro

ASTM Typ1 water purification system for the high-end user. Whether for routine analysis or critical applications where reagent-grade water is required, the system consistently supplies high quality that is perfect for your applications.

Sartorius Lab Instruments

arium® pro features a convincing innovative design, quality and ease of use. From the intuitive menu navigation to the operator friendly setup, all units in the arium® pro series feature ultra easy operation and ultra high flexibility for producing laboratory-grade purified water. arium® pro UV and pro VF water purification systems are also optionally available with an integrated TOC monitor for regularly checking the organic water constituents in product water. The TOC can be measured manually or automatically as required.

Areas of Application

- Atomic absorption (AA)
- Ion exchange chromatography (IC)
- High performance liquid chromatography (HPLC)
- Polymerase chain reaction (PCR)
- Inductively coupled plasma mass spectrometry (ICP-MS)
- Preparing cell culture media
- Protein purification
- Manufacturing reagents
- Preparing buffers and media
- Rinsing glass vessels

Features

- Innovative glass operator interface with touch function
- Integrated TOC measurement (optional)
- Volume- and time-controlled dispensing
- Freely adjustable flow rates up to 2 L/min
- Conductivity measurement for feed and product water
- Integrated monitoring of water consumption
- Data logging on SD card and printer or PC
- Activatable PIN code for basic configurations
- Service and alarm functions supported by graphic displays
- Intelligent alarm system
- Compact design

1

1 Pure water purification systems Barnstead™ Pacific™ TII

The Thermo Scientific Pacific Barnstead TII system provides ultrapure water (1 - 10 MΩcm) ASTM type II for typical demand up to 200 l/day. By combining different treatment technologies such as pretreatment, reverse osmosis, ion exchangers, adsorption and optional UV lamp, the Pacific TII produces pure water (ASTM type II) that meets the highest quality standards such as ASTM II, CAP, ISO 3696, CLSI and Bi distillate. Pacific TII is suitable for table or wall mounting. Three tank sizes 30 l, 60 l, or 100 l are available to match the range of permeate capacities of 7, 12 and 20 l/h. Upgrading the system and thus increasing the capacity for a growing pure water demand is possible at any time. Ideal for supplying ultrapure water systems, clinical analysers, reagent/dilution preparation and general chemical analysis.

Thermo Scientific

Product features:

- Feed water (e.g. tap water) is pre-cleaned by reverse osmosis membrane. Via the pure water cartridge and optional UV unit the type II water is temporarily stored in the storage tank. The optional recirculation of the water via the integrated pump ensures constant optimal water quality
- Flexible and compact laboratory system for optional mounting on the laboratory bench or with the integrated mounting bracket on the wall
- Simple and economical change of consumables due to separately exchangeable high-tech cartridges
- In the 4-line display numerous operating parameters, such as limit values, flushing cycles tank volume display in % can be easily set and queried
- The code-protected operating system as well as a high-precision conductivity monitoring in acc. with USP enable documentation acc. with GLP requirements
- Additional pressure booster system on the ultrapure water tank for supplying downstream devices (e.g. autoclaves, dishwasher, analyser)
- The scope of supply includes all necessary materials for immediate use: Integrated wall bracket, RO membrane, pure water cartridge, pressure reducer and UV lamp (for Pacific TII UV)

Optional hand dispenser with flexible circulating line for dispensing water in a distance of up to 3 m. The kit contains a 0.2 µm end filter.

Pure water specifications

Operating pressure:	2 to 6 bar
Temperature:	+2 °C to +35 °C
Permeate conductivity:	0.067 to 0.1 µS/cm (at <30 ppm CO ₂ in feeding water)
Permeate resistance at 25°C:	15 to 10 MΩ.cm
Removal bacteria, Pyrogens:	>99 %
TOC value:	<30 ppb
Interface:	RS 232

Specifications

Power supply:	90-240 V/50-60 Hz

GENERAL CATALOGUE EDITION 21

Water purification/Pure and ultra-pure water

1

1 Ultrapure water purification systems Barnstead™ GenPure™, ASTM I

All Barnstead GenPure systems meet the requirements of the international standards ASTM type I, ISO 3696 type 1, ASTM D1193 and CLSI- CLRW. A variety of innovative expansion options, such as UV-lamp with wavelengths 185/254 nm and UV-intensity monitoring, a backwashable ultrafilter, real time TOC monitoring, a remote dispenser xCAD (operating radius 80 cm) or a flexible (operating radius 60 cm) dispenser on the unit (GenPure Pro), ensure optimal supply for all analytical and life science applications. All GenPure systems are supplied with: Feed water pressure reducer, wall-mounting, ultrapure water cartridge, end filter, options - all available under one order number

Thermo Scientific

Product features:

- Pre-cleaned feed water (e.g. reverse osmosis, distillation, demineralised water) is treated by a filtration cartridge and optional UV/UF units to produce ultrapure water
- Compact laboratory system for optional mounting on the laboratory bench, on the wall or with the optional dispensing unit xCAD under the laboratory bench
- Simple and economical change of consumables due to easily accessible service hood and cartridge with quick release fasteners and AquaStopp
- Integrated feed water monitoring with individually adjustable limit value ensures the purity grade of the product water and durability of the filter sets
- Swivel-mounted display/keyboard unit for setting and querying all operating and performance parameters (e.g. limit values for ultrapure water quality)
- USP-compliant conductivity measurement with auto-calibration
- Pre-settable dosing in the range from 0.01 to 65 l
- Accurate real-time TOC measurement at the sample point for continuous monitoring of the organic water constituents meets USP requirements
- Permanent UV-intensity monitoring and display in %, as well as UV operating hours counter with individual adjustable limit values

Water purification/Pure and ultra-pure water

1 Ultrapure water purification system Barnstead™ MicroPure™, ASTM I

Thermo Scientific

1

The Thermo Scientific Barnstead MicroPure system provides ultrapure water (18.2 MO, 0.055 µS/cm) ASTM type I, for typical demand up to 15 l/day.

All MicroPure systems meet the requirements of the international standards ASTM (type I), ISO 3696 (type 1), ASTM D1193 and CLSI-CLRW. A variety of innovative expansion options, such as UV-lamp with wavelenghts 185/254 nm and a backwashable ultrafilter with a flow rate up to 0.6 l/min, ensure optimal supply for all analytical and life science applications.

MicroPure systems are supplied for immediate use with: pressure reducer, end filter, ultrapure water cartridge

Product features:

- Pre-cleaned feed water (e.g. reverse osmosis, distillation, demineralised water) is treated by a filtration cartridge and optional UV/UF units to produce ultrapure water
- Compact laboratory system for optional mounting on the laboratory bench or on the wall
- Simple and economical change of consumables due to easily accessible service hood and cartridge with quick release fasteners and AquaStopp
- Swivel-mounted display/keypad unit for setting and querying all operating and performance parameters such as limit values for ultrapure water quality
- **MicroPure ST systems** supplied with integrated 6 l tank for mobile use in the laboratory. Feed water supply with pre-cleaned water is provided by this tank

Water purification/Pure and ultra-pure water

1

1 Pure and Ultrapure water purification system Barnstead™ Smart2Pure™, ASTM I and II

The Thermo Scientific Barnstead Smart2Pure system is a compact system which converts tap water into ASTM type I and II water. The Smart2Pure models 3 and 6 are featured with an built-in 6 l tank to store the type II water. The Smart2Pure 12 offers the choice between a 30 l or 60 l tank depending on storage requirements. A variety of innovative expansion options, such as UV-lamp with wavelenghts 185/254 nm and a backwashable ultrafilter with a flow rate up to 0.6 l/min, ensure optimal supply for all analytical and life science applications. A swiveling display and the easy filter change make the Smart2Pure the perfect laboratory water unit for the small demand.

Thermo Scientific

Product features:

- Easy and economical change of consumables due to separately exchangeable high-tech reprocessing cartridges
- Guaranteed pure water quality: Recirculation pump and sterile ventilation filter protect from contamination and ensure a tank water quality from 10 up to 15 MW x cm
- Additional pressure outlet on the ultrapure water tank for supplying downstream devices (e.g. autoclaves, analyser) or connection of a flexible dispenser
- The scope of supply includes all necessary materials for the first-time operation (for Smart2Pure12 a storage tank must be supplemented)
- Optional hand dispenser with 3 m flexible circulation line for remote dispensing of the water. The kit contains a 0.2 µm end filter

Ultrapure water specifications ASTM Type I

Flow rate:	1.0 l/min
Flow rate UF-models:	0.6 l/min

Water purification/Pure and ultra-pure water

1 Reverse osmosis systems, Ultra Clear™ RO EDI

The well-proven Ultra Clear™ RO range has been enhanced to peak water quality level in the plus series by adding electronic deionisation cells: accessory deionisers for removing inorganic materials from the output are therefore no longer required.

evoqua

Technical parameters:

- Resistance up to 17 megohm (0.07 µS/cm)
- TOC < 5 to 20 ppb at RO cell output
- Typical pure water quality < 0.07 µS/cm

In all Ultra Clear™ RO systems the quality of the feed and output water will be shown on the display.

1

**Features:**

- pure water treatment for simple analysis, laboratory rinsing machines, autoclaves, up to ultrapure water systems
- germ/pyrogen retention rate >99 %
- complete, connection-ready system; fittings allow supply tanks to be expanded if required (e.g. Ultra Clear™ RO supply tanks with 30, 60 and 80 litre capacities, larger tanks are available on request)
- menu-driven controller, RS232 interface
- Entrance- and Product water quality will be shown on the display.

GENERAL CATALOGUE EDITION 21

Water purification/Pure and ultra-pure water

1 Ultra pure water system, Ultra Clear™ TP TWF EDI

The Ultra Clear™ TWF EDI system is equipped with all the necessary components to produce reagent grade water directly from municipal tap water. The built-in reverse osmosis system has a recovery rate of >30 % to conserve water.

evoqua

The continuous electrodeionization (CEDI) stage purifies RO product water down to a quality range between 0.055 to 0.2 µS/cm.

CEDI product water can be drawn directly from the integrated storage tank. Each system is equipped with economical state-of-the-art purification technology.

Water quality with a resistivity of 18.2 MΩ·cm and a TOC level between 1 to 3 ppb far exceeds all reagent water quality standards including:

ASTM Type 1, CLSI and ISO 3696 Type 1. All systems that include ultrafiltration (UF) produce the highest possible water quality.

These units deliver RNase-, DNase- and DNA-free water. A separate reverse osmosis system with storage tank, an electro-deionization and an ultrapure water treatment, compiled into a system, always requires a far greater financial investment. Our system contains All-in-One.

- 7" multi-color glass display for fast and easy operation, with a generous overview
- Easy to navigate by touching functional system components
- New designed user interface
- Graphic display of all main functions
- SD cards and USB connection for data transfer
- Interface and manual available in 7 languages (German, English, French, Spanish, Portuguese, Russian and Chinese)
- Ultrapure water system with an integrated reverse osmosis system to transform municipal water to pure and ultrapure water.
- Consistent water quality due to the EDI cell
- Connection directly to the drinking water line

LLG-PCR tubes with attached lids, PP

- Individual tubes
- Compatible with all common thermocyclers
- 0.2 ml or 0.5 ml
- Individual attached flat or domed snap caps
- Consistent wall thickness for uniform heat transfer
- Cap design ensures fit and helps reduce sample evaporation
- Virgin polypropylene, certified RNase-, DNase- and Endotoxin-free

Description	PK	Cat. No.
0.2 ml, single, flat cap	1000	6.313 401
0.2 ml, single, domed cap	1000	6.313 402
0.5 ml, single, flat cap	1000	6.313 403

2

LLG-PCR-Tubes, 8 Strips with attached individual caps, PP

- For 0.2 ml Thermocycler blocks
- With domed or flat cap
- Made of high quality polypropylene, RNase-, DNase- and Endotoxin-free

Description	PK	Cat. No.
8 PCR tube strips with individually attached flat snap caps	126	6.313 405
8 PCR tube strips with individually attached domed snap caps	126	6.313 407

1 PCR Products, BRAND

BRAND has significantly expanded its product range of extra-thin-wall disposable products, which were specially developed to satisfy the demands of PCR applications.

Quality features

- Suitable for use in common thermocyclers
- PP, extra-thin uniform wall thicknesses to provide the optimal thermal transfer and short cycle times
- 96-well PCR plates with blue alphanumeric code and cut corner marking
- Highly clear flat covers optimally suited for qPCR
- DNase-, DNA- and RNase-free
- Autoclavable at 121°C (2 bar), acc. DIN EN 285
- qPCR: Products which are suitable for Real Time PCR (qPCR)

White PCR products offer significantly better results for qPCR, and are specifically recommended by many thermocycler manufacturers.

2 Single PCR tubes with attached caps, PP

BRAND

0.2 ml and 0.5 ml PCR tubes with attached caps are compatible with leading thermocyclers with heated lids. The caps are easy to open and close without tools, yet ensure a tight fit to reduce sample evaporation. The various colors of the PCR tubes allow fast sample classification.

Other colors available on request.

0.5	flat cap	clear	1000	9.409 372

3 Strips of 8-/12- PCR tubes plus detached cap strips, PP

BRAND

Strips of 8 or 12 connected PCR tubes (0.2 ml). Cap strips consisting of 8 or 12 domed caps (available separately) provide tight seal during all PCR cycles, thus protecting samples from cross-contamination. The tubes have a holding strap at one end, and the cover strips on each lid have a small lip on the side for careful, contamination-free opening. Consistent tube wall thickness allows rapid heat transfer along the entire exterior tube surface. Made of pure, virgin polypropylene, free from RNase-, DNase- and DNA. Autoclavable at 121 °C (2 bar), according to DIN EN 285.

Other colors on request.

PCR tubes, 0.2ml and 0.5ml, thin-walled

Eppendorf AG

Polypropylene tubes for PCR experiments

Product characteristics of 0.2ml PCR tube:

- Contamination shield on attached lid
- Defined lid position (90°) due to special hinge
- Highly transparent
- Tight sealing
- Easy to open
- Can be used in all thermal cyclers with 0.2ml block format
- The work tray for holding 96 tubes is placed in a frame and with this forms a complete rack for 0.2ml tubes. Both parts are made of polycarbonate and are autoclavable (at 121°C for 20 mins.)
- Certified being free from human DNA, DNase, RNase and PCR inhibitor

Product features of thin-walled 0.5ml PCR tube:

- frosted writing surface
- Autoclavable when open (at 121°C for 20 mins.)
- Highly transparent
- Easy to open
- Can be used in Mastercyclers with 0.5ml block format
- Certified being free from human DNA, DNase, RNase and PCR inhibitor

96 well PCR-Plates, PP, for PCR or qPCR

BRAND

The ultra thin-walled PCR plate design facilitates constant, rapid and precise heat transfer.
The smooth vessel interior minimizes the binding of enzymes and nucleic acid to the walls.
The rim of the wells are designed to protect against cross-contamination, allowing a reliable seal with the sealing mats tailored to the plates. With blue alphanumeric code and cut corner for easy orientation, or as indicated.

96-well, non-skirted

PP. 0.2 ml wells. 96-well non-skirted PCR plates are suitable for most commercially available thermocyclers.

9.409 247

96-well, semi-skirted

PP. 0.2 ml wells. 96-well semi-skirted PCR plates can easily be labelled or tagged with a barcode.

96-well, semi-skirted. Suitable for Roche® LightCycler® 480 and other thermocyclers

PP. 0.15 ml wells. Semi-skirted. With black alphanumeric code. Available with or without self-adhesive sealing film (polyester, high-transparent, for qPCR).

9.409 351

96-well, skirted

PP. 0.2 ml wells. 96-well skirted PCR plates are especially rigid, and are optimally suited for use with automatic pipetting systems and for being transported.

3 LLG-PCR adhesive film and foil

For use in cyclers with screw-down or clip-down lids.

PCR Film: Clear film allows both the visual inspection of samples and fluorescence measurements.

PCR Foil: Aluminium, easy to pierce, no residue of adhesive on the pipette tips.

QPCR Foil: Adhesive seal optically clear, peelable, for QPCR and fluorescence applications.

Description	Temp. range °C	PK	Cat. No.
PCR film	-40 ... 102	100	6.313 398
PCR foil	-80 ... 104	100	6.313 400
QPCR foil	-70 ... 100	100	6.313 399

4 PCR Foil, self-adhesive

For micro test plates, deep well plates, micro test tubes and 96/384 Well PCR plates.
DMSO resistant. Easily perforable, even with pipette tips.

Ratiolab

- For manual use
- Temperature resistant from -80 to 120 °C
- Adhesive of PP and aluminium foils with high solvent and DMSO resistance
- All films in SBS standard format

Description	Temp. range °C	PK	Cat. No.
PP	-80 ... 120	100	7.634 537

5 Sealing paddle for sealing films, PE

NEW

BRAND

White. The sealing paddle helps to attach the self-adhesive film to the plate with a uniform pressure.
Especially suited for plates with raised rim.

Type	PK	Cat. No.
Sealing paddle for sealing films	1	6.310 361

1 Sealing Films, Self-adhesive

In case the microplates, PCR- and Deepwellplates need not only to be covered, but also securely sealed, self-adhesive sealing films are available. These film sheets can be easily applied on the plates and removed also without the use of expensive equipment. They are available in different versions and are especially well-suited for storage or cell- and tissue-culture.

Description	Application	Material	PK	Cat. No.
single film, gas-permeable	Cell- and tissue culture	Rayon	100	9.407 620

2 PCR adhesive film and foil

Ideal for sealing PCR plates.

Eppendorf AG

- PCR clean: Certified free from human DNA, DNase, RNase and PCR inhibitor
- PCR Film: Allows visual monitoring of samples
- PCR Foil: Easy to pierce, no sticking of the pipette tips (ideal for automated systems)
- Heat Sealing: Position the film or the foil with the adhesive edges on the plate. Seal the plate using the heat sealer.

LLG-Temperature block exact, aluminium

Suitable for both cooling and heating, universally usable, uniform temperature distribution within the block, ideal for all temperature-sensitive applications.

Aluminum blocks with conical compartments and closed bottom for easy and precise tempering of reaction tubes and PCR tubes. The precisely adapted shape of the borings and the closed bottom offer advantages compared with cylindrical drilled blocks with open bottom, such as much better heat transfer and temperature accuracy. Made of a special aluminum alloy with high thermal conductivity. Identical temperature conditions for all samples. Compact size, requiring little space. Suitable for 96-well plates, 8 or 12 strips and single tubes. Ideal for working with 8- or 12-channel pipettes. Blocks for different tube sizes and combinations of tube sizes as indicated, all working steps in one block, holes closed at the bottom and tapered to fit perfectly the respective tube sizes and offer an optimum heat exchange.

3 96-Well PCR Rack, PP

- Manufactured from high density polypropylene which is fully autoclavable.
- Excellent rack for "before" and "after" PCR sampling.
- This rack can be used alone or inserted in the workstation.
- This working/storage rack is designed to accommodate 96 pieces 0.2 ml PCR tubes or strips of 8 and 12 tubes.
- Tube wells are easily identified with alphanumeric embossed numbers and letters.
- Translucent clear cover protects the tubes from dust and has a non-slip surface to allow safe storage of multiple racks.
- Dimensions (W x D x H): 125 x 88 x 31 mm

1 | 2 PCR-Coolers

PCR-Cooler made of PP with lid made of PC. Ice-free cooling system for PCR preparation and storage of 0.2 and 0.5 ml PCR tubes and strips as well as 96 well plates in standard and low profile well shape. Maintains sample temperature of less than 5 °C for up to 3 hours (with lid off). Maintains the entire 96-well plate at a temperature of 0 °C for 1 hour. When the temperature ceiling of 6 °C has been exceeded, users are signaled by a contrasting color change of the cooler, or a single well.

Heathrow Scientific

- 2 colour options: Purple to pink or dark blue to light blue
- Ice-free cooling reduces the risk of contamination
- Fully sealed and sonic welded cooler keeps coolant contained
- Detachable lid serves also as a stand
- Lid is suitable for left and right handed users
- Ergonomic textured finger grips provide a secure hold, especially when using gloves
- Can be used for freezer storage down to -80 °C
- Alphanumeric identification
- 2 years warranty

4 PCR Mini cooler, PP

With transparent lid. For protecting samples prior to warming. The mini PCR cooler keeps samples at 4 °C for approx. 3 hours. The insulating gel changes from violet to pink at 7°C. Suitable for 0.2 ml single vessels, 8-strips, 12-strips as well as 96-well PCR plates.

BRAND

4

Description	PK	Cat. No.
PCR Mini cooler	2	6.228 848

5 | 6 PCR-Coolers

The PCR-Cooler acts as a thermochromic temperature self-indicator: pink or light-blue (depending on the model chosen) when temperature exceeds +7°C, violet or dark blue when ice-cold. The new Eppendorf PCR-Cooler reliably maintains a sample temperature of 0°C* for over an hour, changing colour when the temperature exceeds +7°C. Better than an ice bath, PCR-Cooler is simple to handle, space-saving and contamination-free, making it the perfect preparation for PCR reactions. The temperature of single tubes is indicated by the colour of the respective individual apertures. Furthermore, samples are prevented from freezing by the specially developed cone contour.

Eppendorf AG

5

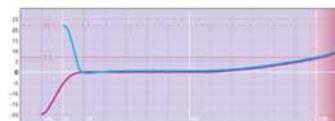

Eppendorf PCR-Cooler: the cooling unit in the universal 96-well format for 0.2ml and 0.5ml PCR tubes, for tube strips, plates and for individual tubes. The Eppendorf PCR-Cooler is a compact, innovative solution for protecting, transporting and storing sensitive samples and obviously also ideal for safely stopping reactions.

Application note:

By changing colour from violet to pink or dark blue to light blue, the PCR-Cooler shows when the temperature has exceeded +7°C. The crucial factor for sample cooling is the well colour in the PCR-Cooler.

1 Cooling Block Systems, FreezeBox™

Blue. FreezeBox™ is a new, energy-saving, environmentally friendly and safe cooling equipment, without additives. It does not require electricity (except for pre-cooling the cores in the freezer) and no ice for low-temperature cooling of biological samples. The system can be used ice-free, is lightweight, easy to transport and ideal for the collection and storage of biological samples. It can be combined with interchangeable cores and different tube modules. Cooling cores can be tempered in a refrigerator or freezer and inserted into the FreezeBox™. For operation with dry ice, leave out the cooling core and fill with 200 g dry ice instead.

- For use with cooling core, ice or dry ice
- Easy to clean and disinfect
- Durable, suitable for frequent use
- Easy to mount

2 Water, nuclease-free

CHEM-LAB n.v.

For use in any molecular biology application. Nuclease-free water is pure, quality-tested water suitable for use in all experiments that require nuclease-free water, including molecular biology applications. Nuclease-free water is prepared in a proprietary process, which yields DNase, RNase, and nuclease-free, deionized water without the use of chemical additives, such as diethylpyrocarbonate (DEPC). Nuclease-free water is provided in nuclease-free containers.

Plasmid Purification-Kits I-Blue Mini/Midi

For rapid and efficient extraction of plasmid DNA from bacterial cells.

IBI Scientific

The method is based on a combination of alkaline lysis and RNase treatment to obtain a clear lysate with minimal genomic DNA and RNA contamination. The bound plasmid DNA is washed and finally eluted by adding a buffer. The test kit contains the I-Blue Lysis Buffer, an optional colour indicator. The use of this indicator prevents common handling errors that impair efficient cell lysis and neutralization.

- Fast extraction time
- High yield
- Prevention of handling errors during cell lysis and neutralisation by I-Blue colour indicator

3 Gel/PCR DNA Fragment Extraction Kit

The test kit was developed to obtain or concentrate DNA fragments from agarose gels, PCR or other enzymatic processes.

IBI Scientific

The agarose gel is dissolved, the enzymes are denatured and the DNA fragments will bind to the glass fibre matrix in the spin column. Wash buffers (containing ethanol) are used to remove contaminants and a low salt elution buffer is used to recover the purified DNA fragments. Recoveries are 90 - 95 % for PCR clean-up. With this kit, PCR purification and gel extraction procedures can be performed, so that a second test kit is not necessary.

- High recovery rate
- Short process time
- One test kit for two methods

Genomics/DNA and RNA isolation-Thermocyclers

1 | 2 Micro plates Riplate® magnetic

Riplate® magnetic plates have been specially developed for the reproducible magnetic separation of DNA and proteins and can also be used for cleaning, mixing or centrifugation of samples as well as for the storage and preparation of substances.

Ritter

For the filtration of proteins as well as for DNA extraction, an automated method called magnetic separation is commonly used. The technology is based on magnetic particles which allow the fast and efficient sample preparation with high throughput. The sustainability of these products as well as reliable analysis results are ensured by the production under cleanroom conditions (class 8). The plates are in line with the SBS standard (Society for Biomolecular Screening) and have been especially developed for the magnetic separation technology.

- High resistance towards commonly used chemicals, solvents and alcohols
- High stability also during centrifugation
- Newly developed cylindrical wells enable a good bioturbation of samples
- Slightly raised rims reduce the risk of cross-contamination
- The alphanumeric code allows the registration and identification of individual samples even in confined spaces

1 Real-time PCR-system Prime Pro 48

The new Prime Pro 48 real time PCR system from Techne (UK) is a high specification, economically priced real-time thermocycler. Techne
 The Prime Pro 48 system has a unique high thermal block uniformity ($\pm 0.1^\circ\text{C}$). This uniformity as well as validated sample volumes of down to 5 μl enable an optimized reaction run time for 40 cycles down to only 15 minutes. The uniform temperature across the plate is achieved with a unique heating and cooling system that quickly enables a uniform temperature of $\pm 0.1^\circ\text{C}$ in every well of the block within a fraction of a second of reaching each well temperature. This high uniformity eliminates the need for triplicates which reduces reagent running costs. Prime Pro 48 accommodates a unique and economical 48-well PCR plate, the size of which is only 1/8 the size of a standard 96-well plate. The well format mirrors a 384-well plate therefore allowing the use of a 16-channel micropipette. The small plate cuts reagent costs in half whilst still producing a strong fluorescent signal. Applications include e.g. absolute and relative quantification, Allelic Discrimination and High Resolution Melt.

Features:

- Validated volume per well: 5 to 20 μl
- High temperature uniformity of $\pm 0.1^\circ\text{C}$ across the whole block instantly after every temperature change
- 40 cycles in 40 minutes before optimization, and down to only 15 minutes when optimized
- Genotype in 4 minutes with over 99% accuracy
- Patented "Adaptive LED Control" minimizes optical artifacts and prevents premature detector saturation
- Dual LED excitation (452nm to 486nm and 542nm to 582nm)
- 4 emission filters (505nm to 545nm, 562nm to 596nm, 604nm to 644nm, 665nm to 705nm)
- Data is always collected in all four filters for all wells
- Distinguishes 5000 and 10000 template copies with 99 percent confidence

Additional features:

- 48-well block
- MIQE compliant
- 400 analyte specific qPCR reagent kits available
- No calibration required
- Calibrated dyes: SYBR®, FAMTM, HEXTM, ROXTM, Cy®5.
- Additional dyes within the filter wavelength range are supported with no additional calibration required
- Unlimited software license
- 1 year warranty

Custom 48-well qPCR plates and corresponding seals have to be ordered separately.

Specifications

Temperature range:	30 to 100°C
Temperature stability:	$\pm 0.1^\circ\text{C}$

1 Thermocycler Alpha Cycler

The Alpha Cycler family from PCRmax provides a range of features which are specifically designed to meet the needs of modern researchers when amplifying DNA. Given the flexibility in format and block options (96 or 384 well) scalability is core in the Alpha Cycler range. Alpha Cycler software has features such as recently used programmes, allowing users to quickly access their most commonly used protocols without the need to navigate through folders to find it, individual user logins, with protected protocols. The Alpha Cycler systems also contain a novel programme wizard which allows users to define a protocol based specifically on their primer sequence and template source. Primer sequences or T_m's are entered, amplicon length and source defined and the on board algorithm generates an optimised protocol for your assay. The Alpha Cyclers range of block options allow for use of the most commonly used consumables from different manufacturers and includes 96 well plates (0.2 ml), tubes (0.2 ml), strip tubes (0.2 ml) and 384 well plates.

- Single, dual or four block options available with either 96 or 384 well gradient blocks
- **Multi-block units have totally independent blocks for maximum flexibility**
- HD Android driven touchscreen interface for simplified programming
- Generate and send instrument reports to diagnose the health of your system and identify any issues before they impact users work
- Lock programs with user defined password
- Alpha Track mobile app allows remote monitoring of run progress

Alpha Track App (free of charge): Track the progress of runs and health of your system remotely via the mobile app

The Alpha Track Application is used in conjunction with your Alpha Cycler and allows users to:

- Remotely track the progress of runs
- Send a health report for diagnosis by the technical support team
- Be notified of any issues and prevent system failures before occurring

UV sterilisation cabinets

These UV sterilisation cabinets provide a convenient area for setting up PCR reactions in a nucleic acid free environment thus limiting PCR reaction contamination. Acting effectively as a low cost alternative to a Cleanroom, the powerful UV lights on the cabinets denature nucleic acids in 5 to 30 minutes making them unsuitable for amplification. The cabinet incorporates safety features to prevent user exposure to UV light. The UV lights themselves are timer controlled and there are safety switches on the cabinets doors which turn off the UV lights when opened. Constructed from 10 mm acrylic, the cabinets also act as efficient shields from beta radiation emissions and can therefore be safely used with isotopes such as ^{32}P .

1 Gel electrophoresis tank MultiSUB Mini

The MultiSUB Mini is the smallest unit in the range, designed for low to medium numbers of samples. The cost-effective small gel size does not compromise versatility as two tray options are available: 7 x 7 cm and 7 x 10 cm. Easy preparation up to 16 samples. Simply by altering the gel tray or comb, this compact unit is capable of resolving up to 64 different samples, prepping 1ml of sample or separating sample bands over a distance of 9 cm.

Cleaver Scientific

Supplied with:

MultiSUB Mini 7: 7 x 7 cm UV Tray, 2 x 8 sample combs.
 MultiSUB Mini 10: 7 x 10 cm UV Tray, 2 x 8 sample combs.
 MultiSUB Mini DUO: 7 x 7 cm and 7 x 10 cm UV Tray, 2 x 8 sample combs.
 Set: MultiSUB Mini DUO + Power supply OmniPAC, MINi 300 V 400mA 60 W, 110/230 V.
 Each model has an additional loading guides and dams.

Specifications

Gel dimensions (W x L):	7 x 7cm and 7 x 10 cm

2 | 3 Gel electrophoresis tank MultiSUB Choice

Gel size: 15 x 15 cm (W x L). This unit is ideal for restriction fragment analysis, sample prep or checking of high number of samples. The MultiSUB Choice offers a high degree of versatility. Two additional tray options are available: 15 x 7 cm and 15 x 10 cm.

