

LAB CATALOGUE

EDITION 21

Your Lab is our Mission!

LLG-uniCFUGE 2, p. 664

LLG-uniCFUGE 5, p. 665

LLG-pH Meter 5, p. 299

LLG-uniREFRACTO 5 pro, p. 1127

LLG-pH Meter 7, p. 309

LLG-uniSPEC 2, p. 1138

LLG-uniSTIRRER 5, p. 462

LLG-uniSTIRRER 7, p. 463

LLG-uniSTIRRER OH2, p. 478

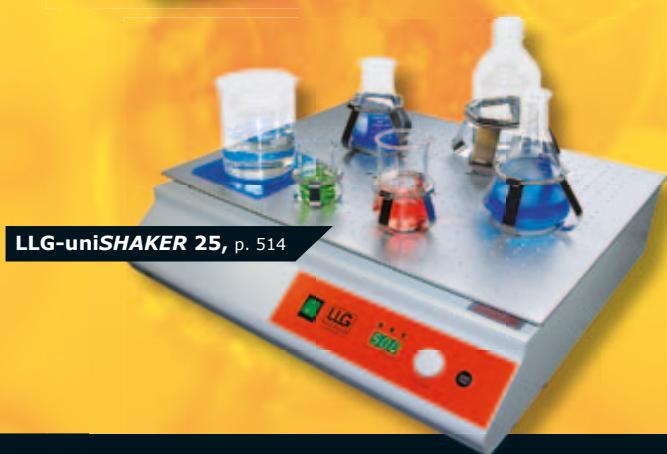

LLG-uniSTIRRER 3, p. 461

LLG-uniSTIRRER 1, p. 454

LLG-uniSTIRRER 2, p. 448

LLG-uniSHAKER 25, p. 514

Detailed table of contents.....	1
Alphabetical index	A 1
1. General laboratory consumables.....	11
2. Occupational safety, Security.....	195
3. Analytical measurement and testing	295
4. Stirring, Shaking, Mixing.....	447
5. Sample preparation	541
6. Distillation, separation, filtration	617
7. Heating and cooling technology	753
8. Liquid Handling.....	909
9. Vacuum technology, Drying, Dry storage	1059
10. Optical instruments and Microscopes.....	1093
11. Cleaning and sterilisation	1161
12. Environmental-, soil-, water-, food analysis.....	1211
13. Life Sciences	1291
14. Chromatography	1419
15. Cleanroom	1501
Supplier index.....	S 1
Numerical index	N 1

Liability, information on products and rights belonging to third parties

Lab Logistics Group GmbH and the dealer who uses this catalogue accept no liability for the suitability of an item listed in the catalogue for a specific application. The responsibility for the suitability of an item for a specific application lies with the user. Please ask your dealer for advice.

Information contained within the catalogue concerning items of personal protective equipment are of general nature only and do not recommend any specific application. To determine whether a product meets the safety requirements of a specific application, the user must assess the technical data sheets/safety data sheets of the manufacturer/supplier indicated.

All product listings have been researched and presented in co-operation with the respective supplier.

Every effort has been made to ensure that data and descriptions given within this catalogue were correct at the time of going to press but we accept no liability for any error. We kindly ask you for your understanding.

Your LLG-Partner's Terms and Conditions of Business will apply.

Some products and brands shown in this catalogue may not be available in all countries.

Abbreviation key:

PK = packaging unit

E & OE = Errors and omissions excepted

PEFC Certified

1. General laboratory consumables	11
Vessels	13
Beakers	13
Measuring jugs	16
Flasks	19
Test tubes	24
Stoppers	29
Tube racks	33
Containers	42
Baskets	49
Transport boxes	51
Buckets	54
Aspirators and Carboys	56
Wide-mouth bottles	62
Wide-mouth kegs	77
Narrow-mouth bottles	78
Square bottles	85
Reagent bottles	90
Spray, dropping bottles	91
Funnels	98
Cylinders	103
Dishes	103
Crucibles	111
Tools	115
Spoons, Spatulas	115
Knives, Scissors	126
Workshop tools	130
Forceps	132
Scoops	138
Heating	139
Burners	139
Beaker tongs	143
Tripod	144
Tubing	146
Tubing/Gas	146
Rubber	146
Plastic	147
Adapters, Clips, Clamps	153
General laboratory aids	165
Labels	165
Documenting	172
Laboratory jacks	175
Stands, Fittings	177
Batteries	187
Accessories for electrical device	188
Bags, Foils	188
Greases	194

2. Occupational safety, Security	195
Eye protection	196
Eyeshields	196
Panoramic eyeshields	202
Overgoggles	203
Accessories	204
Safety shields	205
Breathing protection	206
Hygiene masks	206
Half masks	207
Full face masks	212
Ear protection	214
Noise protection	214
Gloves	217
Vinyl gloves	217
Latex gloves	217
Nitrile gloves	220
Glove box holder	230
Chemical protective gloves	232
Cotton safety gloves	237
Cut resistant gloves	237
Temperature protective gloves	238
Protective clothing	245
Laboratory coats	245
Aprons	248
Coveralls	249
Caps	250
Oversleeves	251
Shoes	252
Identification of hazards	253
Safety signs	253
First-aid	253
Eye wash bottles	253
Eye wash stations	255
Body showers	256
Dressings/plasters	257
Waste disposal	258
Waste, Disposal bags	258
Waste bins	261
Chemical Sorbents	263
Safety containers	264
Transport, storage containers	264
Transport	270
Trolleys	270
Furniture	272
Chairs	272
Step-ladders	278
Furniture	279
Fume hoods	280
Safety cabinets	287

3. Analytical measurement and testing	295
pH-measurement	296
Paper, chopstick	296
Portable devices	299
Table devices	309
pH-Electrodes	315
Redox-Electrodes	322
Ion selective Electrodes	323
Electrode accessories	324
Buffer solutions	325
Conductivity measurement	329
Portable devices	329
Table devices	333
Electrodes	337
Solutions	339
Oxygen measurement	340
Devices	340
Electrodes and accessories	342
Multiparameter measurement	345
Devices	345
Balances	354
Pocket balances	354
Precision balances	358
Analytical balances	367
Other balances	375
Moisture balances	376
Weights	379
Accessories	381
Thermometers	385
Laboratory thermometers	385
Surface, Insertion thermometers	392
Temperature meters	399
Temperature data logger	402
Temperature-Humidity logger	408
Timing	414
Timers	414
Clocks	417
Climate and environment measurement	418
Hygrometer	418
Special climate meters	420
Density determination	425
Density meter	425
Pycnometer	427
Density meters	428
Viscosity determination	432
Viscosimeter	432
Material testing	437
Force measurement	437
Hardness measurement	438
Surface analysis	440

Analytical instruments and systems	443
Melting point determination	443
4. Stirring, Shaking, Mixing	447
Magnetic stirrers / Hotplates	448
Without heating, with motor	448
Without heating, cable free	460
With heating and motor	461
Accessories, Magnetic stirring bars	475
Overhead stirrers	478
Instruments	478
Stirrer Heads	489
Stirrers	491
Shakers and mixers	497
Vortexer	497
Orbital shakers	505
Reciprocating shakers	515
Rocking shakers	518
Tumbling shakers	522
Thermoshakers	527
Overhead shakers	533
Roller mixers	537
Microtitre plate shakers	539
5. Sample preparation	541
Sampling	542
Samplers, gas	542
Samplers, Solids	543
Samplers, Liquids	553
Sample containers	559
Sample transport, storage	562
Grinding	565
Mortars	565
Blenders	566
Mills	568
Jaw breaker	590
Sieving	591
Sieve shakers	591
Test sieves	594
Sample dividers	598
Laboratory presses	599
Presses	599
Mixing, Homogenisation	599
Dispersers	599
Ultrasonic homogenisers	610
Homogenisers	614
6. Distillation, separation, filtration	617
Distillation, synthesis	618
Flasks with NS joint neck	618
Components for reaction and distillation	625
Flat ground flange reaction vessels	630

KPG stirrer and bearings	632
Dropping Funnels	634
Reflux condenser	635
Distillation-Accessories	637
Components for Extraction	639
Gas wash bottles	643
Tubing adapters	645
Standard ground stoppers	649
NS joints accessories	650
Ground joints, attachable	654
Stopcocks and Valves	655

Rotary evaporators 656

Instruments	656
Accessories	662

Separating, centrifuging 664

Minicentrifuges	664
Benchtop centrifuges	669
Centrifuge tubes	688

Filtration 699

Filter paper, qualitative	699
Filter paper, quantitative	710
Glass-fibre filters	716
Membrane filters	721
Syringe filters	729
In-Line filter	741
Filtration apparatus	742

7. Heating and cooling technology 753

Cooling 754

Cryogenic tubes	754
Cryogenic boxes	757
Cryogenic racks	763
Cryogenic accessories	763
Biobanking	766
Cryogenic storage tanks	768
Liquid nitrogen-Accessories	768
Dewar flasks	769
Low and Ultra low temperature freezers	772
Refrigerators and Freezers	785
Refrigerators and Freezers ex protected	787
Ice machines	789
Transport boxes	790

Temperature regulators 796

Heating-Thermostats	796
Cooling-Thermostats	812
Circulator baths	821
Dynamic Temperature Control Systems	826
Temperature Control Accessories	827

Heating 829

Water baths	829
Shaking water baths	836
Heating baths	839
Hotplates	841
Heating mantles	846

Temperature controllers, thermostats.....	851
Microwaves	852
Universal, Heating and Drying incubators	853
Vacuum drying incubators	862
Incubators	864
Cooling incubators.....	870
CO ₂ -Incubators	875
Shaking incubators.....	878
Thermoblocks	889
Test incubators	898
Ovens, Furnaces	903

8. Liquid Handling 909

Volumetric apparatus	910
Measuring cylinders.....	910
Mixing cylinders	916
Graduated flasks.....	917
Pipettes	927
Volumetric pipettes	927
Graduated pipettes.....	931
Pasteur pipettes	936
Serological pipettes	938
Pipette controllers	939
Pipette balls	942
Pipettes Accessories	943
Capillary tubes.....	946
Microlitre pipettes	949
Positive displacement pipettes	979
Pipette tips.....	981
Reagent Reservoirs.....	1000

Dispensing	1002
Hand dispensers.....	1002
Bottletop dispensers	1009

Titration	1021
Burettes.....	1021
Titrators.....	1027
Digital burettes	1031

Pumps	1037
Drum pumps	1037
Peristaltic pumps.....	1042
Dosing pumps.....	1053
Rotary piston pumps.....	1054

Microfluidics	1055
Syringe pumps.....	1055
Hoses and connections	1057

9. Vacuum technology, Drying, Dry storage 1059

Water jet pumps	1060
Water jet pumps	1060
Piston pumps/Compressors	1061
Pumps and compressors.....	1061
Diaphragm pumps	1062
Pumps	1062

Pump units-speed controlled	1069
Pump units-valve controlled	1071
Rotary vane pumps	1074
Pumps	1074
Accessories	1075
for vacuum pumps	1075
Cold traps, Woulff bottles	1076
Vacuum controller	1078
Sensors and Controllers	1078
Desiccators	1081
Desiccators - glass	1081
Desiccators - plastic	1084
Desiccator cabinets	1085
Laboratory Freeze drying	1091
Freeze dryers	1091

10. Optical instruments and Microscopes 1093

Optical instruments	1094
Magnifiers	1094
Microscopy	1097
Light microscopes	1097
Stereomicroscopes	1103
Digital microscopes and cameras	1104
Microscopy accessories	1107
Cold light sources	1109
Counting chambers	1114
Slides	1116
Slide covers	1118
Slide storage	1119
Staining racks	1121

Refractometers	1125
Hand held refractometers	1125
Benchtop refractometers	1130

Photometers	1135
Polarimeters	1135
Spectrophotometers	1137
OD-Measurement	1143
Microplate reader and washer	1144
Colour measurement	1147
Special Photometers	1148
Glass cuvettes	1150
Plastic cuvettes	1157
Accessories cuvettes	1160

11. Cleaning and sterilisation 1161

Disinfection	1162
Wipes	1162
liquid	1163
for Instruments	1166
Cleaning implements	1174
dry wipes	1174
Towels and dispensers	1178

Absorbent pads / Cotton wool	1179
Cleaning equipment.....	1180
Brushes	1182
Hair brushes.....	1183
Draining racks.....	1184

Ultrasonic cleaners 1185

Instruments	1185
Ultrasonic cleaners	1193

Washers, disinfectors 1194

Instruments	1194
Accessories	1196

Steam sterilisers - Autoclaves 1197

Instruments	1197
Accessories	1206
Sterile packaging	1209

12. Environmental-, soil-, water-, food analysis 1211

Sample preparation 1212

Air sampling and analysis	1212
for standard analysis	1217

Trace analysis 1221

Tubes	1221
Accessories	1231

Sample analysis 1235

Elemental analysis.....	1235
Oil Testing	1237
Photometers.....	1238
COD	1249
BOD	1254
Turbidity	1261
Extraction	1266
Kjeldahl	1271
Special distillation	1274
Milk analysis	1275

Water purification 1278

Distillation	1278
Pure and ultra-pure water.....	1278

13. Life Sciences 1291

Genomics	1292
PCR	1292
DNA and RNA isolation	1300
Thermocyclers	1302
PCR cabinets	1305
DNA-Electrophoresis	1306
Gel-Documentatio	1310
Concentration	1314
Electroporation	1314

Proteomics 1316

ELISA	1316
Protein-Electrophoresis	1321
Blotting.....	1322

Blot Imaging.....	1326
Purification	1327
Cell Culture	1331
Cultivation.....	1331
Aspirators	1351
Filtration	1354
Safety Cabinets.....	1357
Microbiology	1361
Media and reagents	1361
Cultivation.....	1364
Sterilizers and burners	1380
Cell disruption.....	1387
Disruptors	1389
Filtration	1390
Analysis	1392
ATP detection.....	1396
Hygiene monitoring	1396
Histology	1398
Embedding cassettes	1398
Microtoms	1399
Scalpels	1400
Dissecting sets.....	1402
Accessories and reagents	1403
General Consumables	1406
Micro Tubes	1406
Centrifugation Tubes.....	1413
Deep-well plates	1415
14. Chromatography	1419
Vials	1420
General information vials and caps	1420
Autosampler Compatibility List	1421
Authentic 1:1 size drawings of all vials	1428
Septa and cap recommendation	1433
Vials, Septa	1435
Accessories	1451
NMR/EPR	1452
Tubes	1452
Accessories	1453
Syringes	1454
Microlitre Syringes.....	1454
Disposable syringes	1460
Sample preparation	1463
SPE	1463
Syringe filters	1468
Liquid chromatography	1472
HPLC columns	1472
HPLC-Accessories	1473
Glass columns.....	1475
Solvent storage/handling.....	1477
Gas chromatography	1484
Gas generators	1484

GC columns	1488
GC consumables	1491
Thin-layer chromatography	1495
Plates	1495
Chambers	1498
Detection	1499
Accessories	1500

15. Cleanroom 1501

Reusable garments	1502
Overalls, coats	1502
Surgical masks, hoods, sleeves	1503
Accessories	1504
Disposable garments	1504
Overalls, coats	1504
Surgical masks, hoods, sleeves	1507
Overshoes, overboots, socks	1508
Eye protection	1510
Cleanroom goggles	1510
Gloves and fingercots	1512
Nitrile gloves	1512
Latex gloves	1517
Polychloroprene gloves	1521
PE, PVC, PU gloves	1523
Coated gloves	1523
Undergloves	1524
Finger cots	1524
Skin protection and care	1525
Wipes and swabs	1526
Dry wipes	1526
Swabs	1530
Cleaning rollers	1532
Paper and documentation	1533
Paper, notebooks, pencils	1533
Tapes	1535
Cleaning equipment and tools	1537
Cleaning systems, stainless steel	1537
Cleaning systems, plastic	1538
Mop holders and covers	1539
Facility	1542
Mats and floor coverings	1542
Trolleys, dispenser	1545
Wardrobes	1548
Gowing benches	1549
ESD products	1550
ESD-gloves and fingercots	1550
ESD-mats and pads	1550

Technical information 1551

- A -

Abbe refractometers	1132-1134
Absorbents	262-263
Absorption cells	1150,1152-1154,1156
Acid bottles	90
Adapters	
-bends	626-627
-destilling	625,629
-distillation adapters	626
-expansion and reduction	645
-flexible tubing adapters	646
-plugs	188
-reduction	159-160
-splash head	629,662
-tubing	645-646

2 Beakers glass, DURAN®, low form

DIN 12331. ISO 3819. With approximate graduations and spout. With easy-to-read scale and large labelling field for easy marking. In fired-on, highly durable white ceramic. Due to the uniform wall thickness, it is suitable for use as a heating vessel. Glass Type I/neutral as per USP, EP and JP. With retrace code (Batch Identification, for all) except 5 ml, 10 ml and 25 ml. Certificate available via the Internet. Autoclavable.