Cleaver Scientific

- Colour coded combs 0.75/1.0/1.5/2.0 mm
- 3, 4 or 6 comb positions for maximum 210 samples
- Low buffer volume: 500 ml
- Simple gel casting by using dams

Supplied with:

MultiSUB Choice 7: 15 x 7 cm UV tray, 2 x 20 sample combs.
 MultiSUB Choice 10: 15 x 10 cm UV tray, 2 x 20 sample combs.
 MultiSUB Choice 15: 15 x 15 cm UV tray, 2 x 20 sample combs.
 MultiSUB Choice Trio: 15 x 7, 10 and 15 cm UV tray, 2 x 20 sample combs.
 MultiSUB Choice Trio 15: 15 x 15 cm UV tray, 2 x 20 sample combs.
 MultiSUB Choice Stretch 20: 15 x 20 cm UV tray, 4 x 28 sample combs.
 MultiSUB Choice Stretch 25: 15 x 25 cm UV tray, 4 x 28 sample combs.
 Each model has an additional loading guides and dams.

E & OE.

1 Gel electrophoresis tank MultiSUB Midi

Extending only the width of this unit allows more samples to be resolved per gel than the MultiSUB Mini without a significant increase in buffer or gel volumes. A maximum of 100 samples per gel can be resolved making this unit ideal for those routinely checking medium numbers of samples over short to medium gel run lengths.

Cleaver Scientific

**Supplied with:**

MultiSUB Midi 7: 10 x 7 cm UV tray, 2 x 16 sample combs.
 MultiSUB Midi 10: 10 x 10 cm UV tray, 2 x 16 sample combs.
 MultiSUB Midi DUO: 10 x 7 cm + 10 x 10 cm UV tray, 2 x 16 sample combs.
 Each model has additional loading guides and dams.

Specifications

Gel dimensions (W x L):	10 x 7 cm and 10 x 10 cm
Unit dimensions (W x L x H):	22 x 12.5 x 9 cm
Max. sample capacity:	10 x 7 cm tray, 50 samples 10 x 10 cm tray, 100 samples

2 Gel electrophoresis tank MultiSUB Maxi

The MultiSUB Maxi is primarily designed for resolution of high numbers of samples such as from Cloning or PCR. The MultiSUB Maxi allows ultra high-resolution separations over extended runs. Tray sizes correspond to standard blotter sizes. It also allows easy sample transfer onto a membrane for further analysis. Four gel tray sizes are available: 20 x 10 cm, 20 x 15 cm, 20 x 20 cm and 20 x 25 cm. Multichannel pipette compatible, 40 combs facilitates speed loading of up to 440 samples per gel. 50 sample combs allow maximum sample capacity of 550 samples per gel.

Cleaver Scientific

**Supplied with:**

MultiSUB Maxi 15: 20 x 15 cm UV Tray, 2 x 20 sample, 1 mm thick combs.
 MultiSUB Maxi 20: 20 x 20 cm UV Tray, 2 x 20 sample, 1 mm thick combs.
 MultiSUB Maxi DUO: 20 x 10 + 20 x 20 cm UV Tray, 2 x 20 sample, 1 mm thick combs.
 MultiSUB Maxi 25: 20 x 25 cm UV Tray, 2 x 20 sample, 1 mm thick combs.
 Each model has an additional casting dams and loading guides.

3 Power supply nanoPAC-300 Mini for gel electrophoresis tanks

The nanoPAC-300 is capable of running all Cleaver Scientific horizontal multiSUB™ systems and vertical omniPAGE mini gel systems.

Cleaver Scientific

- Maximum constant current output of 400mA
- Simple two step feature to set a programmable change in voltage, current and time during the run
- Constant voltage up to 300 V
- Adjustable in 1 V and 1 mA increments
- Two parallel outputs
- Continuous run or timed setting up to 999 minutes
- Automatic safety shutdown
- Alarm function
- Easy-to-clean polycarbonate housing
- 3-digit LED display

2 Agarose for gel electrophoresis

This agaroses are suitable for routine analysis of nucleic acids. They combine tensile strength with low electroendoosmotic effects to achieve high resolving power for a wide size range of nucleic acid fragments. AG agaroses are also very environmentally friendly, being manufactured by a process which excludes organic solvents. Also available as low melting point agarose for nucleic acid recovery and enzymatic applications (Cat. No. 4.658 455) and as High Resolution PCR grade agarose for separation of small DNA fragments of up to 800 bp (Cat. No. 6.270 615). Other packing sizes on request.

DNA Markers for Gel Electrophoresis

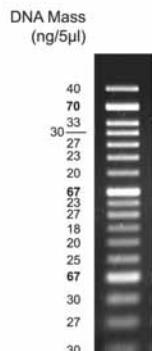

The ready-to-use DNA markers run precisely and produce a sharp, well defined ladder. They are available in six molecular weight ranges. The markers contain high intensity reference bands and may be used to perform size comparisons with DNA molecules ranging from the smallest of PCR fragments to large, linearised cosmid vectors.

Cleaver Scientific

- Up to 19 bands
- Isolated from restrictive plasmids
- 6 months stable at room temperature
- 12 months shelf life at 4 °C

4 Blue- and white light LED-Transilluminators

NEW

Powerful LED lighting arrays for blue (470 nm) and white (broad wavelength) illumination to image fluorescent and colorimetric gels. Through LED lights no ageing of UV bulbs and because of the inbuilt white LED array a separate white light table is not necessary. Well suited for teaching labs in universities and schools. Compatible with blue light excited safe DNA stains, as well as traditional stains such as ethidium bromide.

- Magnetic filter compatible with wide range of DNA stains
- 3 level adjustable LED intensity
- Bottom up illumination provides even sample illumination
- Automatic power-off to prevent heat build-up
- High quality aluminium housing

Scope of supply:

Transilluminator, orange hinged filter, paper hood

Specifications

Wavelength:	470 nm + white light
Viewing size:	120 x 180 mm
Dimensions (W x D x H):	220 x 185 x 30 mm
Input voltage:	12 V, 2 A
Power supply:	110 ... 240 V

1 Blue light LED-Transilluminators runVIEW MINI**NEW**

Cleaver Scientific

The Mini-Blue light Transilluminator uses harmless blue light to illuminate both traditional Ethidium bromide stained gels as well as safe stains. Slotting under any gel tank, but perfect for our MINI and MIDI sized multiSUB gel tanks. With orange filter window to visualise DNA in real time within gel tanks, perfect for quickly checking PCR fidelity and restriction digest results. The device can also be used as a stand-alone transilluminator with the gel placed directly on the illuminator.

1

- High intensity blue LED illuminator allows visualisation of a wide range of fluorescent gel stains
- Compatible with runSAFE, commercial safe stains and ethidium bromide

Scope of supply: Transilluminator, Filter (orange)

Specifications

Wavelength:	470 nm
Viewing size:	112 x 75 mm
Dimensions (W x D x H):	86 x 170 x 25 mm
Weight:	338 g
Power supply:	DC 12 V, 2 A

3 Compact UV transilluminators

Vilber Lourmat

- Compact design
- Metal housing, with stainless steel filter frame and "long life" filter
- Modern technology, highest quality manufacture
- Single or dual wavelength models available
- BECXF models have intensity selector (Hi/Lo)

3

1 | 2 Gel Documentation System omniDOC

The omniDOC offers high performance gel documentation and analysis at a relatively low cost. A high resolution 5 mega pixel camera with slide-out UV transilluminator, and optional blue epi-illumination module and white light table, makes the omniDOC suitable for imaging most fluorescent and colorimetric gels.

Cleaver Scientific

OMNIDOC features:

- Pre-focused 5 mega pixel camera with auto-exposure for almost instantaneous high resolution gel imaging; CMOS sensor for improved light sensitivity
- 6mm lens, F1.2 aperture size, with manual adjustment
- Interchangeable 4 positions filter wheel with 620 nm ethidium bromide filter as standard; 520, 560, 580 nm and neutral density filter options available for runSAFE, SYBR stain and other fluorescence applications
- Viewing pane with universal amber filter for gel inspection, which may be covered by a spring-loaded panel during documentation
- Internal white LED - aids gel positioning and focusing
- Slide-out 312 nm transilluminator; uses optional plug-in white light table for coomassie, silver-stain and other colorimetric gels
- Large 210 x 260 mm filter area
- Dark room assembly with corrosion resistant ABS construction
- Safety switch prevents accidental UV exposure when opening front door panel

omniDOCSAFE: omniDOC plus blue LED Epi-illumination and 520, 560, 580 nm and neutral density filters.

omniDOCPROSAFE: omniDOC plus blue LED Epi-illumination, 520, 560, 580 nm and neutral density filters and white light table.

3 Gel documentation system gelLITE-E60

Cleaver Scientific

NEW

Compact gel documentation system for agarose gels and stained protein gels. Suitable for fluorescent and stained agarose gels, spot and colony counting, Coomassie stained protein gels, GFP plant imaging, molecular weight analysis of DNA agarose gels and protein gels as well as autoradiography imaging. A 302 nm UV transilluminator enables imaging of large format agarose gels or stained protein gels up to 20 x 20 cm. A 5-megapixel camera gives low light sensitivity for clear resolution of closely spaced DNA bands and ensures low levels of fluorescence are detected. With intuitive genePIX acquisition software for an efficient workflow.

- High-resolution 5 megapixel camera with 16 bit image depth and 65536 grey levels
- Manually controlled camera zoom and focus
- Image of all commercially available DNA and protein stains
- Genepix software for acquisition and analysis
- USB connection to PC

Scope of supply:

Darkroom, camera, UV transilluminator, converter screen, UV emission filter, license free acquisition and analysis software

Specifications

Resolution:	5 megapixels
Lens:	Manual zoom 6.5 - 39, F1.4
Sensor bit-depth:	12/16 bit
Greyscales:	4096/65536
Transilluminator wavelength:	302 nm
Transilluminator size:	200 x 200 mm
Dimensions (H x D x W):	620 x 375 x 400 mm
Power supply:	230 V/60 Hz

Type	PK	Cat. No.
gelLITE-E60	1	4.670 735

Further models can be found in our online shop.

E & OE.

1 Gel Documentation System Doc-Print CX3

Doc-Print CX3 is a stand-alone system with a small footprint that doesn't need a computer. **Vilber Lourmat**
The free VisionCapt software guarantees full GLP compliance. Molecular weight calculation, band quantification, colony counting, distance calculation, text annotations and image enhancement are included.

- Field of view: 24 x 18 cm
- Scientific grade camera - Made in Germany
- 3 megapixel resolution (extandable to 20 megapixels)
- Auto-exposure
- 16-bit - 65 536 grey levels
- Passive cooling
- USB 3 connection
- Large 12.6" touchscreen interface display
- Self-understandable user interface
- Print or save on an external drive via the USB port
- Connection of a thermal printer possible

All models include the following standard components: Imaging unit with touch display and software, camera, zoom objective, UV-/vis F-590 Filter and dark hood.

Type	PK	Cat. No.
DOC-Print CX3 - standard components	1	9.971 948
DP CX3-P - standard components + grey-level thermal printer	1	9.971 949
DP CX3-20.M - standard components + UV transilluminator	1	9.971 950
DP CX3-P-20.M - standard components + grey-level thermal printer and UV transilluminator	1	9.971 951

2 Gel documentation system UVIdoc-HD6

PC-independent gel documentation system with a compact darkroom made of metal

Vilber Lourmat

NEW

- Large, good readable touch display (12.2")
- High resolution scientific camera with motorized 6x zoom objective
- High recoding quality (6 MP, 16 bit)
- Automated image recording
- Darkroom, three position filter wheel, LED incident light, integrated UV-table (20x20 cm) with full pullout and automatic safety shutdown
- USB port for data transfer
- Free analysis software

Specifications

Resolution:	6 megapixels
Extended resolution:	10 megapixels
Lens:	6x zoom objective
Sensor bit-depth:	16 bit
Greyscales:	65535
Dynamic range:	>4.0 OD
Transilluminator wavelength:	312 nm
Transilluminator size:	200 x 200 mm
Dimensions (W x D x H):	380 x 475 x 785 mm
Weight:	33 kg

Genomics/Concentration-Electroporation

1 Vacuum concentrator, Concentrator plus™

The new Concentrator plus features a new LCD display and user-friendly control panel with clearly labeled function keys.

Eppendorf AG

The new Concentrator plus from Eppendorf is available in two configurations:

- Complete system with an integrated service-free diaphragm pump
- Basic concentrator for connecting to an existing vacuum.

The Concentrator's heating technology optimises the evaporation process. No matter which configuration you choose, you're assured of quick and efficient-yet gentle-vacuum concentration of your samples (e.g. DNA/RNA, proteins). The complete system includes a vapour condenser that purifies the exhaust air by up to 85%. This serves as protection against unpleasant vapours.

Specifications

Max. power consumption:	350W/150W
Dimensions (W x D x H):	33cm x 58cm x 29cm/33cm x 37cm x 23cm
Weight:	31.5 kg/16.5 kg
Vacuum:	20hPa (20mbar)
Fixed rotation speed:	1.400rpm
Tube sizes:	0.2ml - 50ml
Capacity:	max. 144 tubes 2 microplates

Complete system/Basic device**Description****PK****Cat. No.**

Complete system with integr. membrane vacuum pump and 48 x 1.5ml / 2.0ml fixed angle rotor

**3 Electroporator Eporator®**

The Eppendorf Eporator® is a compact device for the fast and controlled electroporation of bacteria, yeasts and other microorganisms. Mainly for the insertion of plasmid DNA, but also RNA, proteins and all other small molecules.

Eppendorf AG

- One-button operation
- Integrated cuvette holder
- Self-explanatory due to display-controlled operation
- Frequently used parameter settings programmable
- USB interface for data transfer and GLP-supporting documentation

Specifications

Resistance:	600 ohm
Condenser:	10 µF
Time constant:	5 ms
Dimensions (W x D x H):	19 x 27.5 x 12.5 cm
Weight:	3.2 kg
Charging voltage:	200 - 2500 V
Power supply:	230 V, 50 - 60 Hz

Type**PK****Cat. No.**

Eporator

1 6.285 780

1 Electroporation System ECM® 399

The ECM® 399 is an electroporation system for the simple transformation of bacteria and yeast cells. It produces exponential decay waves and is designed to deliver the field strengths and pulse lengths required for transformations. The ECM® 399 is ideal for basic transformation in research and academic environments. It is easy to operate, cost effective, compact in size and portable.

Applications: Transformation of bacteria, yeast, fungus.

Scope of supply: Generator ECM® 399 , PEP cuvette holder, Cuvettes 1 mm, 2 mm, 4 mm (10 each) and Cuvette Rack

1

**Specifications**

Capacity/Resistance Range:

LV Mode: 1050 µF/150 Ohm, fixed

HV Mode: 36 µF/150 Ohm, fixed

Max. Voltage Output: 2500 V (Peak)

Pulse Interval: 100 ms to 10 s

Charge Time: max. 5 s

Max. Pulse Length: 125 ms at 500 V (Peak)

or 5 ms at 2500 V (Peak)

Display: 16-character, liquid crystal, LCD backlit

Interface: Digital User Interface

Relative Humidity: 60 %

Power supply: 100 - 240 V, 50/60 Hz

Type	PK	Cat. No.
BTX ECM 399	1	6.274 057

2 Electroporation cuvettes Plus

BTX Cuvettes Plus are designed for use in electroporation and electrofusion of bacteria, yeast, Harvard Apparatus insect, plant and mammalian cells. Each sterilized Cuvettes Plus package includes a disposable cuvette and a transfer pipette, which is used for removal of the sample after electroporation. The cuvettes are molded with embedded polished aluminum electrodes, and gamma irradiated for guaranteed sterility.

2

Three electrode gap sizes are available:

- 1mm for bacteria and yeast
- 2mm for all cell types
- 4mm for mammalian cells

BTX cuvette can obtain high field strengths up to 25.0 kV/cm. Round caps are leak resistant and allow for quick and easy removal. For research use only. Can be used with electroporation systems from different manufacturers (not suitable for units from Eppendorf).

BRANDplates® - A complete premium-quality line - for every application!

Microplates for Immunoassays (non-sterile)

Diagnosis of disease, pregnancy or verification of doping substances - many analyses in the modern laboratory are performed with immunological assays in microplates. They are characterized by their high specificity and provide the opportunity to detect the lowest concentrations of defined substances in complex liquids e.g. blood serum.

immunoGrade™ (high binding)

Optimized for the immobilization of IgG, highest binding capacity for molecules with mixed hydrophilic and hydrophobic regions. The surface of choice for the majority of standard ELISAs.

hydroGrade™

Strongly hydrophilic, high affinity to hydrophilic molecules like e.g., glycoproteins and peptides, antibodies with predominantly hydrophilic regions and nucleic acids.

lipoGrade™

Strongly hydrophobic (lipophilic), immobilization of biomolecules with predominantly hydrophobic regions. An alternative to the immunoGrade™ surface for the immobilization of molecules, e.g. lipoproteins or peptides.

HydroGrade™ and lipoGrade™ can be found in the online shop.

Non-treated (sterile or non-sterile)

Non-treated PS microplates are used in the most diversified application fields, e.g. homogenous standard assays and extensive screening assays.

The hydrophobic characteristics of untreated PS are often of use in performing these applications! The new BRANDplates® range contains two types of non-treated microplates:

pureGrade™ (medium binding)

Non-treated, non-sterile surface. The standard plate for most applications. Particularly applicable for homogenous assays, screening, and in the field of storage.

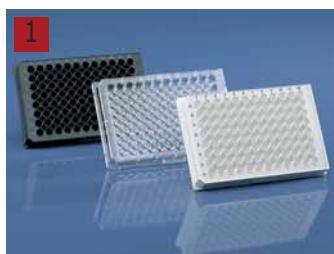

pureGrade™ S

Non-treated surface, sterile. Sterilized via β -radiation. Especially suited for bacteriological assays.

Colours, wells and shapes:

- 96- and 384-well format
- standard or transparent bottom
- transparent, white or black
- Various well bottom shapes: U-, V-, F-, C-bottom for 96-well format
- clearly distinguishable via color code: blue embossed alphanumeric coding for 96-well standard plates.
- free from endotoxins (< 0.01 EU/ml), DNase, DNA, RNase, non-cytotoxic (according to ISO 10993)
- ANSI/SLAS format
- **non-sterile products without lid, please order separately**
- **sterile products comply with ISO 11137 and AAMI guidelines. A SAL of 10^{-6} is reached. Supplied individually wrapped with lid.**

Get yourself familiar with the new range by using the BRANDplates® selection guide under www.brand.de.

1 ImmunoGrade™ (high binding)

PS, non-sterile. Optimized for the immobilization of IgG, standard ELISA assay.

3 Lids for BRANDplates® microplates
To protect samples, reaction batches or cell cultures from both contamination and evaporation,
compatible lids are available for all BRANDplates® microplates. The lids are made of crystal-clear polystyrene.
They are optimally matched to the corresponding BRANDplates® microplates, so that plates with lids can also be
stacked. The cut-corner sets the orientation of the lid. For 96-well standard plates, lids with condensation rings
are also available.

BRAND

3 96 Well Immuno Plates, PS, flat bottom

Non sterile Immuno plates with transparent flat bottom, well suited for quantitative and qualitative solid phase immunoassays.

Thermo Scientific

Choice of different surfaces:

PolySorp™, Immulon™ 1B and Universal Binding (UB) serve to absorb hydrophobic molecules.

Medisorp™ and Immulon 2HB are slightly hydrophilic and bind a variety of biomolecules.

MaxiSorp™, Immulon 4 HBX and Enhanced Bond (EB) are hydrophilic and ideal for antibody sandwich assays.

MultiSorp™ is highly hydrophilic and is well suited for glycans and water-soluble proteins.

- Reliable and repeatable results in colourimetric assays
- Very good optical quality
- Alphanumerically labeled rows and columns

96/384 Well Plates and Modules CovaLink™ and Immobilizer Streptavidin, PS

Microtiter plates for immunoassays with surfaces for affinity binding (passive streptavidin and immobilizer streptavidin, nickel chelate and glutathione, BioBind).

Thermo Scientific

- Streptavidin-biotin interaction for a broad range of biomolecules
- Highly specific binding surface
- Improvement of the signal-to-noise ratio
- 96 well plate: Working volume 100 µl/well, total volume 350-400 µl/well
- 384 well plate: Working volume 50 µl/well, total volume 120 µl/well

1 Gel electrophoresis tank OmniPage Mini

Vertical chamber especially for protein analysis in up to 4 gels.

Cleaver Scientific

The special manufacturing process results in a device with unique quality and durability at a very reasonable price. Easy handling and fast cooling. The dimensions are compatible with all 8 x 10 and 10 x 10 cm ready-to-use gels. High sample throughput by up to 4 gels with 20 samples each. Low buffer volume from 250 to 1200 ml.

Supplied with:

OmniPage Mini: chamber with platinum electrodes, 2 sets of glass plates with 1 mm thick bonded Spacers, electrodes, 2 x 12 sample combs.

OmniPage Mini SYS: OmniPage Mini + caster.

OmniPage Mini CBS: OmniPage Mini + caster and blotting insert.

Technical specifications

Gel dimensions (W x L): 7.5 x 8 cm

Unit dimensions (W x D x H): 19 x 13 x 15 cm

Max. sample capacity: 80 samples, 20 samples per gel

Buffer volume: min. 250 ml; max 1200 ml

Description	PK	Cat. No.
OmniPage Mini	1	9.584 652
OmniPage Mini SYS	1	9.584 654
OmniPage Mini CBS	1	6.229 038

2 Gel electrophoresis package omniPAGE TETRAD Mini-Set

The gel electrophoresis tank OmniPAGE Mini is suitable for parallel treatment of up to 4 gels with 20 samples each. The tank is easy to handle, especially leak proof and guarantees an efficient cooling. For self-cast gels and all major types of 8 x 10cm and 10 x 10cm precast gels.

Cleaver Scientific

Supplied with:

- omniPAGE Mini, 10 x 10cm Dual
- 1x CVS10DIRM Sliding Clamp PAGE insert
- 1x CVS10EXCASTER External Casting Upstand
- 1x VS10TANK Tank
- 1x VS10LID Lid
- 1x VS10DP Dummy plate
- 1x CSL-CAB set of electrophoresis cables, one black, one red
- 2x VS10PGS1 Plain glass plates with 1mm bonded spacer (pack of 2)
- 2x VS10NG Notched glass plates (pack of 2)
- 2x VS10NGS1 Notched glass plates with 1mm bonded spacer (pack of 2)
- 4x VS10-12-1 = 4x 12 sample combs, 1mm thick
- 1x VS10DCAST Casting base with casting mat

Type	PK	Cat. No.
omniPAGE TETRAD Mini-Set	1	7.930 246

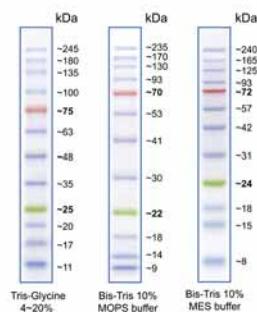

3 Protein Ladders, Prestained

The marker is covalently bound to a blue colour chromophore to produce a ladder of evenly interspersed bands of uniform intensity. The coloured reference bands are used as visual indicators for the process of gel electrophoresis and the efficiency of the transfer to membranes in the Western Blot. The marker is suitable for the precise identification of the molecular weight of most cellular proteins.

Cleaver Scientific

- Easy identification in gels and blots
- Detectable from 2.5 µl
- 2 years stable at - 20 °C
- Vials of 500 µl

Type	Size	Bands	Reference bands	PK	Cat. No.
BLUE Wide Range	10 - 245 kDa	12	25, 75 kDa	1	4.661 311

1

1 Protein gel staining kits

NEW

Ready to use kit for rapid and sensitive protein staining of 1D and 2D SDS PAGE gels.

Cleaver Scientific

It enables high contrast and optimal visualization and quantitation of proteins. After staining, proteins can be analyzed by mass spectrometry directly. The dye has optimal excitation at 302 and 470 nm, with maximum emission at approximately 610 nm. It can be excited with UV-transilluminators, 405, 445, 473-488 nm laser sources or 470 nm blue LED light source.

- High purity dye > 98 %
- Optimal signal to background ratio
- Strong, uniform and reproducible signal from 0.2 ng to 10 ng protein
- Fast three step staining protocol (220 min)
- Mass spectrometry compatible

Description

PK Cat. No.

RUBYPROL, Reagent A 250 ml, Reagent B 250 ml

1 4.670 743

Protein staining solution

NEW

Enhanced Coomassie based protein stain formulated for fast and sensitive protein detection without the involvement of hazardous chemicals such as methanol, acetic acid, and other toxic agents.

Cleaver Scientific

Protein detection limits are as low as 10 ng and visualization can be achieved in less than 1 hour. Applications suitable for native PAGE, SDSPAGE, isoelectric focusing, and 2D gels.

- Detection of protein concentration as low as 10 ng
- Protein bands visualization within 10 minutes
- Without involvement of hazardous chemicals

2

2 Blotting paper

Recommended for blotting techniques with gels, like Southern, Northern and Western Blots, even Semidry-Blots of proteins

Hahnemühle

- Made from ultrapure cotton linters and cellulose, entirely without additives to ensure that no contamination will occur during the transfer steps
- Tested specifically for chromatographic and blotting techniques to ensure high and uniform capillary actions
- High wet strength for safe handling

Further sizes on request.

Semi Dry Blotters

These Semi Dry Blotters offer rapid transfer times for DNA, RNA and protein blotting; typically 15 to 30 minutes. All units can be used for all types of blotting: western, southern and northern via uncomplicated buffer and set up procedures and are compatible with gel thicknesses from 0.25 up to 10mm without the need for additional equipment. Each unit is compatible with their respective omniPAGE vertical gel system. Semi Dry Blotting has the added benefit of economic transfers due to very low buffer volumes - typically only a few millilitres of buffer are required per transfer. These Semi-Dry Blotters utilise a screw down lid, which secures the blot sandwich and allows complete control of pressure ensuring even transfer. The electrodes, comprising platinum coated anode and stainless steel cathode, will exhibit practically no corrosion and so provide many years of trouble free use. Uniform heat dispersion across the blot sandwich ensures stable transfer times and no heat induced sample loss or transfer distortions. Being translucent, it allows viewing of the blot sandwich to ensure correct positioning and transfer is occurring correctly. Electrode plates are fully separated to prevent arching or damage.

Sub Blot Systems omniBLOT

The omniBlot is an stand-alone unit for the tank-blot method. Each unit consists of an OmniPAGE tank and lid, a electroblotting insert as well as cassettes and fibre pads. The versatile design of the tanks and the matching lids are compatible with the vertical PAGE or IEF systems with the appropriate optional inserts.

Cleaver Scientific

- Mini system transfers up to 4 Mini gels
- Mini Wide system transfers up to 4 Mini Wide and 8 Mini gels
- Maxi system transfers up to 4 Maxi gels, 8 Mini Wide and 16 Mini gels
- Run-times ranging between 2 and 20 hours
- Rigid cassettes eliminate the formation of shadow bands
- Colour coded cassettes prevent reverse polarity for correct orientation
- Cooling with cooling packs at high transmission intensity

**1 X-Ray cassettes**

Standard design with lead lining and snap fit lid.

- easy to open, easy to close with gentle pressure.
- firm, consistent support for films through special shaping: base pre-formed with convex profile.
- flexible, pure aluminium base (Absorption 1.2mm Al-value) film processed in frames
- Aluminium base coated in impact-resistant paint
- Anodised aluminium frame
- Elastic foam for film protection
- Specifically designed for autoradiography at 70°C

Use our reinforcement films in the blue sensitivity range with these X-Ray cassettes.

2 Gel documentation system chemiPRO-302E

NEW

Complete solution for chemiluminescence and fluorescent Western blot imaging. With highly sensitive cooled CCD Camera with high quantum efficiency, for detection of picogram level proteins. Peltier cooling allows exposure times to be increased to detect faint chemiluminescence without adding annoying background noise. Suitable for chemiluminescence Western blots, auto-rads, DNA or RNA stained with ethidium bromide, SYPRO, SYBR and SAFE dyes on agarose gels, Coomassie blue or silver stained proteins on acrylamide gels, stain-free gels and fluorescent gels. Furthermore GFP-plantimaging, colonies or plaques detection on Agar plates, bioluminescence and 2d gels. The free of charge software allows automated imaging of multicolour blots with a simple and user friendly interface.

Cleaver Scientific

- Cooled, high resolution, high quantum efficiency (QE) camera
- Motor driven lens and 7-position motor-driven filter wheel
- Long-life white LED EPI lighting
- CFR21 Part 11 compliant
- With acquisition and analysis software genePIX and geneQUANT

Scope of supply:

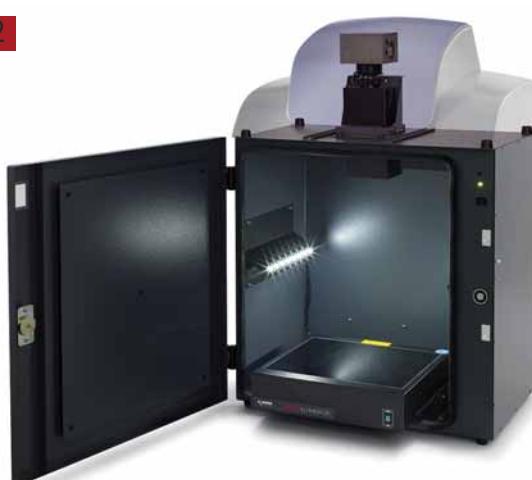

Darkroom, camera, UV transilluminator, UV emission filter, license free acquisition and analysis software

Specifications

Resolution:	4 megapixels
Effective resolution:	16 megapixels
Lens:	Zoom, f1.2
Camera cooling:	-57 °C
Sensor bit-depth:	16 bit
Greyscales:	65536

2 Centrifugal concentrators, Vivaspin 2

Membrane: polyethersulphone. This 2 ml volume unit combines the rapidity of the classic Vivaspin products with reduced internal surface and membrane areas for superior recoveries from very dilute solutions. With a choice of suitable membranes (PES, CTA, Hydrosart) Vivaspin 2 provides the highest flexibility for process optimisation. Vivaspin 2 guarantees maximum sample recovery either by reverse centrifuging into the concentrate recovery cap or by directly pipetting the concentrate from the deadstop pocket built into the bottom of the concentrator.

1 Centrifugal concentrators, Vivaspin 20

Membrane: polyethersulphone. Vivaspin 20ml centrifugal concentrators have been developed to offer increased volume flexibility and performance. Vivaspin 20 handles up to 20ml in swing bucket centrifuges and 14ml in 25° fixed angle rotors accepting 50ml centrifuge tubes. Featuring twin vertical membranes for unparalleled filtration speeds the Vivaspin 20 can achieve 100x plus concentrations. Remaining volume is easy to read off the printed scale on the side of the concentrator and the modified dead stop pocket further simplifies direct pipette recovery of the final concentrate.

Sartorius Lab Instruments

Membrane area: 6.0 cm²
Max. centrifugal force: 6000 xg
Hold-up volume: < 20 µl

2 | 3 Crossflow filter units Vivaflow 50/200

Thin channel, crossflow filter units with 50cm²/200cm² filter areas for capacities between 100ml/500ml and 5L. This system provides high crossflow rates at minimum pumping pressure and does not require additional fittings for scale-up. VivaFlow 50 is easy to operate with a flow restrictor and, optionally, a pressure indicator. Modular construction with luer connections allows interlocking of units in series for easy scale-up. Recovery rates are maximised due to optimised recirculation volume and by use of low adsorption materials. Disposable.