Measuring jugs, PP, blue scale or embossed

BRAND

Transparente. Graduated beakers with handle with blue printed scale or embossed. Ergonomic handle for secure grip. Functional spout to minimize spills. Cleaning at temperatures below 60 °C is recommended to preserve marks and inscriptions. For autoclaving (121 °C), beakers with an embossed scale should be selected.

3 Silicone lid DURAN®

NEW

DWK Life Sciences

Stretchable silicone lid for save covering of vessels, e.g. to protect against dust or splashing of solutions.

The wide overlapping sides of the silicone lid closes well with the vessel wall. Suitable for temperatures from -40 °C to 180 °C. The prolonged exposure to solvents may cause swelling of the material.

- Three different sizes and colours
- Labeling field on the flap
- Chemically resistant
- Heat resistant
- Suitable for dishwashers
- Autoclavable

2 Flask ring, PP.

Kartell

Provides a secure base for round bottom flasks from 10 ml to 10000 ml capacity.
Autoclavable.

For flasks ml	Diam. mm	Height mm	PK	Cat. No.
10 ... 10000	160	50	1	9.143 040

3 Flask support rings, "BiBase", silicone elastomer

Blue. Double sided. Sits firmly on the bench to support round-bottomed flasks.

- Resistant to oxidation and temperatures from -60 to +200 °C
- Very soft and easy to clean
- Resistant to chemicals
- Good thermal and electric insulation
- Excellent adhesion with glass
- Non-slip

4 Stabilizing/Weighting rings, lead

LAB-Rings to stabilise glassware and plasticware on shakers or to immerse in water baths.
Vinyl-coated lead rings will not mark or scratch benchtops and labware.

Test Tube Racks, PP, clinical, 4-Way

Heathrow Scientific

Especially suited for round, flat and conical blood collection and culture tubes. 6 racks can be assembled to build a large rack. Sturdy polypropylene racks can hold tubes of 13 x 75 mm, 13 x 100 mm, 16 x 100 mm, 16 x 125 mm, 17 x 120 mm or volumes of 3.5 ml, 7 ml, 10 ml, 15 ml. Different sizes to hold 12 or 18 tubes dependent on tube size. Dimensions (L x W x H): 232 x 70 x 95 mm.

- Racks can be used in water baths and placed in freezers
- Alphanumeric identification
- Chemically resistant
- Autoclavable

Vessels/Tube racks

1 | 2 Tube Rack Adapt-a-Rack™, POM

Heathrow Scientific

Capable of holding different size tubes in each available slot as the well literally adapts to your tube size to hold firmly in an upright position. The design enables you to hold 12 to 30 mm (5 to 50 ml) tubes simultaneously and still allow full viewing of the tube label. Racks can be linked together for additional holding capacity. Autoclavable.
Dimensions (W x D x H): 181 x 56 x 76 mm

Vessels/Tube racks

1 PCR Multirack, PP

ISOLAB

Fully autoclavable. This storage/working rack, with lid, is designed to work with different PCR volumes at the same time. It can accommodate up to 32 individual 0.2 ml PCR tubes, 24 pieces of 1.5/2.0 ml and 16 pieces of 0.5 ml microtubes. Tube wells are alpha-numerically matrixed with raised bold type for accurate sample identification. The rack also has a transparent lid for easy viewing of samples. Frosted writing panels on four sides allow labelling or writing.

Rack dimensions (l x w x h): 210 x 115 x 50 mm.

Vessels/Tube racks

1 Test tube racks Switch-Grid™, POM

This split-frame rack holds up to two different grid inserts. For 10 to 30 mm diameter test tubes.
Dimension frame (W x D x H): 318 x 111 x 67 mm.

- 5 colored coded grid inserts
- Three tier rack
- With rubber feet
- Stackable
- Chemical resistant
- Autoclavable at 121 °C

2 Test tube rack, PP

PP. For all common test tube diameters. Very sturdy design. All openings are widely spaced apart to accommodate screw cap tubes. All racks have the same footprint and can be stacked easily when empty. Modified PP with greater density than water makes them ideal for use in water baths. Large marking area (60 x 12mm) for barcode labels and alphanumeric references for clear sample identification. Racks are supplied in three parts for quick and permanent assembly. Continuous use temperature -20 to +90 °C. Autoclavable at 121 °C (2 bar), according to DIN EN 285. Choice of colours as outlined below.

3 Tube standing and drying racks, PP

Heathrow Scientific

Autoclavable, fiberglass-reinforced polypropylene racks are ideal for bench work or storage of test tubes. Allows easy viewing of tube contents. Does not float in water baths. User can also turn tubes as well as electrophoresis and chromatography plates upside-down and use as a drying rack. The flexible peg design is suitable for tubes with a diameter of 10 mm to 13 mm and 14 mm to 17 mm. Includes embossed indexing and drainage holes.

4 LLG-Test tube racks, self-aligning, stainless steel

Robust stainless steel (brushed) test tube racks. Due to the special construction the racks align the test tubes automatically so that the tubes are more comfortable to use. Contamination from vessel to vessel is also reduced as the tops of the tubes do not touch. Dishwasher safe, steam autoclavable, suitable for dry heat (200 °C) and water bath. Each rack holds up to 50 test tubes.

4 Jars with screw cap Nalgene™, PC

Thermo Scientific

Cylindrical. Very durable. Stackable. Non-toxic. Suitable for cold storage rooms and refrigerators. Autoclavable - remove cap before autoclaving.

- Excellent for cold room and refrigerated use, easy to see contents
- Wide-mouth and straight sides provide full-access and complete sample retrieval ease
- 15, 30 and 60 mL jars have natural polypropylene closures
- 125 mL to 1 L jars have white polypropylene closures with recessed tops for stacking
- 125 and 250 mL sizes fit Osterizer™ and other blenders that have Mason Jar threads, recommended for use with Fluid Transfer Closure 7.048 079
- Not liquid leakproof, not recommended for liquid transport
- Autoclavable/Transparent

Angled stopcock, straight	1	9.002 670
Angled stopcock, curved	1	9.002 671

3 4 Space saving jerrycan Flachmann LaboPlast®, PP

Space-saving jerrycan Flachmann LaboPlast®

With its low width the compact jerrycan Flachmann is ideal as a space-saving canister. Different liquids can be stored and decanted in a small space. Flachmann can also be stored lying on its side e.g. in a refrigerator. It is very stable due to ribbed structure and thick sides. The compact jerrycan can also be used as a settling canister.

Bürkle

- With or without threaded connector 3/4"
- With tamper-evident cap, PP, blue
- PP, transparent
- Canister without valve autoclavable
- Volume: 5 L and 10 L
- Graduations: 250 ml
- With moulded, indestructible litre graduation

Space-saving Compact set: 1 Flachmann LaboPlast® canister 5 L or 10 L and 1 stopcock Compact (9.140 003)

The Flachmann canister is ideal to store and decant liquids in a small space. The Compact stopcock for canisters and barrels features an impressive compact design, which does not overlap the footprint of the canister and therefore can be stored on its side e.g. within a refrigerator or rack without screwing off the stop-cock.

Space-saving StopCock set: 1 Flachmann LaboPlast® canister 5 L or 10 L with screw neck and 1 stopcock (9.139 997)

Stopcocks LaboPlast®

StopCock Siphon

Bürkle

- With rotatable spout, preventing drips
- With tapered spout for bottles with narrow openings from diameter 6 mm to 8 mm
- Fits screw threads with G 3/4"
- Pressure proof to 2 bar at 20 °C (without discharge bracket and grommet)
- Parts in contact with media made of PP, PE and PTFE
- Food safe

9.140 003

StopCock Compact

- Compact design, the short discharge does not protrude over the lower edge of the container
- The specially optimised design of the discharge forms an even stream of liquid with no splashing or spattering
- The Compact stop cock fits all containers with G 3/4" connecting threads
- PP, PE and PTFE are materials that offer outstanding chemical resistance to acids and bases
- Food safe

9.140 000

StopCock PA

- Made of polyamide, electroconductive, can be grounded separately
- Ideally suited for solvents
- Inexpensive alternative to stainless steel stopcocks
- PTFE seal
- Including adapter for 3/4" inner thread made of PA electroconductive
- Fits all containers with 3/4" outer thread and with included adapter, to all 3/4" inner threads

DURAN® YOUTILITY Laboratory Bottle system GL 45

- Specially shaped gripping zones on both sides of the bottle for easier and safer handling.
- With the new YOUTILITY bottle thread opening or closing the bottle is significantly faster. The thread is fully compatible with DIN GL 45 closures and other accessories.
- The slimmer YOUTILITY bottle shape allows more optimal use of limited space in autoclaves and laboratory refrigerators.
- A pre-defined labelling area is compatible with the dedicated DURAN® self-adhesive YOUTILITY bottle labels.
- Nominal volume is shown at the top of the easy-to-read graduation scale for fast determination of the volumes.
- Glass bottle body is moulded from the tried and tested DURAN® borosilicate 3.3 Type 1 neutral glass. DURAN® glass offers very good chemical resistance and high temperature resistance.
- The YOUTILITY bottle has an integrated Retrace Code to allow full product traceability. The lot specific certificate of conformance is available at: www.duran-group.com.
- Bottles are available in either clear or amber coloured glass. The amber colour meets the requirements of the USP <660> and Eur. Ph. requirements for UV light protection.
- Each DURAN® YOUTILITY bottle is supplied as a complete system, with a pouring ring (cyan polypropylene) and a GL 45 cap (cyan polypropylene).

Laboratory bottles DURAN®

ISO 4796-1 compliant. Thread acc. to DIN 168-1 and approximate graduations. The ring mark on the shoulder of the 100 ml to the 2000 ml bottles makes the filling height of the nominal capacity visible. The 25 ml bottle has a specially shaped glass rim for pouring (eliminating the need for an additional pouring ring). Neutral glass/Type I glass in compliance with USP/EP and JP. With easy to read scale and large labelling field for easy marking. Highly durable white ceramic. With Retrace code (Batch identification). Certificate available via the Internet. Autoclavable.

1 DURAN® laboratory glass bottle GL 25

Areas of application

DWK Life Sciences

- Storing expensive/sensitive media, reference samples etc.
- Packaging bottle for reference samples, stability tests, proficiency tests and deuteration solutions
- Shipping bottle for small sample volumes
- Storing proteins, vitamins, DNA

GENERAL CATALOGUE EDITION 21

Vessels/Wide-mouth bottles

1

1 Laboratory bottles, DURAN® amber, with retrace code

DURAN®. ISO 4796-1, Amber with DIN thread. Neutral glass/Type I glass acc. to USP/EP and JP. Autoclavable. With approximate graduations. A ring-shaped moulding on the shoulder of the 100 to 2000 ml bottles makes the filling height of the nominal capacity visible. The 25 ml bottle has a specially formed rim for pouring (eliminating the need for an additional pouring ring). UV protection up to 500 nm. Unaffected DURAN® properties within the bottle, as colour is applied only to the outer surface. Very uniform, durable and chemically resistant, amber colour due to innovative technology. With Retrace code (Batch identification). Certificate available via the Internet.

Please order screw cap and pouring ring separately.

DWK Life Sciences

1. General laboratory consumables

Vessels/Wide-mouth bottles

1 Safety-coated bottles, DURAN®, with retrace code

Glass laboratory bottles with DIN thread to ISO 4796-1. Safety-coated in plastic (DURAN® Protect). Neutral glass/Type I acc. to USP/EP.
With Retrace code (Batch identification). Certificate available via the Internet. Autoclavable.

DWK Life Sciences

DURAN® Protect is a resistant and transparent plastic coating based on a cross-linked co-polymer (polyurethane) applied onto DURAN® 3.3 borosilicate glass. The coating made from PU adheres to the glass surface and fulfils the following functions:

- protects the glass surfaces against mechanical damage (**scratch protection**)
- keeps fragments together in the event of glass breakage (**shatter protection**)
- minimises loss of fluid in the event of glass breakage (**leak and spray protection**)
- absorbs UV rays up to a light wavelength of 380 nm (**light protection**)
- (Cat. No.: 9.071 999) only scratch protection.

Temperature resistance

Do not subject to an open flame or direct heat (e.g. on a laboratory hotplate). The maximum operating temperature sustained is 135°C - continuous use at this temperature (>30 mins.) should be avoided.

DURAN® Protect is suitable for freezing (down to -30 °C) and for use in microwaves.

Please order cap and pouring ring separately.

Laboratory bottles Premium, DURAN®, with retrace code

DURAN®. ISO 4796-1, DIN ISO 718. Premium laboratory bottle with DIN thread.

DWK Life Sciences

Highly leak-tight using Premium screw cap. Working temperature from -196 °C up to 260 °C.

With PTFE coated silicone seal and pouring ring. With additional reverse scale, accuracy ±5 %.

Thermal shock resistance of 160K (tested by the German TÜV and with GS mark). Bottle and screw cap in accordance to USP/EP guidelines (Glass Type I/Neutral glass, screw cap raw material USP Class VI, seal FDA). Screw cap material is similar to PFA and highly resistant against chemicals. The material is free from colourants and therefore no leaching takes place. DMF available upon request. Premium bottle and screw cap fulfil highest requirements of the pharmaceutical, chemical and food industry. With Retrace code (Batch identification). Certificate available via the Internet (available for cap and bottle). Autoclavable.

1. General laboratory consumables

Vessels/Wide-mouth bottles

1 VITgrip™ lab bottles, PP, GL 45

VITLAB

Allround lab bottle made of polypropylene, with GL 45 thread and supplied with tamper-evident closure (PP).

- Excellent handling due to innovative design. In contrast to common lab bottles, the slim, waisted shape facilitates the handling of the VITgrip™ to a considerable degree. The molded volume graduations support slip-safety while working with gloves.
- Leakproof**due to optimized sealing system of the bottle thread and the screw cap with ergonomic design.
- Easy readability of the volume at all times due to molded, double-sided graduations with high accuracy ($\pm 5\%$).
- Smooth pouring of liquids and easy to clean due to hydrophobic material and rounded shape without dirt catching edges.
- With tamper-evident closure that reliably signals, if the bottle is still sealed.
- Autoclavable at 121 °C (2 bar) according to DIN EN 285

Very good chemical resistance against most acids, bases and alcoholic solutions. Furthermore, the VITgrip™ lab bottles and the supplied VITLAB® tamper-evident closures are suitable for contact with foodstuffs (according to regulation EU No. 10/2011).

Vessels/Wide-mouth bottles

1 Screw caps, High Temperature (HT), PPS

BOLA

With PTFE/silicone seal made of PPS (polyphenylene sulphide). With PTFE/silicone seals having a particularly high level of mechanical resistance, even in temperatures up to +250 °C. The non-slip, knurled outer surface ensures the screw cap can be closed securely and opened easily. The closure incorporates a PTFE-faced silicone seal wad and the substance in the container only comes in contact with PTFE. The silicone wad levels out any unevenness in the container neck.

1. General laboratory consumables

Vessels/Wide-mouth bottles

1 Wide-mouth bottles GLS 80® protect, DURAN®

Laboratory bottle with batch identification (Retrace Code), certificate available via the internet, with GLS80® wide-mouth (o.d. 80 mm). Glass Type I/neutral glass as per USP, EP and JP. Autoclavable. Ideal for any application with powder or granulate, easier filling and emptying. The coating of DURAN® protect is a resistant and transparent plastic coating based on a cross-linked copolymer. Complete with blue quick release closure (PP, integral lip seal) and pouring ring (PP) for drip-free pouring and clean, safe working.

DWK Life Sciences

The coating adheres to the surface of the glass and fulfils the following functions:

- protection of the glass surface against mechanical damage (e.g. scratches)
- keeps broken glass in place after breakage and avoids or reduces leakage
- minimises loss of media in case of breakage
- absorption of light up to a wavelength of 380 nm

Temperature resistance:

- autoclavable (< 135 °C)
- can be used in microwaves
- high temperature applications for extended periods (>30 min) and direct heating with a flame not recommended
- freezing down to -30 °C possible

Temperature (max.): 135 °C

1

2 Baffled Wide-mouth bottles, GLS 80®, DURAN®, with screw cap

Baffled Wide-mouth bottle with three vertical baffles in the inner surface of the GLS 80® bottles which disrupt a swirling motion. The baffles improve the top-to-bottom circulation and produce a greater radial mixing. The baffles also offer other advantages such as suppressing the formation of a central vortex, and reducing dead-zones where mixing does not occur.

DWK Life Sciences

- Compatible with both the DURAN® GLS 80® magnetic stirrers, and other magnetic stir bars
- Manufactured from DURAN® borosilicate 3.3 glass
- Fully autoclavable
- The wide 65 mm inner diameter of the GLS 80® wide mouth provides easy access to the contents, or for cleaning
- The baffles are moulded into the glass side wall of the bottles and form a continuous, smooth inner surface making clean up easy
- Compatible with full range of wide mouth GLS 80® connection cap systems for liquid addition or removal when mixing with stir bars.
- The bottles feature an easy-to-read graduated volume scale
- With pouring ring

Applications

- Aerating
- Dissolving
- Emulsifying
- Homogenizing
- Mixing
- Suspending

GENERAL CATALOGUE EDITION 21

Vessels/Wide-mouth bottles

1

1 Double-walled wide-mouth bottles GLS 80®, DURAN®

The DURAN® double-walled wide-mouth bottles GLS 80® incorporate an integral jacket that isolates the contents from the external environment. Heated or cooled liquids can be circulated through the jacket to control the temperature within the screw topped DURAN® bottle.

Applications

- Simple, low cost, jacketed chemostat or bioreactor for cell culture.
- Vessel for temperature-controlled reactions such as enzyme digestions.
- Simple continuous flow stirred reactor system with the optional GLS 80® cap components.
- Thermostatic vessel to maintain fluids, or high viscosity liquids at a constant temperature, useful when working with endo- or exothermic reactions.
- Large cold trap or condenser when used with dry ice in the inner container.

Features

- Usable temperature range of - 40 to + 120 °C.
- Manufactured from DURAN® borosilicate 3.3 glass.
- All components are fully autoclavable.
- Available in two sizes: 500 and 1000 ml.
- Compatible with full range of wide mouth GLS 80® connection cap systems for liquid addition or removal during processing.

3 Quick release closure, PSU compound, for GLS 80® laboratory bottles

DWK Life Sciences

The GLS 80® quick release thread allows opening and closing of bottles with three-quarters of a turn. This closure contains dyestuffs. There is a lower risk of contamination due to the double-sided PTFE-coated silicone seal. The medium only comes in contact with PTFE. The matching pouring ring made of PTFE allows clean, drip-free working. Please order separately.

- Good mechanical stability
- High chemical resistance
- Autoclavable/suitable for hot-air sterilisation
- Tmax: 180 °C

Vessels/Wide-mouth bottles

1 Connection system for wide-mouth bottles GLS 80®

DWK Life Sciences

Materials used PP, PBT and PTFE. Flexible modular system. Five different hose diameters (3.2 mm, 6.0 mm, 8.0 mm, 10.0 mm and 12.0 mm) can be connected. Sterile pressure equalisation is possible through use of membrane filter. Unused ports can be provided with a blind cap. Typical applications: safe transfer of liquid media within a closed and sterile system (evaporation is reduced). Autoclavable - maximum temperature 140 °C.

5 Dispenser/bottle-top flasks, amber soda-lime glass

Available ethylene-acrylate-coated or uncoated. The coating envelops the glass bottle like a protection skin. Should the bottle break, the splintering hazards are reduced considerably. To preserve the coating, do not clean at temperatures exceeding 60 °C.

BRAND

- PP screw cap
- LDPE pouring ring
- Space-saving square design
- The maximum operating temperature for coated bottles is 80 °C

3 Square shape laboratory bottles, DURAN®, with retrace code

Easy to use due to square shape, highly stable, good stackability - proven DURAN® properties give a space saving of 44 % in comparison with standard laboratory bottles (example applies to 100 ml bottles) With pouring ring and PP screw cap. Temperature (max.): +140 °C

Advantages:

- proven DURAN® properties
- excellent chemical resistance
- low coefficient of expansion
- can be sterilised to 140 °C. Before autoclaving, unscrew closure and set lightly on the container. Do not tighten the closure.
- freezer limit: -40 °C. Only freeze the bottle by laying at an angle and if maximum ¾ full.
- ergonomic shape
- very stable
- with Retrace code (Batch identification). Certificate available via the Internet.
- neutral glass/Type I glass acc. to USP/EP and JP.

2 Safety wash bottles, wide mouth, series 303, HDPE

Laboratory safety wash bottle printed with symbols for hazardous substances. Leakproof. Description of contents is given in German, English and French.

Kautex

Scratch-resistant ink. Bottles can be fully emptied thanks to a movable outlet jet, also can be used upside down.

Safety note: If the base of the jet is positioned above the liquid level, no liquid will be ejected in the event of a change in temperature. The jet tip is sealed for safety during transport and must be cut before use.

With fitted HDPE washbottle cap.

4 GHS Safety Wash Bottles Nalgene™

Prevent chemical accidents in the lab with Nalgene Right-to-Understand LDPE Wash

Thermo Scientific

Bottles. Bottles are pre-labeled with chemical identification and safe handling information

following the GHS specifications as applicable to secondary laboratory containers. Wash bottles are ready to use when you transfer common laboratory chemicals from manufacturers' containers. Self-venting wash bottles eliminate risk of bottles self-dispensing.

- Bottles are made from high quality Nalgene materials for low extractables and long life in the lab
- Printed with 100 % Globally Harmonized System (GHS) chemical safety information
- No other system markings are used on the bottles, which eliminates confusion
- Color coded for easy chemical identification at a glance
- Dispensing nozzles are carefully molded to deliver a straight stream for precision dispensing and safety
- Self-venting, so idle bottles won't drip on the bench top
- Designed to dispense through the top with a closure and stem molded in one piece for uniform leakproof service

2 Dropper bottles, HDPE

Natural. Highly suitable for adhesives and other liquids that can be finely dispensed.

Kautex

HDPE combination closure with screw-on dropping tip (Cat. No. 9.073 313).
Please order separately.

3 Cap for dropping bottles, HDPE

For bottles 9.073 310 to 9.037 312 series.

Kautex

4 Spray bottles with pump vapouriser

Spray bottles (HDPE) with pump vapouriser (PP, stainless steel) and safety cap for the pump. Liquids can be finely vapourised at the push of a button in an environmentally compatible way. The transparent bottles make identification of contents easy.
The protective cover prevents unintentional pressing of the pump and acts as a dust cover.

Bürkle

5 Spray bottles LaboPlast®, PE/PP

Chemical resistant to a large extend. Trigger-action spray pump with continuously adjustable spray nozzle.

Bürkle

- Parts in contact with media made of PP, PE and stainless steel
- Nozzle diameter 0.6mm; nozzle is continuously adjustable
- Amount sprayed per stroke: 1.2 ml ±0.1 ml

2 | 3 Spray bottle Turn'n'Spray with overhead valve, PE/PP

Bürkle

Spraying upwards overhead is not possible with standard spray bottles. As soon as the suction tube is no longer immersed in liquid, you can't spray any more. Not so with our overhead spray bottle, Turn'n'Spray. It features a special technology that allows you to spray from any position. That means you can spray practically and conveniently from any angle and reach hard-to-access places easily and without straining. The high-quality, refillable spray bottle can be used again and again.

- Uninterrupted spraying, even upside down
- Parts in contact with media made of PP, PE, silicon and stainless steel
- Nozzle diameter 0.6mm; nozzle is continuously adjustable
- Amount sprayed per stroke: 1.2 ml ± 0.1 ml

5 Pressure sprayer Turn'n'Spray

NEW

Bürkle

The pressure sprayer is ideal to spray a wide range of liquids uniformly. The practical 360° spray function allows you to spray overhead. The adjustable spray jet, with a nozzle diameter of 0.8 mm, can be adjusted from a fine spray mist to a powerful jet. Extension for spray lance 30 cm available as accessory.

- Wetted parts HDPE, PP, FKM, V4A
- Plastic container made of HDPE
- Safety valve to compensate overpressure, max. 4 bar

Type	Nominal capacity ml	PK	Cat. No.
Turn'n'Spray	1500	1	4.670 813

1. General laboratory consumables

Vessels/Spray, dropping bottles

1 Spray bottles

White or transparent bottles. Sprayer insert with stable, smooth pump trigger and adjustable spray nozzle, which can be regulated from the finest mist (nebulising) to a precise liquid jet. Range: approx. 3-4 meters. Ideal for spraying detergents or disinfectants, especially into difficultly accessible areas, as well as applications in thin layer chromatography.

2 Pressure sprayer Food

NEW

Bürkle

For spraying various media, such as oils, fats or flavourings. The adjustable spray jet, with a nozzle diameter of 0.8 mm, can be adjusted from a fine spray mist to a powerful jet.

- Wetted parts HDPE, PP, VMQ, V2A
- Plastic container made of HDPE
- Safety valve to compensate overpressure, max. 3 bar
- Transparent viewing window for easy reading of the filling level
- Rubberised stand ring
- Food-safe

Type	Nominal capacity ml	PK	Cat. No.
Food	1200	1	4.670 814

3 Spray bottles, PET

Manufactured from transparent PET with a spray head. All media contacting parts perfectly resists to most solvents and chemicals. Liquids can be finely vaporised with the pull of the hand pump trigger. Safety lock at the trigger prevents accidental use.

Blue. The spoon for foodstuffs is available in two sizes, 2.5 ml (similar to a teaspoon) and 10 ml (similar to a tablespoon), and is ideal for sampling powders, granulates, pastes and fluids. The shade of blue that is used does not occur in a natural form in foodstuffs. Because of this, the spoons or parts of them can be quickly found and easily identified in a visual check if they are ever mixed into production. The detectable spoons have a special additive in the material that makes them visible to metal detectors or X rays. They can therefore be rejected with standard systems for checking for foreign objects, even though they are made of plastic.

- Individually packed, gamma-sterilized
- Production, assembly and packaging according to clean room class 7 (10000)
- According to EU food and FDA guidelines

1 Laboratory tool box

12 piece ring/open end spanner set: 1 piece each in sizes 6 mm to 15 mm, 17 mm and 19 mm.
 Knipex 180 mm combination pliers. Knipex 240 mm water pump pliers.
 FLEX-DOT screwdriver set: 1 slotted screwdriver each in sizes 8.0 x 1.2 mm - 5.5 x 1.0 mm and 3.0 x 0.5 mm.
 1 Phillips screwdriver, size 2. Including two stubby screwdrivers: 1 size 2 Phillips screwdriver and 1 slotted screwdriver 5.5 x 1.0 mm. Automotive light tester with cable and crocodile clip (for automotive electrical systems only).

Sockets, sizes 8 mm - 10 mm - 12 mm - 13 mm - 14 mm - 15 mm - 17 mm - 19 mm - 22 mm and 24 mm.
 Reversible ratchet. Universal joint. 1 each 125 mm and 250 mm extensions. Long T-handle with slide (for loosening wheel nuts). Special 16 mm and 21 mm spark plug sockets with ball head on longer side. Pocket Allen key set (8 piece set) from 1.5 - 8.0 mm. PROXXON ball-peen hammer (300 g), ground on all sides and partially polished.
 With inseparable graphite handle (fibre-glass reinforced, non-slip soft coating in grip area) for unparalleled vibration damping.

Type	PK	Cat. No.
PROXXON 23650	1	9.306 125

2 Screwdriver set

Hardened, chrome vanadium molybdenum steel. With impact-resistant, cadmium-free, plastic handles.
 Insulated in accordance with VDE 0680/2, 1000V, 7 screwdrivers.

4 VDE screwdriver: 2.5 x 80/3.5 x 100/4 x 100/5.5 x 125 mm
 2 VDE Phillips screwdriver: PH1 x 80/PH2 x 100 mm
 1 Voltage detector

Type	PK	Cat. No.
Wera 160i/7	1	9.306 107

3 Electronics screwdriver set with rack

6-piece screwdriver set consisting of:
 4 flat screwdrivers: 2.5 mm/3.0 mm/3.5 mm/4.0 mm
 2 PH screwdrivers: Size 0 and 1

Type	PK	Cat. No.
Electronics screwdriver set with rack	1	9.210 143

4 Side cutting pliers

Type 7001. DIN 5238 B. ISO 5749. For hard and soft wire. Inductively hardened precision cutting edges.
 Cutting hardness approx. 62 HRC. Plastic coated handles.