Sartorius Lab Instruments

For greater volumes, VivaFlow 200 is available with a filter area of 200cm² and includes pressure indicator, flow restrictor, filtrate tubing and connectors.

1 Dialysis Tubing Biotech Cellulose Ester (CE)

Biologically inert and ultra-pure, Biotech CE is available in the largest selection of concise MWCOs (0.1 to 1000 kD) and sizes to provide better molecular separation for desalting, isolating ionic species and macromolecular purifications. Moderate chemical compatibility tolerates weak or dilute acids or bases and mild alcohols with only a slight change to the MWCO. Not for use with organic solvents. Use with pH 2 to 9 and temperature 4 to 37 °C.

Type	Flat width mm	PK	Cat. No.

2 Dialysis Device Float-A-Lyzer G2

Ready-to-use dialysis device with screw cap for ultimate convenience for small volume dialysis. Easy loading and recovery. No needles, closures, knots, buoys, pontoons, or weights required. Made with Biotech CE membrane in 9 MWCO's (0.1 to 1000 kD) and 3 volume sizes (1, 5 and 10 ml).

2

3 Standard RC Dialysis Membrane Tubing, Spectra/Por®

Standard Grade Regenerated Cellulose (RC) is a clear, flexible and sturdy dialysis tubing. This tubing is ideal for a broad range of applications in which there is a significant size difference between the MW species being separated, including sample preparation, desalting, buffer exchange, pH change, protein purification. Offering a good chemical compatibility, Standard Grade RC can be used with dilute strong acids and bases, concentrated weak acids and bases, most alcohols and some mild or dilute organics, including DMSO. Standard RC can tolerate pH 2 to 12 and temperatures 4 to 121 °C.

3

4 Dry RC Dialysis Tubing Spectra/Por® 1, 2, 3 and 4

RC dialysis tubing supplied dry with glycerol humectant for easy handling and manipulation. Soak in DI water for 30 minutes to remove glycerol. Contains trace levels of heavy metals and sulphides.

Spectra/Por® 1, 3 und 4: For standard dialysis, different MWCO and flat widths
 Spectra/Por® 2: Dialysis Tubing with higher permeability

1 Cell and Tissue Culture Dishes, Nunc™ EasYDish™, PS, sterile

Nunc™ EasYDish™ improves the handling, stacking and transport of culture dishes.

Thermo Scientific

A bevelled grip ring facilitates handling even with gloves and the proprietary notch design ensures maximum ventilation with consistent sterility. A raised outer edge on the dish lid enables very stable stacking and more safety during transport. Orientation marks on the dish bottom simplify the localization of cells under the microscope.

- Standard Nunclon™Δ surface treatment to maximize adhesion for most cell types
- RNase/DNase free, human DNA free
- Non-cytotoxic, pyrogen-free
- Gamma irradiation (SAL of 10^{-6})
- Shelf life 5 years from manufacturing date
- With certificate of quality

1 Cell culture flasks, treated, PS, sterile

These cell culture flasks with treated surfaces for the cultivation of adherent cells are available with different growth areas from 12.5 to 182 cm². Available with vented or plug-seal caps made from polyethylene. Vented caps contain a 0.22 µm hydrophobic filter to allow gas exchange and minimize risk of cross-contamination. Plug Seal caps can be used in closed systems, providing a liquid and gas sheer seal, but by simply unscrewing the cap one quarter of a turn, this cap can also be used in an open system.

Features:

- Innovative angled neck design offers good pipette and cell scraper access
- Upper triangular and wider base shape provides stability
- Stackable
- Special writing area near the neck
- Engraved graduation on both flask sides
- Sterilized by gamma irradiation
- Pyrogen-free

Material: Polystyrene

2 Cell Culture Flasks, Nunclon™Δ Surface, PS/HDPE, sterile

Nunclon™Δ cell culture flasks with surface areas from 25 to 175cm² are available with filter caps or Vent/Close caps for good gas exchange. Short, wide neck (angled or straight)

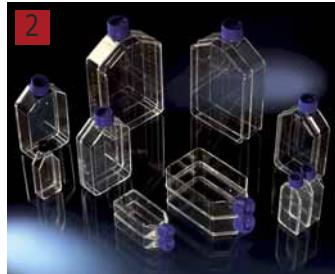

Thermo Scientific

allows easy access to entire growth surface. The Nunclon™Δ treatment is limited to the intended growth area.

Neck areas are not treated to prevent cell attachment and growth in undesired areas. Certified pyrogen-free and tested for both monolayer formation and cloning efficiency employing primary cells as well as repeating cell lines. Sterile.

Cell Culture Flasks, Nunc™ Sphera™

Optimizing spheroid formation

- Allows cells to grow in suspension with virtually no cell attachment
- Supports many different cell types and their ability to generate spheroids
- Enables consistent, repeatable cell growth

Thermo Scientific

Growing 3D cancer cultures

- Minimizes variability and supports the consistent formation of cancer spheroids that simulate the 3D structures of tumor growth, providing a better model system for studying tumor cell progression and efficacy of anticancer agents *in vitro*

Promoting formation of embryoid bodies (EB)

- Demonstrates superior quality for embryoid body formation of pluripotent stem cells with minimal spontaneous differentiation
- Resultant cells are able to differentiate into all three germ layers

Certifications/Compliance

- Free of animal products
- Pyrogen-free: Endotoxin tested (0.5 EU/mL)
- Biologically inert: USP biological reactivity class VI
- High level of sterility: SAL 10-6, ethylene oxide gas sterilization

1 Cell Culture Flasks DURAN® TILT

The smart, reusable bottle system for cell culture media preparation.

DWK Life Sciences

DURAN® TILT is perfectly designed for making work in biosafety cabinets and clean hoods safer and easier. The innovative features of the DURAN® TILT bottle changes everything. The TILT bottle has two positions: upright for filter sterilization or storage, and tilted at 45° for pipetting.

- The innovative design enables both good aseptic and ergonomic practice.
- The GL 56 mouth has a 100 % bigger opening than the standard GL 45 mouth for easier pipetting.
- The ergonomically shaped GL 56 screw cap is easy to open and close. Made from a non-cytotoxic polymer.
- Vacuum resistant glass bottle for the safe filter sterilisation of media.
- Space saving shape for fridge storage and warming media in a water bath
- Low bottle height is practical in the biosafety cabinet.
- Tilted volume indicators for convenience
- Manufactured from DURAN® borosilicate 3.3 glass for reusability and lower whole life costs.

Accessories please order separately.

Suitable accessories can be found in our online shop.

2 | 3 Microscope slide Lab-Tek™ Chamber Slide™ System, PS

Chamber slides eliminate the need for cell transfer prior to visualisation/staining. Upper structure can be removed when culturing is complete. Useful for viral and mycoplasma testing, chromosome studies, toxicity tests and immunocytology. Sterile. The chemically coated growth surface of the Lab-Tek™II-CC² Chamber Slide System mimics polylysine and provides binding sites optimal for fastidious cells (e.g. neurons). Material chamber: Polystyrene

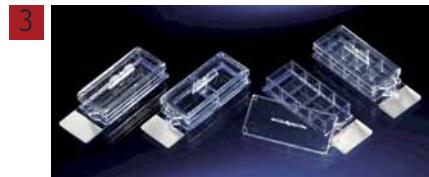

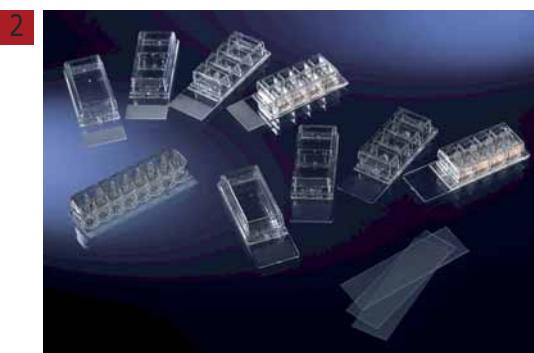

Thermo Scientific

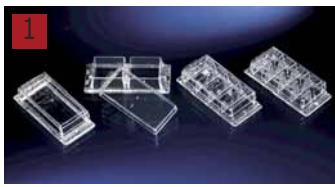

Lab-Tek™: Sealant: Non-toxic medical grade silicone.

Lab-Tek II™: Sealant, biocompatible acrylic adhesive.

Lab-Tek II - CC²: modified glass slide, chemically coated to mimic polylysine.

2 Cell Culture Plates, non-treated, PS, sterile

NEW

Standard surface non-treated cell culture plates. Reduced evaporation due to raised well rims and uniform rings on the lids.

- Available with 4-, 6-, 12-, 24-, 48-, 96- or 384-wells (lid included)
- Flat well bottom
- 96-well plate also available as round bottom plate (4.672 531)
- Single position lid reduces the risk of cross-contaminations
- Wells are labeled with alphanumeric code for easy identification
- Sterilized by gamma irradiation
- Pyrogen-free
- Material: Polystyrene

BRANDplates® - A complete premium-quality line - for every application!

BRAND

Microplates for Cell Culture (sterile)

Cell culture is increasing in popularity in the research and development area. Outside of basic research, cells are cultivated today for a number of reasons, including the production of proteins and in particular as assay systems. As cell cultures can sometimes be quite demanding regarding their environment, the disposables used for cultivation have to be of highest quality. The four different cell culture surfaces of the BRANDplates® allow the optimum combination between microplate and specific cell line.

cellGrade™

Standard plate for the cultivation of adherent cell cultures. PS-surface with different chemical groups, like e.g. carboxyl and hydroxyl groups, that are freely accessible. Surface is hydrophilic compared with non-treated PS.

cellGrade™ plus

For cultivation of fastidious cell cultures. In addition to carboxyl and hydroxyl chemical groups, free amino groups are present on the surface. The surface has a protein-like composition; cells can directly attach and spread out. Cells adhere faster, better rate of yield. Suited for serum reduced cultivation of cells.

cellGrade™ premium

Poly-D-Lysine-equivalent surface, with analogous results regarding growth performance and cell morphology. Optimal adhesion of cells to the surface reduces cell damage when washing frequently. Surface suited for serum-free and serum-reduced cultivation of cells. Good shelf life at room temperature.

inertGrade™

For cultivation of suspension cell cultures. Especially suited for cell cultures, when adhesion is not desired. Optimized surface characteristics reducing cell adhesion and protein adsorption, enzyme and cellular activation is minimized. Stem cells can be prevented from early differentiation.

Colours, wells and shapes:

- 96-, 384- and 1536-well format
- sterile according to Ph.Eur. and USP 29, SAL 10⁻⁶
- standard or transparent bottom
- transparent, white or black
- various well bottom shapes: U-, V-, F-, C-bottom for 96-well format
- clearly distinguishable via colour code: orange embossed alphanumeric coding for 96-well standard
- free from endotoxins (< 0.01 EU/ml), DNase, DNA, RNase, non-cytotoxic (according to ISO 10993)
- Sterile Products comply with ISO 11137 and AAMI guidelines. A SAL of 10⁻⁶ is reached. Supplied individually wrapped with lid.
- ANSI/SLAS format

You can find ordering information for all articles described above as well as other articles online.

1 Cell Factories EasyFill™ mit Nunclon™Δ Surface, PS, sterile

A time and space saving vessel for large scale cell culture production.

Thermo Scientific

Suitable for industrial scale production of vaccines, monoclonal antibodies or pharmaceuticals.

Nunclon™Δ surface modification is certified for cell culture and ensures consistent cell growth layer to layer, lot to lot.

Ready to use and easy to fill and empty with plug and play connection. Wide range of accessories available for different methods of filling, venting and harvesting (please see Cell Factories Accessories). Sterile.

2 Bioreactors CELLine™

New line of membrane driven flasks for high density cell culture. The flasks are designed to enhance small scale bio-production for antibodies and proteins. Conventional *in vivo* or *in vitro* cell culture methods can be laborious, may have low cell density and require significant purification. CELLine™ flasks address these three areas of limitation observed in static tissue culture flasks.

DWK Life Sciences

- Disposable and ready-to-use
- High cell density and high product concentration
- Reduces operation time
- Decreases use of consumables
- Cost-efficient, space saving, and stackable
- No additional equipment required for operation

Spinner Flasks Celstir® and Magna Flex™

Celstir® and Magna Flex™ spinner flasks from WHEATON® are high-quality products designed for long life, high efficiency and low maintenance. Celstir® spinner flasks are the ideal environment for culturing/growing a wide variety of cells, such as insect cells, hybridomas and many other suspension adapted cells. Magna Flex™ flasks are suitable for microcarrier cultures. Celstir® and Magna Flex™ flasks are produced from autoclavable, Type I borosilicate glass. WHEATON® spinner flasks can be used on all magnetic stirrers.

DWK Life Sciences

Scope of supply: Flask, stirring unit with lid and lids for side arms.

3 Spinner Flask, double sidearm Celstir®

- For suspension cell culture with a magnetic stirrer
- Adjustable paddle impeller and sterile design as stirrer shaft does not protrude through cap
- 1:1 headspace ratio for ideal gas exchange
- Bottom dimple to reduce cell aggregation (dimple on 125mL and larger flasks)
- Autoclavable borosilicate glass that conforms to USP Type I and ASTM E 438 Type I, Class A requirements

DWK Life Sciences

1 Automated Cell Counter EVE™

EVE™ is a benchtop automatic cell counter designed to accurately and precisely measure cell count and viability of different cell cultures. It uses the standard trypan blue technique.

NanoEn Tek Inc.

- Fine distinction of clumped cells: Accurate results with advanced analysis algorithm
- Broad range of cell sizes and types: Primary (tissue and blood) cell lines and stem cells
- User friendly: Touch screen LCD without any maintenance needed
- Data store analysis: 500 test results, transfer to PC via USB drive
- Cell size gating: Select range of cell size using gating function

EVE™ cell counting slides contain two enclosed chambers which can measure two different samples or perform replicates of the same sample.

Scope of supply: Automated Cell Counter EVE™, one box of Cell Counting Slides (50 slides/100 counts), USB Drive (2 GB), User Manual and Quick Manual.

**Description****PK** **Cat. No.**

Automated Cell Counter EVE™	1	6.284 817
-----------------------------	---	------------------

2 Automated cell Counter EVE™ Plus

EVE™ Plus is a benchtop automatic cell counter designed to accurately and precisely measure cell count and viability of different cell cultures. It uses the standard trypan blue technique.

NanoEn Tek Inc.

- Fine distinction of clumped cells: Accurate results with advanced analysis algorithm
- Touch screen interface
- Auto save function up to 500 results
- Data transfer via Wi-Fi
- Acoustic signal after each count

**Specifications:**

Manual counting time:	1 second or less
Auto focus counting time:	10 seconds or less
Measuring range:	$1 \times 10^4 \sim 2 \times 10^7$ cells/ml
Zählbarer Zellgrößenbereich:	5 ~ 60 µm

1 Cell Scrapers, sterile

NEW

Available in two blade designs, scraper and lifter. Material blades TPE and handle ABS.

- Particularly thin, swivelling, flexible blades
- Sterilized by gamma irradiation
- Individually wrapped
- Pyrogen-free

Description	Length mm	PK	Cat. No.
Blade position scraper, 20 mm	250	100	4.672 560
Blade position scraper, 30 mm	390	100	4.672 562
Blade position lifter, 20 mm	250	100	4.672 561
Blade position lifter, 30 mm	390	100	4.672 563

2

2 Cell Scrapers Rotatable®, sterile

NEW

Free rotating blade to twist easily to the desired direction. Easy changes of the blade angle by slight pressure on the handle. Material blades PE and handle ABS.

- Small raised knobs on the handle for better grip
- Sterilized by gamma irradiation
- Individually wrapped
- DNase/RNase-free
- Pyrogen-free

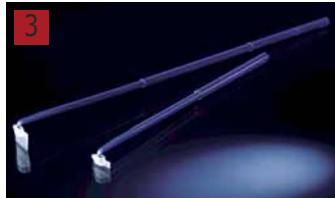

Description	Length mm	PK	Cat. No.
Scraper, 12.5 mm	230	150	4.672 556
Scraper, 12.5 mm	300	150	4.672 557
Scraper, 19.5 mm	230	150	4.672 558
Scraper, 19.5 mm	300	150	4.672 559

3

3 Cell Scrapers, sterile

Thermo Scientific

Available in two different lengths with adjustable blade for optimal application flexibility.
Pyrogen-free. Sterile.

Width mm	Length cm	Height mm	For bottles cm ²	PK	Cat. No.

4

4 Cell lifters, PE, sterile

NEW

Flat blade cell lifter for manual harvesting of cells.

- Special blade design minimizes cell damage
- Sterilized by gamma irradiation
- Individually packed
- DNase/RNase-free
- Pyrogen-free

Length mm	PK	Cat. No.
23.4	100	4.672 555

5

5 Cell lifters, with blade or hook, PE, sterile

NEW

Cell lifter with flat blade on one end and exchangeable J-hook or narrow blade on the other end.
For manual cell harvesting, also for multiwell plates or microcentrifuge tubes.

- Special blade design minimizes cell damage
- Sterilized by gamma irradiation
- Individually packed
- DNase/RNase-free
- Pyrogen-free

Description	Colour	PK	Cat. No.
J-Hook, 9.0 mm	green	100	4.672 553
Narrow Blade, 2.5 mm	green	100	4.672 554

1 LLG-Cell strainers, Nylon, sterile

Cell strainers are especially suited for the generation of homogenous single cell suspensions from tissue or primary cell lysates

- Available in 3 mesh sizes, 40 µm: 70 µm, and 100 µm
- Colour coded mesh size
- Designed to fit into 50 ml tubes
- Individually packaged
- Handle and mantle surface for improved aseptic handling
- Nylon mesh
- Pyrogen-free

1

Mesh size µm	Colour code	PK	Cat. No.
40	blue	50	6.268 093
70	white	50	6.268 092
100	yellow	50	6.268 091

2 Cell strainers Flowmi™

Scienceware® Flowmi™ Cell Strainers provide fast and efficient filtering of small volume samples (up to 1000 µl) prior to FLOW or FACS analysis. Removes cell aggregates and creates uniform single cell suspensions.

Bel-Art Products**NEW**

- Flowmi™ fits most 1000 µl tips
- Compact tray holds 50 Flowmi™ Cell Strainers
- Sliding cover for easy, one-handed use
- Sterile, packaged in a re-sealable bag

2

Freezing Aid for Cell Cultures, FreezerCell™

FreezerCell™ can be used for a variety of cell types, including stem cells, primary cells, cell lines and yeasts. The FreezerCell™ does not require any additives and only needs to be placed in an ultra deep freezer and the cooling runs at -1°C per minute. Fill the freezing aid with the cryotubes and freeze for approx. 3 hours at -80 °C. Then the samples are ready to transfer to a nitrogen tank. This gentle method ensures a high survival rate of the cells during the freezing process.

- No pre-cooling necessary
- Consistent temperature distribution, even with partial loading
- Lid can be opened easily

1 Semi-Micro Osmometer K-7400S

The K-7400S Semi-Micro Osmometer enables the measurement of osmolality and freezing point of aqueous solutions.

KNAUER

Determination of the total concentration of all dissolved particles in a solution. All dissolved components of a liquid are collected and will be displayed in a separate value. This makes it particularly suitable for quality control and research laboratories. The standalone device can optionally be equipped with a printer. Furthermore, the device can be controlled via a PC using the EuroOsmo 7400 software (please order separately).

- Sample volume of only 50 µl
- LCD display
- User-friendly menu guidance
- Fast, easy and automatic measurements
- High reproducibility
- Peltier cooler

Scope of supply: Osmometer with measuring head, incl. sample vessels and calibration standards

Specifications

Sample volume:	50...150 µl
Osmolality range:	0...2000 mOsmol/kg
Measurement duration:	approx. 2 min.
Measurement precision	
SD:	≤ 4 mOsmol/kg (0...400 mOsmol/kg)
RSD:	≤ 1 % (400...2000 mOsmol/kg)
Linearity:	±1 % (0...1500 mOsmol/kg) ±1.5 % (0...2000 mOsmol/kg)
Display:	LCD
Ambient conditions:	10...35 °C, 20...80 % relative humidity (non-condensing)
Dimensions (W x D x H):	160 x 340 x 182 mm
Weight:	5.3 kg
Power supply:	100-240 V, 50/60 Hz, 70 W

Type	PK	Cat. No.
Semi-Micro Osmometer K-7400S	1	6.287 298

2

2 Osmolality standards

Osmolality Standards for calibration and control, compatible with all types of osmometers.

Reagecon

Extensive range: 50 to 3000 mOsmol/kg H₂O, ISO 17025 certified. Values from 100 to 700 mOsmol/kg H₂O according to European Pharmacopoeia 2.2.35 and US Pharmacopeia 785. 12 ampoules of 5 ml each.

1 LLG-Serological pipettes, PS, sterile

Serological pipettes from LLG are ideally suited for sterile serological and cell culture applications. Easy to read graduation scales facilitate volume measurement and dosing. All LLG serological pipettes are plugged, sterile, pyrogen-free and have an increased volume capacity through extra graduations.

- Also available as short-pipettes (5 ml, 10 ml and 25 ml) or wide-mouth pipette (10 ml)
- 1 ml, 5 ml, 10 ml, 25 ml and 50 ml pipettes contain a bi-directional secondary graduation scale for precise dosing
- Colour coded ringmark for easy volume identification
- Single packed in easy-to-open plastic/paper packaging

LLG-Electrical pipette *Plus*

121 °C

Ergonomic and precise - the cordless and lightweight LLG-Electrical pipette *Plus* enables fast and exact pipetting with glass and plastic pipettes.

- UV resistant housing
- Fatigue-proof pipetting due to ergonomically shaped handle
- Suitable for left and right handers
- Exchangeable filters protect the device mechanism from contamination
- LED display with speed display: High, Low or Gravity mode (for free liquid flow without drive operation)
- 5 different coloured autoclavable nose pieces and labelling area enables customisation of the pipette
- Extremely quiet and powerful drive
- Low-Battery LED indicator

2

Scope of supply: Charger (5 V micro USB), Li-Ion battery, 5 coloured nose pieces, 3 membrane filters, adapter for 1 ml pipettes, benchtop rack, magnetic wall mounting

Specifications

Membrane filters:	PTFE/Ø 25 mm /0.45 µm
Capacity:	1 to 100 ml, glass and plastic pipettes
Pipette attachment:	Polypropylene, autoclavable
Dimensions:	15 x 152 x 41 mm
Weight:	approx. 200 g
Power supply:	rechargeable Li-Ion battery, 8 h continuous operation
Warranty:	1 year

Disposable Erlenmeyer Flasks Nalgene™ with vented closure, Type 4115, 4116, PETG, sterile

With blue vented closure, the chance for cross contamination is reduced. Ideal for shaker and suspension cell culture, media preparation or storage. Made of light, crystal clear PETG. Molded-in graduations. Leak-proof HDPE closure has a hydrophobic 0.2µm PTFE membrane that allows sterile air exchange. Flasks offer a 5-year shelf life, a 10⁶ SAL, are non-pyrogenic and non-cytotoxic. Available with flat or baffled bottom. Individually packaged for easy storage and handling.

1 Media Bottles Nalgene™, Type 382019, PETG, sterile

Suited for biopharmaceutical processing and storage of critical reagents and bulk intermediates such as vaccine and protein therapeutic preparations. Manufactured in a certified ISO 14644-1 Class 7 cleanroom. Containers are lot certified to comply with particulate limits specified in USP <788>, EP 2.9.19, and JP 14th ed. Part 1, Section 24. Packaging is designed for cleanroom applications. Bottle and closure are secured with a tamper-resistant heat-shrink band and packaged in heat-sealed bags to support cleanroom operations. USP Class VI, EP Modified Abnormal Toxicity, and USP <661> physicochemical tests compliant. Bottles meet the requirements for USP Class VI, EP Modified Abnormal Toxicity Test, are non-cytotoxic, pyrogen-free, non-hemolytic, and comply with USP <661> physicochemical guidelines. Resins are free of animal derived components (ADCF). Leakproof.

Timer:	0.1 ... 99.5 min
Dimensions (W x D x H):	405 x 500 x 325 mm
Weight (without rotor):	32 kg

Power supply: 230 V, 50/60 Hz

1 Cytocentrifuges Cellspin® III CYTO

The specialist in cytology with a large selection of open and closed rotors.

THARMAC GmbH

- Compatible with Shandon™ Cytospin™
- Quickchange® for rapid rotor change
- For cytorotors with 4, 8 and 12 positions

Specifications

Max. speed:	200 ... 2000 rpm
Max. capacity:	0.1 ... 5 ml

Type	Description	PK	Cat. No.

Cellspin® III CYTO	open, removable 12-positions-EASY-rotor	1	4.672 270
Cellspin® III CYTO	closed, removable 12-positions-EASY-rotor	1	4.672 271

Further models can be found in our online shop.

2 Cytocentrifuge Cellspin® III UNI

For cytology and general laboratory applications with a wide range of rotors.

THARMAC GmbH

- No reprogramming required
- Compatible with Shandon™ Cytospin™
- Speed adjustment to max. 2000 rpm when using cytorotors
- For swing-out, angle and hematocrit rotors and cytorotors

Please order rotors separately.

Specifications

Max. speed:	15000 rpm
Standard laboratory applications:	4 x 200 ml
Cytology:	0.1 ... 5 ml

1 Aspirator LLG-uniVACUUSYS

LLG-uniVACUUSYS Vacuum Aspiration System **with integrated vacuum pump and vacuum controller** is ideally suited for aspirating liquids in Life Science applications, e.g. the removal of media from cell cultures, aspiration of supernatants after centrifugation, or the removal of wash solutions from Immuno assay plates. The set vacuum is automatically re-adjusted in case of deviations.

- Integrated vacuum pump with vacuum control
- Easy to use
- Self-closing connectors for quick installation and prevention of liquid or aerosol escape
- **Liquid level sensor**, prevents liquid overflow
- Autoclavable waste collection bottle and nozzle

Scope of supply: Vacuum Aspiration System with integrated vacuum pump, 4 liter waste collection bottle, single channel needles and 8-channel needle aspirator handles, single channel and 8-channel adaptor for 200 µl pipette tips, single channel adaptor for 1000 µl pipette, tubing and quick-connectors

Specifications

Vacuum range:	0 ... 600 mbar (adjustable)
Aspiration rate:	1 ... 15 ml/s
Noise emission:	<50 dB(A)
Dimensions (W x D x H):	180 x 320 x 530 mm
Weight:	3.4 kg
Power supply:	100 ... 240 V, 50/60 Hz
Warranty:	3 years

Aspirator systems FTA-1/FTA-2i

Designed for routine aspiration of the supernatent alcohol/buffer from the walls of microtubes during DNA/RNA purification and other macromolecule reprecipitation techniques. *Grant*

- Fitted with hydrophobic microbiological filter
- The hydrophobic microbiological suction filter eliminates risk of contamination from the trap flask. Efficiency up to 99.9 %, holds particles bigger than 0.027 micron, which are smaller than agents of Hepatitis A, B and C.
- Polyethylene tube connects collecting tip to the trapping flask
- Built-in micro-compressor creates negative pressure in trapping flask for removal of liquid from microtubes

Specifications

Aspiration rate:	up to 10 l/min
Flow rate:	72 ml/min with collecting tip 666 ml/min without collecting tip
Power supply:	120 ... 230 VAC, 50/60 Hz

2 Aspirator FTA-1

Scope of supply: Aspirator system with integrated pump, trap flask, aspiration tip and tube holders for 2 tubes *Grant*

3 EcoVac safety suction systems

schuett-biotec

For safe and comfortable removal of liquid excess. EcoVac increases the safety standard, when working with infectious material. Completely autoclavable. Screw-cap of safety bottle incl. 2 self-locking fittings. When tubing is removed, they close automatically and the bottle will be sealed hermetically. Safety bottle made of impact and chemical-resistant polypropylene, with screw-cap incl. 2 self-locking fittings, ventilation system, safety filter and 5m of silicone tubing.

EcoVac vacuum pump (optional):

Quiet with low vibration. Throughput 4L/min., 300mbar ult. vacuum, with illuminated on/off switch and 1m connecting cable.

Overall dimensions: 80mm x 60mm x 160mm (W x H x D). 230V 50/60Hz.

Foot-switch (optional): For short-time repeated use of EcoVac.
Replacement covers and other spare parts on request.

Supplied with: EcoVac system (1.2.4 or 5), safety bottle (breakproof and chemically stable) with screw cap and 2 self-locking fittings, silicone tubing 2 x 1.5m (autoclavable), safety filter, 2 angled fittings for tubing connection, 1 aeration insert

Fluid aspiration systems BioChem-VacuuCenter BVC basic/control/professional

VACUUBRAND

The compact BioChem-VacuuCenter offers the perfect solution for safe, sensitive and efficient aspiration of supernatants or filtration in all application areas.

- The BVC basic is designed for connection to an existing external vacuum source like a diaphragm pump or a vacuum network
- The BVC control and professional serve for efficient and convenient aspiration of supernatants. The vacuum level and thus the suction force is sensitively adjustable by the electronic touch panel and allows a delicate and reproducible operation. The chemically-resistant diaphragm vacuum pump is automatically turned on and off as needed, which reduces the low noise level even further.
- The BVC professional, with 4L PP bottle and self-closing quick couplings minimises risks in transporting hazardous waste and contamination of the workplace.
- All systems are available in two complete equipment options with different collection flasks and ready to accept a second aspiration hand controller (VHC) to support two users. The 2L borosilicate glass bottle (all types with "G" in the description) with a protective coating has a very high chemical resistance. For larger amounts of liquids the 4L bottle of unbreakable polypropylene (PP) is used.

1

1 Filter units, PES membrane, sterile

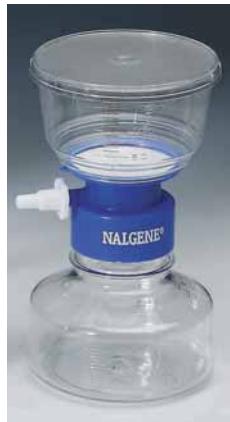

These bottle-top filter units are ideally suited for the separation or purification of samples which are contained in large volumes. The units are available with either 0.22µm or 0.45µm pore sizes and 3 different volumes (250, 500 and 1000ml).

Features:

- Bottle-top filter and reservoir bottle are included
- Light weight and stable wall construction
- Large knurls on the reservoir bottle cap for easy screwing
- Wide bottle mouth for efficient pouring out
- Volume graduation
- Hose connector fits multiple diameters
- Pyrogen-free

Membrane material: Polyethersulfone (PES)

2 Filter units Nalgene™ Rapid-Flow™, PES Membrane, sterile

Ideal for biological and pharmaceutical sterile filtration. PES membrane features low protein binding, low level of extractables and a high flow rate. Now available in three pore sizes:

Thermo Scientific

The best filter units with 0.20µm and 0.45µm pore size and new to the protection of valuable cell cultures from mycoplasma with 0.10µm pore size. Filter top and filtrate bottle are graduated. Blue color-coded collar with cellulosic vent plug side arm and quick-disconnect tubing adapter. Leakproof, sterile screw closure included for storage of sterile filtrate. Sterile, single packed. Certificate of Quality included in each full case. Lot number, catalogue number, membrane type, pore size and expiration date are printed on filter units, bottle tops and receivers for easy identification and lot traceability.