Length mm	PK	Cat. No.
180	1	9.306 111

5 Water pump pliers

Chrome vanadium steel. Form D. With locking groove and glide adjustment. Inductively hardened toothed grips.
 6 position jaw opening.

Length mm	PK	Cat. No.
250	1	9.306 115

6 Combination pliers

Tool steel. Light design. DIN ISO 6746. For cutting hard and soft wire. Long cutting edges for thicker cable.
 Inductively hardened cutting edges. Cutting hardness 60 HRC. Plastic coated handle grips.

Length mm	PK	Cat. No.
180	1	9.306 117

GENERAL CATALOGUE EDITION 21

Tools/Forceps

1

Precision Forceps, anti-Magnetic, anti-Acid, replaceable tips

130 mm high quality steel tweezers with strong plastic replaceable tips. Tips made of plastic type CF (carbon fibre), handles made of anti-magnetic anti-acid stainless steel. For laboratory applications in moderately aggressive chemical environments.

Ideal-tek

Tips made of PA66/CF30 polyamide 66 reinforced with 30 % carbon fibre. Very high rigidity, excellent tensile and flexural strength, fatigue resistance. Excellent wear and abrasion resistance. Not resistant to strong acids, alkalis and hot water or steam. Very low coefficient of linear thermal expansion. Forceps made of Stainless Steel type SA, from 16.5 to 18.5 % chromium and nickel and molybdenum as additional alloying elements. Non-magnetizable.

2 Disposable tweezers, PS and disposable tweezers, PS, detectable

Bürkle

Blue. For precise laboratory work, for gripping and holding small objects. The blue products, or parts of them, can be quickly found and easily identified in a visual check, if they ever get into production.

Disposable tweezers detectable: In addition to the blue colour, these products have a special additive in the material that makes them visible to metal detectors or X rays. They can therefore be rejected with standard systems for checking for foreign objects.

- Serrated handles
- Sterile
- Cleanroom manufactured (cleanroom class 7)
- Food-safe

Gas cartridges

C 206 GLS pierceable cartridge

Piercing cartridge with integrated gas lock system according to EN 417: 2012. For bunsen burner without safety valve.
For bunsen burners Labogaz® 206 and Soudogaz blow torches.

CV470 Plus and CV 300 Plus valve cartridge

With safety valve. For bunsen burner Labogaz® 470.

CV 360 valve cartridge

With safety valve. For gas-safety burner schuett phoenix (Cat.-No. 9.018 761).

Safety valve allows removal of partially used valve gas cartridges.

Electric laboratory burner

Simple power supply through the electrical connector with an integrated switch for power on/off, no dangerous gas supply and gas leakage

HORO

- Electrical power supply instead of gas
- Fast heat up without a flame
- Highest security operated through an RCD: suitable for education
- No waste and storage of gas cartridges
- Continuous power regulation through the optional power regulator
- Heat protection through the optional glass support: deposition for dishes and flasks
- Improved heat protection with an improved glass support
- Clean odorless working in regular atmosphere without a flame

2

5 Electric Bunsen burner BA6101

Electrothermal's Electric Bunsen, combines the advantages of a regular gas burner with the clean, easy operation of their Electromantles. The Electric Bunsen is ideal for non-contact heating of test tubes, crucibles, small flasks and beakers, regardless of their shape.

Electrothermal

- Conical shaped heating element directs radiant heat to the top cavity
- Top cowl deflects heat away from your hand
- Air circulation from the vented housing keeps the base cool enough to hold during operation
- Corrosion-resistant

5

Tubing/Plastic

1 Tubing Norprene® A 60 G

Black, Thermoplastic elastomer, Shore A 61. Suitable for use as tubing for peristaltic pumps. High endurance. Resistant to many aggressive chemicals. Supplied per metre or in standard coils of 15 m.

- Temperature range -60 to +135 °C
- Superior weathering
- Abrasion resistant
- Low gas permeability versus rubber tubing
- Ozone (300 pphm) and UV light resistant

2 Tubing Versilic®, Silicone

Versilic® 60 shore tubing is biologically inert and does not inhibit cell culture. It stays flexible down to -50 °C and maintains its chemical, mechanical and electrical performance up to +200 °C. Versilic® meets the European Pharmacopoeia requirements for silicone elastomer for closures and tubing, USP Class VI biological tests and ISO 10993 biocompatibility (systemic toxicity, irritation, sensitization, citotoxicity, hemocompatibility and Ames test).

3 Tubing Iso-Versinic®

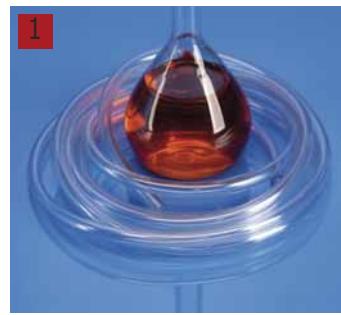

Synthetic fluoroelastomer. Chemically resistant to hydrocarbons (aromatic and aliphatic), oils, strong acids, oxidizing agents and chlorous solvents. Excellent resistance to abrasion and flexing. Good ozone and radiation protection. Impermeable to gas and steam. Shore A, Density 1.9. Temperature range -20 °C to +200 °C (up to +300 °C for short periods). Elongation at tear >250 %. Suitable for transporting corrosive liquids. Supplied per metre.

1 Tubing Tygon® E-3603

Transparent. Shore A 55. Universal laboratory tubing with very good gripping properties on glass or plastic fittings. Very low gas permeability level similar to rubber. Resistant to most laboratory chemicals. Suitable for peristaltic pumps and for food and beverage dispensing. Meets FDA and USP class VI. Supplied per metre or in standard coils of 15 m.

- Temperature range -50 to +74 °C
- Smooth inner surface
- Contains no BPA or phthalates

1 Tygon® tubing ELFL

Transparent, flexible, Shore A 56.

Saint Gobain

Temperature range -54 to +74 °C. Tygon tubing with the longest "Flex-Life" (lifespan) when used in peristaltic pumps. To FDA/USP Class VI. ISO 10993, according to REACH without phthalates. Suitable for food, drinks or pharmaceutical applications. Resists ageing and non-toxic. Resistant to many chemicals. Supplied in 7.5 m coil.

3

3 LLG-Hose cutter

A perfect tool to cut even thick hoses with external diameter from 6.0 mm to 25 mm. The cut edges of tubings with the tube cutter are always clean and flat. Offers a clean and sharp cut of tubings in few seconds. Hose cutter has a two end blade which can be turned when one gets blunt and the other sharp side used.

Description	PK	Cat. No.
for diam. 6 - 25 mm	1	6.267 395

NEW

Spare blades for LLG-Hose cutter

General Purpose Couplings with valve, PMC Series, Acetal

PMC coupling natural white, for standard applications, such as optical testing equipment, analytical equipment for chemicals, medical equipment and gas testing systems. Both coupling elements are fitted with a valve. When disconnecting the coupling, both sides close tightly. Main components and stop valve made of acetal. Unlocking button, springs and pins made of stainless steel 316.

Material O-rings: Buna-N

- Unlocking button for one-handed operation
- Integrated connections for short installation lengths and fast installation
- With stop valve
- Combinable with MC Series couplings

General Purpose Couplings with valve, PLC12 Series, PP

PLC12 coupling, beige, for more demanding applications, such as battery filling systems, disinfectants, dosing pumps, pharmaceutical production and chemical processing in the semiconductor industry. Both coupling parts are fitted with a valve. When disconnecting the coupling, both sides close tightly. Main components and stop valve made of PP. Unlocking button, springs and pins made of stainless steel 316.

Colder Products Company

Material O-rings: EPDM

- Unlocking button for one-handed operation
- Integrated connections for short installation lengths and fast installation
- With stop valve
- Sterilizable with gamma rays

General Purpose Couplings with valve, Sixtube™-Series, Acetal

The coupling elements provide a quick lock for up to six independent connections for liquid media. Stop valves can be used in the coupling, but not in the plug. With the unlocking button, six lines can be disconnected at once by pressing with the thumb. The coupling is designed for various applications, such as packaging systems, pneumatic regulators, filling of air chambers, semiconductor production, water softeners and measuring equipment. Main components, stop valve (natural white) and unlocking button (turquoise green) made of acetal, springs made of stainless steel 316.

Material O-rings: Buna-N.

- Unlocking button for one-handed operation
- Integrated connections for short installation lengths and fast installation for up to six connections
- With stop valve

4 Laboratory threaded joints - GL 14/18/25

Enables GL threads to clamp easily to fluoroplastic or thick-walled tubing made out of other plastics, glass or metal. (Ideally suited for connection with Bola GL fittings, Bola pressure valves, Bola GL taps and Bola GL ball valves).

BOLA

The laboratory threaded joints consist of a red screw cap made of glass-fibre reinforced ETFE, a sealing disc and a tapered sealing ring made of PTFE, as well as a V-ring made of glass-fibre reinforced ETFE. This patented system withstands pressures up to approx. 10 bar, is suitable for a vacuum (at room temperature in the case of sizes 14 to GL 25) and is easy to assemble without tools. The substance that passes through only comes in contact with PTFE.

Bola laboratory threaded joints can, for example, be used to hold probes (including stainless steel probes), sensors, laboratory taps, submerged tubes, thermometers or as a cable feed.

1 Laboratory Threaded Joints, GL 14/18/25/32

Connecting equipment and fittings with GL threads with hard-walled tubing or tubes made of glass, plastic or metal. Fixing probes, thermometers, dip tubes or cables in reaction vessels. Black screw caps made of PPS, inner parts consisting of a v-ring (PPS), a tapered ring and a sealing ring (both PTFE) as well as an o-ring (FKM) for tubing diameters under 3 mm (not exposed to the medium). Good chemical resistance, the medium is only exposed to PTFE. Temperature resistant from -50 to 250 °C, pressure stable up to 10 bar, suitable for vacuum.

GL fittings, PTFE

Couplings with GL connector screwthread. Connect PTFE, PFA, FEP, glass and metal tubing. Fittings are chemical and temperature resistant to approx. 250 °C. Can be used at working pressures of up to 10 bar when used in combination with Bola laboratory screwthread connections (at room temperature). A further advantage is that they can be used as expansion/reduction adapters to connect tubing of different diameters. For easy tubing connection we recommend accessory Bola Laboratory screwthread connectors which can be ordered separately.

GL stopcocks, PTFE

Stopcocks with cylindrical taps and GL screwthread made of pure PTFE, giving almost total chemical resistance. Can be used at working pressures of up to 6 bar when used in combination with Bola laboratory screwthread connections (at room temperature). A further advantage is that they can be used as expansion/reduction adapters to connect tubing of different diameters. For easy tubing connection we recommend accessory Bola laboratory screwthread connectors - please order separately.

Bottle distributors

With GL-threaded necks and screw caps. Suitable for GL45 threaded bottles. The distributors are ideal for decanting liquids, whereby the necks are connected either to a liquid source or to an excess pressure or vacuum system (up to 8.5 mm max. tubing diameter). For hassle-free connection, we recommend the Bola threaded connector (please order separately) in accordance with the outer diameter of the tubing.

Flexible Distributors, PP

For connecting elastic tubing by simply slipping it onto hose connectors. Suitable for GL45 threaded bottles. With screw cap made of glass-fibre reinforced PP, ideal for transferring liquids or gases. The angled tubing connectors can be attached to a liquid source, a pressure source or a vacuum system. Avoid crimping of the tubing. The distributor can be loosened by simply turning the screw cap. The complete distribution system can then be fixed onto another bottle.

5 Tubing clamp, Acetal

Bel-Art Products

Clamp is molded of strong, durable plastic with serrated jaws 27 mm long. Attach at any point on tubing without disconnecting tubing. Designed to be operated with one hand, the clamp locks closed and opens when the locking tab is released.

- Autoclavable
- One hand open and close operation
- For use on tubing with a wall thickness of 0.82 mm or thinner
- When not in use, the circular opening (approximately 6 mm diameter) at hinge end allows clamp to remain attached to tubing having 6-10 mm OD with little to no restriction in flow
- Overall length is 59 mm

Type	PK	Cat. No.
Tubing clamp	12	6.200 838

1. General laboratory consumables

Tubing/Adapters, Clips, Clamps

1 | 2 Curved tubing clamps stop-it, PVDF

Stepless flow regulation. The micro setting screw allows very fine stepless flow control, the flow can also be shut off completely. The fully adjustable pressure plate squeezes the hose against the stable steel hook. The hose is compressed over a wide area in order to prevent it from being damaged. Easy-Click closure - Stopper can be opened and closed in any position - without tiresome screwing on and off. Stopper is with up to 140 °C heat-resistant and chemical resistant plastic PVDF, the clamp is galvanised steel. Available in 3 sizes for hose diameters up to 20 mm.

3 | 4 Tubing clamps stop-it, Metall

Tubing clamps can regulate or stop the flow through of tubings that carry fluids or gases. Stepless flow regulation: The knurled screw allows very fine stepless flow control. The flow can also be shut off completely. The fully adjustable pressure plate squeezes the hose against the stable steel hook. The hose is compressed over a wide area, in order to prevent it from being damaged, stop-it can be mounted on hoses after they have been connected. stop-it metal is extremely heat resistant and robust due to the steel and aluminum. The hose clamp is available in four different sizes up to a maximum hose diameter of 30 mm.

1 Adhesive tape dispenser Write-On™ Economy

Provides a smooth writing surface, making labeling easy and fast. When marked tape is advanced and cut off on the serrated edge, a fresh length of label tape is positioned on the writing platform. Plastic cutting edge is moulded into the housing. Various widths and colours of tape rolls can be mixed together on the spindles, which accommodates 5 or more 12 to 19 mm narrow rolls or 4 x 25 mm wide rolls. Spindles are easily removed from the unit for loading and unloading and can be adjusted to hold either 25 or 75 mm core diameter rolls.

Bel-Art Products

- Includes three plastic separating discs to assure smooth, snag free dispensing for up to four rolls of tape (additional discs on request).
- Moulded-in pen holder wells on the dispenser help to keep writing instruments handy
- Ideal for use with the full line of Write-On™ Tapes, which are available in 6 colors and 3 widths.
- Includes mounting holes for secure attachment to a benchtop (screws not included). Can also be attached to vertical surfaces using Wall Mount Adapter
- Dimensions (W x D x H): 302 x 143 x 105 mm

Items supplied: Adhesive tape dispenser incl. 1 roll of 12 mm white Write-On™ Labeling Tape

Type	PK	Cat. No.
Write-On™ Economy	1	9.040 389

2 Adhesive tape dispenser

Suitable for holding and releasing the tape to be cut to users desire. The core perfectly fits to the inner diameter of the tape and keeps the tape rigid. Platform includes a writing surface. Finger holes on the platform enables quick release of the tape and accelerates the cutting step. Featured with a cut-off edge for efficient cutting of the tape. A weighted base with non-skid pads prevent sliding or lifting.

ISOLAB

Overall dimensions: 155 x 250 x 100 mm.
Cutting platform dimensions: 155 x 110 mm.

Adhesive tape dispenser	1	6.286 759

3 Adhesive label tape

Manufactured from colored paper with special resin adhesive that resists to moisture and most solvents. Can be used between -5 to 110 °C temperature range. Also withstands steam autoclaving cycle and gamma irradiation. Adheres to any clean surface including PTFE coated surfaces and peels off without leaving any sticky residue. Accepts writing from almost all pen types such as pencil, ball point pen, solvent ink marker etc. Markings remain absolutely legible under the most demanding laboratory conditions. Supplied as white, color or as pack of 6 different colors matching the universal hazard color codes yellow for chemical reactivity, blue for health hazards, green for safety, red for flammability, orange tape for biohazard and white for general use. Rolls of 30 m.

4 Adhesive labels

Manufactured from polypropylene flexible paper with acrylic resin adhesive back. This unique combination does not expand and retract together with temperature fluctuations and therefore always guarantees a strong adhesive bond. Chemically inert, resists to water, moisture and most organic solvents and caustic agents. Can be used between -96 to + 121 °C temperature range. Also withstands steam autoclaving cycle and gamma irradiation. Adheres to any clean surface including PTFE coated surfaces without cracking, peeling and degrading. Peels off without leaving any sticky residue.

3 Deep freeze labels

Manufactured from polyfiber grade flexible paper with acrylic resin adhesive back. This unique combination expands and retracts together with temperature fluctuations and always guarantees a strong adhesive bond. Chemically inert, resists to water, moisture and most organic solvents and caustic agents. Can be used between -196 to +80 °C temperature range. Sticks to any clean surface including PTFE coated surfaces without cracking, peeling and degrading. Peels off without leaving any sticky residue. Recommended to be used on tube caps with different diameters.

ISOLAB

Supplied as white color or pack of 6 different colors matching the universal hazard color codes (yellow for chemical reactivity, blue for health hazards, green for safety, red for flammability, orange tape for biohazard and white for general use).

General laboratory aids/Labels

1 Labels

Manufactured from polyfiber grade flexible paper with acrylic resin adhesive back. This unique combination expands and retracts together with temperature fluctuations and always guarantees a strong adhesive bond. Chemically inert, resists to water, moisture and most organic solvents and caustic agents. Can be used between -40 to +121 °C temperature range. Also withstands steam autoclaving cycle and gamma irradiation. Adheres to any clean surface including PTFE coated surfaces without cracking, peeling and degrading. Peels off without leaving any sticky residue. Recommended to be used on flat or round surfaces with different diameters. Supplied as 1000 label rolls packed in a dispenser box for practical use.

Dimensions (W x D) mm	Colour	For vessels	PK	Cat. No.

2 Label Dispenser for Deep freeze labels

Perfect organizer for fast and efficient use of labels. Manufactured from clear acrylic and holds 6 label box. Drop the label box in the label dispenser and feed the paper through the slot. The writing surface enables easy and clean writing on the label. The sharp cutting edge helps to tear off the labels. A weighted base with nonskid pads prevents sliding or lifting. The article is delivered without pen.

Type	PK	Cat. No.
Label Dispenser for Deep freeze labels	1	6.286 769

3 Deep freeze labels TOUGH-SPOTS®

Pre-cut Peel-off round labels for 0.5 and 1.5/2.0 ml microcentrifuge tube tops. Temperature resistant from -196 °C to 80 °C. Easy to write on: PVC labels accept writing from most lab markers. Convenient: Dispensing box assists in labeling individual tubes used in small experiments.

4 Deep freeze labels Cryo-Babies®/Cryo-Tags®

Temperature resistant from -196 °C to +150 °C. All labels withstand freezer temperatures down to -196 °C (liquid and vapour phase nitrogen), boiling water baths, autoclaving and moderate ovens (150 °C). Chemically inert labels resist most organic solvents and caustic agents. They adhere to most plastics, glass and metals without cracking, peeling or degrading. Made with a flexible, polyolefin label material and acrylic adhesive. This unique combination expands and contracts together with temperature fluctuations resulting in a strong adhesive bond. Convenient dispensing box assists in labeling individual tubes used in small experiments. Easy to write on. PVC labels accept writing from most lab markers including solvent resistant pens.

GENERAL CATALOGUE EDITION 21

General laboratory aids/Labels

1 Laser deep freeze labels Cryo-Babies®

Temperature resistant from -196 °C to +150 °C. All sheets withstand freezer temperatures down to -196 °C (liquid and vapor phase nitrogen), boiling water baths (100 °C), autoclaving and moderate oven temperatures (150 °C). Chemically inert label sheets resist most organic solvents and caustic agents. They adhere to most plastics, glass and metals without cracking, peeling and degrading. Made with a flexible, polyfin label material and acrylic adhesive. This unique combination expands and contracts together with temperature fluctuations resulting in a strong adhesive bond. Label sheets are specially top-coated to readily accept laser printing. Heat-resistant, stay-flat sheets will not jam in laser printers.

2 Labels Tough-Tags®

Temperature resistant from -40 °C to +121 °C. Tough-Tags resist boiling water baths, autoclaving and moderate freezer temperatures. Chemically inert labels resist most organic solvents and caustic agents. They adhere to most plastics, glass and metals without cracking, peeling and degrading. Tubes are pre-cut, peel-off labels which accept many marking instruments. They are perfectly sized to fit microcentrifuge tubes and other containers in the laboratory. Tubes labeled with Tough-Tags® easily slide in and out of centrifuge rotors without binding.

Label remover SOLVENT 50/SOLVENT 50 SUPER

SOLVENT 50 is a highly effective label solvent for the effortless removal of self adhesive labels on the basis of natural orange terpenes. It works on the adhesive and quickly and gently dissolves adhesive labels on glass, porcelain, metal, wood, foil and cardboard. SOLVENT 50 also removes sticky residue of any kind, such as tar spots or glue residue from stickers. Check compatibility when using on plastics. Not suitable for polystyrene.

CRC

SOLVENT 50 SUPER ist the label remover with brush and NSF K3-Registration for use in the food industry. The optimised formula has high dissolving capacity to remove paper labels and all kinds of adhesive residues.

1 BMP™21 Plus Hand-held label printer

The portable label printer BMP™21 Plus creates long lasting labels which adhere securely. Even under extremely demanding industrial applications the thermal transfer printer BMP™21 labels are pin sharp and clearly legible.

Brady

Key Features:

- Hard wearing design
- 203 dpi thermal transfer print
- Large LCD Display (3 lines of text, 1 line of icons)
- Left or right handed cutter activation
- Automatic data serialisation and built-in graphics and barcodes

Type	PK	Cat. No.
BMP™21 Plus	1	9.040 586

2 BMP™21-LAB Hand-held label printer

The BMP21-LAB Portable Label Printer is an all-in-one labeller for research, academic and clinical labs. With label materials designed specifically for harsh environments, the BMP21-LAB printer can quickly and easily create legible labels for flat, curved or highly textured surfaces that stay stuck for years even when exposed to extreme temperatures and chemicals. It's durable (Lithium-ion battery) and easy to use (drop-lock-and-go cartridges, simple to operate, quick to print). 2 year Warranty.

GENERAL CATALOGUE EDITION 21

Application Key for Brady labels

F =	Freezer (-70 °C)
N =	Liquid Nitrogen (-196 °C)
A =	Autoclave
H =	Hot Water Bath (100 °C)
S1 =	Self-laminating label
L =	Low-Profile (extremely thin)
V =	Vial Identification
S2 =	Slide Identification
P =	Plate Identification
G =	General Identification

Brady labels Material overview

Type B-499:	Permanent adhesive, write-on capabilities
Type B-461:	Permanent adhesive - suitable for liquid nitrogen application if label material is wrapped around itself, as in self-lamination, write-on capabilities
Type B-481:	Clear polyester will remain resistant when exposed to xylene and other chemicals that are commonly used in the slide staining process.
Type B-488:	Permanent acrylic adhesive - ideal for flat surfaces, write-on capabilities, excellent solvent resistance and xylene resistance
Type B-427:	Permanent acrylic adhesive; self-laminating, write-on capabilities, suitable for liquid nitrogen application and can be used to ID a frozen vial if label material is wrapped around itself, as in self-lamination
Type B-492:	Label material that will adhere to frozen surfaces
Type B-595:	Mark aisles, passageways, storage locations, point out safety equipment, exits. Indoor/outdoor marking film, high gloss, durable, flexible. Temperature range: -40 °C to 82 °C, durability outdoors up to 10 years.

Labels for BMP™21 Hand-held label printer

Black on white. Brady's laboratory labels are designed to withstand extreme laboratory environments.
The labels are resistent against high/low temperatures, solvents and chemicals (Alcohol and DMSO).

2 3 Molecular model system miniDNA®/RNA Kits

The advanced miniDNA® system comprises colour-coded, abstract-shaped parts designed to represent the nitrogenous bases, pentagonal sugar and pyramidal phosphate components needed to make a double-helix model of DNA. The three hydrogen bonds that connect Cytosine to Guanine and the two that connect Thymine to Adenine are represented by the appropriate number of pegs.

Two DNA kits are available to make either a 12-layer (1 turn) or 22-layer (2 turns) DNA model. The models can be displayed on their stands, or unzipped into a ladder form to demonstrate the process of Replication.

A similar approach can be taken with the two RNA kits to model the process of Protein Synthesis.

Type	Description	PK	Cat. No.

For those who wish to reach the top

Bochem

New design and improved construction:

- Improved scissor technology with reduced tolerances
- Ergonomic knob, rounded and user friendly
- Scissor-construction made of 18/10-stainless steel

Properties:

- All models are manufactured according to DIN 12897.
- With the operating load we differ between the maximal dynamic operating load (Kg max. dyn.) and the maximal static operating load (Kg max. stat.) of the lab jack. These norms are also according to DIN 12897.
- Smaller models up to 240 mm x 240 mm (Type A) have a simple adjusting wheel, which can be operated by hand.
- Bigger models from 300 mm x 300 mm on (Type B) have a special adjusting wheel, which is used with the included ratchet.

2

1 | 2 Laboratory jacks, aluminium anodized

For those who wish to reach the top:

- New design and improved construction:
- Improved scissor technology with reduced tolerances
 - Ergonomic knob, rounded and user friendly
 - Scissor-construction made of 18/10-stainless steel

Bochem

Properties:

- All models are manufactured according to DIN 12897.
- With the operating load we differ between the maximal dynamic operating load (Kg max. dyn.) and the maximal static operating load (Kg max. stat.) of the lab jack. These norms are also according to DIN 12897.
- Smaller models up to 240 mm x 240 mm (Type A) have a simple adjusting wheel, which can be operated by hand.
- Bigger models from 300 mm x 300 mm on (Type B) have a special adjusting wheel, which is used with the included ratchet.

3 | 4 | 5 Laboratory jacks MAXI, aluminium

For those who wish to reach the top:

New design and improved construction:

- Improved scissor technology with reduced tolerances
- Ergonomic knob, rounded and user friendly
- Scissor-construction made of 18/10-stainless steel

Bochem

Properties:

- The MAXI lab jacks offer 30 % more height because of an amplified construction
- Scissor-construction made of 18/10-stainless steel
- Adjustment of height with the help of an adjusting wheel.
- Ergonomic knob, rounded and user friendly
- Norms are according to DIN 12897.

1 LLG-Surface protector DescProtect

DescProtect is a durable paper which quickly absorbs liquid spills. The PE-coated base layer stops liquids reaching the work surface.

- stays flat, does not ripple or curl to destabilise vessels
- white surface can be written on using pens or pencils
- rapid absorption of liquid spills
- excellent fluid protection
- no contamination of work surfaces or laboratory cabinets
- suitable for school laboratories, wet chemistry, industry

Surface protection paper with two layers:

- Layer 1: Highly absorbent carrier paper, sucks up spilled toxic or radioactive liquids quickly
- Layer 2: Wetness impermeable polyethylene layer, protection for lab workbenches, trays or chemical cabinets
- Additional advantages: impermeable cover in animal cages, ideal in humidity chambers for atmospheric regulation

Type	Size	PK	Cat. No.
Sheets	460mm x 570mm	50	9.160 270
Spool	400mm x 50m	1	9.160 271

2

2 Benchkote surface protector®

The upper side consists of a particularly absorbent filter paper, the lower side is a non-permeable, chemically resistant PE layer. This combination makes Benchkote into a protective paper with a particularly high wet strength for universal use, helping to meet the requirements of Good Laboratory Practice (GLP):

Whatman

- Completely absorbs escaped liquids
- Prevents spills from reaching the workbench
- Protects against contamination

Applications:

- Surface protection for lab workbenches, trays or chemical cabinets
- Contamination protection, e. g. in isotope or bacteriological labs
- Adsorption of toxic or radioactive substances
- Hygienic protection in animal cages
- Atmospheric regulation in humidity chambers

2 | 3 Laboratory mats Lab Mat, silicone

Heathrow Scientific

The Lab Mats are an economical solution to help keep benchtops clean and safe from stains, spills and wear. Stain resistant washable surface, which can easily be cleaned using any standard disinfectant and even autoclavable at 121 °C for 15 minutes. The mat can also be rolled up for compact storage. The Lab Mat can be used with instruments such as centrifuges, vortex mixers, stirrers, and so much more. It offers a large working surface. Food-safe.

3

Side one: purple, side two: grey on purple	35	60	2	1	6.286 312

4 Laboratory mats Workstation Lab Mat, silicone

Heathrow Scientific

Non-slip Laboratory mats with 2 different sides for organising and thus simplifying workflow processes. One side with a completely flat surface and one side with a combination of gridded and flat surface. The gridded area avoids unwanted movement of small parts Ideal for all laboratories and more specialised areas such as cold rooms or areas with high sterility requirements such as clean rooms.

4

Dimensions (W x D x H): 305 x 379 x 2 mm

- Protection of the work bench from hot items up to 200 °C
- Lip around the edge can hold approx. 250 ml of liquid
- Reusable
- Chemically resistant
- Dishwasher safe
- Food safe
- Noise dampening
- Can be rolled up
- Autoclavable at 121 °C for 15 minutes

4 PARAFILM® M sealing film

Can be stretched up to 200 % and clings around irregular shapes and surfaces. Parafilm® M is resistant to many polar substances such as saline solutions, inorganic acids and alkaline solutions for up to 48 hours (After this time it may become brittle). Parafilm® M conforms to general FDA requirements if used below 55 °C.

Melting temperature: 60 °C
 Continued use temperature: -45 °C to +50 °C
 Stretching ability: 200 %

1 KÄLTE 75 SUPER

Instant cooling of parts. Cooling agent for thermal fault location. Provides an instant solution by cooling down circuitry to -50 °C. Intermittent short circuits or interruptions in condensors, resistors, integrated circuits are quickly discovered. Especially designed for applications where 100 % safety is an absolute must. The fluid evaporates very quickly and, in doing so, extracts heat of vaporisation from the environment. As a result, the sprayed surface cools down considerably (max. - 55 °C). The spray evaporates completely and leaves no residues. It does not contain CFC's.