3 Bottle Top Filters Nalgene™ Rapid-Flow™, PES Membrane, sterile

Filters securely screw onto glass media bottles with 33 mm or 45 mm neck sizes.

Thermo Scientific

Allows direct filtration of liquid into sterile glass media bottles.

Tight and secure thread connection for vacuum filtration, vacuum tubing to be connected onto tubing adapter of side-arm. Graduated. Certificate of quality included in each full case. Lot number, catalogue number, membrane type, pore size and expiration date are printed on filter units for easy identification and lot traceability.

2 Filter Units Nalgene™ Rapid-Flow™, Nylon Membrane, sterile

Single-use, disposable filter units for sterile filtration of media and other reagents, and for other highly sensitive cell culture lines. With polystyrene (PS) upper and lower chambers and nylon membrane. Colour code: red. For cell culture. Gamma-irradiated sterile. Extremely low in extractable substances, no wetting agents. Lot number, catalogue number, membrane type, pore size and expiration date are printed on filter units, bottle tops and receivers for easy identification and lot traceability.

2

2 Bottle Top Filters Nalgene™ Rapid-Flow™, SFCA Membrane, sterile

Tissue culture filters for screw fitting onto bottles with 33mm or 45mm neck diameters. With surfactant-free, cellulose acetate membrane (SFCA) and polystyrene (PS) housing.

Thermo Scientific

Gamma-irradiated sterile. Pyrogen-free. Non cytotoxic. Low-pressure filtration can be carried out directly into a suitable sterile bottle. Caution: Only use sterile bottles authorised for use in low pressure applications. Always wear protective equipment for low pressure procedures. The membrane is characterised by its low protein binding, good throughput rates and minimal clogging with negligible protein loss. Permanent, moulded graduations. Quick-disconnection tubing adaptor with cellulosic vent plug for tubing with an internal diameter of 6mm to 9mm. Lot number, catalogue number, membrane type, pore size and expiration date are printed on filter units for easy identification and lot traceability.

3

3 Filter Storage Bottles Nalgene™ Rapid-Flow™, PS, sterile

Easy-to-use ergonomic design. Can be used to store sterilised filtrate. Radiation-sterilised to save you time and minimize contamination. Also handy as presterilised, single-use storage containers. 1-1/2-turn threaded screw closure guarantees a leakproof seal and eliminates pH shift in receivers. Certified. Pyrogen-free, non cytotoxic. Sterile, graduated and leakproof.

Further syringes can be found in chapter 14.
Syringe filters can be found in chapter 6.

1 Laminar Flow Clean Benches, Type Airstream®

The new generation of ESCO Airstream horizontal and vertical laminar flow benches offer optimal product protection by achieving ISO Class 5 conditions inside the cabinet.

ESCO

1

**Features:**

- Energy-efficient DC ECM motors
- Stable and self-compensating airflow
- Sentinel Gold microprocessor control
- Control panel to easily monitor the operating parameters
- Standby mode reduces power consumption while maintaining the ISO class 5 conditions inside the work bench
- Visual and audible alarms
- Side windows made of safety glass
- Standard working space height vertical/horizontal benches: 689 mm/573 mm
- Additional working space heights on request.
- ULPA filter with long service life and protection mesh
- Pre-filter EU3
- ISOCIDE antimicrobial coating on all painted surfaces minimizes contamination
- Apparatus for UV lamp with timer (UV lamp and protective cover must be ordered separately)

Options on request:

Stands, electrical sockets (4.662 021), front covers with UV lamp, IQ/OQ

Please order stands separately.

2 Microbiological Safety Cabinet, class II Type Airstream®

ESCO

2

- Class II according to DIN 12469

- Ergonomically angled and frameless front sash
- A large easy-to-read digital display and ergonomically sized touchpad
- Tempered glass side walls (S-Series with stainless steel side walls)
- Esco triple-wall design with negative pressure prevents the possibility of contamination from leaks
- ISOCIDE™ antimicrobial coating on all painted surfaces minimises contamination
- Quickstart Mode
- Sentinel-Microprocessor maintains steady blower speed
- RS232 serial interface port
- More options on request, e.g. prefilter at intake socket

Model variations:

Model type E and S: Single ULPA-Filter/H14

Model type G: Dual ULPA-Filter/H14

Options on request:

Electrical outlet, support stand, prefilter, service fixture, UV lamp, IV bar, single piece work surface for E-Series, Q/OQ or KI DISCUS test

Please order support stand separately.

Suitable accessories can be found in our online shop.

1

1 Microbiological Safety Cabinet, class II, acc. to DIN 12469, Type Airstream® Plus

- Certified according to EN 12469 by TÜV-Nord, Germany
- Ergonomically angled and motorized front sash for one handed operation (aerosol tight gasket)
- Dual Energy efficient DC ECM motor
- Sentinel-Gold-controller maintains steady blower speed
- Tempered glass side panels with E-Series, stainless steel side walls with S-Series
- LED lamp
- Esco triple-wall design with negative pressure prevents the possibility of contamination from leaks
- Multi-piece work surface removal simplifies cleaning for E-Series, single piece work surface with sink for S-Series
- ULPA-Filter/H14
- Esco ISOCIDE antimicrobial coating on all painted surfaces minimizes contamination
- Quickstart Mode
- RS232 serial interface port

ESCO

Options on request:

Electrical outlet, support stand, prefilter, service fixture, UV lamp, IV bar, single piece work surface for E-Series, IQ/OQ or KI DISCUS test, RS485 serial interface port for using Voyager Software

Please order support stand separately.

2 Microbiological Safety Cabinets, Class II, Type NordicSafe®

One of the silent Biological Safety Solutions from Esco. Class II according to DIN EN 12469.

ESCO

- Dual-ULPA filter
- Noise emission <51 dBA
- Best comfort and safety at a favourable price
- Esco triple-wall design with negative pressure prevents the possibility of contamination from leaks
- Ergonomically angled and motorized front sash for one hand operation
- A large easy-to-read digital display and ergonomically sized touchpad
- Tempered glass side panels
- Sentinel-Gold-controller maintains steady blower speed
- Sleep mode with 50% reduced power to save energy, to maintain safety
- Esco ISOCIDE™ antimicrobial coating on all painted surfaces minimizes contamination
- Certified according to EN 12469 by TÜV-Nord, Germany

Options on request:

Electrical outlet, support stand, prefilter, service fixture, UV lamp, IV bar, IQ/OQ or KI-Discus-Test

1 Cytotoxic Safety Cabinets Type Cytoculture

The Esco Cytoculture Cytotoxic Safety Cabinet provides the highest level of patient, pharmacist and environmental protection in cytotoxic/antineoplastic drug processing. The unique demands of handling and preparing cytotoxic drugs for use in chemotherapy require a specialized cabinet. As cytotoxic drugs cannot be inactivated by chemical decontamination, Class II biosafety cabinets should not be used. With this in mind Esco has developed a highly specialized range of cabinets designed especially for handling these potentially dangerous drugs.

ESCO

- 3-fold filter system
- With V-shaped Hepa filter
- Sentinel™ microprocessor controller supervises all functions
- Motorized sash simplifies transfer of materials into the work zone
- Tested according to DIN 12980, EN 12469, ISO 14644.1 Class 3, EN-1822

Options on request:

Electrical outlet, service fixture, UV lamp, IV bar, carbon filter

2 Biological safety cabinets Herasafe™ 2030i, class II

For demanding cell culture applications and other sensitive work requiring assured safety for product, personnel and environment.

Thermo Scientific

- Interior made of stainless steel, with LED lights
- GUI touchscreen interface
- SmartFlow plus auto compensation
- Cross beam UV in side walls
- Electronic front sash window
- Hinged front window for easy cleaning and disinfection of the interior
- Sloped front window allows fatigue free working
- Padded, ergonomically adjustable armrests (optional)
- 2 x Smart Ports for feeding trough vacuum tubes and cables
- One touch auto start/stop function
- Cloud ready data output
- USB data outputs
- EN 12469

NEW

2 MSC-Advantage™ Class II Biosafety Cabinets

Thermo Scientific

Thermo Scientific biological safety cabinets combine smart design and extraordinary value with best-in-class energy efficiency, reliability and usability. The MSC-Advantage is designed to meet the stringent safety requirements of EN 12469:2000 and EN 61010-1:2001, and carries the NF Mark as well as the test report from the Health Protection Agency (HPA) from Porton Down, UK.

- 60% less energy consumption than competing AC motor-driven cabinets
- 60% less heat emission than competing AC motor-driven cabinets
- Extremely low noise level (54 or 59 dB(A)) for a more comfortable work environment
- Largest work surface area of any cabinet (more workspace for your research)
- Cleaning position of window (patented feature that allows user to clean the entire window)
- Sloped front window for improved ergonomics (more comfortable working position)
- Motor operates at reduced speed when front window is closed (keeps interior cleaner for faster set up each day and eliminates noise into the lab when not in use)
- Low overall height to fit into labs with shorter ceilings
- Supply/exhaust air filter: HEPA H 14 EN 1822, 99.999% at 0.3 µm particle size
- Additional exhaust filter option (AEF): HEPA H 14 EN 1822, 99.999% at 0.3 µm particle size
- Voltage: 230 V, 50/60 Hz

Description	External dimensions (W x D x H) mm	Internal dimensions (W x D x H) mm	Weight kg	PK	Cat. No.

MSC Advantage 1.8	1900 x 798 x 1550	1800 x 495 x 780	340	1	4.010 033

Suitable accessories can be found in our online shop.

1 LLG-Microbiological Media, dehydrated

Media for bacteria
Luria Bertani (Miller):

- Standard high salt content media for *E. coli* cultivation
- Ideal for plasmid preparation
- Available also as granulated media

Luria Bertani (Lennox):

- Standard medium with low salt content for the cultivation of *E. coli*
- Ideal for cultivating recombinant *E. coli* strains

Terrific Broth:

- Rich content media for the high density cultivation of *E. coli*
- Ideal for protein expression and plasmid preparation
- Available also as granulated media

2xYT Broth:

- Nutritive medium for the cultivation of recombinant *E. coli* strains and for the growth of filamentous bacteriophages

Media for yeasts
YPD-Broth:

- Standard medium for the cultivation of *Saccharomyces cerevisiae* and other yeasts

Agar
Bact. Agar.:

- High quality agar used for the preparation of culture media and other bacteriological applications

Luria Bertani Agar (Miller):

- Standard Agar based on Luria Bertani (Miller) media with high salt content
- Ideal for growth and maintaining especially of *E. coli* strains used in molecular microbiology procedures

Luria Bertani Agar (Lennox):

- Standard Agar based on Luria Bertani (Lennox) media with low salt content
- Ideal for growth and maintaining especially of recombinant *E. coli* strains

Media components
Yeast Extract:

- Concentrate of the water-soluble portion of autolyzed *Saccharomyces cerevisiae* cells
- Non-animal product, used widely for non-animal formulations of bacterial, fungal, mammalian and insect cell culture.

Tryptone:

- Pancreatic digest, tryptone from casein
- Excellent nutrient for use in culture media for producing antibiotics, toxins, enzymes and other biological products

Casein Peptone:

- Pancreatic digest, peptone from casein
- Ideal for use in fermentation applications and microbiological culture media

The safety data sheets of these products are available under www.llg-labware.com/en/zertifikate.

2 LLG-Microbiological Media

For numerous micro- and molecular biological applications.

The safety data sheets of these products are available under www.llg-labware.com/en/zertifikate.

1 Microbiological rapid tests Lovibond® Dipslides

The Lovibond® Dipslides are designed to test liquids as well as surfaces. These dual-sided Dipslides are available in a wide range of different media types. They are ideal for use in many applications including evaporative cooling towers, closed water circuits, cutting fluids, food testing, and many more.

Lovibond®

Description	PK	Cat. No.

2 Incubator Lovibond® DI 10

Designed for the reliable incubation of dipslides in laboratories and field work.

Lovibond®

- Low voltage, in-car operation possible
- Holds up to 12 dipslides or 10 quanti-discs
- Excellent temperature stability
- Programmable incubation period setting
- LCD Temperature display with up/down push button control
- Rapid heating times for fast testing
- External status LEDs

Scope of supply: Incubator incl. external 12 V universal power supply, set of leads (UK, EU, US), 12 V in-car power adapter

Temperature range: ambient +5 ... +40 °C (± 0.5 °C)

Dimensions (W x D x H): 246 x 215 x 162 mm

Weight: 1.7 kg

Power supply: 110/220-240 V or 12 V

1 Nutrient pads

Sterile, dehydrated culture media pads in petri dishes. Once they are moistened with 3.0 ml to 3.5 ml of sterile and demineralised (or distilled) water they are ready-to-use immediately. All Nutrient Pad sets are supplied with the appropriate membrane filters, which are also individually sterile packed. Shelf life of the NPS 18 to 24 months at room temperature. Alternative nutrient media are available on request.

2 Microsart® Media, prefill dishes

Microsart® media are dishes pre-filled with different types of agar medium, sterile-packaged and ready to use.

Sartorius Lab Instruments

2

Absorbent medium pads

The absorbent pads are wetted with the appropriate liquid culture medium before a membrane filter is placed on them. They are pre-sterilized in plastic magazines.

Sartorius Lab Instruments

- 47 mm with approx. 3 ml absorption capacity
- 50 mm with approx. 3.5 ml absorption capacity
- Thickness 1.4 mm

100 pads in petri dishes	50	100	7.910 351

1

Automatic spiral plater and diluter easySpiral® Dilute

A 2-in-1 unit for automatic plating with the possibility of combined serial dilution series. *interscience*
The instrument allows up to 5 serial 1/10 dilutions of a sample to be prepared and then automatically
plated onto a Petri dish. Patented circular application: 3 dilutions on a 90 mm Petri dish, 6 dilutions on a 150 mm
Petri dish. The countable range is between 30 and 1×10^{12} CFU/mL on a single Petri dish.

- Times (for different sample viscosities) and volumes are also programmable via USB
- Traceability through Excel™ Export, Data Matrix label
- Intensive cleaning
- Patented overflow technology cleaning system
- 8 bar pump pressure
- 2 fully autoclavable bottles (diluents and disinfectants) and connectors

Specifications

Petri dish size:	55 ... 150 mm
Syringe capacity:	1000 µl
Volume dispensed:	10 ... 1000 µl
Counting range:	30 ... 1×10^{12} CFU/ml
Full cycle time:	134 seconds
Preset pipetting volumes:	50, 100 und 200 µl
Plating modes:	exponential, circles, uniform, pour plate
Cleaning autonomy:	1000 cycles (2 l bottles)
Dimensions (W x D x H):	400 x 415 x 290 mm
Weight:	16.4 kg
Power supply:	100-240 V /50-60 Hz

2 LLG-Petriplates, PS

Made of high quality optical clear polystyrene. Produced under aseptic conditions in an ISO 6 cleanroom. Contact plate with counting grid.

- With a smooth surface for an optimal distribution of the transport medium
- Stable thickness to prevent any deformations while using
- Stackable
- With or without vents
- Aseptic (90 mm diam.) or beta irradiated sterile versions (all sizes)
- Packed in sleeves à 10 dishes or 20 dishes (90 mm diam. dishes)

2 | 3 Inoculating Turntable

Manually operated turntable guarantees smooth and easy rotation in both directions. **ISOLAB**
Also enables easy and fast allocation of bacteria across petri dish surface. Double-sided construction accommodates petri dishes from 60 to 150 mm diameter by inverting the turntable. Ball bearings provide smooth and effortless spinning, ensuring rapid inoculation steps and extended operation life. Light weight but robust body manufactured from aluminum with non-skid feet. The silicone pad holds the petri dishes firmly and always keeps the dish centered during inoculation steps. The non-skid pad can easily be removed for fast and efficient cleaning.

Description	PK	Cat. No.
Inoculating Turntable	1	6.286 850

4 Petri dish turntables, schütt Petriturn

For uniform inoculation of petri dishes. Easy-to-use. Made in Germany.

schütt petriturn-M

With manually operated, heavy turntable for smooth and long-lasting rotation. Double-sided construction accommodates two sizes of petri dish (90mm or 150mm diameter), by inverting the turntable.

schütt petriturn-E

Electrically driven (100 - 240 V, 50/60 Hz), constant speed rotation. Easy operation of the rotary table contact-free start via IR sensor (adjustable rotation time from 3 to 120 sec.), in continuous operation or optionally in foot switch mode. Infinitely adjustable speed from 10 to 120 rpm. For Petri dishes up to Ø 100 mm (Ø 150 mm optional). Compact housing made of stainless steel.

5 LLG-Inoculation loops, PS, sterile

Made of flexible polystyrene. With ultra-smooth loops for problem-free planting and streaking of cultures. Free of lubricants, oils and electrostatic charges, enabling consistent and complete liquid transfer. Ergonomic design of the loops for optimal grip and an easy orientation of the loop head. Needle end shape is perfect for picking off individual isolated colonies and suitable for making stab inoculations into agar slants or tubes of solid culture medium.
Package: 10 bags of 10 pieces

Type	Capacity	PK	Cat. No.

4 Baffled flasks DURAN®

With GL 45 thread

DWK Life Sciences

- Oxygen introduction is often a limiting factor for cell growth.
- Baffled flasks cause a turbulent flow, increase the gas exchange surface and produce a higher oxygen transfer.
- Automated one-step production enables a reproducible and comparable result.
- Complete with membrane screw cap (gas exchange).

9.141 169

1 Erlenmeyer flasks with baffles, PC

Thermo Scientific

Transparent. With baffles indented into the base which increases mixing when trypsinizing and aerating in processes such as cell culture and fermentation. Autoclavable. 500 ml and 1000 ml flasks have a straight neck, suitable for 38 mm standard caps of stainless steel, aluminium or plastic.

Capacity ml	PK	Cat. No.
250	12	4.675 585

1000	6	4.675 583
2000	4	4.675 584

2 LLG-Cellulose stoppers, Steristoppers®

Cellulose, 100% biodegradable and fully compostable autoclavable. Steristoppers® have been proved as an excellent sealing for microbiological samples and tissue cultures in test tubes and Erlenmeyer flasks. They are in constant use in many European microbiological laboratories.

- Autoclavable
- Filters bacteria
- Sterilisable
- Air permeable

1 Sterile stoppers SILICOSEN® and BIO-SILICO®

SILICOSEN® and BIO-SILICO® are specially processed culture plugs in sterile rubber with continuous bubbles for preparation, filling and sterilisation of culture media. Their uniform pore structure and good air permeability make them excellent for the cultivation of aerobic microorganisms.

The choice between SILICOSEN® and BIO-SILICO® culture stoppers depends on the requirements of the application. SILICOSEN® culture stoppers have low water evaporation which makes them particularly suitable for long term cultures. BIO-SILICO® culture stoppers have high air permeability, similar to cotton plugs. Both types are chemically resistant, temperature resistant, liquid repellent and reusable.

2 Sterile stoppers SILICOSEN® S-Type

Hirschmann

Superb permeability. Suitable for aerobic bacterium cultures and shaking cultures.

Type	Top diam. mm	Bottom diam. mm	Cylinder length mm	Cone length mm	Joint size (NS)	PK	Cat. No.
S-28	28	17	18	27	17/26	1	9.231 178

Anaerobic jars, stainless steel

For the cultivation of anaerobic and microaerophilic microorganisms in a defined and rapidly generated gas atmosphere.

schuett-biotec

The requested atmosphere may be reached under ideal conditions by two methods. Either by using chemical gas packs (anaerobe systems) or by manually evacuating the jars with a vacuum pump and flushing with gas afterwards (e.g. with nitrogen), in this case no chemical accessories are needed (except anaerobic jar eco and crystal eco). The jars are made of robust stainless steel or transparent PC. The lids are made of UV-resistant plastic or transparent polycarbonate with two corner valves incl. tube clips for vacuum hoses (5 mm i.d.) and with manometer for exact control of the vacuum or overpressure from -1 to 0.2 bar (except anaerobic jar eco and crystal eco). The optional racks are made of stainless steel providing holders for comfortable operation of the anaerobe systems.

Methods for reaching anaerobic conditions: 3 x times evacuating and filling gas, flushing with gas for 5 minutes and chemical gas production (GasPacks) for Anaerobic jars "small", "standard", "large" and "crystal". For Anaerobic jar "eco" flushing with gas for 5 minutes (Using GasPack-Kits).

Customized: Other equipment available upon request. Examples: customized lids, e.g. made of special or heat-resistant materials e.g. stainless steel, heat-resistant pressure gauges (up to 100 °C), also without cocks/manometer available.

Bioreactors RTS-1/RTS-1C

Compact and efficient bioreactors providing patented Reverse-Spin® type agitation and logging of microbial growth, in 50 ml tubes, in real time. For applications such as bacterial cultivation with real time growth kinetics, strain screening, temperature stress and fluctuation experiments media screening and optimization, synthetic and systems biology, inhibition and toxicity tests and strain quality control.

- 3D graphical representation of OD or growth rate over time over unit
- Easy-to-read LCD screen displaying temperature, RPM and time
- Programmable cycling/profiling of cultivation parameters such as temperature, RPM, Reverse-Spin® frequency
- Active cooling and temperature profiling via software (RTS-1C only)
- Minimum PC requirements: Intel/AMD Processor, 1 GB RAM, Windows XP (not guaranteed)/Vista/7/8/8.1/10, 2.0 USB port

Specifications

Theoretically possible measurement range in OD₈₅₀, at 10 ml working volume*

Rod shaped bacteria:	0 ... 25 (0 ... 45.6 OD ₆₀₀ equivalent**)

Loop steriliser SteriMax basic/smart

For rapid sterilisation of inoculation loops using infrared technology. Instantly ready for use without warm-up.
Sterilisation at 750 to 1000 °C. Suitable for all laboratories, anaerobic working environments and laminar flow cabinets.

WLD-TEC

- Instantly ready to work without any unnecessary warm-up
- Heating tube made of special quartz glass
- Simple cleaning of the device and the heating tube
- Sterilisation tube closed on one side to prevent contamination
- With timer
- Easy to clean
- No danger of combustion on the housing (Cool-Touch)
- Efficient use of energy
- Tested and certified for photobiological safety in accordance with EN 62471 by the BG ETEM - Risk-free for skin and eyes
- Robust housing made of stainless steel and safety glass

Specifications

Temperatur range:	750 ... 1000 °C
Power consumption:	600 W
Dimensions (W x D x H):	110 x 180 x 170 mm
Weight:	1.8 kg
Power supply:	220 - 240 V, 50/60 Hz
IP code:	IP 20

**1 Loop steriliser SteriMax basic**

- Can be operated directly on the touch panel of the device or via optional foot pedal
- Fast and efficient, the sterilisation process takes only 10 seconds

WLD-TEC

Scope of supply: SteriMax basic, mains cable, 1 x Inoculation loop Ø 3 mm, 1 x Inoculation loop holder, power cable

Type	PK	Cat. No.
SteriMax basic	1	4.670 727

2 Loop Steriliser SteriMax smart

- Auto-Start through touchless IR-Sensor technology
- Touch operation
- Adjustable sterilisation and cool-down timers for two users

WLD-TEC

Scope of supply: SteriMax smart, 2 x quartz glass heating tubes, inoculation loop holder, inoculation loop (diam. 3 mm), holding device for 3 inoculation loops, power cable

Type	PK	Cat. No.
Loop Sterilizer SteriMax smart	1	6.261 507

2

1 Loop Sterilizer schuett solaris

Sterilisation with light. Sterilisation of inoculating loops, tweezers and small instruments within seconds.

schuett-biotec

- Sturdy and maintenance-free
- No gas, no open flame - Works with standard electrical power
- Intuitive, easy to use
- Instant, ready-to-use, no warm-up time, no waiting
- Sterilization temperature: 900 to 1300°C
- Touch-free START, with IR-sensor and adjustable timer (5 to 7 seconds)
- For use in Laminar Flow Cabinets
- Ideal for mobile operation in the field

The schuett solaris is the perfect solution if an open flame should be avoided or gas cartridges etc. are not available. Used with standard electrical power. Reaches the safe working temperature of 900 to 1300°C within a split second. No excess heat, no energy consumption between work cycles. START is generated by an infra-red sensor, which allows for efficient one-handed operation. Pathogenic material is kept inside the sterilization chamber. No spreading, no splashing. Working angle adjustment (4-steps).

Scope of supply: schuett solaris inoculation loop sterilizer, 2 x quartz glass tubes, 1 x inoculation loop holder with inoculation loop (sample)

2 Sterilisers STERI

The STERI second sterilisers permit instant disinfection and sterilization of all small instruments directly at the workplace. Especially suitable for laminar flow cabinets. Biological investigations and tests prove that the 250 °C temperature maintained in the glass bead container guarantees complete destruction of all micro-organisms and spores within a few seconds. The one part of the instrument which is inserted into the STERI glass beads is sterilized. The STERI 250 and 350 are two versions of the same quality apparatus, with a stainless steel container, high-performance heating element, reduced heating time, high precision thermostat, temperature limiter and built-in thermometer.

Simon Keller AG

2

- For perfect hygiene directly at the workplace
- A guaranteed Swiss quality product

STERI 250: Steriliser incl. plain metal cover, glass-cup and glassbeads (150 g). Suitable for small & medium sized instruments (scissors, tweezers, forceps, knives, blades, spatulas, etc.).

STERI 350: Steriliser incl. plain metal cover and glassbeads (300 g). Especially suitable for medium sized and longer instruments.

1 Flame sterilizer schuett easyflame

Mobile device for scarfing and flame-sterilising. With piezoelectric-ignition and gas supply control to create a soft or sharp flame. Infinite adjustment of the flame. Highest operational safety. In short-term use, the flame is activated as long as the push button is pressed. For continuous operation with lock key.

schuett-biotec

schuett easyflame to use with propane/butane gas

1. Suitable with gas cartridges with 7/16" connection thread, e.g. CG 1750, Express 444, AT 2000.
2. Adapters for CV 360 or CP 250 gas cartridges optional.

schuett easyflame^{plus} for connecting natural gas and propane/butane gas with gas safety hoses

1. Natural gas hose for central gas supply for easy plugging the device (hose barb included)
2. Propane/butane gas hose with fitting (1/4 "left-hand thread) for the use of gas cartridge adapters or gas cylinders with pressure reducer. Matching adapters C 206 and CV 300/470 (already equipped with gas safety hose, 0.5m and reducer). Gas safety tubing in other lengths on request.

2 Gas burner powerjet

NEW

WLD-TEC

Mobile handheld laboratory gas burner with piezoelectric ignition for liquid gas cartridges. Suitable for flame sterilisations in the microbiological or biotechnical field, where no central gas supply is available.

- For gas cartridges with 7/16" x 28 UNEF thread, e.g. CG1750
- Ignition at keystroke
- Size of the flame infinitely adjustable
- Gas supply only when bar is pressed
- With a locking device for long term flaming
- Safe handling due to one-handed operation

Scope of supply: Laboratory gas burner with gas cartridge adapter (7/16" x 28 UNEF thread)**Specifications**

Weight: 300 g
Gas consumption: 120 g/h
Flame temperature: 1350 °C
Warranty: 2 years

Type	PK	Cat. No.
powerjet	1	7.970 147

2 Safety Bunsen Burners Flame¹⁰⁰

The safe alternative for all traditional Bunsen or alcohol burners.

WLD-TEC

Multi-Use: The Flame¹⁰⁰ is ideally suited for all flame related applications in the laboratory. The precision flame allows graduated heating of dental tools as well as safe sterilization of microbiological instruments. Flame size and intensity can be adjusted infinitely.

Easy operation: The safety Bunsen burner Flame¹⁰⁰ activates immediately with the push of a button. No match or a pilot flame are required. Optionally, the Flame¹⁰⁰ can also be operated by a foot pedal or an external infrared motion sensor. The Flame¹⁰⁰ is suitable for stationary natural gas and propane/butane gas supplies as well as gas cartridges or gas cylinders. Numerous adapter systems are optionally available.

Reliable safety: The proven Safety Control System (SCS) is also incorporated in the Flame¹⁰⁰. All potential hazards are constantly monitored and, if necessary, protective measures, such as shutting off the gas supply, are activated. In addition to the ignition and flame control function and the overheating protection the safety package also features the continuous burner head control BHC. BHC unfailingly identifies burner head clogging by liquids or solid substances. Approved by DIN-DVGW, approval no. NG2211AS0167. 2 years warranty.

Safety Laboratory Gas Burners Fuego SCS series

Suitable for all flame related applications in the laboratory. The low profile body facilitates ergonomic operation; the streamlined design reduces air flow disturbances in a Cleanroom workbench. The Fuego SCS series can be operated with foot pedal, button function or touch free IR-Sensor. Made of stainless steel, with fireproof controls.

WLD-TEC

- SCS Safety Control System with gas safety cut off: Ignition and flame control, temperature monitor, automatic unit switch off, residual heat display, burner head assembly monitor.
- BHC Burner Head Control.
- Removable burner head.
- Tilt mechanism right/left.
- Turbo flame.
- Holding device for 3 inoculation loop holders.
- Operation with stationary natural gas and propane/butane gas supplies, cartridge gas or gas cylinders.
- Approved by DIN-DVGW, approval no. NG2211AS0167.
- Warranty: 2 years.

Fuego SCS basic/ Fuego SCS basic RF: With stainless steel foot pedal. The foot pedal regulates the burning time either by continuous foot pressure or by start-stop function. Instrument with ON/OFF button function. Basic model without IR-Sensor and without graphic display.

Fuego SCS basic RF: Features as Fuego SCS basic but enables wireless operation due to modern radio foot pedal.

2

6.231 770

Fuego SCS/Fuego SCS pro: with Double-Click IR-sensor, button function and foot pedal operation. (foot pedal optional). Double-Click IR-sensor: This adjustable safety function ensures that the burner can only be ignited by activating the IR-Sensor twice. Adjustable IR-sensor reaction distance: 5mm to 50mm.

Illuminated graphic display: The animated, self-explanatory and language-less symbol display facilitates a rapid selection of all functions. 6 standard-programs with count down display: 1sec to 2hrs selectable.

The first safety laboratory gas burner with comfort package: Cooling time reminder for inoculation loops, temperature regulation for heating media, gas consumption display for gas cartridges, flexible and individual by selecting user account, acoustic signals as operating aids.

Additional safety assistance: Zero-pressure shut off for a pressureless gas hose. Graphical installation instructions facilitate the initial start-up.

Fuego SCS pro: Features as Fuego SCS, plus battery operation (9hrs), 2 rechargeable batteries (Mignon AA), fast charge function (3hrs) and safety tilt sensor.

Additional accessories are available on request.