- Lightweight at just 23 grams
- Innovative hinged sidearm design
- Frame colour: transparent blue or transparent grey
- Completely metal-free
- Reliable UV 400 protection

uvex

uvex **supravision excellence** coated lenses are anti-fog (for at least 16 seconds) on the inside, while the outside offers extreme scratch and chemical resistance. The anti-fogging properties are permanent even after repeated cleaning. The lenses are also easy to clean and less susceptible to dirt due to the non-stick nanotechnology.

uvex **supravision sapphire** coated lenses are excellent scratch resistance

Overgoggles uvex super OTG 9169

The super OTG and the super f OTG are equipped with this state-of-the-art lens technology. Alongside the tried and tested hingeless spectacles and highly flexible soft ear pieces, a hinged design has been developed. The revolutionary new design of the super f OTG with hinge combines all the principles of contemporary spectacles with the advantages of state-of-the-art materials. Both designs are well-suited to any wearer situation, and can also be used as overspecs for prescription wearers.

1 | 2 Mini-Ultrasonic Cleaner LLG-uniSONIC 1

For convenient cleaning of goggles or smaller laboratory instruments. Eco-friendly, only needs warm water. By ultrasonic sound millions of small air bubbles are generated. Combined with a very high pressure these achieve a fast, efficient and effortless cleaning.

- Ready to use, no assembly required
- Automatic 3-minute-operation can be stopped anytime
- Removable lid
- Stainless steel tank

Scope of supply: ultrasonic cleaning device, lid

Protection level classification

These filter classes are minimum requirements and simply serve as a guide. It is the wearers' responsibility to make sure the breathing apparatus conforms to the requirements in terms of hazardous materials and concentration before use!

FFP 1: for particles that are neither toxic nor associated with fibrosis. For protection up to 4 times the corresponding threshold limit value

FFP 2: for hazardous or harmful particles, vapour and smoke; filters for solid and liquid particles with a medium filtering level. For protection up to 10 times the corresponding threshold value

FFP 3: for poisonous particles, vapour and smoke; filters for solid and liquid aerosols with a high filtering classification. For protection up to 30 times the corresponding threshold limit value

R labelling: The mask has been tested for reusability and has the required performance features for wearing during a second work shift.

NR: non reusable

D labelling: The mask has undergone additional dolomite dust testing and therefore affords excellent breathability, even in extremely dusty environments and during longer periods of use.

Respirator Series BARIMASK

Particle filtering half mask Series BARIMASK with exhalation valve for protection against liquid and solid particles

Respirators with 2-Way-Protection Aura™ 1883+, Folding Masks

The 3M™ Aura™ Health Care Particulate Respirator 1883+ provides effective respiratory protection for use in medical environments where health care workers will be exposed to airborne dust particles, non-volatile liquid particles and bio-aerosols. This respirator limits the transmission of infectious agents from staff to patients and is suitable for use during surgical procedures and certain other medical procedures.

3M Deutschland

It protects the user as well as the product being handled.

This product also offers resistance to penetration of splashes of liquid.

Features and advantages as Aura™ 9300+ series

Authorisation: EU construction test

Testing standards: EN 149:2001 + A1:2009

Premium Respirators 8825+ and 8835+, Moulded Masks

Respirators Premium 8825+ and 8835+ moulded masks offer the new patented 3-dimensional face seal with integrated nose profile of 3M Premium+ Series, the convenience of a disposable mask as well as the concept of tailor-made face seal of reusable respirator masks: Flexible 3-dimensionality for an individual and securely sealed fit! The face seal of the mask 8825+ and 8835+ improves the sealing fit. The profile of the respirator directs the air escaping through the filter medium away from the face. The upward air flow is minimized as much as possible reducing fogging of safety glasses.

1 Respiratory Protection - Screw-Type Filters for Full Face Mask BRK 820

The filters are tested and approved to EN143/EN 14387. Offer very low breathing resistance. Their lifespan depends on the toxicity, humidity and air consumption of the user. Measurements differ with application so it is impossible to predict the working lifespan.

BartelsRieger

Filter exhaustion can be detected as follows:

- Gas filters: appearance of odours, tastes or irritants in inhaled air.
- Particle filters: increase in breathing resistance.

Storage times for unused gas and combination filters (kept sealed in manufacturer's packaging) 6 years.
Particle filters can be stored for 10 years.

Individually sealed in PE bags and packed in outer boxes.

Protection level A:	Vapours from organic compounds with boiling point > 65 °C
Protection level B:	Inorganic gases and vapours e.g. chlorine, hydrogen sulphide
Protection level E:	Sulphur oxide, acidic gases
Protection level K:	Ammonia
Protection level AX:	Gases and vapors from organic compounds with boiling point < 65 °C, low boilers in groups 1 and 2
Protection level Hg:	Mercury vapours
Protection level NOSt:	Nitrogen oxides, including nitric monoxide and particles P3
Protection level P 1:	Particles (fumes, smoke, dust) from inert substances
Protection level P 2:	Particles from non-toxic substances
Protection level P 3:	Particles from toxic substances

EN ISO 374-1
Type B

EN ISO 374-5

EN 420

The *ergo* disposable, protective, nitrile gloves combine the comfort and "feel" of latex with the physical and chemical endurance of nitrile, with no risk of allergies. The ideal glove for all applications requiring high tactile sensation and protection against chemicals.

- **Thin - very comfortable to wear**
- Excellent tactile sensitivity - similar to latex
- Tried and tested quality product made of nitrile
- Excellent resistance to skin irritants in foodstuffs
- Specially formulated for a more resilient glove
- For single use in applications with an increased need for safety when handling chemicals
- Free from phthalates/softeners and allergenic latex proteins
- Easy to wear and particularly skin-friendly through special finishing process
- Colour: Lavender Blue
- Suitable for areas subject to HACCP standards
- **Cat. III low chemical resistant. AQL 1.5**

1 | 2 Disposable Gloves NeoTouch®, Neoprene

Ansell

- With a latex-free formulation, NeoTouch® gloves are appropriate for the prevention of Type I allergies. Because they're powder-free, they also limit the risk of dermatitis for the wearer.
- They provide excellent resistance to acids, bases and alcohols. Thanks to an exclusive formulation, NeoTouch® gloves are convincingly the most comfortable synthetic single-use gloves available today.
- NeoTouch® gloves have a polyurethane inner-coating that ensures easy donning. Their textured fingertips provide a secure grip in both dry and wet conditions. The beaded cuff ensures a secure hold, and their green colour makes them easy to identify.
- NeoTouch® gloves are inspected to an AQL of 1.5 for pinholes, which matches the legal requirements for medical gloves.
- **Cat. III Low Chemical resistant.**

2 Chemical Protection Gloves uvex rubiflex S, NBR

uvex

The comfortable NBR safety gloves, seamlessly coated in a reinforced design, with excellent chemical resistance and outstanding abrasion resistance. 1 pair per pack.

Characteristics:
 - anatomic shape
 - highly flexible
 - very good mechanical characteristics
 - excellent resistance to many chemicals, acids, alkalis, mineral oils and solvents, **Cat. III**
 - good water vapour absorption due to the cotton lining

Applications: chemical industry, automotive industry, metal processing industry, mechanical industry, sandblasting

According to EN ISO 374-1:2016/Type A, EN 388, EN 420 Suitable for food handling.

Protection Gloves CRYOLITE

EN 511

EN 388

EN 407

341

2122

CRYOLITE is a fully waterproof glove to protect the hand and forearm in operations that involve the use of liquid nitrogen (or other cryogenic gases) and heat.

Made by materials specifically designated for this application, it keeps the hands warm and dry for long periods of use.

Tested, with success, by contact with liquid nitrogen (-195.82 °C) for one minute and following test of flexibility

(RCT method). Suitable for contact with Liquid Oxygen (Oxygen Index O.I. 25.4 external layer - Test Report 166/2016 Dipartimento di Ingegneria Padova).

The multilayered construction allows a high level of thermal protection, flexibility and dexterity from -200 °C to 250 °C.

EN 511

EN 388

EN 420

2422

Suitable for all work with liquid nitrogen and other cryogenic gases up to approx. minus 196 °C. Protects against cold and contact burns in case of leakage of liquid gas. The waterproof glove is made of a special elastic and laminated fabric.

Interior insulation: polyester multi-layer fabric (410 g/m²) and polyolefin porelle membrane.

According to normative EN 511, EN 420, EN 388, Cat III. Warning: Not intended for immersion in liquid nitrogen or other liquid cryogens.

Protection Gloves Waterproof Cryo-Grip[®] Gloves**NEW**

Waterproof Cryo-Grip[®] Gloves offer improved grip on small objects while protecting your hands and arms when working in hazardous, ultra-cold environments. Gloves are designed to provide a high level of thermal protection where the exposure to cryogenic fluids might exist. Made from state-of-the-art materials and a multi-layered construction, the gloves are designed to keep you dry and to wick moisture away from your hands, so you can work in comfort for extended periods of time and allows a maximum level of grip, dexterity, flexibility, and thermal protection - essential features when function is important and safety is critical.

1 pair per pack.

CAUTION: Not intended for immersion in liquid nitrogen or other liquid cryogens.

2 Skin Protection Cream LINDESA® PROFESSIONAL with Beeswax

Non-greasy, quickly absorbed. The cream strengthens the defensive functions of the skin, preventing skin damage from external pollution and soothes irritation. Smooths and cleans without leaving a residue. LINDESA® PROFESSIONAL gives the skin elasticity and suppleness through its special caring agents. The sense of touch is not affected. For low levels of soiling it provides protection against weak acids, alkalis and organic substances.

3 Laboratory Coat Tyvek® 500, PL309

Protective coat DuPont™ Tyvek® PL309, size S - XXL, 2 pockets, with zipper, white, PE-Spunbond non-woven.

DuPont de Nemours

Tyvek® garments are composed of flash spun high density polyethylene, providing an ideal balance of protection, durability and comfort. Tyvek® is permeable to both air and water vapour, yet repels water-based liquids and aerosols. It offers an excellent barrier against fine particles and fibres (down to 1 micron in size), is ultra-low-linting and antistatically treated. Silicon non-added.

GENERAL CATALOGUE EDITION 21

1

1 Disposable Overall AlphaTec® 2000 STANDARD

AlphaTec® 2000 is designed to allow water vapour (perspiration) to escape from the suit yet will withstand saturation of liquid chemicals and filter 100% of particulates down to 0.01 microns in size*.

Ansell

The use of a high quality two-way stretch microporous film provides an effective liquid and particle barrier combined with a high water vapour transmission rate from inside to outside.

- Excellent liquid penetration resistance and barrier to fine particulates
 - Moisture vapour permeable ("breathable") to help reduce the risk of heat stress
 - Silicone free
 - Low linting
 - Optimised body fit
 - Anti-static - Tested according to EN 1149-5
- *EMSL test method

6 Eye-Wash Bottle, Barikos KS

Barikos KS and Mini Barikos KS are maintenance-free models of eye wash bottles. BartelsRieger
Containing water, they can be kept ready for use for at least two years in the sealed state. Both models are ideal for first aid boxes and sets. All above mentioned Barikos eyewash bottles comply with EN 15154-4. A protective cover clips onto the spray head of the eye wash bottle thus preventing any leakage. All bottles with sliding valve are suitable for use with upright and with the downward spray head.

- Filled eyewash bottle, ph-neutral eyewash on water basis without chemical additives
- Ergonomically shaped eye recess

Mini eyewash station EyesFresh	1 6.076 887
--------------------------------	-------------

Hand-Held Drench Hoses

Two sprays in one. The hose can be used as a fixed eyewash when fitted into the mount. This allows the injured person to use both hands to hold open the eyes. The hose can also be removed from the mount so that other body parts and reclining patients can be treated.

- For wall and table mounting
- Wall-/ table mount included
- according to DIN 1988 und DIN EN 1717
- according to DIN EN 15154-2:2006 and ANSI Z358.1-2014
- DIN-DVGW tested and certificated
- DIN certification label included
- The spray heads ensure a wide distribution of water so that areas around the eyes are also covered and the exact positioning of the eyes is therefore not critical
- Large holes in the spray heads protect against limescale. The spray heads can be removed for cleaning purposes
- Rubber shrouds on the nozzles help prevent accidental injury
- Self-closing valve with squeeze lever operation
- Lightweight dust caps fall off automatically on operation
- Integral jet regulator keeps the water jet constant independent of the water pressure
- Built-in non-return valve prevents any backflow of contaminated water

Spray height: 250mm
Hose length: 1500mm
Connection: 1/2" swivel nut
Water output: 7 litres/min per spray head, regulated
Inlet fitting: M 28 x 80mm.

Plaster Dispenser aluderm®-aluplast

Plaster dispenser with wall mounting. Can be used mobile or stationary. 115 individual aluderm®-aluplast plasters of various sizes and shapes, each individually sealed, and a mini block of emergency medical care verification are available.

Content: 115 elastic, aluminum-coated wound plasters for adults:

- 30 strips about 1.9 x 7.2 cm
- 30 strips about 2.5 x 7.2 cm
- 25 fingertip bandages
- 20 finger bandages approx. 12 x 2 cm
- 10 finger joint bandages

- Dimensions: approx. 160 x 122 x 57 mm
- Color orange
- Material: ABS plastic

Plaster Dispenser QuickFix

Pull and you immediately have a plaster ready for use. Each plaster is individually packed. This provides great hygienic safety. Ready for use at critical workplaces. The plasters are made of protective, PE material that allows the skin to breathe and are especially suitable for damp workplaces. The QuickFix dispenser is only 23cm wide and 13.5cm high. It contains 90 plasters in spite of its modest size so it can be installed precisely in those places where the need is greatest. Refilling of the dispenser is also possible with other types of the QuickFix range.

QuickFix Elastic Long Refill, 30-parts finger dressing
Elastic plasters, conforming to the movements of the skin and therefore very comfortable to wear.
The plasters allow the skin to breathe.
- Solves most accidents quickly, easily and hygienically

5 | 6 Disposal Container SHARPSAFE®, PP

Sharpsafe® offers a convenient range of disposal containers and accessories that meet high requirements of hygiene and safety. The disposal of waste at its source is thus very convenient and easy.

- Container consists of 2 parts: yellow base with semi-transparent cover, safe and quick installation by simply pressing and hearing 4 clearly audible "clicks"
- The Sharpsafe® 0.6 l is a pocket container and is already pre-assembled
- The Sharpsafe® 9 l is also available with a height of 498 mm for the disposal of long items such as serological pipettes
- Equipped with a carrying handle
- Secure one-hand use possible with different mounting accessories
- Wide opening for the disposal of large objects
- Disconnection for all types of needles (2 l to 7 l), insulin pens (2 l to 7 l) and scalpel blades (2 l to 9 l)
- Opening with integrated safety flap for additional protection (2 l to 7 l)
- The closure cap can be locked in the open position if required
- 2 locking positions: provisional and final, open simply by pressing the tab
- Maximum filling level clearly visible by a black line on the lid
- Safety distance between the container opening and the clear marking line of maximum filling level
- Inscription on a label fused into the container, label will not be removed by moisture or autoclaving
- Information on the label in different languages (see table)
- The empty and open container is autoclavable up to 134 °C for 18 minutes
- Sharpsafe® is conform to ADR, TRBA 250, ISO 23907: 2013, NFX30-500 and owner of the label NF302
- Country of origin: European Union

2. Occupational safety, Security Waste disposal/Waste bins-Chemical Sorbents

1 Mercury collector

Bürkle's mercury collector enables the easy collection of spilt mercury, which can then be used again. The mercury collector is composed of a PE tub. Within the screw cap lid there is a special plastic foam insert. On pressing this foam gently on the spilt mercury, the foam's pores are opened and the mercury globules are absorbed. When raised, the foam's pores are sealed again, thus keeping hold of the mercury. The cap is then screwed on the tub, the globules are released again and fall through the perforated separation into the tub.

Bürkle

Description	PK	Cat. No.
Mercury collector	1	7.300 223
Replacement foam insert	1	7.300 224

Chemical Sorbents

The sorbents have a high performance. Due to their new microfibre structure, they provide very high absorbing capacities. The light and absorbent material is easy to use and committed to absorb quickly and store the liquid. The absorbed liquid can be extracted, to be used again or to be disposed of separately. The optimal combination of features such as light weight, low volume, very high absorbance, easy handling and low sorbent disposal weight significantly reduces disposal costs in comparison to conventional binding materials. To reduce the final waste content, the used sorbents can be burnt.

3M Deutschland

Can be used to absorb a variety of lab chemicals:

- acids, such as acetic acid, hydrofluoric acid, phosphoric acid, nitric acid, hydrochloric acid, sulphuric acid
- alkalis, such as sodium hydroxide, potassium hydroxide
- hydrazine: N₂H₄
- hydrogen peroxide

2 Portable Desiccator DURAPorter™, PC

Heathrow Scientific

Ideal for transporting biological and clinical samples, as well as instruments and products that you want to keep clean and dry under testing environmental conditions. Are light weight and easy to carry; they are ideal for moving samples that must be protected from humidity, dust and other environmental influence. The clarity of the DURAPorter™ enables the user to visibly check sample integrity, so that it can be opened using the right precautions.

- Polycarbonate construction are available in three colours for use/owner identification
- Silicone water-tight seal and three lid clasps provide secure closure
- Carry handle folds neatly into body space allowing the units to be stacked
- Lid opens a full 180°, allowing total access to contents and making it easier to clean
- Will accommodate 13 and 16 mm tubes in a 72-place one rack®, or similar sized/brand of rack
- Use the separators provided to create your own compartment sizes, or use empty to transport larger products and equipment
- Autoclavable

Matching rack (e.g. Cat. No. 9193 997, 9193 998) please order separately. Further colours available on request.

Safety Funnel with Hinged Lid, HDPE

This compact funnel with lid is optimally suited for restricted space conditions in the laboratory. The hinged lid closes the funnel clean and safely. The removable sieve collects magnetic stirrers and solid substances during fluid discharge.

- Chemically resistant HDPE
- With removable sieve for easy cleaning
- Funnel diameter: 130 mm
- Different thread sizes with free rotatable cap
- Safety lance ensures clean outflow without contaminating the container opening. Lance length: 200 mm
- Also available without safety lance
- Chromatography vials can be disposed completely when the sieve is removed.
- Black Safety funnels are made of electrostatic conductive HDPE and have a grounding connection to avoid ignition risks. Grounding cable (1.5 m) and grounding clamp are included.

Further thread sizes available on request.

- Different thread sizes with free rotatable cap
- Splash protection for safe discharge without splashes
- Safety lance ensures clean outflow without contaminating the container opening, lance length: 200 mm
- Black Safety funnels are made of electrostatic conductive HDPE and are supplied with a grounding wire.

3

3 Waste Disposal Unit Standard, HDPE

S.C.A.T.

Disposal unit for liquid waste, HDPE, useful for the collection of solvent and sample waste. With funnel, hinged lid and removable sieve to collect magnetic stirrers and residues. The sieve is detachable for cleaning. Delivered with container and funnel, ready to use.

Capacity	Dimensions (W x D x H) mm	PK	Cat. No.
2.5	115 x 150 x 305	1	9.139 892
5.0	150 x 195 x 345	1	9.139 893
10.0	190 x 230 x 395	1	9.139 894

1 Disposal Unit with Safety Funnel, HDPE, Electrostatic Conductive

This set contains a safety funnel with ball valve and a container both made of electrostatic conductive HDPE to prevent ignition risks. The Safety funnel with ball valve closes automatically after the disposal of the liquid. The built-in level control floater gives a warning in time to prevent overfilling of the container. The removable sieve collects magnetic stirrers and solid substances during fluid discharge.

S.C.A.T.

- Chemically resistant HDPE, electrostatic conductive
- Delivered with grounding cable
- With removable sieve for easy cleaning
- Funnel diameter: 180 mm
- Splash protection for safe discharge
- Safety lance ensures clean outflow without contaminating the container opening, Lance length: 200 mm
- Container with 10L or 20L capacity
- With level control floater to prevent overfilling

Description	Thread	PK	Cat. No.
with canister 10L and level control	S60/61	1	4.005 954
with canister 20L and level control	S60/61	1	4.005 955

2 Waste Disposal Unit Set, HDPE, Electrostatic Conductive

Ready-to -use complete set as disposal unit for liquid waste. Consisting of safety funnel, container and collecting tray. All components are made of electrostatic conductive HDPE to avoid ignition risks. Only one part number for the entire safety system. No time consuming compilation of a configuration. Price advantage compared to ordering piece by piece. The delivery is made complete - the system is immediately ready for use

S.C.A.T.

Funnel

- Hinged Lid
- Sieve
- HDPE, electrostatic conductive
- Grounding cable

Container

- 10 Liter, S60/61 thread
- HDPE, electrostatic conductive
- Float for level control
- With collecting tray
- 445 x 405 x 350 mm

Type	PK	Cat. No.
Waste disposal unit Set	1	6.255 403

3 Safety container, HDPE

Suitable for the S.C.A.T. safety system. Electrically conductive, with or without floater for level control.

S.C.A.T.

Please note: The containers can be grounded with a suitable grounding cable (4.005 653, please order separately).

Type	Capacity	Dimensions (W x D x H) mm	Thread	PK	Cat. No.

2 Safety container with viewing stripe, HDPE, electrostatic conductive, with UN-approval

Electrostatic conductive container for a safe collection and transportation of flammable solvents and solvent waste. Made of electrostatic conductive HDPE to avoid ignition risks.

S.C.A.T.

The viewing strip allows a permanent control of the solvent level. Also available as set with safety funnel.

- weight: 450 g
- with UN-approval

Please note: The container 6.251 593 must be grounded with a suitable grounding cable (6.254 171, please order separately).

1 LLG-Trolleys, Stainless Steel

Made of CNS 18/10, material no. 1.4301, with micro-polished surface. All shelves are produced with an all round raised profile edge. This prevents anything from slipping over the edge. The shelves are welded to the car. The load capacity per shelf is 80 kg. A noise-insulation mat is mounted on the bottom side of each shelf. The round tubes at the front edges are used as handgrips.

The trolleys are equipped with galvanized steel castors (4 swivel castors, 2 with brakes, castor diam. 125mm) which are inserted in the tubular frame. Wall bumpers made of plastic (polyamide) on all four corners protect against damage.

Description	Width mm	Depth mm	Height mm	PK	Cat. No.
2 shelves, vertical spacing 585mm	900	600	950	1	9.148 101
3 Shelves, vertical spacing 275mm	900	600	950	1	9.148 104

2

Laboratory Trolleys, HDPE

Hard-wearing, sturdy, HDPE construction resists chemicals and routine knocks and scratches in use, ensuring a long working life.

Langkavel

- stable and high load bearing capacity, long life
- Load capacity per tray approx. 40 kg
- Trolley frame, square, beige
- not electrically conductive, easy to clean
- hygienic, high density polyethylene
- easy to assemble without screws, legs and bases can be recycled
- top tray has integral handles
- 4 rolls (10 cm diameter), 2 of them with brake locks

LLG-Lab Stool

The extra-large seat provides optimum comfort. The solid black plastic star base and the upholstery edge protector that runs all the way round guarantee a long working life. The practical gas spring system with easy ring control allows a comfortable seat height adjustment.

- Resistant to all of the usual disinfectants and chemicals.
- Seat upholstery made of artificial leather (soft and comfortable, washable and antibacterial) or soft-touch PU foam (extremely robust, washable and antibacterial) in black.
- Extra-large seat: Encourages healthy posture and upright seating in the laboratory.
- Round front edge of the seat: Prevents blocked circulation in the thighs.
- Seat height adjustment by gas spring.
- Practical ring release: The height adjustment can be operated comfortably and easily in sitting position.
- Solid black plastic star base, flat design.
- The chrome-plated foot ring for the high chairs provides support through the wide tread area and can be easily and quickly adjusted in height.
- With certificate "Tested Safety" (GS mark).
- 10 years warranty, Made in Germany.

LLG-Lab Chair

Entry model for healthy sitting! The permanent contact backrest provides best support when working sitting down in the laboratory. The generously proportioned seat and backrest with integrated lumbar support provide additional support and therefore offer best laboratory ergonomics.

- Minimal joints: Hygienic design for easy cleaning and disinfection
- Resistant to disinfectants and chemicals: Resistant to all of the usual disinfectants and chemicals.
- Seat and backrest upholstery made of artificial leather (soft and comfortable, washable and antibacterial) or soft-touch PU foam (extremely robust, washable and antibacterial) in black.
- Quick adjustment: Every function can be operated comfortably and easy in sitting position.
- Seat height adjustment by gas spring.
- Permanent contact backrest.
- Backrest adjustable in height and inclination.
- Solid black plastic star base, flat design.
- The chrome-plated foot ring for the high chairs provides support through the wide tread area and can easily and quickly be adjusted in height.
- With certificate "Tested Safety" (GS mark).
- 10 years warranty, Made in Germany.

Accessories: Multifunctional armrests (pair): Adjustable in height, width and depth as well as swivelling.

LLG-Lab Standing Rest

The LLG-Lab Standing Rest is the practical solution for laboratory workplaces where people have to sit as well as to stand. To cope with this, it has a particularly wide range of heights that can be adjusted steplessly. Its ergonomic backrest and non-slip wave seat surface ensure that you feel completely safe and comfortable when you sit on it.

- Resistant to all of the usual disinfectants and chemicals.
- Seat upholstery made of soft-touch PU foam (extremely robust, washable and antibacterial) in black.
- Adheres to biosafety level BSL1 and BSL2 of the Directive for Biological Agents.
- GMP-conform.
- Rippled wave seat surface: Slip-resistant and offers a very good support and excellent ventilation.
- Integrated backrest: Best support of the lumbar region.
- Its low weight provides maximum mobility and easy handling in the laboratory.
- Seat height adjustment by gas spring.
- Seat swivel range of 360°.
- Solid black plastic star base, flat design.
- The chrome-plated foot ring provides support through the wide tread area and can be easily and quickly adjusted in height.

Laboratory Chair Labsit

Labsit is the new chair for all kinds of laboratories. Its intelligent Flex function offers comfort and laboratory ergonomics with minimal adjustments required. Labsit has all the properties required for laboratory work and, at the same time, it is light and universally applicable. Labsit is therefore a laboratory specialist and all-rounder all in one.

- Minimal joints: Hygienic design for easy cleaning and disinfection.
- Resistant to disinfectants and chemicals: Resistant to all of the usual disinfectants and chemicals.
- Seat upholstery made of artificial leather (soft and comfortable, washable and antibacterial) or soft-touch PU foam (extremely robust, washable and antibacterial) in black.
- Suitable for cleanrooms: Certified for the use in cleanrooms category 3 in accordance with ISO 14644-1.
- Adheres to biosafety level BSL1, BSL2 and BSL3 of the Directive for Biological Agents, GMP-conform.
- The backrest made of plastic with its 3D-Flex function automatically adapts to the movements of the user and therefore follows the upper body when leaning back or turning sideways.
- The Flex function on the front edge of the seat supports the forward-angled working which is typical for laboratory work.
- Its low weight and integrated handle provide maximum mobility and easy handling in the laboratory.
- Seat height adjustment by gas spring.
- Solid polished aluminium star base, flat design.
- The chrome-plated foot ring for the high chairs provides support through the wide tread area and can be easily and quickly adjusted in height.
- With certificate "Tested Safety" (GS mark).
- 10 years warranty, Made in Germany.

Accessories: Armrests (pair). Lab-Clip: The intelligent Lab-Clip enables Labsit to be easily, individually and quickly labelled, this creates order. Can be added or removed any time.

1 Laboratory stool Labsit, with castors

Bimos

The space-saving laboratory stool is a good solution for short-term sitting. The black integral foam cushion is very comfortable. The release ring enables infinitely variable seat height adjustment.

- Robust and washable
- Disinfectant-resistant
- Suitable for cleanrooms: Certified for the use in cleanrooms category 3 in accordance with ISO 14644-1
- Adheres to biosafety level BSL1, BSL2 and BSL3 of the Directive for Biological Agents
- GMP-conform
- Solid polished aluminium star base
- With certificate "Tested Safety" (GS mark)
- 10 years warranty, Made in Germany

1 | 2 Laboratory Chair Neon

Bimos

Neon new generation laboratory chairs. Neon offers the best possible support for the body and excellent sitting comfort to wellbeing at work in the laboratory. Neon supports the forward-leaning sitting position that is often necessary for the laboratory work. So Neon is always the ideal solution for the laboratory, when a really comfortable chair is needed.

- Resistant to disinfectants and chemicals: Resistant to all of the usual disinfectants and chemicals.
- Seat and backrest upholstery made of artificial leather (soft and comfortable, washable and antibacterial) or soft-touch PU foam (extremly robust, washable and antibacterial) in black.
- Contaminant-free: No toxic substance and emission.
- Award winning for shape and sustainability. Neon is the first laboratory chair to be awarded the "Blue Angel" eco-label.
- Extra large, ergonomically designed backrest.
- Neon can be adjusted in every possible way to cater for different body sizes and weights on the one hand and the most varied activities on the other.
- The synchronous technology provides an active-dynamic sitting experience. The seat and backrest accompany the body as it moves.
- Innovative changeable upholstery system.
- The 1+1 system makes the change of upholstery very easy: The upholstery elements are simply placed on the chair and fixed with a click. .
- Seat height adjustment by gas spring.
- Synchronous technology including ergonomics package with seat height, seat inclination, seat depth and backrest height adjustment as well as weight regulation.
- Solid black aluminium star base, flat design.
- The chrome-plated foot ring for the high chairs provides support through the wide tread area and can be easily and quickly adjusted in height.
- With certificate "Tested Safety" (GS mark).
- 10 years warranty, Made in Germany

Accessories: Multifunktional armrests (pair): Adjustable in height, width and depth as well as swiveling.

Glove Boxes Vitrum/Pure/Air Stream

Front panel with two glove ports and one pair of gloves size 9, two lead-ins for cables on the back side (upper left and upper right). Transfer chamber with two doors, external door with latch to prevent accidental opening, the tray extends into the workspace with opening of the internal door for easy removal of inserted products.