Microbiology/Sterilizers and burners

9.018 760

Safety Bunsen Burner, schuett phoenix II

For sterilising, heating, flame sterilising. For use in every microbiological laboratory or in safety cabinets. Modern Bunsen burner with state-of-the-art safety features plus outstanding quality characteristics:

- Controlled burning time 1 sec to 120 min (selectable)
- Automatic safety shut-off (selectable)
- Overheating protection/burner control by sensors
- Precise economic flame regulation (stable flame in strong air current)
- Flame and ignition monitoring
- "Push-and-Twist" bayonet fixture for burner head, no tools needed for cleaning
- Tilting right or left

9.018 761

Operating status, safety notes and warnings pictures and full text (color display) written language for most international languages. Brilliant colour display. Unique Joy-Stick navigation. Operating modes: by hand or with foot pedal or motion sensor. Housing made of stainless steel and safety glass. UV- and solvent resistant. For case of cleaning and flame-sterilising. Suitable for use with natural gas (central gas) or butane/propane gas (gas cartridges). Integrated stand for tilting right or left. Safety standard acc. to DIN 30665 part 1, DIN-DVGW

schuett phoenix II eco: (with LED control lamp and foot-switch) Start flame by foot-switch or button (On/Off). Best suited for use in microbiological safety cabinets. Best price to performance ratio.

schuett phoenix II standard: (brilliant colour display, selection of native language, sensor and foot- switch)

Start/Stop flame by activating sensor 1x or 2x, use foot switch or press button by hand. Continuous display of timer.

schuett phoenix II accu: (brilliant colour display, selection of native language, sensor and built-in extra heavy duty power cells) Start/stop flame by activating sensor 1x or 2x, use foot-switch or press button by hand. Continuous display of timer and battery power. Operates for up to 30 hours, intermittent use. Complete with battery charger for 3 hour recharging. Ideal for mobile usage.

Power supply: 100 - 240 V, 50/60 Hz

Flame sterilization carousels semi- and fully automated: For precise and time-controlled flaming of different kinds of inoculating loops. Minimization of gas consumption, the life of the inoculating loops is significantly increased. The inoculating loop is placed into the carousel after use and is sterilized immediately after turning the holder in flaming position. Sterilization time infinitely adjustable. Designed for continuous work-flow with sample series in the Laminar Flow.

Semi-automated: schuett easyloop (for 6 Inoculating loop holders, included): Comfortable manual rotation, fully automated flaming process. For use with Safety Bunsen Burners schuett phoenix II standard and accu. Sterilization time: 3 to 5 s (adjustable from 1 s to 120 min)

Fully automated: schuett flammy R (for 5 Inoculating loop holders, included): Fully automated rotation and inoculating. In combination with a standard gas-safety-burner (e.g. schuett phoenix II). Sterilization time: 2 to 10 s

LLG-Micropesles, stainless steel

Polished stainless steel, micropesles. Precisely fitted for Eppendorf Safe-Lock Tubes™, manufactured in one-piece, smooth handle sections, can be disinfected easily. Minimum homogenate displacement due to tapered piston.

For Reaction tubes:

For homogenisation of cells, tissues or foodstuffs/feed samples.

- For tubes with 0.5 ml, 1.5 ml, 2.0 ml and 13.0 ml
- Can be cooled down to -196 °C
- Sterilisable in an autoclave or dry heat at +200 °C
- Suitable for PCR applications
- Alternative to single-use plastic pestles
- Perfectly suitable for Eppendorf Safe-Lock Tubes

2 | 3 Tissue Grinders System

For safety grinding of any cells by minimal temperature rising. Closed System (CS) for minimizing the risk of personal contact with aerosols and sample overflow while grinding. Optimal contact of grinder and conical sample tube (15 or 50ml) to grind each cell in the best way. Each unit is gamma sterilized and comes with a fully assembled pestle, conical sample tube (PP), solid top cap (HDPE) and label.

DWK Life Sciences

CS 2	50	10	9.651 053

4 Homogenisers DUALL®, with glass pestle

With conical and cylindrical area for effective tissue for grinding and also for homogenising. Especially suitable for cellular tissue such as muscle, heart and lungs. The pestle is sufficiently stable to be motor driven. The space between the pestle and mortar is between 0.1mm to 0.15mm. Spare components are available and are completely interchangeable.

Shakers, Disruptor Genie® analog/digital

The patented Disruptor Genie® provides a multi-directional action, which simultaneously agitates and vortexes at high speed, dramatically increasing cell disruption or sample resuspension efficiency.

Scientific Industries

9.730 115

- Dramatically increased sample disruption efficiency. Ideal for difficult glass bead procedures (Glass beads - please order separately), cell disruption/homogenisation of yeast, bacteria, plant and animal tissues and pellet resuspensions or anything that requires extremely violent, high-speed agitation.
- Patented multi-directional action simultaneously agitates and vortexes at high-speed producing greater yields in less time
- Hands-Free disruption of up to twelve 1.5ml or 2.0ml microtubes with timer from 0 to 15 minutes (Disruptor Genie® analog), 0 to 99 minutes (Disruptor Genie® digital) or continuous operation
- Performance comparable to expensive ultrasonic cell disruptors/homogenisers.
- Suitable for use in cold rooms or incubators

Supplied with: Disruptor Genie, tube holder for 12 tubes, pop-off cup

1 | 2 Microbiological monitoring of water: MBS I system and membranes

The MBS I filtration system is designed for laboratories that handle high numbers of samples for microbiological quality control. It consists of a membrane dispenser, a funnel dispenser, and a 2-place filter AS220 manifold.

Whatman

AS220 Filtration Manifold and Filtration funnels AS220 is a two-place stainless-steel filtration manifold, which can be joined together (maximum of 3 manifolds). This simple manifold can be used with 47mm or 50mm filtration membranes.

- Waste reduction - because PP funnels can be autoclaved up to 50 times
- Time saving - No need to flame in between filtrations
- Easy handing
- Cost saving - 20 PP funnels are enough for 1000 analyses
- Reduces cross-contamination

3 Biosart®100 monitors

Filtration unit for use with a Sartorius vacuum manifold or direct attachment to a special *Sartorius Lab Instruments* vacuum pump. Biosart® 100 Monitors have been specifically designed for the microbiological testing of pharmaceuticals, food, beverages, water and other liquids. These sterile disposable units with built-in membrane filter and cellulose pad are ready to use. After filtration, just remove the 100ml funnel to convert the monitor into a petri dish. Culture media for wetting the pad are available in individually sterilised, convenient plastic ampoules. Biosart® 100 Monitors are ready to use filter units designed to fit onto the receivers of a vacuum manifold. For use with Biosart® 100 culture media.

5 Membrane Filter Microsart® @filter units, CN

Microsart® @filter 100 filter units are a sterile and ready-to-use combination of funnel made of PP with 47 mm diameter, filter base and gridded membrane in one unit.

Sartorius Lab Instruments

They have been specifically developed for the detection and enumeration of microorganisms in pharmaceuticals, cosmetics, food, beverages, water and other liquids. The membrane filters can also be used in conjunction with Sartorius Stedim Biotech nutrient board discs.

1 Plastic Funnels, Microsart®, PP

The sterile plastic funnels with 47 mm diameter allow quick performance of the filtrations required in the routine testing of water, food and beverages, pharmaceutical and cosmetic products. A Sartorius Stedim Biotech gridded membrane is placed on a stainless steel filter support and a Microsart® Funnel is simply and practically fitted on and the sample is filtered by vacuum.

- Click-Fit closure for optimum sealing
- Graduation with markings for exact volume dosing

1 schuett count Colony Counter

Designed for reliable and efficient counting of bacterial colonies and bacteriophage plaques growing on nutrient agar or nutrient discs/filter disks in Petri dishes. Provides ergonomic and relaxed working.

- For Petri dishes with Ø 90 mm (Ø 60 or 150 mm optional)
- Individually adjustable lighting, pressure sensitivity of the counter plate and volume
- LED lighting technology, absolutely glarefree and gentle on the eyes
- Three types of illumination: from below, from the side and incident light (optional)
- High colony transparency and differentiation (agar or nutrient discs/filter), even with transparent colonies
- No heating of the samples
- Natural colour reproduction
- Easy counting by marking the colonies (with any felt pen) on the petri dish
- Acoustic counter control (with volume control)
- 4-digit LED-display (0 - 9999), clearly arranged foil keypad
- Average count calculation, data transfer via USB to PC. Imported in Excel, for further processing, storage and printing

schuett-biotec

Scope of supply: For 90mm dia. Petri dishes: adapter (transparent) for illumination from below, adapter (black/white) for illumination from side, contrast disc (black), USB-cable, marker-pen with holder.

For enumeration of more than 50 Petri dishes per day, we recommend: schütt colonyQuant automatic colony counter (sample chamber, PC/laptop, software-license): The schuett colonyQuant is equipped with a high-resolution auto focus/auto-zoom color camera. Evaluation of Petri dishes with agar Petri film, filters or nutrient pads, spiral plating or Hemmhof analysis. Storage of counting methods, documentation of results.

Suitable for automatic counting and documentation of Petri dishes or nutrient pads, covered with smallest colonies (min. 0.05 mm diameter), mixed cultures. Connection to existing LIM system possible. Test evaluation of customer-specific plates in the customer's own laboratory possible before purchase.

Automatic Colony counter Scan® 300, 500 and 1200

Scan® 300 is an automatic colony counter that includes the essential features for Petri dish counting. *interscience*
 It is specifically adapted to the usual media in food microbiology (PCA, MRS...). With a CCD camera with
 1 Megapixel - zoom x 28. It counts colonies on a Petri dish in less than half a second, with a minimum colony size
 of 0.1 mm. For the detection of colonies on round pour, surface, spiral and circle mode plated dishes Ø 55 - 90 mm.

Scan® 500 is a high-tech automatic colony counter. It counts colonies on a Petri dish in less than half a second and
 gives you quick, accurate, complete and traceable reading of the results. With its CCD camera and a powerful software,
 it connects to a PC via a Firewire connection automatically export results to Excel.

Scan® 1200 is a high resolution automatic colony counter that offer quick, and traceable counting results. Widely used
 in food microbiology, it counts colonies and automatically saves all data to Excel. Equiped with a digital camera and
 a powerful software, it connects to a PC via a Firewire connection. Scan® 1200 counts all colonies, even on smallest
 poured, spread and Spiral® Petri dishes; on PetriFilm™ and RIDA™ Count/Sanita-kun™, on filtration membrane and
 Compact Dry™.

2 Colony Counter Scan® 4000, automatic

Scan® 4000 is an ultra HD automatic colony counter and inhibition zone reader for high resolution *interscience*
 color reading of colonies and inhibition zones. Adapted to all sizes of Petri dishes and all media,
 its lighting system guarantees a great user comfort, high accuracy and excellent reproducibility. Automatic lighting
 system with 6 combinations, top and/or bottom light, white or black background. Automatic counting and inhibition
 zone measurement with manual control

- All stainless steel body
- Counting: 1000 colonies per second
- Minimum size of colony: 0.05 mm
- Color detection: 7 colors on the same dish
- Long-life white LEDs/Dark Field
- Counting on e.g. Petri dishes 55 to 150 mm, PetriFilm™ and other plates
- Inhibition zone reading on 90 to 100 mm round dishes and 120 mm square dishes
- Maximum number of antibiotics: up to 16 antibiotics on a square 120 mm dish
- Reading time: measurement of 16 inhibition zones between 2 and 4 seconds maximum
- Automatic separation of confluent colonies
- Results: Scan® file, PDF report, jpeg, png, bmp, Excel™
- LIMS and USB connection
- Software available in English, French, Spanish, Japanese, Chinese, Russian

Specifications

Camera:	Color HD CCD camera and digital zoom x64
Camera Resolution:	5 mega-pixels
Lighting:	LED/Dark field
Min. colony size:	0.05 mm
Counter:	1000 colonies per second
Culture dishes:	55 to 150 mm, 90 to 100 mm round dishes, 120 mm square dishes
Dimensions (W x D x H):	470 x 470 x 640 mm
Weight:	24.4 kg
Power supply:	100-240 V, 50/60 Hz

3 Air sampler, Airport MD8 airborne bacteria sampler

AirPort MD8 is a new portable air bacteria sampler for the pharmaceutical and food and beverage industries, hospitals, environmental protection and for industrial safety.

Sartorius Lab Instruments

AirPort MD8 has the following benefits:

- Battery-powered and portable for lab or field use
- Battery status display guarantees constant performance during sampling
- Ergonomic, smooth design, surfaces can be disinfected
- Choice of sampling selection, either by total volume or measurement duration

**Specifications:**

Volume flow control:

Volume flow can be set to three levels using integral hydrometric manometer: 30 L/min., 40 L/min. and 50 L/min.

Fixed sample volumes:

25, 50, 100, 250, 500, 750 and 1000 litres

Battery:

Sample volume can also be adjusted in 5 litre increments

Running time with a full battery charge:

NiMH 16.8 Volt/3800 mAh

Charging time:

approx. 4.5 hours

Noise level:

approx. 4.5 hours if battery flat

Weight:

Using gelatin membrane filters, 48 dB(A)

Dimensions (L x W x H):

2.5 kg

300 x 135 x 165 mm

Filter size:

80 mm dia., area 38.5 cm²

4 Disposable gelatin units for air sampler Airport MD8

Gelatine filter disposable units are individually sterile packed, ready-to-connect units consisting of gelatine filter and holder.

Sartorius Lab Instruments**Specifications:**

Filter size: 80 mm dia., area 38.5 cm²

Pore size: 3 µm

Reaction in water: soluble

Flow capacity (air): per cm²: 2.7 l/min. at ΔP 0.05 bar

Environment: Temperature max. 30°C, humidity max. 85%

Retention: 1. Bac subtilis niger 99.9995% retention at 0.25 m/s flow rate

2. Coli Phages T3 99.94 % retention at 80% rel. humidity and 0.3 m/s flow rate

Sterilization: sterilisable with gamma radiation

Histology/Embedding cassettes

1

1 LLG-Histology cassettes with detachable lid

For routine tissue and biopsy processing and embedding.

Made of Polyoxymethylene (POM). 100 % resistant to the chemical action of histological solvents.

With detachable lid (unassembled). Special design for easy frequent opening and closing, as well as easy and safe lid removal/insertion without any danger of specimen loss.

With two large labeling areas on the cassette sides and a standard 45 °C front writing area adaptable to most cassette labelers.

Fine square pores (0.9 x 0.9 mm) for an optimal fluid exchange and proper drainage.

Suitable accessories can be found in our online shop.

Rotary Microtomes RAZOR/RAZOR-e

Rotary Microtomes with disposable blades for paraffin sections for routine and research.

Micros Austria

Micro and coarse advance movements in enclosed housing. Coarse advance left side.

Optimum specimen guidance by maintenance-free cross roller guides. Safety lock on hand wheel. Section thickness adjustment from 0.5 µm to 60 µm in defined steps. Precise guide way and clamping device for knifeholder with optimum sliding capability and prism guide.

6.270 919

Manual Rotary Microtome RAZOR:

The rotation of the hand wheel is light and smooth and ensures an ergonomic handling of the instrument, which greatly reduces the operators intensity in the sectioning job. The hand wheel locking is conveniently integrated in the wheel and is designed for one thumb use. The compact ergonomical design offers space for using different application tools.

Fully automatic Rotary Microtome RAZOR-e

Offers great user benefit and gives superior comfort to the operator. The perfectly ergonomic arrangements of the control elements enable an effortless handling of the microtome. Automatic trimming in 3 steps: 1:10 µm, 2:20 µm, 3:30 µm. The powerful cutting motor drive with safety function ensures high section stability and precision. Hand wheel lock conveniently integrated locking lever on the hand wheel. Emergency shut down button. With the emergency shut down button the slicing process can be stopped immediately.

6.270 920

Scope of supply: Microtome Base with Knife Holder Base, Disposable Blade Holder Basic, Changeable clamping plate, Adapter Piece (fixed), Universal Cassette Clamp, Wooden Transport Box, 50 Microtome Blades MS100

The microtome blades MS200 (article no.: 6.270 924) and other suitable blades are available as accessories.

Blades for Microtoms, stainless steel

MS200: Universal blade with plasma coating for daily routine, suitable for all types of tissue.
Especially suitable for ribbon sectioning, excellent sharpness, even with very thin cuts.

Allrounder with unique hardened blade cutting edge, excellent durability.

MS300: Very sharp blade with plasma coating, especially recommended for cutting bone tissue.
Also perfect for all other tissue types as well as for ribbon sectioning.

MS100: For daily routine like ribbon and thin sectioning. Excellent sharpness and durability.
All-purpose, even for difficult tissue. High-quality stainless steel, extra hard teflon coated.

MS33: Blade for applications where extremely thin, high-quality sections are required.
Suitable also for skin biopsy. Short trimming time and increased durability.

MS24: For hard tissue, but also for soft tissue and biopsies. Excellent long life and sharpness,
very suitable for ribbon sectioning.

HP (High Profile Plasma): Excellent references for cryostat and ribbon sectioning.
Special hardened blade with plasma coating, short trimming time, excellent durability.

Tissue Vial CryoELITE®, sterile

The CryoELITE® Tissue Vials are specifically designed for tissue collection, transport and storage. DWK Life Sciences Different from cells and biofluids, tissue specimens have particular requirements for cryogenic storage. Offering researchers a uniform vial able to maintain sample integrity while maximizing storage capacity and organization, the CryoELITE Tissue Vials feature a wide-mouth opening, 5mL capacity and high integrity closure. The CryoELITE Tissue Vial offers researchers who work with tissue samples ease of use, convenience and security. The CryoELITE® Tissue Vials are manufactured from low binding, cryogenicgrade virgin polypropylene that meets the USP Class VI classification. Lot tested and certified to be free of pyrogens, RNase/DNase and endotoxins, the vials have a sample capacity of 5mL and a storage temperature range of -156°C to 121°C. The externally threaded cap provides a seal that exceeds DOT and IATA classifications for diagnostic specimens and their transport and is capable of maintaining a secure closure during freeze/thaw procedures. The vials have a flat bottom and a stippled external surface to promote easier handling.

- Lot certified RNase/DNase and Endotoxin Free providing assurance of product integrity
- Cap seal exceeds DOT and IATA regulations ensuring ultimate protection of samples during transportation and demanding freeze-thaw handling
- Wide mouth for insertion and removal of tissue with forceps
- 5 ml volume for use with tissue sections
- Directional indicators to allow orientation of tissue within the vial

2 | 3 Paraffin Section Flotation Bath, MH8517

The Paraffin Section Flotation Bath is designed to assist with the handling of paraffin wax samples in histology and pathology laboratories. It is essentially a hot distilled water floating bath that allows for the meticulous manipulation and location of sections onto glass slides. This Apparatus achieves a stable 45 °C using 2.25 litres of water within 40 minutes. The stability and accuracy have been improved due to the change of control which now also allows the user to set the temperature as opposed to the arbitrary power, thereby reducing the risk of overheating sections. It has a PTFE black interior and powder-coated aluminium exterior, which makes it virtually maintenance-free, extremely easy to clean and allows for improved visibility of floating sections. The lid is not included and can be ordered separately.

Electrothermal

Capacity:	2.5 l
Temperature:	30 to 70 °C
Temperature Stability:	±0.5 °C
Bath material:	Aluminium base with PTFE coated interior
Dimensions (D x W x H)	330 x 330 x 140 mm
Weight:	2.7 kg
Heater Power:	240 W

4 Paraffin Wax Dispenser MH8524

The Paraffin Wax Dispenser delivers quickly and conveniently on-demand molten wax, e.g. for histological applications. It is designed for melting up to 6 kg of pelletised wax at a time, and has a large 7.5 l capacity tank.

Electrothermal

- Anti-microbial coating (Ag+) to inhibit growth of bacteria
- Safety features include over-temperature cut-out at 120 °C
- Heated tap and inner filter screen (0.5 mm mesh) to prevent blockages
- Non-drip lever tap
- Small footprint

Specifications

Capacity:	7.5 l
Temperature:	Ambient ... 70 °C
Display:	Digital
Resolution/Accuracy:	1 °C/±1 °C
Material:	Stainless steel
Heater Power:	480 W
Dimensions (W x D x H):	181 x 500 x 455 mm
Weight:	7 kg
Power supply:	220-240 V, 50/60 Hz

1 Microscope slide drying bench, MH 6616

Slide Drying Bench aids in the preparation of microscope slides at the specimen mounting stage. It complements both the Paraffin Wax Dispenser and the Paraffin Section Flotation Bath to provide a complete set of paraffin wax sampling equipment for the modern laboratory. Accepting up to 50 slides (26 x 76mm), it has the facility for drying slides in different orientations- across the drying support bars, angled from the bars, or flat without the bars.

Electrothermal

- Up to 50 slides capacity
 - Slides can be arranged on the bench in different orientations
 - Built-in energy regulator controlling temperature up to 100 °C
- Material: Base and top powder-coated aluminium
 Max Element Temperature: 100 °C
 Dimensions (D x W x H) 180 x 390 x 95 mm
 Weight 1.8 kg
 Electric Requirement 230 V, 50/60Hz, 150 W

PARAPLAST®	5	1	6.255 599
PARAPLAST PLUS®	1	1	9.170 020

3

3 EUKITT® Mounting medium

EUKITT® mounting media are characterized by fast curing, crystal-clear optics, low fluorescence, ideal refractive index, good fluidity and low shrinkage. The preparations are stable over many years without cracking and discoloration. EUKITT® mounting media are colorless and do not change shape, structure or color of the material to be examined. No self-fluorescence under UV light! Delivered in wide neck, unbreakable aluminium bottles.

ORSAtec GmbH

EUKITT®: Gold-standard mounting medium. Particularly preferred for use in coverslippers. EUKITT® resists heat, cold (-17 °C), humidity, daylight and UV light and preserves the original preparations for an unlimited period. Drying time: 20 minutes.

EUKITT® neo Spezial: Fast drying, xylene free mounting medium. Can be directly applied on EtOH or *i*-PrOH. Washing with xylene can be omitted. Modern formulation approach using a sustainable, renewable raw material as a solvent. Pleasant odour. Drying time: 15 minutes.

EUKITT® UV R: Curing with a single click. Mounting medium which is very quickly cured by UV-light. Only 50% of the amount of standard mounting media are needed. EUKITT® UV R can be directly applied on EtOH or *i*-PrOH and does not present any health risks. Suitable for all tissue types. Curing time: 10 to 30 seconds.

1 Histofluid mounting medium

Histofluid is a water-clear adhesive of acrylic resins dissolved in xylene. It hardens fast and due to its optical properties suits perfectly well for embedding microscopic preparations. Shortly after having covered a preparation it can already be examined and filed. Histofluid may also be used to firmly lock and seal bottle caps.

Marienfeld

- long storing or temperature changes do not cause fissures or deformations in Histofluid layers
- does not turn yellowish when being exposed to UV-radiation
- does not fluoresce
- does not form bubbles
- even sensitive colorations are preserved due to its acid number = 0
- refractive index of 1.5 (nD 20 °C) is adjusted to the microscope slide and cover glass
- water-repellent and dissolves in, for example, xylene, acetone, chloroform, dioxan and toluol
- can be stored in sealed bottles for an unlimited period
- filled into special bottles designed for hazardous materials and bearing the UN code

Due to its solvent contents Histofluid is flammable and, therefore, considered as hazardous. So it has to be specially packed and shipped according to the international transport regulations. Before ordering please carefully check your country's import regulations and ensure a smooth transport according to the IMO (International Maritime Organization). Any cost that might arise additionally for documents, reloading, returns etc. will be at your expense.

2 Histological staining solutions

Stains are delivered in 1000 ml bottles. Each bottle is sufficient for 1500 up to 2500 specimens.
They can be used for clinical diagnostics.

ORSAtec GmbH

Harris' hematoxylin solution (Papanicolaou's solution 1a): The cytological staining technique developed by Papanicolaou is still the standard method in cancer and hormone cycle diagnosis. By using the classical Harris' hematoxylin solution (Papanicolaou's solution 1a), excellent nuclear staining can be achieved in 3 to 5 minutes. Nuclei are stained blue, dark violet to black. Density (20 °C): 1.04 g/cm³. pH value (20 °C): 2.3 to 2.8. C.I. 75290: 5.3 g/l. $Al_2(SO_4)_3 \times 18 H_2O$: 67 g/l

Mayer's hemalum solution: This solution does not need to be filtrated prior use and the dye is oxidized in a controlled manner, which renders the results robust and allows a brilliant differentiation of the stained structures. Nuclei are intensive blue, cytoplasm is grey-blue. Density (20 °C): 1.05 g/cm³. pH value (20 °C): 1.8 to 2.2. C.I. 75290: 4.4 g/l. $Al_2(SO_4)_3 \times 18 H_2O$: 28 g/l. $C_6H_8O_7 \times H_2O$: 0.5 g/l

0.2% EOSIN Y solution alcoholic: A ready-to-use solution that can be used for routine staining in the hematoxylin-eosin staining process (H&E) of sample material of human origin. Due to the hematoxylin solution, the nuclei will appear blue to dark violet in color and the Eosin Y solution will stain the cytoplasma and intercellular substances red-orange.

General Consumables/Micro Tubes

1

1 LLG-Microcentrifuge tubes, PP

LLG Microtubes cover standard volumes for a variety of sample tests. They are available in 0.5ml, 1.5ml and 2.0ml volumes. These standard Microtubes withstand high centrifugal forces, are temperature and chemically-resistant and guaranteed leak-free. An innovative and modern new generation of Microtubes with new features. Perfect sealing qualities, excellent chemical stability and optimal construction materials guarantee even better resistance to centrifugal and chemical forces. Easy to open and to close thanks to the improved lid geometry. For visual volume control the 1.5ml tubes are equipped with graduations at 0.5ml, 1.0ml and 1.5ml. The 2.0ml tubes have graduations at 0.5ml, 1.0ml, 1.5ml and 2.0ml. The 0.5ml tubes have no graduations. Certified DNase-, RNase- and pyrogen-free.

Clear, in bags. Suitable for microbiology. Guaranteed metal-free.

Micro tubes with screw caps

Screw cap micro tubes are ideal for storage of serums and blood samples, and for boiling, centrifugation, etc.

BRAND

Quality features:

- Available in different formats, designs and quality grades.
- Micro tubes of PP and screw caps of PE or PP are precisely matched to ensure a secure seal. Available screw caps: screw cap with sealing cone, screw cap with silicone seal or tamper-evident screw cap with silicone seal.
- Cap inserts for coding, available in a variety of colors.
- Fast opening and closing with 1¼ turn of cap.
- Micro tubes with ring stands (self-standing) can be placed in suitable racks without the use of both hands.
- Micro tubes without ring stand (round bottom) withstands RCF up to 17 000 g at 20 °C, for 20 min.
- Dimensions: outer Ø 11 mm, height 47 mm.

LLG-Centrifuge tubes, 5ml, PP

The LLG-Centrifuge tubes, 5ml, represent the perfect solution for all laboratory applications requiring incubation, centrifugation and sample handling in an intermediate volume range. Available in clear, and amber for use with light sensitive samples, and as an assorted colour pack (green, blue, yellow and red).

- Max. 25.000 x g, suitable for high speed centrifugation
- Graduations every 0.25 ml for easy volume estimation
- A flat, frosted cap and large writing pad for sample labeling and identification
- Autoclavable
- Fits all rotors and racks that hold 15 ml conical tubes, no adapters needed
- Certified free of RNase and DNase

Eppendorf Tubes® 5.0 mL, PP

Eppendorf AG

- Simple, practical and ergonomic single-hand operation. Large labelling area.
- Lid design: Hinged lid for minimized sample evaporation during storage and incubation in a wide range of temperatures from -86°C to 80°C
- Certified purity: Available in lot-tested and certified Eppendorf Quality, PCR clean, Sterile and Eppendorf Biopur® purity levels
- Maximum safety and stability for centrifugation up to 25 000 x g.
- Compatible with accessories for conical 15 ml tubes - many existing adapters and racks can be used.
- Available in Eppendorf LoBind® material for maximum recovery of valuable samples

The Starter Pack comprises:

- 400 Eppendorf Tubes® 5.0 mL, PCR clean (Certified purity grade)
- 8 universal adapters for rotors with bores for 15 ml conical tubes
- 2 Tube Racks 5.0 mL (16 spaces; white)
- Free of human DNA, free of DNase and RNase, free of PCR inhibiting agents.
- For PCR preparations or any reactions where DNase or RNase could interfere with the reaction or analysis.

From 80°C on, please use the Tube Clip opener Cat. No. 9.409 294.

1 Eppendorf Tubes® 25 ml, PP

NEW

Eppendorf AG

Transparent. For cell culture applications, sample preparations, storage and transport of samples. The SnapTec™ cap version allows single-handed opening and closing for quick liquid extraction or addition. Also available with HDPE screw cap.

- Conical
- Single-Handed Operation
- Tightness from -86 °C to 100 °C
- Max. RZB 17000 x g
- Lower height than 15 ml/50 ml conical tubes
- The SnapTec tubes are autoclavable

Starter pack 1: 200 Eppendorf Conical Tubes® 25 ml with snap cap SnapTec™, PCR clean, 4 single tube stands, 6 adapters for rotors with bore for 50 ml conical tubes

Starter pack 2: 200 Eppendorf Conical Tubes® 25 ml with screw cap, PCR clean, 4 single tube stands, 6 adapters for rotors with bore for 50 ml conical tubes

Starter pack 1	1	6.311 419
Starter pack 2	1	4.669 460

2

2 Micro test tubes and racks, PP, 1.2 ml

BRAND

Suitable for biological examination, e.g. PCR, cell uptake studies, RIA, EIA, etc. Functional design for storing, freezing and transporting reagents and samples. Compatible with standard microtitre plates and suitable for work with multi-channel pipettes.

- 8 x 12 configuration
- Alphanumeric identification system
- Tubes and rack are autoclavable at 121 °C (2 bar), according to DIN EN 285
- Tube dimensions: 8.8mm external Ø, height 45mm
- Suitable for storage up to -80°C
- Test tube capacity 1.2ml (1.1ml when capped)
- Individual tube or 8-tube strips available
- With PE cap (not autoclavable)

Type	PK	Cat. No.
Rack with 96 single test tubes, non-sterile, PP	10	9.407 605
Rack with 12 x 8-tube strips, non-sterile, PP	10	9.407 606

Rack with grid, non-sterile (empty), PP	10	9.407 611

► Further Centrifuge tubes - please see page 688.

1 | 2 | 3 LLG-Test and centrifuge tubes rimmed, PS or PP

- Made of ultra clear virgin polypropylene or virgin polystyrene
- Polystyrene tubes are transparent. Polypropylene tubes are opaque, break-resistant
- Tubes with cap are ethylene oxide sterilized
- With label

LLG-Dual-Position Caps for test- and centrifuge tubes, PE

- For culture tubes with an O.D. of 12 mm and 17 mm
- 2 locking positions possible:
 - Closed , but gas exchange is still possible for aerobic growth conditions
 - Hermetically sealed for anaerobic growth conditions, for storage or despatch of samples or for centrifugation

4 LLG-Centrifuge Tubes economy, PP

- With flat PE caps
- With conical bottom (15 and 50 ml) or with self-standing bottom (50 ml)
- Easy-to-read black volume graduations
- With a large frosted writing area
- Engraved graduation at the conical bottom of each tube
- Max. rotate speed up to 12000 x g for conical bottom tubes and 6000 x g for self-standing tubes
- Autoclavable at 121 °C and freezable to -80 °C
- Leak-proof
- Free of heavy metals, pyrogens and endotoxins
- DNase/RNase-free
- Aseptically or sterile

General Consumables/Deep-well plates

1 | 2 Deep-well plate system, Riplate®

Riplate® round wells - Standard in Multifunction

Ritter

Raised wells reduce the risk of cross-contamination and increase the security of hot sealing or sealing with adhesive foils. Riplate® 1ml is ideal for use in a thermocycler or for defrosting of samples in a hot-water bath. The U-shaped well bottom reduces the dead-volume.

Riplate® square wells - For a Maximum in Capacity

Riplate® SW have been developed for optimal use of capacity when it comes to sample storage. Due to the SBS-format the outside dimensions of Riplate® are given. Form follows function: the construction of cavities is crucial for a maximum absorption of liquids.

Riplate® medio - Saves 50% of Storage Capacity

Due to the compact construction of Riplate® medio less than 50% stacking size is needed. Higher well rims allow an airtight closure or sealing of Riplate® medio. The alphanumeric marking allows registration and identification of single assays.

Riplate® 384 - Optimized for Smaller Volumes

Available in PS and PP for automated screening and storage systems. Alphanumeric marking for identification of samples. Round cavities for reduced capillary forces. With flat well-bottom - ideal for microscopic and optical applications.

Field of application: screening, sample storage et al. Ritter Riplate® systems are in line with the SBS-standard and are suitable for automation systems with corresponding closing- and sealing-mechanism.

Deep Well Plates, 96/48-well, PP

Ratiolab

Deep-well plates from Ratiolab are available as standard or low profile version with different volumes from 1.2 to 4.6 ml for each well.

- Available with U-bottom (low profile + standard) and as V-bottom version
- SBS standard micro test plate format
- Wells with significantly larger cross section for reduced cross-contamination
- Improved visual control due to clear polypropylene
- 1.2 ml low profile is about half as high as conventional deep-well plates
- 30 % less storage space when using low profile plates
- Autoclavable at 121 °C, 20 min
- Temperature resistant to -80 °C
- 8 x 12 wells with alphanumeric code in micro test plate format
- Precise design, for use in automatic pipetting systems for High Throughput Screening (HTS)
- Optimum space for bar code labels on the side walls
- Space-saving and stackable

1 Deep well plates

Developed for a range of uses, e.g. High-Throughput Screening (HTS), general analysis which requires a master reservoir plate, cell and tissue culture, sample storage, etc.
Deep well plates can be used with all leading robotic systems and other autosampling devices.

BRAND

- Capacities: 96 well: 0.5ml, 1.1ml, (1ml with lid), 1.2ml or 2.2ml (2ml with lid), 384 well: 0.3ml
- U-bottom wells
- Low Profile and Standard profile
- 96 well: 12 x 8 array, 384 well: 24 x 16 array
- High chemically-resistant polypropylene (e.g.: against DMSO, phenol, chloroform)
- ANSI/SLAS format
- Alphanumeric well coding
- Plates suitable for freezing down to -80°C (PP) or -20°C (PS)
- One notched corner ensures correct orientation.
- Stackable
- DNA-, RNase-, DNase -free

1

4.655 301

Deep-Well Plates, 96/384-well, PP

Eppendorf AG

High-performance plates for manual or automated applications. Suitable for sample storage and preparation, bacteria and yeast cultivation, DNA and RNA isolation, protein analysis and plasmid purification.

- Clear wells
- Frame, white or coloured
- High-contrast, alphanumeric lettering
- Autoclavable (121 °C, 20 min)
- Centrifugation resistance up to 6000 × g
- Rounded RecoverMax®-Well-Design
- Elevated well frames for reliable sealing, even with heat sealing
- Stackable
- PCR clean: free of human DNA, DNase, RNase and PCR inhibitors or sterile
- Available with bar code (on request)

General information about vials and caps

Technical Information – Vials

In chromatography a broad variety of glass or plastic vials are used as sample containers for analysis usage. As they are mainly used within autosamplers or any other automatic instrument, strict obedience of all dimensions is crucial for a trouble-free run. Besides these physical properties the vials also have to fulfill requirements regarding inertness and cleanliness, as otherwise analysis results may be incorrect. LLG Labware consider the physical and chemical demands in their production process by various implementations:

Almost all vials are made out of 1st hydrolytic class glass. First hydrolytic class glass is very hard and has a low expansion coefficient even at high temperature variations. It shows an excellent chemical resistance to acidic and neutral solutions, and even to alkaline solutions due to its relatively low Alkali content. Higher density of the glass surface offers a higher hydrolytic resistance. Clear Glass of 1st hydrolytic class is differentiated by 33 expansion (Type 1, Class A) and 51 expansion glass (Type 1, Class B), whereas amber is generally worldwide only available as 51 expansion glass. The indicated lower expansion coefficient of 33 implies that this harder clear glass has to be processed at higher temperatures. These amount to approx. 1,200°C for 33 expansion glass in comparison to only approx. 1,000°C for glass of 51 expansion. In the USA typically clear glass in 33 expansion and amber glass in 51 expansion is used, whereas in Europe solely 51 expansion glass is processed. From a quality point of view both types of glass are equally suitable for usage in chromatography, as they both are glasses of 1st hydrolytic class.

Technical Information – Seals

Seals are the assembled combination of a cap and a septa. To carry out a correct analysis, it is important that besides the vial the seal is also inert and uncontaminated. The closures sold by LLG Labware are automatically assembled and packed according to internally defined conditions of the supplier. Photocells check the side-orientation of the liner, so that it is ensured that the PTFE lamination is always directed towards the sample to build an inert barrier between sample and carrier material of the septa. A gauge control ensures that not more or less than one septa is installed. The final seals are automatically counted – and not weighed – by automates to guarantee quantity obedience. They are packed in tamper-proof evident zip-lock bags that allow easy identification of the content due to the transparent PE material. The zip-lock enables resealing of the bag to avoid any contamination of the closures during consumption. The batch number of the manufactured seal is printed on each PE-bag for traceability.

Technical Information – Septa

The right choice of septa depends on the application. Almost all septa are laminated on one side with PTFE, which has a high chemical resistance and forms an inert barrier between sample and carrier material of the septa. The carrier materials have different physical and chemical properties, such as temperature resistance, resealability properties, cleanliness, hardness, thickness, etc.

The individual conditions of the customer's application aim at the specific characteristics of the carrier material, e.g.:

Multiple injection? ↓ good resealability properties necessary ↓ Natural Rubber/TEF	Temperature?			Thin, fragile needle? ↓ soft and thin septa required ↓ e.g. Silicone/PTFE	Blunt, thick needle? ↓ Slitted/pre-cut liner as penetration aid (HPLC) ↓ e.g. 08 02 0039	Critical analysis? ↓ very clean liner required ↓ Silicone/PTFE septa	Low coring? ↓ Both sided PTFE laminated liners required ↓ PTFE/Silicone/PTFE PTFE/Butyl/PTFE
	-40°C up to 120°C ↓ Natural Rubber/ TEF; Butyl/ PTFE	-40°C up to 110°C ↓ Red Rubber/ PTFE	-60°C up to 200°C ↓ Silicone/ PTFE

Autosampler compatibility chart

The autosampler compatibility chart generally shows the most typical LLG-Labware vials and closures for usage on instruments of different manufacturers. Additionally the corresponding part number of the manufacturer is indicated. Beside these there also may be further products in our catalogue which may technically and functionally be suitable. We will gladly recommend other suitable products. If applicable for a manufacturer, each table has been divided by the application HPLC, GC and Headspace. We generally recommend asking for cost-free samples for testing purposes. We kindly ask for your understanding that we do not take any guarantee for the correctness nor for the completeness of the data indicated here.

Autosampler compatibility chart

The autosampler compatibility chart generally shows the most typical LLG-Labware vials and closures for usage on instruments of different manufacturers. Additionally the corresponding part number of the manufacturer is indicated. Beside these there also may be further products in our catalogue which may technically and functionally be suitable. We will gladly recommend other suitable products.

If applicable for a manufacturer, each table has been divided by the application HPLC, GC and Headspace. We generally recommend asking for cost-free samples for testing purposes.

We kindly ask for your understanding that we do not take any guarantee for the correctness nor for the completeness of the data indicated here.

Headspace Cap*: This cap has the function of a pressure release cap and is designed with special scorelines whose bridges break open at an internal vial pressure of 3.0 ± 0.5 bar to let the excess pressure escape. It is comparable with the three component PerkinElmer Headspace Closure (Aluminum Crimp Cap with slits, metal star washer, liner with ears) which offers the same effect with a different technical design.

1 LLG-2in1 KITs with Screw Neck Vials ND8 (small opening)

2in1 KITs contain 100 vials (1.5 ml) and 100 closures in an orange PP-Box. As both components are always required at the same time, 2in1 KITs are a convenient way to obtain and store all required items for analysis. All advantages of the individual components (cleanroom packaging of the vials, recloseability of the packaging, etc.) remain unchanged.

Any other combination of vial and seal as a 2in1 KIT available.

1 NMR tubes, diameter 3 and 5 mm borosilicate glass 3.3, standard

The NMR tubes are produced with high precision. They are suitable for routine measurements, high-throughput measurements or NMR systems with autosampler at measurement frequencies up to 600 MHz. The tubes are manufactured from borosilicate glass 3.3 which is conform to USP Type I and ASTM E438, Type I, Class A. Please order closing caps separately.

Hilgenberg

2 NMR Tubes, diameter 5 mm, borosilicate glass 3.3, High Precision

NEW

The High Precision NMR tubes are manufactured with high accuracy and excellent straightness and concentricity. They are particularly suitable for quantitative measurements and measurements in spectrometers with high measurement frequencies above 600 MHz up to the highest available field strengths above 1 GHz. The tubes are made of borosilicate glass 3.3, which complies with USP Type I and ASTM E438, Type I, Class A requirements. NMR tubes are supplied without caps, please order caps separately.

Hilgenberg

Outer diam. mm	Int. diam. mm	Length mm	Wall thickness mm	PK	Cat. No.

3 NMR tubes, diameter 3 and 5 mm, borosilicate glass 3.3, with UV protection

NEW

These tubes coloured by silver ion diffusion are particularly suitable for handling UV-sensitive substances. The tubes are manufactured from borosilicate glass 3.3 which is conform to USP Type I and ASTM E438, Type I, Class A. They are supplied with a green cap.

Hilgenberg

4 NMR Tubes, 5 mm, Wilmad®, High Throughput

Bel-Art Products

The thin-walled high-throughput Wilmad® NMR Tubes have an average camber of 60 microns to guarantee spectral quality for small molecule (MW <250) samples up to 600 MHz.. Designed for routine use in most low to mid field NMR spectrometers.

External diameter: 4.947 ± 0.019 mm
 Internal diameter: 4.1 mm
 Wall thickness: 0.43 mm

Type	Length mm	Camber µm	PK	Cat. No.

High Throughput	203	60	50	6.287 512

1 NMR tubes, 5mm, DURAN®, three accuracy classes

NMR tubes are available, according to requirement, in three accuracy classes. The correct tube can be selected depending on magnetic field and spin. The tubes are noteworthy for their close tolerances and accuracy, especially to their straightness, wall thickness and wall thickness distribution. Consequently, quick and accurate test results are achievable.

DWK Life Sciences

Type Economic:

The disposable for economical use in fully automatic sample dispensers or where high throughputs are involved.

- Applicable until 300 MHz

Type Professional:

For professional use in industry and research in the medium and high resolution area of NMR spectroscopy.

- Applicable until 400 MHz

Type Scientific:

For scientific use with high value samples and optimum substance exploitation in the highest resolution range of NMR spectroscopy.

- Applicable until 500 MHz

Please order closing caps separately.

3

3 Syringe Terminations

N, NR (Cemented Needle, Rheodyne)

Needles are cemented into the glass syringe barrel at a point corresponding to the zero graduation mark. NR stands for syringes with Rheodyne specified needles.

LTN (Luer Tip Cemented Needle)

Needles are cemented into the conical glass luer tip of the barrel at a point corresponding to the zero graduation mark.

SN (Special Needle)

Hamilton offers customized syringes with special needles and state the following details: needle length, gauge, point style, and whether they are electro-tapered. Example of a correct specification: 701 SN, 70mm, gauge 25, point style 3, not electrotapered. Without these details the corresponding standard syringe 701 N will be supplied.

RN (Removable Needle)

Removable needles sit precisely to the zero graduation mark of the syringe. Allows the use of different specification needles on the same syringe barrel.

KH (Knurled Hub)

Knurled hub is used on 7000 Series syringes. The attachment of a spacer enables repeatable depth injections.

LT (Luer Tip)

Ground glass syringe barrel with a male luer taper accepts most hypodermic needles. Use Kel-F hub needles and connectors for a tight seal.

TLL, TLLX (PTFE Luer-Lock)

Male luer taper with nickel-plated brass hub accepts, and locks in place, luer hub needles and connectors. The X-style plunger stop incorporates a 6-32 UNC female thread on the end of the stop to allow the attachment to drive arm mechanisms, such as on the Microlab 500 Series diluters/dispensers.

SL (SampleLock)

On/Off syringe valve with RN needle is cemented to a syringe barrel. Used for headspace, environmental sample collection and storage, pre-pressureization of gaseous samples for GC analysis, and sample spiking.

FN (Fixed Needle)

Found on PALSystem C-Line and X-Type autosampler syringes.

C (ChemSeal)

1/4"-28 UNF, male fitting. Used in low volume applications where system dead volumes need to be minimized.

1 Microlitre syringes, Needle Types

Point Style 2 (pst2): 12° bevelled non-coring needle point recommended for septum penetration. Ideal for gas chromatographic applications. Hamilton

1

Point Style 3 (pst3): Blunt needle point (90°) for use with HPLC injection valves. Also recommended for applications where exact dosing is required (e.g. thin layer chromatographs).

Point Style 4 (pst4): 10-12° bevelled needle point recommended for life science applications; sharp point for animal injection.

Point Style 5 (pst5): Conical needle with side port for penetration of septa, thin-gauged vinyls and plastics without coring; minimizes septum damage

Point Style AS (pstAS): Special conical style needle point (8° taper) designed to withstand the demands of multiple injections; exclusively used on GC autosampler syringes

2 Microlitre syringes, 700 series, with cemented needle (N)

With cemented needle (N, NR). NR stands for syringes with Rheodyne specified needles. Plungers are individually fitted, therefore cannot be interchanged and are not available as replacement parts. Needle length 51 mm. Hamilton

1 Microlitre syringes, 1700 series, with TLLX and gas tight

NEW

Hamilton

Glass barrel with PTFE-coated plunger and seal, and Luer lock outlet. With 6-32 UNC female thread.
Allows attachment to drive arm mechanisms, e.g. Microlab 500 Series diluters/dispensers.

Gas-tight microlitre syringe without needle. TLLX= Plunger stop fitted to prevent damage to the PTFE seal.
Prevents the plunger tip from reaching the end of the syringe.

3 Microlitre syringes Neuros™

Hamilton Neuros™ syringe technology provides unprecedented functionality for controlled injections e.g. of tissues and animals. An industry first, the Neuros™ accurately dispenses 50 nL to 100 µL of liquid through an ultrafine needle protected by a custom-designed sleeve. Developed specifically for the neurosciences, the Neuros minimizes injection site damage by increasing needle rigidity and delivering a microvolume of liquid to an exact location.

Hamilton

3

- Adjustable needle exposure of 0 to 20 mm
- Almost no dead volume
- Needle rigidity improves insertion path accuracy
- Minimal tissue damage reduces injection variability
- Reduced sample loss saves money and materials
- Fine gauge needle creates smaller injection sites
- Compatibility with most infusion pumps and stereotaxic holders means an easy integration into existing processes
- Also available as beveled 12° point (point style 4)

Needle length: 0 to 20 mm

5 | 6 GC-Syringes PAL Headspace®

HD syringe: High Dynamic plunger has been optimised for higher throughput in the headspace technique.

Hamilton

Novel metal spring allows working with enhanced tightness over a large temperature range.
Which results in increased accuracy and reproducibility of your headspace GC analysis.

HDHT syringe: Unique cement-free snap-on connection. The syringe is chemically inert and temperature stable up to 200 °C which broadens the range of possible applications.

3 Syringes BD Discardit™ II, disposable, 2-piece, PP/PE, sterile

Clear barrel for perfect visualisaion of syringe contents.

Becton Dickinson

- 2-piece syringes with Luer-Tip
- Smooth plunger movement, reduced sliding force
- Retaining ring: prevents accidental plunger rod withdrawal
- Leak-tight: Tested in compliance with ISO 7886-1
- Scale marking: accurate graduation suited to user's needs
- Design of finger grip flanges ensure stability and comfort during injection
- Ergonomically designed plunger for single-handed operation
- Barrel material: Polypropylene
- Plunger material: Polyethylene
- Plunger lubricant: Oleamide
- Colour-coded packing units
- Sterilization method: Ethylene oxide
- Silicone oil-free
- Sterile single packing, single use, latex-free, PVC-free

For pressure applications we recommend three-part syringes.

1 | 2 Disposable Syringes Omnifix® Solo, 3-piece

- Material: Polypropylene, Plunger backstop: Polyisoprene
- Plunger backstop with smooth double sealing ring for slow aspiration and injection of small sample quantities
- Highly transparent barrel with black graduations (in ml) for ideal readability, permanent marking
- Safe plunger backstop for easy aspiration to the maximum volume
- Inside siliconized
- Luer Slip to put on the needle, centric or eccentric or Luer Lock conus, centric
- Latex- and PVC-free
- Sterile, single packed
- Manufactured according to EN ISO 7886-1

2 CHROMABOND® C₁₈

Octadecyl modified silica phase for SPE, not endcapped

MACHEREY-NAGEL

Base material silica, pore size 60Å, particle size 45µm for C₁₈, specific surface 500m²/g, pH stability 2 to 8 octadecyl phases, not endcapped, carbon content 14% possesses more free silanols (SiOH), which allow secondary interactions with polar groups of the analytes.

Recommended applications: non-polar compounds, pesticides.

3 CHROMABOND® SiOH

Unmodified silica phase for SPE

MACHEREY-NAGEL

Unmodified, weakly acidic silica, pore size 60Å, particle size 45µm, specific surface 500m²/g, pH stability 2 to 8, very polar, adsorbs humidity from air, for this reason it should be kept well closed and if necessary dried before use due to its high affinity for polar compounds it should not be conditioned with polar (e.g. methanol) or water-containing solvents.

Recommended applications: aflatoxins, chloramphenicol, pesticides, steroids, vitamins.

1 CHROMABOND® HR-X

Spherical, hydrophobic polystyrene-divinylbenzene resin for SPE

MACHEREY-NAGEL

Hydrophobic polystyrene-divinylbenzene copolymer pH stability 1 to 14. High-purity material with highest reproducibility and lowest blank values due to a novel manufacturing process, spherical particles 85mm; pore size 55 to 60Å. Very high surface 1000m²/g; capacity 390mg/g (caffeine in water). Excellent recovery rates especially for the enrichment of pharmaceuticals/active ingredients due to the spherical structure of the particles, very homogeneous surface, and optimised pore structure.

Recommended applications: pharmaceuticals/active ingredients from tablets, creams and water/waste water, drugs and pharmaceuticals from urine, blood, serum and plasma trace analysis of pesticides.

3

3 CHROMABOND® XTR

Kieselguhr phase for liquid-liquid extraction

MACHEREY-NAGEL

Base material coarse-grained kieselguhr, large pore size, high pore volume, constantly high batch-to-batch quality, pH working range 1 to 13.

Application: liquid-liquid extraction of highly viscous aqueous solutions such as physiological fluids (blood, plasma, and serum) in clinical chemistry, dyes in textiles, environmental and food analysis.

Glass columns available on request.

2 CHROMABOND® C₁₈ ec

Octadecyl modified silica phase for SPE, endcapped

MACHEREY-NAGEL

Base material silica, pore size 60Å, particle size 45µm for C₁₈ ec, 100µm for C₁₈ ec f (for fast flow), specific surface 500m²/g, pH stability 2 to 8. Octadecyl phases, endcapped, carbon content 14% very non-polar, hydrophobic interactions with a wide variety of organic compounds. Advantageous for clean-up of samples with large structural variations (polarity differences).

Recommended applications: non-polar compounds, aflatoxins, amphetamines, antibiotics, antiepileptics, barbiturates, caffeine, drugs, preservatives, fatty acids, nicotine, PAHs, pesticides, PCBs, heavy metals, vitamins. Very well suited for desalting of samples.

3 CHROMABOND® NH₂/C₁₈

Combination phase for SPE analysis of PAH from water containing humic acids

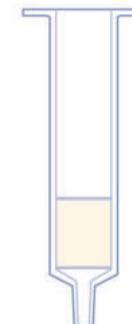

MACHEREY-NAGEL

Special combination phase: aminopropyl phase for removal of interfering humic acids, octadecyl phase for enrichment of PAH.

Recommended application: PAH from water containing humic acids.

Capacity ml	Capacity ml / mg	PK	Cat. No.
6	500 / 500	30	6.228 257
6	500 / 1000	30	4.003 675

Glass columns available on request.

4 CHROMABOND® SB

Quaternary ammonium modified silica anion exchanger for SPE (SAX)

MACHEREY-NAGEL

Base material silica, pore size 60Å, particle size 45µm, specific surface 500m²/g, pH stability 2 to 8. Silica modified with quaternary amine. Strongly basic anion exchanger (capacity ~ 0.3meq/g). Not suited for very strong anions such as sulphonlic acids, because these are difficult to elute.

Recommended application: organic acids, caffeine, saccharin.

BIGpacks: 4.003 487

1

1 CHROMABOND® Easy

Polar modified polystyrene-divinylbenzene copolymer with a weak anion exchanger

MACHEREY-NAGEL

Specific surface 650 to 700 m²/g, particle size 80 µm, pore size 50 Å, pH stability 1 to 14. Due to bifunctional modification much more hydrophilic than conventional polystyrene-divinylbenzene polymers and thus easily wettable with water.

Recommended applications: polar herbicides/pesticides from water (acidic, neutral, basic), polar phenols from water, polyaromatic compounds, polychlorinated biphenyls, drug analysis from urine, blood, serum, plasma pharmaceuticals/active ingredients from tablets, creams.

Due to the bifunctional modification CHROMABOND® Easy is considerably more hydrophilic than conventional polystyrene-divinylbenzene polymers and thus easily wettable with water. The Easy effect: Aqueous samples can be loaded directly without preconditioning! This means that little or even no conditioning is needed, in contrast to standard SPE materials, where recovery rates normally decrease, in the worst case down to zero! Depending on the separation task conditioning may be required and is recommended for method development. A positive side effect of the excellent wettability: there is no decrease of recovery rates, if the cartridge runs dry, therefore automation is easier or, in some cases compared to silica materials, only feasible with CHROMABOND® Easy, because a permanent vacuum can be used without supervision.

Further advantages of using a polymeric material:

- high surface, this means very high binding capacity (2 - 5 times higher than silica-based adsorbents)
 - less adsorbent is needed in the cartridge (without losing sensitivity or recovery)
 - faster analysis, because the height of the adsorbent bed can be reduced
 - acidic or basic solvents (e. g. TFA) do not destroy the phase, or lead to unintended side products
- Because of the polar modification the material is suitable for a broad range of compounds (acidic, neutral, basic, polar and nonpolar substances). Highly reproducible recovery rates can be obtained, even if the cartridge runs dry (especially advantageous when using 96-well plates, where stopcocks are not available!)

1 Copure® QuEChERS extraction kits

NEW

1

Extraction and clean-up mixtures for sample preparation in the pesticide analysis of vegetable foodstuffs according to EN 15662 using GC/MS or LC/MS after acetonitrile extraction and purification using the dispersive SPE-QuEChERS method.

The samples are first extracted with Mix A. Purification is done with one of the following mixtures:

- **Mix B** (Clean-up mixture for fruits and vegetables with low fat content, e.g. apples, strawberries)
- **Mix C** (Clean-up mixture for fruits and vegetables with high fat content, containing oil/wax, e.g. avocados)
- **Mix D** (Clean-up mixture for moderately chlorophyll/carotenoid-containing fruits and vegetables, e.g. carrots, salad)
- **Mix E** (Clean-up mixture for fruits and vegetables with high chlorophyll/carotenoid content, e.g. sweet peppers, spinach)

If required, add ceramic homogenising beads for better mixing.

- **Mix A contains a bag with the required amount of mixture and a 50 ml empty tube**
- **Mix B, C, D and E are pre-weighed into a 15 ml tube**

Type	Capacity ml	Composition	PK	Cat. No.
Mix A	50	4 g MgSO ₄ , 1 g NaCl, 1 g Trisodium citrate, 0.5 g Disodium citrate	50	4.669 294
Mix B	15	0.15 g PSA, 0.9 g MgSO ₄	50	4.669 295

Ceramic homogenising beads			100	4.669 299

2 SPE phases for food analysis

QuEChERS method and pre-mixes

Within a few years after its development by Anastassiades et al. the QuEChERS method has gained a leading position for determination of pesticide residues in food by GC-MS or LC-MS allowing rapid and cheap clean-up of strong matrix-contaminated samples.

Standard clean-up of food samples

10 g sample are homogenised with 10 ml acetonitrile. After adding the internal standard the sample is shaken with 4 g MgSO₄ and 1 g NaCl and afterwards centrifuged. 1 ml of the supernatant is spiked with 25 mg CHROMABOND® Diamino and 150 mg MgSO₄ and shaken again. After centrifugation the supernatant is injected into the GC/MS.

3 CHROMABOND® QuEChERS extraction buffer mixes/clean-up mixes

3

Extraction mixtures for sample preparation for determination of pesticides in food samples.

MACHEREY-NAGEL

MACHEREY-NAGEL offers a number of individually weighed and pre-mixed buffers and extraction mixtures, specially composed for different sample matrices.

Mix I and Mix II are extraction mixtures, Mix III to Mix VI are clean-up mixtures.

The food samples will be extracted with either Mix I or Mix II.

Afterwards they will be purified with one of the following mixtures:

- Mix III (samples with low fat content; e.g. apples, strawberries),
- Mix IV (moderate content of chlorophyll and carotenoids; e.g. carrots, lettuce),
- Mix V (high content of chlorophyll and carotenoids; e.g. bell peppers, spinach),
- Mix VI (high fat content; e.g. avocados).

Every mix is prepacked in a 15 ml centrifuge tube. Pack of 50 pieces.

Description	Capacity ml	Composition	PK	Cat. No.
Mix I Citrat-Extraction-Mix	15	4g MgSO ₄ , 1g NaCl, 0.5g Na ₂ H citrate 1.5 H ₂ O, 1g Na ₃ citrate, 2 H ₂ O	50	4.003 824
Mix II Acetat-Extraction-Mix	15	6g MgSO ₄ , 1.5g Na acetate	50	4.003 825
Mix III Diamino Clean-up Mix	15	0.15g CHROMABOND® Diamino with 0.9g MgSO ₄	50	4.003 826
Mix IV Diamino/Carbon Clean-up Mix	15	0.15g CHROMABOND® Diamino with 0.9g MgSO ₄ and 15mg Carbon	50	4.003 827
Mix V Diamino/Carbon Clean-up Mix	15	0.15g CHROMABOND® Diamino with 0.9g MgSO ₄ and 45mg Carbon	50	4.003 829
Mix VI Diamino/C ₁₈ ec Clean-up Mix	15	0.15g CHROMABOND® Diamino with 0.9g MgSO ₄ and 150mg C ₁₈ ec	50	4.003 828

Chemical compatibility of filter materials

The following table lists the chemical compatibility of our CHROMAFIL® materials. The chemical compatibility depends on several parameters such as time, pressure, temperature and concentration.

In most cases, CHROMAFIL® filters will have only short contact with a solvent. In these cases they may be used despite of limited compatibility.

For example, a PTFE filter with PP housing does not liberate any UV-detectable substances during filtration of 5 ml THF, although PP shows only limited resistance towards THF.

Solvent	MV	CA	RC	PA	PTFE	PVDF	PES	PET	GF	PP

1 LLG-Syringe Filters SPHEROS

Cost-effective syringe filters for filtration of a broad variety of solvents and aqueous or inorganic solutions. These syringe filters cover most applications in HPLC, pharmaceutical, environmental, biotechnology, and food and beverage testing laboratories.

- Robust Polypropylene housing
- Multifunctional syringe filters with female Luer-Lock inlet and male Luer-Slip outlet
- Suitable for all syringes with Luer connection
- Sterile or non-sterile
- Sterile products in individual hard blister packaging and dispenser box

1

2 3 LLG Syringe Filters SPHEROS, Cellulose Acetate

Hydrophilic membrane for filtration of aqueous liquids. Low protein binding capacity. Especially suitable for biological macromolecules, water soluble oligomers and polymers. With female Luer-Lock inlet and male Luer-Slip outlet. Sterile products in individual hard blister packaging and dispenser box.

2

4 LLG Syringe Filters SPHEROS, PES

Hydrophilic membrane for aqueous and polar organic solutions with low protein binding capacity. Especially suited for sterile filtration of solutions and media in cell culture as well as for ion chromatography and organic acids. With female Luer-Lock inlet and male Luer-Slip outlet. Sterile filters individually packed in a hard blister package.

LLG-Syringe Filters

We offer a line of syringe filters especially designed to provide efficient filtration of a broad variety of fluids, solvents, aqueous or inorganic solutions. Our syringe filters cover most applications in HPLC, pharmaceutical, environmental, biotechnology and food and beverage testing laboratories.

- Housing injected in Polypropylene or MABS
- Multifunctional Syringe filters equipped with Luer-Lock connections on both sides or female Luer-Lock input and male Luer-Slip output
- Suitable for all syringes with Luer connection
- Pre-sterilised or non-sterile
- Sterile products in individual hard blister
- Superior pressure stability

1 | 2 | 3 LLG Syringe Filter CA, Cellulose acetate

Hydrophilic membrane for filtration of aqueous solutions.

This membrane features excellent shape stability in aqueous solutions and a very low binding capacity for proteins (21 μ g per 25 mm Filter). Ideal for use with biological macromolecules, water soluble oligomers and polymers. With Luer-Lock input and Luer-Lock or Luer-Slip output.

4

4 LLG Syringe Filter NY, Nylon/Polyamide

This is a rather hydrophilic membrane; it is recommended for filtration of aqueous and organic/aqueous medium polar liquids.

Excellent chemical compatibility with esters, bases and alcohols. With Luer-Lock input and Luer-Slip output.

Type	Filter diam.	Pore size	Housing	PK	Cat. No.

2 Tubing, PEEK

For use in LC, LCMS and automation technology. The polyetheretherketone (PEEK) tubing are a flexible alternative to stainless steel tubing in high pressure applications.

Trajan Scientific

The tubing are color coded to industry standards for easy identification of the inner diameter.

They are inert to most commonly used solvents. Exceptions are very caustic reagents, strong acids and bases.

- Smooth inner surface
- Good chemical resistance
- Bio-inert and biocompatible
- Operating temperature up to max. 100 °C
- Pressure stable up to 480 bar (7000 psi, 48000 kPa)

4 HPLC column thermostat Jetstream II Plus

Peltier heating/cooling thermostat with a temperature range of 5-85 °C. Big compartment room for 4-5 HPLC columns with a length of 350-400 mm as well as space for valves, precolumns and column switch valves. Programmable via alphanumeric keyboard or RS 232 interface. The temperature control allows isothermal steps and linear gradients for up to 99 temperatures. With two-way forced-air circulation and double sensor reference technology, that means very good temperature distribution, temperature stability and repeatability.

VDS optilab

- For horizontal and vertical use
- Independent from room temperature due to Peltier elements
- Autocalibration and temperature correction via keyboard
- Permanent display of set/actual temperature
- Safety switch-off for thermal protection of the columns, selectable sensitivity
- Leak detector with acoustic warning signal and device switch-off, selectable sensitivity
- Continuous monitoring of all functions with overload protection
- LCD display

Specifications

Operating temperature range:	5 ... 85 °C
Temperature accuracy:	±0.5 K
Temperature stability:	±0.15 K
Temperature gradient:	1 K/2 min
Dimensions (W x H x D):	135 x 450 x 310 mm
Weight:	11 kg
Power supply:	100 ... 245 V, 50/60 Hz

14. Chromatography

Liquid chromatography/HPLC-Accessories

GENERAL CATALOGUE EDITION 21

1 Sample Concentrators SBHCONC/1

A sample concentrator is a fast and convenient way of concentrating multiple samples in a block heater at once. Utilising a simple gas delivery system the sample concentrator passes an inert gas over the surface of the samples via stainless steel needles. This in combination with the heat from the block heater below produces ideal conditions for fast, efficient evaporation.

- Gas reservoir located on adjustable stand for accurate height control
 - Needles available with 76 and 127 mm length
 - Needles available with PTFE-coating for corrosive solutions
 - Compatible with Stuart SBH130D/3 and SBH200D/3 Block heaters

Scope of supply: Gas reservoir and stand

Please order Dry block, inserts and needles separately.

Type	PK	Cat. No.

2 Silica adsorbents for low pressure column chromatography

Standard silica 60, pore size ~ 60 Å; pore volume ~ 0.75 ml/g; spec. surface BET ~ 500 m²/g, *MACHEREY-NAGEL* highly porous, amorphous silicic acid in the form of hard, opalescent particles, prepared by precipitation of water glass with sulphuric acid. Silica FIA for the fluorescence indicator adsorption procedure for the determination of hydrocarbon groups in the testing of liquid fuels in accordance with DIN 51791 and ASTM D 1319-58T. The FIA method determines saturated hydrocarbons, olefins and aromatic hydrocarbons of a sample chromatographically by adsorption and desorption in a column filled with FIA silica, in the presence of a fluorescent dye mixture. Further silica adsorbentson request.

1 HPLC bottles, DURAN® complete system 4-port screw cap

DWK Life Sciences

For sterile transfer of media or for feeding solvent to HPLC instruments. The bottle is pressure/vacuum resistant from -1 to +1.5 bar (tested by TÜV in accordance with EN 1596, GS marked). Complete with a 4-port screw cap (autoclavable, reusable) made from PP, 4 connection screw caps (black, M8 thread) and silicone seal. Suitable for tube diameters of 1.6mm and 3.2mm. Spare parts are available individually. Further connection system components for the GL45 thread are available upon request (Tubing not included). Neutral/Type I glass acc. to USP/EP. With Retrace Code (Batch Identification), with certificate available via the internet. Autoclavable.

Capacity ml	PK	Cat. No.
500	1	9.072 526
1000	1	9.072 525

2 HPLC reservoir bottles DURAN®, borosilicate 3.3 glass, with conical base

DWK Life Sciences

The DURAN® reservoir bottles have been designed for use in high-performance liquid chromatography (HPLC) and allows longer, uninterrupted analyses. A central cavity in the bottom of the bottle allows mobile phases and solvents to be dispensed without tilting the bottle. Side vent hole in the base for ultrasonic bath degassing, or water drainage after cleaning. Screw caps HPLC (PTFE, GL 45, 3 ports) available as accessories.

- GL 45 Thread
- ISO 3585
- Type I neutral glass, by USP/EP
- With Retrace Code and certificate for manufacturing lot traceability
- Available in four sizes: 1, 2, 5, or 10 Litres
- 5 and 10 litre bottles can accommodate magnetic stirring bars
- Durable white enamel volume gradations
- Autoclavable at 121°C or 134°C

3 4 Flexible connecting system for DURAN® GL 45 flasks

DWK Life Sciences

For safe transfer of liquid media within a closed and sterile system (evaporation is reduced).

- Screw closure GL 45 with two, three or four ports GL 14 thread
- Autoclavable
- Temperature resistant up to max. 140 °C
- Flexible modular system
- Sterile pressure equalisation is possible through use of a membrane filter
- Unused ports can be provided with a blind cap

Description	PK	Cat. No.

2 | 3 SafetyCaps Generation 2.0 for HPLC solvent supply

Maximum safety for HPLC solvent supply. The integrated air valve (B) blocks hazardous vapours and cleans the inflowing air (M) from dust and dirt particles.

S.C.A.T.

- Protection against escaping solvent vapours
- Solvents (L) und and mixtures remain clean and stable
- No twisted tubing, easy container exchange
- No air intake in to the HPLC system
- Reproducible analytical results through stable mobile phase
- Use the supplied blind plugs to tighten connections which are temporarily inactive or not in use
- Air valve (B) with PTFE filter (G) and Luer-Lock adapter (A)
- Valve membrane (H) optimized for analytical and preparative flow rates
- Improved PFA fittings (C)
- Body (D/I) made of medical grade PTFE, food safe, FDA conform
- Screw cap (F) made of PPS, autoclavable/sterilisable up to 200 °C
- PTFE and PPS with excellent chemical resistance and flammability classification V-0 (UL-94)
- Insertion label (E) for individual inscription
- Improved FKM seal (J) for stable fit on any bottle
- Improved ergonomics and construction (K)

4 SafetyCaps Generation 2.0, GL 45

Safe solvent supply. With integral air filter vent. For maximum efficiency, we recommend that the vent is changed every 6 months. The filter membrane absorbs dust and dirt particles to protect your solvent reservoirs. The vent is universally suitable for all SafetyCaps. It also works with your current SafetyCaps, simply replace the old vent with the new one.

7 SafetyWasteCaps for HPLC waste

Collect fluid waste safely for protection of health and environment: SafetyWasteCaps block hazardous solvent vapours and provide safe pressure equalisation within the waste container. Due to high end materials, the caps are chemically resistant even against aggressive organic solvents.

S.C.A.T.

- The exhaust filter (A) catches escaping solvent vapours (B)
- The active carbon (C) provides an active filtering surface of 1.200m²/g - optimised for solvent vapours
- Pre-filter (D) for optimised air flow
- Afterfilter (E) provides safe enclosure and keeps the filter clean
- Tubing and capillaries remain safely fixed (F)
- No twisted tubing, freely rotatable cap enables easy container exchange (G)

5

9.139 867

- Body (H) made of medical grade PTFE, food safe, FDA conform
- Screw cap (G) made of PPS, autoclavable/sterilisable up to 200 °C
- PTFE and PPS material provides excellent chemical resistance and flammability classification V-0 (UL-94)
- Improved FKM seals (I) for maximum tightness
- Improved PFA fittings (F)
- Improved ergonomics, stable construction

6

6.314 960

Further thread sizes and configurations are available on demand. Fittings for capillary/tubing connections are included in delivery. Please choose a filter size and order your exhaust filter separately (see chapter "Exhaust Filters for SafetyWasteCaps").

1 | 2 Exhaust filters for SafetyWasteCaps 2.0

The exhaust filter cleans the exhaust air of the HPLC waste containers. It protects operators and environment from harmful solvent vapours. The S.C.A.T. active carbon is optimised to adsorb organic solvents, and offers an active filtering surface of 1200 m²/g. The splash guard avoids contamination of the filter by dripping or spilled liquids. Depending on the required capacity, 3 different filter sizes with different service lifes are available.

2 SafetyWasteCaps with mechanical level control

The red floater is immediately visible when the container has reached the critical fill level.
Perfect for canisters of opaque material, where the fill level is not visible from the outside.

S.C.A.T.

- Approved S.C.A.T. technology of the SafetyWasteCaps
- Different thread sizes
- Connections for capillaries and tubings
- Mechanical or electronic (E) level control
- With connection for S.C.A.T. exhaust filters

**Please choose a filter size and order your exhaust filter separately
(see chapter "Exhaust filters for SafetyWasteCaps").**

Further thread sizes are available on request.

Collectors for tube connector for SafetyWasteCaps

Collectors for additional parts to add more tubings and capillaries. Delivered with fittings.
Further configurations available on request.

S.C.A.T.

Description	Material	PK	Cat. No.
3 x connectors (90°) for 3 capillaries diam. 2.3/3.2mm o.d.	PTFE/PFA/PP	1	9.139 888

5 Inlet filter for solvents

HPLC solvent filters for 3.2mm OD tubing.

S.C.A.T.

Description	PK	Cat. No.
HPLC solvent filter, PP, for 1/8" dia. (3.2mm o.d.)	5	4.005 890
HPLC solvent filter, PFA/PTFE, for 1/8" (3.2mm o.d.)	5	4.005 891

6 Flanged Tubing, PTFE, PA

Flanged PTFE tubing with black tube end fittings UNF 1/4" 28 G made of PP and washers
made of PA. The tubing is ready for use. Temperature resistant from 0 to +100 °C,
pressure resistant up to 30 bar, universal chemical resistance.

7 8 Multiple bottle distributors, HDPE

The S.C.A.T. system for solvent safety remains permanently closed, the "safety chain" is not interrupted during the rinsing process of the HPLC system. After the analysis has been completed, the system is cleanly returned to its original state.

S.C.A.T.

- Up to 4 SafetyCaps can be installed on the rinsing bottle
- Simple and safe handling due to firmly seated capillaries
- GLS 80 (w) thread
- 4 x GL 45 (m) connections
- Electrically conductive

Connections	Material	PK	Cat. No.
4 x GL 45	HDPE	1	4.665 768

1 Hydrogen generator Precision Hydrogen SL

NEW

The smallest hydrogen generator from the Precision Hydrogen SL line, safely and continuously produces laboratory-grade hydrogen, with a purity of 99.9995 %, for GC-FID. This generator comes in a choice of manual water fill, auto water fill or with pressurised water fill.

- Minimal hydrogen storage in the system
- Very low maintenance requirements
- Auto-shutdown fail-safe

Specifications

Purity:	99.9995 %
Max. pressure:	6.9 bar
Required water quality:	<1.0 µS/cm
Gas connection:	1 x 1/8" Swagelok compression fitting
Permissible ambient temperature:	10 ... 35 °C
Dimensions (W x D x H):	160 x 355 x 250 mm
Weight:	8.0 kg
Power supply:	100 ... 240 V, 50/60 Hz
Warranty:	2 years

2 Hydrogen generators Precision Hydrogen

NEW

For the safe and continuous production of hydrogen with a purity of 99.9995% for GC and GC/MS.

Peak Scientific

- On-demand generation of high-purity hydrogen as detector gas for the FID
- Compact, modular and stackable system
- Hydrogen production from deionised water using proton exchange membrane
- Internal leakage detection with automatic switch-off function
- Minimal hydrogen storage in the system
- Front LED touch screen with status display
- Can be individually combined with PEAK zero nitrogen and zero air systems
- Systems are available with different flow rates
- Very low maintenance requirements
- 3 years warranty on the hydrogen cell

Scope of supply: Hydrogen generator, 1 m Tygon® tubing, Deioniser column refill, barbed hose fitting, mains power cable for EU, UK and US, 2 x transit plugs

Specifications

Purity:	99.9995 %
Max. pressure:	6.9 bar/100 psi
Required water quality:	<1.0 µS/cm
Gas connection:	1/8" Swagelok
Permissible ambient temperature:	10 ... 35 °C
Dimensions (W x D x H):	380 x 540 x 406 mm
Power supply:	110/230 V, 50/60 Hz
Warranty:	3 years (cell)/1 year (device)

Type	Flow rate L / min.	Weight kg	PK	Cat. No.

1 Nitrogen generators Precision Nitrogen

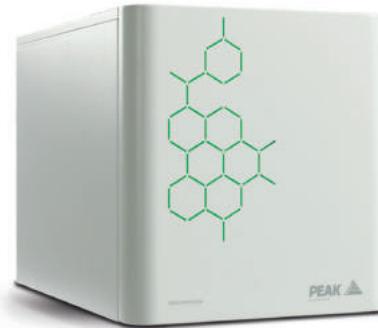

1

Peak Scientific

Nitrogen generators for the GC. For safe and continuous production of nitrogen with a purity of 99.9995%.

- On-demand generation of nitrogen as purge gas and for sample preparation in standard analyses
- Compact, modular and stackable system
- Constant and uniform supply for reliable and reproducible analyses
- Can be individually combined with PEAK hydrogen and zero air generators
- No contamination of the system
- Very fast start time and rapid achievement of the required operating purity
- Available with different flow rates
- Generator for headspace requirements available, compatible with most headspace samplers
- Very low maintenance requirements

Scope of supply: Nitrogen generator, 1 m PTFE tubing, 1/4" compression fitting, 1/8" compression fitting, mains power cable for EU, UK and US

Specifications

Purity:	99.9995 %
Gas connection:	1/4"
Permissible ambient temperature:	5 ... 35 °C
Dimensions (W x D x H):	380 x 540 x 256 mm
Power supply:	110/230 V, 50/60 Hz
Warranty:	1 year

Type	Flow rate L / min.	Pressure max. bar	Weight kg	PK	Cat. No.

Precision Nitrogen 1000	1.00	5.5 (80 psi)	26	1	4.669 269

2 Zero Air generators Precision Zero Air

2

Peak Scientific

Generates clean, dry and hydrocarbon-free air for FIDs in GC.
Also meets the purity requirements for trace analysis.

- Fail-safe, continuous generation of zero air
- Hydrocarbon content <0.05 ppm
- Modular design and combination option with other PEAK Precision devices
- Minimal maintenance
- No replacement of the catalyst chamber required
- Compatible with the Precision Air Compressor
- Status display

Scope of supply: Zero air generator, 3 m PTFE tubing, 1/4" compression fitting, 1/8" compression fitting, mains power cable for EU, UK and US

Specifications

Hydrocarbon content:	<0.05 ppm
Permissible ambient temperature:	5 ... 35 °C
Power supply:	110/230 V, 50/60 Hz
Warranty:	1 year

1 Air compressor for GC

Peak Scientific

For compressed air supply of Precision nitrogen and zero air generators for the GC.

- For simultaneous supply of nitrogen and zero air generators in one stack
- Can be stacked and combined with all Precision modules
- Very quiet and low-vibration operation
- With maintenance and repair status displays

Scope of supply: 3 m PTFE tubing, 2 x 1/4" compression fitting, 1/4" tee compression fitting, 2.5 mm hex key, mains power cable for EU, UK and US

Specifications:

Max. pressure:	8.27 bar/120 psi
Gas connection:	1/4"
Permissible ambient temperature:	5 ... 35 °C
Dimensions (W x D x H):	380 x 540 x 406 mm
Weight:	42 kg
Power supply:	208 ... 230 V, 50/60 Hz
Warranty:	1 year

Precision Air Compressor	1	4.669 286

2

2 Gas chromatography flow meter GF500

Convenient digital flow meter for the simple, accurate and repeatable measurement of flow in gas chromatographs. User friendly, handy design. Can be used with the carrier gases Air, Hydrogen, Nitrogen, Helium, Carbon dioxide, Argon and Argon/Methane.

Carl Stuart Limited

OLED display shows flow rate and further information. With pressure and temperature compensation. Suitable for columns with diameters of 100, 180, 200, 250, 320, 450, 530 and 750 µm.

- Measurement of flow rate, linear velocity and split ratio
- High resolution
- 25 point calibration, traceable to National Standards
- Rechargeable battery
- Auto power off

Scope of supply: Flow meter with case, tubings, tubing adapter fittings, tubing clips, tie-wraps, universal charger with USB connector, operation manual, calibration certificate.

Please order adapters for direct connection to the detector separately.

Specifications

Range:	0...500 ml/min. (0...300 ml CO ₂)
Accuracy:	0.4 ml/min./±2.5 %
Resolution:	0.1 ml/min.
Operating temperature:	15...35 °C, calibrated at 21±2 °C
Inlet pressure:	max. 175 kPa
Dimensions:	68 x 30 x 130 mm
Weight:	150 g

Type	PK	Cat. No.
GF500 flow meter set	1	4.661 928

1 Gas chromatography flow meter GF1000

Carl Stuart Limited

Very robust, portable device for measuring the flow rate of gas chromatographs and for calibrating air sampling canisters. Measurement is performed in real time, allowing simultaneous flow and pressure measurement to improve validation efficiency. Reduces downtime.

- For real-time measurement of more than 30 common gases over a wide range
- Check the volume flow, mass flow, pressure and temperature at the inlet and detector outlet of the GC
- Flow calibration with NIST-traceable accuracy
- Immediately ready for use after switching on, measurement completed within 20 seconds
- Fast response time of 10 ms
- TFT display
- RS232 interface for data transfer
- 18 hours battery life

Scope of supply: GC flow meter, hard-shell carrying case, spare tubings, tubing connector fittings, power supply with adapters for EU, UK, CH and US

Specifications

Range:	0.1 ... 1000 ml/min
Accuracy:	±0.8 % of reading, 0.2 % of full scale
Resolution:	0.1 ml/min
Turn-down Ratio:	200:1
Operating temperature:	-10 ... 60 °C
Inlet pressure:	max. 1000 kPa (145 psi)
Dimensions:	60 x 170 x 24 mm
Weight:	450 g

Type	PK	Cat. No.
GF1000 flow meter set	1	6.276 103

2 Gas filters

Tajan Scientific

Gas filters are an essential part of GC analysis as contaminants in gases can significantly impact the quality of results. Oxygen, hydrocarbons and moisture can lead to problems such as noisy baselines, moisture entering the GC column and excessive bleed.

The gas filter kit consists of a gas filter and a connection unit.

- Fast stabilization times
- The gas filter system consists of two key parts: the filters and the connecting unit
- The connecting unit has inlet and outlet connectors for the gas lines
- The connecting unit can be bench or wall-mounted
- Can be used in combination with other filters
- Indicator color change tells you when to change your filter

Type	Description	PK	Cat. No.
Gas filter carrier gas	Removes water, oxygen and organic compounds	1	4.676 268
Gas filter moisture	Removes water, oil and other foreign material	1	4.676 270
Gas filter oxygen	Removes oxygen as well as traces of sulfur and chlorine compounds	1	4.676 271
Kit gas filter carrier gas	Removes water, oxygen and organic compounds, incl. connection unit	1	4.676 269

3 Gas filters big trap

Tajan Scientific

Gas filters are an essential part of your GC analysis as contaminants in gases can significantly impact the quality of results. Oxygen, hydrocarbons and moisture can lead to problems such as noisy baselines, moisture entering the GC column and excessive bleed.

- Heavy-walled aluminium tube
- High capacity filters
- Sintered stainless steel frits prevent particulate contamination

Specifications

Volume:	750 cm ³
Pressure rating:	up to 17.2 bar

Universal	1	4.676 267

1 Optima® WAX capillary columns for GC

polyethylene glycol 20000 daltons

MACHEREY-NAGEL

USP G16

polar phase

recommended for solvent analysis and alcohols

suitable for aqueous solutions

similar phases: Premabond® CW 20 M, DB-Wax, Supelcowax, HP-Wax, HP-INNOWAX, Rtx-Wax, CP-Wax 52 CB, Stabilwax, 007-CW, BP20, AT-Wax, ZB-Wax

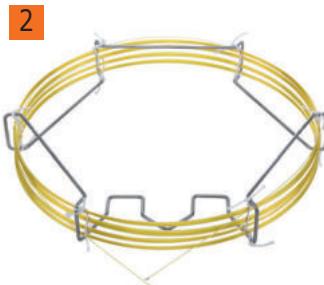

max. temperature for isothermal operation 240°C, max. temperature for short isotherms in a temperature programme: 250°C, for 0.53 mm ID columns the max. temperatures are 220 and 240°C, resp.

Int. diam. mm	Ext. diam. mm	Film thickness μm	Length m	PK	Cat. No.

0.53	0.8	2.00	30	1	4.003 174

Custom-made columns to your specifications available on request.

Each column is individually tested and supplied with test certificate and test chromatogram, but without fittings or ferrules.

Column ends are melted or closed with septa. Additionally, we supply the corresponding test mixture with each column.

2 OPTIMA® 5 MS Accent capillary columns for GC

silarylene phase

MACHEREY-NAGEL

- With polarity similar to a 5 % diphenyl -95 % dimethylpolysiloxane phase.

- USP G27, G36

- Lowest column bleed, nonpolar phase, ideal for ion trap and quadrupol MS detectors solvent rinsing for removal of impurities applicable

- Application areas: all-round phase for environmental analyses, trace analyses, EPA methods, pesticides, PCB, food and drug analyses

similar phases: DB-5 MS, HP-5 MS, Ultra-2, Equity-5, CP-Sil 8 CB low bleed/MS, Rtx-5SIL-MS, Rtx-5 MS, 007-5 MS, BPX5, MDN-5S, AT-5 MS, VF-5 MS

Max. temperature for isothermal operation: 340 °C,

Max. temperature for short isotherms in a temperature programme: 360 °C

for columns with film thicknesses > 5.5 μm the max. temperatures are 320 and 340 °C

Int. diam. mm	Ext. diam. mm	Film thickness μm	Length m	PK	Cat. No.
0.25	0.4	0.25	30	1	4.003 017
0.25	0.4	0.50	30	1	4.003 019

0.32	0.5	0.25	30	1	4.003 009
0.32	0.5	0.50	30	1	4.003 013

Each column is individually tested and supplied with test certificate and test chromatogram, but without fittings or ferrules. Column ends are melted or closed with septa, and thus protected from atmospheric oxygen.

Additionally, we supply the corresponding test mixture with each column.

3 Capillary columns GC BPX70

70% Cyanopropyl Polysilphenylene-siloxane. Able to be solvent rinsed.

Trajan Scientific

Industry standard column for fatty acid methyl esters, carbohydrates, pharmaceuticals, GC/MS applications. Suitable alternative to: DB-23, Rtx-2330, SP-2330, CP-Sil 88, SP2380, HP-23.

Int. diam. mm	Length m	Film thickness μm	Temp. range °C	PK	Cat. No.

2

2 Silylation reagents - MSTFA

MACHEREY-NAGEL

N-methyl-N-trimethylsilyl-trifluoroacetamide
m.w. 199.1, Bp 70°C (75mm Hg), density d20°/4° = 1.11
MSTFA: R' = CF₃, R" = CH₃

the most volatile trimethylsilyl amide available
very strong TMS donor which does not cause any noticeable fouling of the FID burning chamber even after long-time measuring series. The already good solution characteristics can be improved by addition of submolar quantities of protic solvents (e.g. TFA for extremely polar compounds such as hydrochlorides) or pyridine (e.g. for carbohydrates).

H phrases: H226|H302|H315|H319

Description	Capacity ml	PK	Cat. No.
MSTFA	1	20	7.055 892
MSTFA	10	1	6.704 091
MSTFA	10	5	6.085 475
MSTFA	50	6	6.227 450
MSTFA	100	6	4.001 493

Due to their purpose, derivatisation reagents are very reactive substances. For this reason they should be stored cool and protected from moisture. The derivatisation reagents are supplied in vials with crimp caps for easy access with a syringe. Vials with pierced sealing disks have limited stability and should be used soon.

3

3 | 4 Silylation reagents - BSTFA, SILYL-991

MACHEREY-NAGEL

N,O-bis-trimethylsilyl-trifluoroacetamide
m.w. 257.4, Bp 40°C (12mm Hg), density d20°/4° = 0.961

BSTFA: R = CF₃ powerful trimethylsilyl donor with approximately the same donor strength as the non-fluorinated analogue BSA

advantage of BSTFA over BSA: greater volatility of its reaction products (particularly useful for GC of some lower boiling TMS amino acids).

BSTFA is nonpolar (less polar than MSTFA), and can be mixed with acetonitrile for improved solubility. For silylating fatty acid amides, hindered hydroxyls and other compounds, which are difficult to silylate (like secondary alcohols and amines), we recommend BSTFA + 1% trimethylchlorosilane (TMCS), available under the designation SILYL-991.

H phrases: H226|H315|H319

Description	Capacity ml	PK	Cat. No.
BSTFA	1	20	4.001 486
BSTFA	10	1	6.803 320
BSTFA	10	5	4.001 487
SILYL-991 (BSTFA - TMCS (99:1))	1	20	4.001 511
SILYL-991 (BSTFA - TMCS (99:1))	50	1	4.001 510

Due to their purpose, derivatisation reagents are very reactive substances. For this reason they should be stored cool and protected from moisture. The derivatisation reagents are supplied in vials with crimp caps for easy access with a syringe. Vials with pierced sealing disks have limited stability and should be used immediately.

GC Septa

High performance septa, suitable for injector temperatures up to 320 °C.

La-Pha-Pack

4.668 494

4.668 495

- Good penetration and re-sealing properties (low fragmentation)
- Long lifetime
- Ultra low bleeding
- Ready to use, no further pre-treatment necessary
- No sticking to hot surfaces, easily exchangeable
- Standard dimensions for all common gas chromatographs
- For other gas chromatography models on request

Diam. mm	For	PK	Cat. No.

1 Septa for Agilent GC

All Septa are made with a high grade silicone material to minimize needle coring. *Trajan Scientific*
 These new materials meet or exceed industry standards, giving you reassurance in the quality
 of your work. All of these Septa are durable with excellent resealing properties and excellent solvent resistance.

GP = General Purpose Silicone Septa for non-demanding routine applications up to 200°C.
 EC = High Temperature Silicone Septa, for significantly longer injection life, low bleed and low injection port adhesion.
 MN = High Temperature Premium Silicone Septa for autosamplers, up to 400 injections per septum.
 HT = BTO Silicone Septa, Bleed and temperature optimized, combined with outstanding mechanical properties.

1

Also available: Septa for instruments from Perkin-Elmer, Shimadzu, Thermo and Varian/Bruker.

Ready-to-use layers for TLC

Support materials for TLC ready-to-use layers

Glass plates: glass, ~ 1.3 mm thick, high requirements for weight, packaging and storage, ideal torsional strength, high temperature stability, susceptible to breakage, can not be cut with scissors, high resistance against solvents, mineral acids and conc. ammonia, suitability for aqueous detection reagents depends on the phase

POLYGRAM®: polyester, ~ 0.2 mm thick, low requirements for weight, packaging and storage, low torsional strength, max. 185°C temperature stability, not susceptible to breakage, can be cut with scissors, high resistance against solvents, mineral acids and conc. ammonia, very suitable for aqueous detection reagents

ALUGRAM®: aluminium, ~ 0.15 mm thick, low requirements for weight, packaging and storage, relatively high torsional strength, high temperature stability, not susceptible to breakage, can be cut with scissors, high resistance against solvents, low resistance against mineral acids and conc. ammonia, limited suitability for aqueous detection reagents

SIL G unmodified standard silica layers for TLC, glass plates/ POLYGRAM®

1

MACHEREY-NAGEL

Glass plates, POLYGRAM®, ALUGRAM®

- Silica 60
- Specific surface (BET) ~500 m²/g
- Mean pore size 60 Å
- Specific pore volume 0.75 ml/g
- Particle size 5 to 17 µm
- Standard grade
- Thickness of layer for analytical plates 0.25 mm, for preparative plates 0.5 and 1 mm
- For 2 mm preparative layers a slightly coarser material is used, indicators: manganese activated zinc silicate with green fluorescence for short-wave UV (254 nm)
- Binders: highly polymeric products, which are stable in almost all organic solvents and resistant towards aggressive visualisation reagents
- Binder system for Polygram® sheets is also completely stable in purely aqueous eluents
- Available as glass plates, Polygram polyester sheets and Alugram aluminium sheets
- Available with or without fluorescent indicator (UV 254)

Thin-layer chromatography/Plates

GENERAL CATALOGUE EDITION 21

1

1 ADAMANT unmodified standard silica layers for TLC

Silica 60, specific surface (BET) ~ 500m²/g, mean pore size 60Å, specific pore volume 0.75ml/g, particle size 5 to 17µm. Outstanding hardness and abrasion resistance due to an optimized binder system. Increased separation efficiency due to an optimized particle size distribution. High suitability for trace analyses resulting from a UV indicator with brilliance and a low-noise background of the layer.

Available as glass plates with or without fluorescent indicator (UV254).

Type	Plate format cm	Gel thickness mm	PK	Cat. No.

2 RP-18 W/UV254 octadecyl-modified nano silica layers for HPTLC

ALUGRAM®

MACHEREY-NAGEL

base material: Nano-K silica 60, specific surface (BET) ~500m²/g, mean pore size 60Å, specific pore volume 0.75ml/g, particle size 2 to 10 µm; for preparative plates (1 mm thickness of layer) standard silica 60, particle size 5 to 17 µm, pH stability 2 to 10 indicator: acid-resistant product with a pale blue fluorescence for short-wave UV (254nm); UV-absorbing substances appear as dark-blue to black spots on a light-blue background; partial octadecyl modification, wettable with water, carbon content 14%. 18-100 normal phase or reversed phase separation modes with eluents from anhydrous solvents to mixtures with high concentrations of water (see figure); the relative polarity of the eluent determines the polarity of the layer.

Recommended application: aminophenols, barbiturates, preservatives, nucleobases, polycyclic aromatic hydrocarbons, steroids, tetracyclines, plasticizers (phthalates).

Available as glass plates with or without fluorescent indicator (UV254).

Glass plates available on request.

2 | 3 Chromatography paper/Ion exchange papers

Whatman chromatography papers are the most widely used papers for chromatography worldwide. This acceptance and usage reflects the purity, high quality and consistency of Whatman papers. These qualities are relied upon by chromatographers and essential to successful reproducible chromatography. Whatman chromatography paper media are made from specially selected cotton cellulose. They are rigorously quality controlled for characteristics important to the chromatographer and to ensure uniformity within the grade.

1 Chr world standard chromatography paper. A smooth surface, 0.18 mm thick with a linear flow rate (water) of 130 mm/30 min. Good resolution for general analytical separations.

3MM Chr widely used as a blotting paper, 3MM Chr is used in both electrophoresis and for general chemistry. A medium thickness paper (0.34 mm) used extensively for general chromatography and electrophoresis. Flow rate is 130 mm/30 min.

3 Chr medium thickness paper (0.34 mm) with a flow rate of 130 mm/30 min. For general applications with medium/heavy solute loadings. Frequently used for separation of inorganic compounds and for electrophoresis.

17 Chr thick (0.92 mm) and highly absorbent paper with a very high flow rate of 190 mm/30 min. Suitable for the heaviest loadings and ideal for preparative paper chromatography and electrophoresis.

Ion exchange paper

SG81: A unique paper (0.27 mm thick) combining cellulose and large pore silica gel. Suitable for separations in which both partition and adsorption are important, including the separation of phospholipids, steroids, phenols and dyes. Flow rate is 110 mm/30 min.

2 Nano separating chambers, with knob/ stainless lid

The nano separating chamber was developed for the preferred plate format of 100 mm highs and have all the advantages of standard separating chambers.

Type	PK	Cat. No.
Separating chamber 100 x 100 mm with glass lid	1	6.311 892

3 Dipping chamber, glass insert

- For TLC plates
- Highly-resistant glass
- Clear width 5 mm
- Small volume of reagent required

Type	PK	Cat. No.
For TLC plates up to 100 x 100 mm, reagent required approx. 25 ml	1	9.022 160
For TLC plates up to 200 x 100 mm, reagent required approx. 50 ml	1	9.022 161
For TLC plates up to 200 x 200 mm, reagent required approx. 100 ml	1	9.022 162

4 H separating chamber

The H separating chambers make optimum use of HPTLC gel layer advantages. biostep
Small particle size 5µm, stringently controlled pore size and distribution, and more theoretical bases. Excellent value for money and can be supplied for time and cost saving in 50mm x 50mm plate format or traditional 100mm x 100mm format. Optimum separations are achieved even on the shortest runs.

Type	Width mm	Length mm	PK	Cat. No.
H separation chamber	50	50	1	9.023 150
H separation chamber	100	100	1	9.023 160

Cover plate	50	50	1	9.023 956
Cover plate	100	100	1	9.023 957

5 Chromatography sprayer SG e1

Spraying with powerful and quiet pump. The finest spray is produced even when the battery power is low. Liquids, up to the viscosity of light oil, can be finely sprayed at the touch of a button. Particle diameter 5µm to 10µm with a throughput of 20ml/min. based on water. The reservoir bottle for the spray reagent is made of borosilicate glass. The bottle is screwed into the high-grade PTFE nozzle and can be changed in seconds. With quick-charging dock as a storage base. Overload protection enables continuous storage of the sprayer in the charging station. Supplied with battery, battery charger, bottle and nozzle.

Type	PK	Cat. No.
SG e1	1	9.539 045
Reagent reservoir, 50 ml	10	9.539 046

6 Special atomiser, with rubber blowball

With rubber blowball for nebulising reagents. Can be connected to other compressed air supplies.

Type	PK	Cat. No.
Special atomiser	1	9.024 000

Thin-layer chromatography/Detection-Accessories

1

TLC sprayer

Versatile sprayer with gas cartridge for spraying reagents and other liquids.

Haubold Technik

Spray pressure: constant 4.4 bar. Eco-friendly propellant mixture of dimethyl ether, propane and isobutane. Sufficient for approx. 500 ml of liquid.

Easy to clean: unscrew cartridge, immerse uptake into vessel containing cleaning fluid and spray until the spray is free of residues.

Propellants: dimethyl ether, isobutane, propane.

Delivery incl. propellant cartridge (94 g), 170 ml glass reservoir bottle, suction tube and screw cap.

Danger

H phrases: H222|H229

UV irradiation system BIO-LINK

- Compact and powerful, ideal for a broad range of applications
- Precise measurement and control technology, non-ageing UV sensors
- Choice for irradiation parameter energy or time
- Easy operation: Programme memory, storage of the last parameters, programme resumes after opening of the door, auto-restart after power failure
- Secure and stable construction, very easy to use
- Easy exchange of the UV tubes for wavelength change

1 Overall for clean room ASPURE, lateral zip, polyester

The overall is available in four different colour versions. Falling of hair, dust and other particles is prevented by double sleeves. In the area of the sleeves, the waist and the lower hem rubber bands are incorporated.

AS ONE

- Oblique lateral zip
- Anti-static protection
- With conductive yarn
- Suitable for clean room class ISO 5
- Surface resistance: 10^6 - $10^8 \Omega$

For cleanroom use this garment has to be washed according to required cleanroom class.

1

**1 Hood Tyvek® IsoClean®, sterile**

DuPont™ Tyvek® IsoClean® hood with ties, model IC 668 B WH CS. Sterile hood available in white and in one size. Full face opening with loops and ties. Tyvek® garments are composed of flash spun high density polyethylene, providing an ideal balance of protection, durability and comfort. Tyvek® is permeable to both air and water vapour, yet repels water-based liquids and aerosols. It offers an excellent barrier against fine particles and fibres (down to 1 micron in size) and is ultra-low-linting. Silicon non-added. Garments and accessories made of Tyvek® IsoClean® are used in the biotech, pharmaceutical, medical device manufacturing and electronics industries, as well as in other critical or controlled environments.

DuPont de Nemours

- This accessory is not CE certified as chemical protective clothing
- Clean laundered and gamma-sterilised
- Suitable for use in cleanroom class ISO 5 and higher
- Sterility assurance level (SAL) of 10^{-6}
- Bound seams: tightly sewn seam is covered with garment fabric to reinforce seam protection and reduce potential for liquid and particle penetration
- Full traceability on all sterilized apparel with certificates of sterility available
- Box of 100 p., single packed

2 Cleanroom Gloves Nitrilite® Silky, nitrile

EN ISO 374-1
Type B EN ISO 374-5
 

Ansell

Produced in a controlled powder-free environment, they feature low levels of extractable and particles for excellent product protection. The 100 % nitrile polymer prevents the risk of allergies related to latex proteins for the wearer. It also provides exceptional chemical and puncture resistance for further safety. All this, added to optimal electrical properties, makes Nitrilite® gloves ideal for a wide range of industrial sectors.

- AQL of 1.5
 - **Cat. III**

Packaging: 50 gloves vacuumsealed in an unprinted polybag, two bags of 50 gloves per master polybag. All packaging and labeling is printed with IPA-resistant ink. The gloves are doublebagged for superior contamination control. Packed in a ISO Class 5 cleanroom.

2 Disposable Gloves AccuTech® 91-250, latex

EN ISO 374-1
Type B EN ISO 374-5 EN 420

Ansell

AccuTech® 91-250 has an inner silicone coating that facilitates easy donning and double-gloving. The cuff is slightly thicker, nicely fitting over the garment. The 91-250 glove is comprised of a specific formulation of latex that provides increased flexibility and elasticity. The glove's thinner fingertips, combined with the bisque finish, provide greater sensitivity, increased handling precision and dexterity. Suitable for cleanroom class ISO 5.

- Color: Natural
- Powder-Free
- AQL of 1.0
- Cat. III

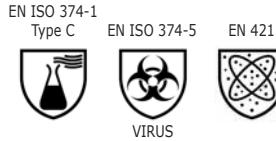

Packaging: The glove is packaged one pair per poly wallet, sealed in a poly envelope; 10 pairs per sealed polybag; 5 sealed polybags per master polybag; 4 master polybags per lined carton; 200 pairs per carton. All packaging is printed with cleanroom-compatible IPA-resistant ink. The gloves are triple-bagged for superior contamination control. The polybags have an easy-tear opening.

According to EN ISO 374-1:2016/Type B, EN ISO 374-5:2016, EN 420.

4 Finger Cots "High Grip", natural rubber

The finger cots made of antistatic natural rubber, with a thickness of min. 0.09 mm, are ideal for applications where the highest precision and fingertip sensation is required. Due to microtexturing, they are also especially handy.

AS ONE

NEPTUNE dispenser system TOUCHLESS

Universal dispenser with 5-in-1 technology: reliable dispensing of liquid soaps, foam, spray, alcohol gel and hand cleansers.
Peter Greven

- made of plastic or stainless steel
- completely hygienic system as there is no contact between product and dispenser
- adjustable dispensing frequency (1 - 3 times)
- sturdy design
- optionally lockable
- drip tray available on request

The dispenser NEPTUNE TOUCHLESS STAINLESS STEEL is available as single unit in a cardboard box, incl. wall-mounting material. For using the touch-free dispenser, 4 batteries (Type C, 1.5V) are needed, which are **NOT** included in the delivery.

1 Cleanroom Wipers ASPURE, polyester

The polyester long fibers reduce the generation of lint.

AS ONE

- 100 % Polyester
- Laser cutting
- Double packed
- Weight: 120 g/m² ± 5 %
- Water absorbency: ≥ 280 ml/m²
- Clean Pack: Cleanroom cleand with ultrapure water

Dimensions mm	Cleanroom Class	Package contents	PK	Cat. No.
102 x 102	ISO 5	8 x 600 pieces	4800	4.663 627
152 x 152	ISO 5	24 x 150 pieces	3600	4.663 628
229 x 229	ISO 5	8 x 150 pieces	1200	4.663 629

2 Cleanroom Wipes ASPURE, polyester

Extremely low particle number and evaporation residues. Laser-cutting techniques minimise the formation of dust and lint on cutting edges. The use of polyester long fibers prevents the generation of lint.

AS ONE

- Knitted made of 100 % polyester
- Lasercut
- Cleaned with ultrapure water
- Double packed

Dimensions mm	Cleanroom Class	Package contents	PK	Cat. No.
102 x 102	ISO 5	10 x 600 pieces	6000	4.663 630
152 x 152	ISO 5	20 x 150 pieces	3000	4.663 631
229 x 229	ISO 5	1 x 150 pieces	150	4.659 070

3 Cleanroom Wipers ASPURE, polyester

Lower particle count, less evaporation residue, and fewer detected ions. The polyester long fibers and heatcut reduce the generation of lint.

AS ONE

- 100 % Polyester
- Heat cutting
- Double packed
- Weight: 130 g/m²
- Thickness: 540 µm
- Water Absorbency: 330 g/m²
- Clean Pack: Cleanroom cleand with ultrapure water

Dimensions mm	Cleanroom Class	Package contents	PK	Cat. No.
102 x 102	ISO 5	10 x 300 pieces	3000	4.663 632

5 Cleanroom Wipes ASPURE, polyester/rayon

Cleanroom wipes made of nonwoven fabric.

AS ONE

- 30 % polyester/70 % rayon
- Quattro folded
- Weight: 30 g/m²
- Thickness: 360 µm
- Water absorbency: 226 g/m²

Dimensions mm	Cleanroom Class	Package contents	PK	Cat. No.
250 x 250	ISO 6	30 x 100 wipes	3000	4.659 073

Wipes and swabs/Dry wipes

1

1 Cleanroom Wipes Sontara® MicroPure, polyester/cellulose

Sontara® MicroPure nonwoven styles (woodpulp/polyester) are engineered for cleanroom use and combine absorbency of a natural fibre with the cleanliness and strength of a synthetic fibre in the same fabric. No binders or chemical treatments are used to manufacture them. The high cleanliness and purity are ensured by low extractable level and ion content as well as extremely low particle generation by the material itself. The fabric styles offer high particle and liquid absorbency due to their cellulose content.

Sontara

Type	Dimensions mm	Cleanroom Class	PK	Cat. No.
Sontara® MicroPure 100	305 x 305	ISO 5 + 6	150	9.390 185

2 Precision-Swabs

Precision-swabs are engineered for use in a variety of environments and applications. They are ideal for use with cleaner degreasers, head cleaners, flux removers and other solvents for fast, precision cleaning.

Ideal-tek

Wrapped foam swabs

- Durable wrapped foam swabs designed for precise applications.
- Good particle entrapment and work well as solvent applicators
- Small tips allow use in very tight tolerance areas
- Wrapped foam delivers superior abrasion resistance for removal of tough contaminants
- Pointed end works especially well as a pick.

Sealed polyester swabs

- Very clean and durable all-purpose swabs
- Featuring either knit or nonwoven fabric heads, these swabs are acid and solvent resistant
- Sealed edges build in high strength with no loose fibers or particulates
- Ideal for tough scrubbing around raised shapes
- Cleanroom process gives the lowest ionic, non-volatile residue and particle contaminants.

Sealed foam swabs

- Economical general purpose swabs
- Best solvent retention
- Excellent particle entrapment
- The open cell structure gives the best solvent holding ability of any style of swab
- Free of adhesives or binders that could contaminate your process
- Fiberless construction does not generate particles.
- Suitable for ISO Class 4 Cleanrooms and higher

4 Sticky Swabs, ESD

Sticky Swabs - ESD safe cleaning stems: Dustfree sticky swabs are specially used and designed for a high degree dust-free environment (class10-100). Anti-static treatment can safely dissipate electrostatic charge. Sticky swabs are applicable for manufacturing and assembling static sensitive products. Property: ESD safe, good absorption, soft and good tenacity, excellent agility, non-volatile, environment-friendly, no thrill odor.

1 Cleaning trolleys Clino® CR mini EM-GMP1, stainless steel

Pfennig Reinigungstechnik

1

Impregnation system for 10 mops, for highly sensitive areas, including disposal. The small, compact CR mini cleaning unit was constructed in such a manner that it can be moved with the mop frame.

- Cleaning method: EasyMop GMP with a system box certified for areas under sterile conditions
- Single-stage wiping process
- Base modul electropolished
- ISO class 3
- GMP class A/B
- Autoclavable

Scope of delivery: Basic module mini made of stainless steel suitable for cleanrooms, autoclavable special castors (100 mm), system box EasyMop GMP, 9-litre stainless steel container MopTen for mop release.

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR mini EM-GMP1	530 x 430 x 430	1	4.667 989

Cleaning trolleys Clino® CR1 FP-GMP/Clino® CR3 FP-GMP with flat wringer Ringo GMP®, stainless steel

Pfennig Reinigungstechnik

2

For highly sensitive areas, with disposal.

- Cleaning method: Certified flat wringer Ringo GMP for sterile areas
- Changing between single and dual-stage wiping process
- ISO class 3
- GMP class A/B
- Autoclavable

Scope of delivery (Clino® CR1 FP-GMP): Basic module small, made of stainless steel suitable for cleanrooms, autoclavable special castors (100 mm), flat wringer Ringo GMP®, 25-litred stainless steel container, 35-litred stainless steel container, 9-litred stainless steel container.

Scope of delivery (Clino® CR3 FP-GMP): Basic module large, made of stainless steel suitable for cleanrooms, autoclavable special castors (100 mm), flat wringer Ringo GMP®, 2 x 25-litred stainless steel container, 2 x 9-litred stainless steel container.

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR1 FP-GMP*	530 x 740 x 700	1	4.667 993
Clino® CR3 FP-GMP	530 x 860 x 1090	1	4.667 992

* Base modul electropolished

4.667 992

3 Cleaning trolleys Clino® CR4 EM-GMP, stainless steel

Pfennig Reinigungstechnik

3

The modular design system suitable for the cleanroom, for use in highly sensitive areas.

- Cleaning method: EasyMop GMP with system box certified for areas under sterile conditions
- ClinoLink: Cleanroom-suitable connection system für individual attachment of accessory parts
- Single-stage wiping process
- Base module electropolished
- ISO class 3
- GMP class A/B
- Autoclavable

Scope of supply: Basic module medium, made of stainless steel suitable for cleanrooms, autoclavable special castors (100 mm), 2 system boxes EasyMop GMP stainless steel, 2 x 4 l stainless steel container, 1 x 35 l stainless steel container, 1 x 9 l stainless steel container

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR4 EM-GMP	630 x 610 x 1020	1	4.667 988

Cleaning equipment and tools/Cleaning systems, plastic

1

1 Cleaning trolleys Clino® CR mini EM-CR1, stainless steel

Impregnation system for 12 mops, for use in non-sterile areas. The small, compact CR mini cleaning unit was constructed in such a manner that it can be moved with the mop frame.

Pfennig Reinigungstechnik

- Cleaning method: EasyMop CR with ergonomically optimised system box
- Single-stage wiping process
- Base modul electropolished
- ISO class 7
- GMP class C

Scope of delivery: Basic module mini made of stainless steel suitable for cleanrooms, electrically conductive special castors (100 mm), 2 blue system boxes EasyMop, grey tray for system box EasyMop.

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR mini EM-CR1	520 x 430 x 450	1	4.667 990

2

2 Cleaning trolleys Clino® CR4 EM-CR, stainless steel

Pfennig Reinigungstechnik

The cleanroom-suitable modular design system for highly sensitive areas that do not require sterility.

- Cleaning method: EasyMop CR with ergonomically optimised system box
- Cloth impregnation for surface cleaning in PlusBox
- ClinoLink: Cleanroom-suitable connection system für individual attachment of accessory parts
- Single-stage wiping process
- Base module and castors electrically conductive
- ISO class 7
- GMP class C
- Autoclavable

Scope of supply: Basic module medium, made of stainless steel suitable for cleanrooms, electrically conductive special castors (100 mm), 2 blue system boxes EasyMop CR, 2 PlusBoxes, 1 grey tray for system boxes, 1 x 35 l und 1 x 5 l plastic container

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR4 EM-CR	630 x 610 x 1020	1	4.667 987

3

3 Cleaning trolleys Clino® CR6 FP with flat wringer, stainless steel

Pfennig Reinigungstechnik

3-bucket system with four buckets for surface cleaning and supply articles.

- Cleaning method: flat wringer Clino stainless steel
- Changing between single and dual-stage wiping process
- Basic module and castors electrically conductive
- ISO class 7
- Autoclavable

Scope of supply: Basic module large made of stainless steel suitable for cleanrooms, autoclavable special castors (100 mm), flat wringer Clino stainless steel, 3 x 15 l plastic bucket (blue) with stainless steel handle, 4 x 6 l plastic bucket (blue) with stainless steel handle

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Clino® CR6 FP	540 x 800 x 1020	1	4.667 991

1 Mop covers King CR, single-use

Suitable for all standard cleanroom and pharmaceutical floors and for the single-stage wiping process.

- 100 % polyester
- ISO class 3
- GMP class C
- Autoclavable
- Suitable for cytosstatica areas
- Very high-quality, cleanroom-suitable processing
- Pre-washed, single double packaged

Dimensions (D x W) mm	Weight g	Sterile	auto-clavable	PK	Cat. No.
400 x 120*	50	+	-	1	4.668 013
400 x 120	50	-	+	1	4.668 014

* gamma-sterilised

1

2 Mop covers Clino One Way Ultra PW/Clino One Way Ultra PW/I, single-use

For all standard cleanroom and pharmaceutical floors.

Pfennig Reinigungstechnik

- 100 % PES microfiber with special structure for optimum particle absorption
- ISO class 5
- GMP class A/B
- Very high-quality processing suitable for clean rooms
- Particularly smooth-running and effective due to soft bristles
- Pre-washed and single double packaged

Type	Dimensions (D x W) mm	Weight g	Sterile	PK	Cat. No.
Clino One Way Ultra PW-I*	400 x 120	55	+	5	4.668 011
Clino One Way Ultra PW	400 x 120	55	-	5	4.668 012

* gamma-sterilised

2

3 Mop covers MicroSicuro, PES

The germ reduction of bacteria, yeast fungus and mould of over 99 % will be reached by using water. Suitable for grey areas, all smooth and structured hard floors, safety tiles, dry cleaning and single-stage wiping.

Pfennig Reinigungstechnik

- 100 % PES High-tech microfibre, with soft bristle
- Washable up to 95 °C
- Suitable for low temperature dryer
- ISO class 9

Dimensions (D x W) mm	Weight g	PK	Cat. No.
400 x 120	130	1	4.668 007

3

4 Mop covers MicroSicurofor CR/A, PES, multiple-use

Pfennig Reinigungstechnik

Eliminates 99.9 % of all particles in single-step technique. For all standard cleanroom and pharmaceutical and perforated floors and safety tiles.

- 100 % PES-microfiber with special soft bristle
- Washable up to 95 °C
- Suitable for high dryer temperatures
- ISO class 5
- GMP class A/B
- Autoclavable up to 50 preparation cycles
- Desinfectant proof
- Resistant to gamma rays

Dimensions (D x W) mm	Weight g	PK	Cat. No.
400 x 120	110	1	4.668 008

4

Cleaning equipment and tools/Mop holders and covers

1

Mop covers MicroMopp standard CR/A, PES, multiple-use

Pfennig Reinigungstechnik

For all standard cleanroom and pharmaceutical floors and for single-stage wiping process.

- 100 % PES microfibre (polyester microloops) with polypropylene bristle
- Washable up to 95 °C
- Suitable for medium dryer temperatures
- ISO class 7
- GMP class C
- Autoclavable
- Not suitable for chlorinated disinfectants

Dimensions (D x W)	Weight mm g	PK	Cat. No.
400 x 120	110	1	4.668 009

2

Mop covers King CR, multiple-use

Pfennig Reinigungstechnik

Eliminates 99.9 % of all particles in single-step technique. For all standard cleanroom and pharmaceutical floors.

- 100 % PES microfiber yarn in high-tech-finish suitable for cleanrooms
- Hollow-knitted bagging with sealed edges
- Washable up to 95 °C
- Suitable for high dryer temperatures
- ISO class 5
- GMP class A/B
- Autoclavable up to 50 processing cycles
- Disinfectant proof
- Resistant to gamma rays
- Optimised for the flat wringer Ringo GMP
- Minimal amount of particle emission

Dimensions (D x W)	Weight mm g	PK	Cat. No.
400 x 120	140	1	4.668 010

3

Mop frames, stainless steel, invers

- In particular for single-use mop
- Stainless steel plate on the bottom
- With Clino Connect Lock
- Not suitable for flat wringer
- Autoclavable
- Suitable for all PPS mop handles

Pfennig Reinigungstechnik

Width mm	PK	Cat. No.
400	1	4.668 006

1 Mop frame Clino® Synchro CR and Clino® Synchro Hybrid

Pfennig Reinigungstechnik

The mop frames made of autoclavable technical high-performance plastics(Clino® Synchro CR) or in combination with stainless steel (Clino® Synchro Hybrid), especially for clean rooms, are easy to clean. They are suitable for detachment with MopDrop CR and impregnation with EasyMop®.

- Clino® Synchro Hybrid with metal wings made of V4A stainless steel
- With locking system Clino Connect Lock
- Can be opened by hand and foot
- Symmetrical opening for easier mop pick up
- 100 % contact surface
- Autoclavable
- Suitable for all PPS mop handles

Type	Dimensions (D x W) mm	Weight g	PK	Cat. No.
Clino® Synchro CR	400 x 100	372	1	4.668 001

4.668 000

2 | 3 Adhesive Mats Sticky Mat

The Sticky Mat provides a fast, convenient, reliable way to clean shoe soles or other items before entering a clean and sanitary area. Sticky Mats significantly reduce traffic-borne contaminants.

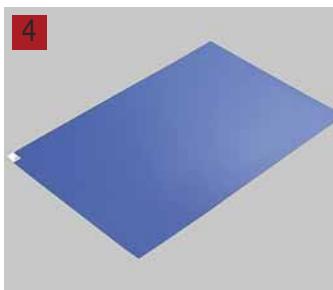

Ergomat A/S

Each Sticky Mat consists of a stack of tear-off adhesive polyethylene sheets, effectively capturing dirt and dust from foot-traffic and equipment wheels before they enter controlled environments. A clear release sheet protects the top sheet of the sticky mat until it is ready to use. The corner tabs are consecutively numbered to show the number of remaining sheets, thereby helping you to keep track of the number of sheets remaining and preventing multiple sheets being removed at once.

Ergomat White Sticky Mats are produced in an 46 x 114 cm sheet, sold in pads of 30 sheets, with 10 pads per box (300 sheets total.)

Description	Colour	PK	Cat. No.
Frame for Cleanroom mats Sticky Mat	grey	1	6.272 245
1 mat of 30 sheets	white	10	6.272 241
1 mat of 30 sheets	blue	10	6.272 242

1

2 Sticky Mats ASPURE, LDPE

Removes dust and dirt from shoe soles.

AS ONE

- Anti-static protection on each layer
- Surface resistance: 10^8 - 10^{10} Ω
- With count-up tag with a thickness of 45 µm per layer
- Water-soluble adhesive
- 1 carton with 10 mats, 30 layers

2

3 Adhesive Mats ASPURE, MDPE

If the top adhesive mat is soiled, you can simply remove this layer and work directly on the next one of the stack. The number of remaining mats on the stack is indicated by the number in the corner. 30 layers.

AS ONE

- Medium or weak adhesive
- Antistatic
- Surface resistance: 10^9 - 10^{11} Ω
- With serial layer number (count-down), with a thickness of 35 µm per layer
- Water soluble adhesive
- 1 carton with 10 mats, 30 layers or 1 carton with 6 mats, 60 layers

3

2 Adhesive mat Nomad™ 4300

Ideal for areas with increased demand for air purity . The adhesive layer on the Nomad™ mat collects when crossing all dust particles from the boots and binds them so that they cannot be spread . It does not have to be cleaned , if necessary the used adhesive layer is removed and a new layer is available.

3M Deutschland

The silicone-free and residue-free mat can easily be fixed on the floor.

- Consists of multiple , adhesive coated , clear polyethylene layers , which are attached on a vinyl backing
- For use in the entrance to sterile rooms (Cleanroom conditions), or requirements of highest hygiene
- 40 layers, numbered
- Removable disposable mat
- Easy to install
- Can be walked and driven on without any problems
- Very good removal and retention of dirt particles

3 Transport Trolley, stainless steel

Transport trolley made of stainless steel. Rugged construction made from two tubular steel bar push handles, Ø 25 mm with welded deep drawn shelves with elevated perimeter flange inbetween. Shelves are bevelled by 35 mm all over, with flat safety return to the inside. Chassis with 4 swivel castors, 2 of them with brake, Ø 125 mm, antistatic. Massive plastic bumper protect against damage.

Specifications

Max. load per shelf:	40 kg
Shelf dimensions:	800 x 500 mm
External dimensions (W x D x H):	895 x 595 x 950 mm

3 shelves, stainless steel case, 4 wheels	120	1	6.290 737

3

Cleanroom Transport Trolley

- Material stainless steel (1.4301/AISI 304)
- Functional surfaces in KEK-Finish
- Shelves with a smooth surface or shelves with punched holes (\varnothing 10 mm in 15 x 15 mm grid) to support the laminar flow of air
- Firmly welded
- Stabilized by reinforcement depending on design and dimensions
- Square profiles closed at the top with plastic caps
- 4 castors electrically conductive, 2 of them lockable

Laboratory Chair Labsit

Labsit is the new chair for all kinds of laboratories. Its intelligent Flex function offers comfort and laboratory ergonomics with minimal adjustments required. Labsit has all the properties required for laboratory work and, at the same time, it is light and universally applicable. Labsit is therefore a laboratory specialist and all-rounder all in one.

- Minimal joints: Hygienic design for easy cleaning and disinfection.
- Resistant to disinfectants and chemicals: Resistant to all of the usual disinfectants and chemicals.
- Seat upholstery made of artificial leather (soft and comfortable, washable and antibacterial) or soft-touch PU foam (extremely robust, washable and antibacterial) in black.
- Suitable for cleanrooms: Certified for the use in cleanrooms category 3 in accordance with ISO 14644-1.
- Adheres to biosafety level BSL1, BSL2 and BSL3 of the Directive for Biological Agents, GMP-conform.
- The backrest made of plastic with its 3D-Flex function automatically adapts to the movements of the user and therefore follows the upper body when leaning back or turning sideways.
- The Flex function on the front edge of the seat supports the forward-angled working which is typical for laboratory work.
- Its low weight and integrated handle provide maximum mobility and easy handling in the laboratory.
- Seat height adjustment by gas spring.
- Solid polished aluminium star base, flat design.
- The chrome-plated foot ring for the high chairs provides support through the wide tread area and can be easily and quickly adjusted in height.
- With certificate "Tested Safety" (GS mark).
- 10 years warranty, Made in Germany.

Accessories: Armrests (pair). Lab-Clip: The intelligent Lab-Clip enables Labsit to be easily, individually and quickly labelled, this creates order. Can be added or removed any time.

	(long) hundredweight	cwt	1 cwt = 50.80 kg	for GB
	short hundredweight	sh cwt	1 sh cwt = 45.36 kg	for USA
	(long) ton	tnl	1 tnl = 1016 kg	for GB
	short ton	tnsh	1 tnsh = 907.2 kg	
	pennyweight	dwt	1 dwt = 1.555 g	for precious stones and metals
	troy ounce	oztr	1 oztr = 31,10 g	for GB
Density	troy ounce	ozt	1 ozt = 31,10 g	for USA
	pound/cubic foot	lb/ft ³	1 lb/ft ³ = 0,016 g/cm ³	
	pound/cubic inch	lb/in ³	1 lb/in ³ = 27,68 g/cm ³	
Pressure	pound/cubic yard	lb/yd ³	1 lb/yd ³ = 0,593 kg/m ³	
	pound/square inch	lb/in ²	1 lb/in ² = 6,895 · 10 ⁻² bar	
	(p.s.i.)		(1 p.s.i. = 6,895 · 10 ⁻² bar)	
	pound/square foot	lb/ft ²	1 lb/ft ² = 4,788 · 10 ⁻⁴ bar	
	inch Hg	in Hg	1 in Hg = 3,337 · 10 ⁻² bar	
	inch WS	in WS	1 in WS = 2,487 · 10 ⁻³ bar	

Plastic Materials

The careful evaluation of material requirements by the user is absolutely necessary. The following recommendations from technical literature and/or the raw material manufacturers themselves only offer information to allow decisionmaking. They do not replace, under any circumstances, qualification tests by the user, who must be familiar with the respective application conditions in each case.

Plastics have become generally accepted as an alternative material to glass within the laboratory. Physical and chemical characteristics vary strongly. Application conditions decide which plastic is suitable. There are various influences: Exposure period and concentration of chemicals involved, temperature load, sterilization requirement, mechanical load, aging, e.g. by the effect of cleaning agents or by other environmental factors.

Abbreviations of the most important plastics, acc. to DIN 7728

ABS	Acrylo-Butadiene-Styrene-Copolymer	PBTP	Polybutylene terephthalate
ACL	Acetal (Polyoxymethylene)	PE-HD	High density polyethylene
CA	Cellulose acetate	PE-LD	Low density polyethylene
CN	Cellulose nitrate	PETP	Polyethylene terephthalate
CP	Cellulose propionate	PFA	Perfluoralkoxylalkane
ECTFE	Ethylene-Chlortrifluoroethylene-Copolymer	PMMA	Polymethylmethacrylate
ETFE	Ethylene-Tetrafluoroethylene-Copolymer	PMP	Polymethylpentene (TPX®)
FEP	Tetrafluoroethylene-Perfluoropropylene	POM	Polyoxymethylene
GF	Glass-fibre, Glass-fibre reinforced	PP	Polypropylene
NBR	Nitrile rubber	PPO	modified Polyphenylene oxide
NR	Natural rubber	PS	Polystyrol
NYL	Nylon (Polyamide)	PSE	Polysulphone
PA	Polyamide (Nylon)	PTFE	Polytetrafluoroethylene
PAN	Polyacrylonitrile	PUR	Polyurethane
PC	Polycarbonate	PVC	Polyvinyl chloride
PCTFE	Polychlorotrifluoroethylene	SAN	Styrene-Acrylnitrile-Copolymer
PE	Polyethylene	SB	Styrene-Butadiene-Copolymer (Impact-resistant PS)
		SI	Silicone rubber
		TFE	Teflon® (Tetrafluorethylene, PTFE)

Physical characteristics

SAN	no	no	yes	yes
SI	yes	no	yes	yes

¹⁾ Loss of rigidity is possible.

²⁾ Some exceptions possible.

Chemical resistance of major plastics in relation to substance groups (without warranty)

Plastics are divided into the following three groups according to their chemical stability:

A = very good chemical stability.

Constant exposure to the medium does not cause damage to the plastic over 30 days.

The plastic can remain resistant for years.

B = good to fair chemical stability.

Constant exposure to the medium causes slight damage/change within the period of 7 to 30 days.

Some of these changes are partially reversible (radiation, softening, reductions in rigidity, discolouration).

C = low chemical stability.

Not suitable for prolonged exposure to the medium. Damage can occur immediately (reduction in rigidity, deformation, discolouration, increased porosity, dissolving!).