SICCO

Specifications

Capacity Box:	290 l
Internal Dimensions Box (W x D x H):	850 x 540 x 650 mm
Max. Load Box:	40 kg
Inlet openings:	Ø 190 mm
Hinged lid opening (W x H):	850 x 425 mm
Capacity Transfer chamber:	24 l
Internal Dimensions Transfer chamber (W x D x H):	220 x 320 x 275 mm
Max. Load Transfer chamber:	3 kg
Power supply:	240 V, 50/60 Hz

1 Glove box Vitrum, borosilicate glass 3.3

Aluminium frame with panels made of borosilicate glass 3.3. The workspace is made of materials with good chemical resistance (aluminium, stainless steel, borosilicate glass) for handling of aggressive products. With gloves made of natural rubber. Workspace including two hose connectors for gas-filling and aeration and 2 x 5 m PVC tubing for gas-filling and 2 x 5 m PE aeration tubing. Transfer chamber with two doors, external door with latch to prevent accidental opening, the tray extends into the workspace with opening of the internal door for easy removal of inserted products.

1 Fume Hood Workstations LABOPUR® H Series

Manipulation of liquid chemicals and powders where and when needed.

ECOSAFE

Advantages: eliminates installation costs, saves substantially capital and running costs, mobile and easy to relocate wherever needed; protects the user and environment against toxic fumes.
Low Energy consumption: less than 200 KWh /year (for 2100 hours usage)

Choice of activated charcoal filters (Please order separately!):

- "ORG" filter for flammables and organics
- "CORC" filter suitable for the most common laboratory chemicals, for organic and corrosive vapors
- "FOR" filter for formaldehyde vapors
- "AMM" filter for ammonia vapors

Standard equipment:

- Built in 15/10 steel, covered with white Epoxy (RAL 9010) with blue stripes
- HPL or tempered glass worktop on removable retention tank (optional)
- Transparent PMMA glazed walls on all four sides for comfortable working or lectures
- Ergonomic hand traps or trapeze opening
- 4 protective caps for easy use of external supplies (e.g. power cables, water, gas)
- Air velometer; sampling outlet for reactive tube measurement

Recirculating air filter system (CLASS 2) and coal filters Norm NFX 15-211

- Noiseless fan: 57 dB(A), 220-240 V, 50 Hz, 10 W, 0.1 A
- Air flow: 170 m³/h; face velocity: 0.4 to 0.6 m/s
- Ventilation system with lighting control in case of system failure

Please choose fume hoods, charcoal filters, trolleys and accessories according to your needs. Delivered mounted.

The fume hood will be delivered without bottom retention tank and work top.

2 Workstation with Deaerated Storage Cabinet LABOPUR® H Series Package

Manipulation and storage in the laboratory: all in one.

ECOSAFE

The storage cabinet is connected to the fume hood in order to extract and absorb the toxic fumes from both items. The self-contained system provides mobility, security and highly reduces running costs. No ductwork or exhaust system required, no discharge of toxic gases to the environment. No heating or cooling of air.

Technical specifications of the cabinet:

- Built in steel 15/10, white Epoxy paint (RAL 9010) pictogram ISO 3864, EU 92/58/CEE
- Self-closing wing doors, locking system
- 1 height-adjustable retention shelf, 1 retention tank
- 4 castors (height of castors: 70 mm)
- Vent grids in the lower part, connection element to the fume hood

LABOPUR® Workstation supplied with:

- Ventilated storage cabinet
- Fume hood with recirculating air filtration system CLASSE 2, certified Norm NF X 15-211, May 2009
- Charcoal filter "CORG": absorbs inorganic/organic acids vapors and organic preparations and solvents
- Containment sump + melamine wotktop (tempered glass available on request)
- Connecting kit between the fume hood and the safety cabinet below

1

1 Ductless Fume Hoods Type Ascent Opti™

Compact, energy saving fume hood without ducting system.

ESCO

- Independently tested and complies with AFNOR NFX 15-211 standard
- Average Inflow Air Velocity: 0.5m/s
- Easy Filter change
- Sentinel-Microprocessor with LCD-Display, air velocity alarm and 24-hour-clock
- Fluorescent lighting provides superior illumination of the work zone
- Sloped acrylic front window
- With transparent back wall (for type SPD-4B1)
- Acrylic side walls
- ISOCIDE™ antimicrobial coating on all painted surfaces minimises contamination.
- Stainless steel spill-retaining work top.
- Sampling port
- Pass-through ports in the back wall
- Pre-filter made of polyester fibre, EU3 rating is included

Hood is delivered unassembled. On-site assembly can be completed in 60 mins. Without special tools.

Options on request:

Support stands, installation

For operation the main filters have to be ordered separately.

2 Chemical laboratory exhaust APA

- Safe handling of chemicals, protection from hazardous vapours and potentially explosive atmospheres

asecos

- Suitable for Pharmacies
- Easily mounted on a table top
- Robust construction made of chemically resistant, antibacterial powder-coated sheet steel
- Testing of the air equipment by recognized test institute

Standard equipment:

- Exhaust air fan
- Monitoring electronics with visual and audible alarm
- Stepless height adjustable front sash made from acrylic glass
- Workplace light
- 2 sockets

E & OE.

1 Ductless Fume Hoods Type Ascent™ Max

Compact, energy saving fume hood without ducting system.

- Independently tested and complies with AFNOR NFX 15-211 standard
- Easy Filter Change
- Average Inflow Air Velocity: 0.4m/s
- Sentinel-Microprocessor with LCD-Display, air velocity alarm and 24-hour-clock
- Fluorescent lighting provides superior illumination of the work zone
- Tempered glass sliding sash
- Tempered glass side panel
- ISOCIDE™ antimicrobial coating on all painted surfaces minimizes contamination.
- Stainless steel worktop

ESCO

Model variations:

Model type B: Pre-filter, main filter (activated carbon, different filter types available)

Model type C: Pre-filter, main filter (activated carbon, different filter types available), back-up filter (activated carbon, different filter types available)

Model type E: Pre-filter, main filter (activated carbon, different filter types available), back-up filter (HEPA filter)

Options on request:

Filter, electrical outlet, VOC sensor, service fixture, swan-neck faucet, Drip Cup (PP), support stand, installation

For operation the main filters and the back-up filter (Modell type C) have to be ordered separately.

1 Underbench Cabinet with Refrigerating Unit

- Safe and approved cooled storage of hazardous materials in workrooms
- Type proofed according to DIN EN 14470-1, fire resistance 90 minutes
- Mobile: integrated castors with plinth, easy moving of the cabinet
- Convenient handling: drawer can be opened with minimal effort
- Safe access to all containers: interior of the drawer is completely visible,
- Convenient: drawer remains open in any position, self-closing in the event of a fire
- No unauthorised use: drawer is lockable with cylinder locking and locking state indicator (red/green)
- Quickly put into operation: integrated technical recirculating air system with multi-stage filter system and power cord
- 7-Segment/LED-Display: function monitoring directly in view. Display shows the refrigeration temperature (TARGET/ ACTUAL), air exchange rate and filter saturation, easy setting of the required temperature
- High flexibility in choosing the installation location
- Active personal protection through safe capture of harmful vapours with retention in the filter system
- VDE tested electronic monitoring system with visual and audible alarm including potential-free alarm contact
- Safe, permanent min. 10-fold air exchange, no areas inside and outside of the cabinets are at risk of explosion
- Maximum refrigeration temperature of +2 °C (with max. 25 °C room temperature)

Safety Storage Cabinets V-Move 90

The space saving vertical drawer Safety storage cabinets provide an overview and simple access to the stored containers. Safe and approved storage of flammable hazardous substances in working areas.

asecos

- Space saving vertical drawer
- Robust construction and longevity: stable, high quality and scratch proof cabinet body with powder-coated surface
- Electronic opening and closing
- Standard serial closing after approx. 60 seconds with visual and acoustic signal for drawer closure
- Lockable with cylinder lock (integration in an existing locking system possible) and locking state indicator (red/green)
- Adjusting aids to compensate for uneven floor
- Integrated air ducts ready for connection (DN 75) to a exhaust system
- Guard rail system (option)
- 2 different colour versions available: Light grey RAL 7035 and Pure white RAL 9010

Scope of supply versions:

- 1) Cabinet without interior equipment
- 2) Cabinet with 4 x shelves (2.5-l bottles), 1 x perforated insert, 1 x bottom collecting sump
- 3) Cabinet with 5 x shelves (1-l bottles), 1 x perforated insert, 1 x bottom collecting sump
- 4) Cabinet left/right: 4 x shelves (2.5-l bottles), 1 x perforated insert, 1 x bottom collecting sump
- 5) Cabinet left/right with 5 x shelves (1-l bottles), 1 x perforated insert, 1 x bottom collecting sump
- 6) Cabinet left: 4 x shelves (2.5-l bottles), 1 x perforated insert, 1 x bottom collecting sump, right: 5 x shelves (1-l bottles), 1 x perforated insert, 1 x bottom collecting sump

Option:

- Recirculating air filter system with exhaust air monitoring (Cat. No. 9.840 650)
- Ventilation system with exhaust air monitoring (Cat. No. 6.238 986)
- Ventilation system without exhaust air monitoring (Cat. No. 9.840 616)

Safety Storage Cabinets Q-CLASSIC-30 with Wing Doors

- safe and approved storage of hazardous materials in workrooms
- type proved according to EN 14470-1, fire resistance 90 minutes
- GS-approved
- outer body made of flame retardant, melamine coated special plates, door front made of sheet steel with structured paint finish, colour: body anthracite grey (similar to RAL 7016), doors light grey (RAL 7035), door colour pure white (RAL 9010) available on request
- easy handling with comfort: doors stop in any position, self-closing in the event of fire
- standard door open arrest system holds doors open, safe and convenient storage and removal
- integrated transport base for an easy indoor transport
- removable base cover with integrated adjusting aids optional
- lockable doors with cylinder lock (integration into a locking system possible)
- ventilation connection (NW 75) in the cabinet ceiling

asecos

Shelves, height adjustable (32 mm increments), load capacity 75 kg (evenly distributed load), bottom collecting sump with perforated insert as a first storage level. Capacity bottom collecting sump: 33 litre (model width 1200 mm), 22 litre (model width 600 mm)

Supplied with: Safety Storage Cabinet Q-CLASSIC-30 Model Q30.195.116 or Q30.195.056 incl. interior equipment with 3 shelves, bottom collecting sump with perforated insert

Option:

- Recirculating air filter system with exhaust air monitoring (Cat. No. 9.840 650)
- Ventilation system with exhaust air monitoring (Cat. No. 6.238 986)
- Ventilation system without exhaust air monitoring (Cat. No. 9.840 616)

A wide variety of cabinet versions is available. Please enquire.

1 2 Cabinets for Acids and Alkalies SL-CLASSIC with Wing Doors

- safe and approved storage of aggressive, non-flammable hazardous materials in workrooms
- robust construction and longevity, safety elements assembled outside the storage compartment for increased protection against corrosion, easy to clean
- safe storage with two hermetically separated storage compartments
- doors lockable with cylinder locking (integration in locking system possible)
- integrated adjusting aids to compensate for uneven floor
- integrated metal-free air ducts ready for connection (NW 75) to a technical exhaust system with only one extraction air Inlet
- pull-out shelves: high quality and sturdy construction with removable plastic sump, load capacity 25 kg (evenly distributed load), capacity 15 litre

asecos

Supplied with: Cabinet for acids and alkalis SL-CLASSIC incl. interior equipment, Model SL.196.120.MV with 8 or 12 pull-out shelves, Model SL.196.060.MH with 4 or 6 pull-out shelves

A wide variety of cabinet versions is available. Please enquire.

5,5 - 9,0	Refill packs with 3 rolls	3	9.130 326

Further indicator papers available on request.

5

5 Indicator paper, Duotest

Roll length 5 m, 10 mm width. With two colour zones. Plastic box with 1 roll of indicator paper and colour scale. Duotest indicator papers combine two different indicator zones on a single strip. The zones are separated by a hydrophobic barrier, which effectively prevents mixing of the reaction colors, simplifying and precisely assigning the pH value.

MACHEREY-NAGEL

Range pH	Description	PK	Cat. No.
1,0 - 12,0	Dispensing reel with 1 roll	1	9.130 344
1,0 - 4,3	Dispensing reel with 1 roll	1	9.130 356

1

2 Litmus paper

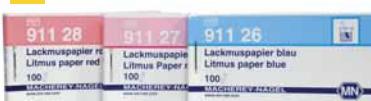

Litmus paper, available in blue, red and neutral.
Supplied in booklets of 100 strips, 10 x 70mm W x L.

MACHEREY-NAGEL

Measuring range	Type	Colour change	PK	Cat. No.
8.0 to 5.0	Litmus paper, blue	blue - red	100	9.130 112
5.0 to 8.0	Litmus paper, red	red - blue	100	9.130 116
5.0 to 8.0	Litmus paper, neutral	red - violet - blue	100	9.130 118

Also available as reel. Refill packs available separately.

2

3 LLG-Indicator paper sticks

For pH determination. Box of 100 indicator paper sticks of 80mm length.

3

4 LLG-Universal Indicator strips "Premium", in vial with snap lid

Flip-top vial is easy to open and close with one hand. The new LLG pH strips offer the utmost in convenience and ease of use in laboratory-grade testing. With a single colour match, and a 12 mm reagent pad, these universal pH strips (0.0-14.0) belong in every lab.

- pH measuring range: 0 - 14
- 12 mm matching area for quick matches,
- Flip-top vial stays closed when dropped, but is easy to open with one-hand.
- Vial keeps strips safe from the elements
- 1 pack (vial) of 100 strips

4

pH-measurement/Portable devices

1 | 2 LLG-pH Pen

Cost efficient pH tester, ideal for testing small amounts of liquid and in narrow vessels. The supplied storage container prevents the electrode from drying out.

- ATC from 0 °C to 50 °C
- Large, easy-to-read LCD display
- **3-point calibration**

Scope of supply: pH meter

Specifications

pH Measuring range:	0 ... 14
pH Accuracy:	±0.1
pH resolution:	±0.1
Dimensions with electrode (W x D x H):	36 x 20 x 210 mm
Dimensions electrode (diam. x L):	12 x 110 mm
Weight:	72 g
Power supply:	2 x 3 V CR2032 button cell
IP code:	IP 65
Warranty:	2 years

Type	PK	Cat. No.
LLG-pH Pen	1	6.263 690

1 | 2

3 | 4 LLG-pH Meter 5

The LLG-pH meter 5 is a very easy to use pH/mV/°C handheld meter. The pH value and temperature can be stored directly on the SD card (Excel file) or transferred directly from the pH meter to a PC via the RS-232 interface.

- Gel filled pH electrode with external temperature sensor with 1m cable
- BNC connector
- Automatic temperature compensation (ATC)
- Large, easy-to-read LCD display
- 3 point calibration
- Suitable for all standard SD cards with 1 to 16 GB

Please order batteries separately (6 x 1.5 V AA)

Optional: power cable, PC connection cable, PC software

Scope of supply: pH meter, pH electrode with temperature sensor, buffers pH 4 and pH 7, 4 GB SD-Memory card, transport case.

Specifications

Measuring range pH:	0 ... 14
pH resolution:	0.01
pH accuracy:	±0.02 + 2d

1 pH Meter PAL-pH

NEW
ATAGO

For the pH measurement this droplet type pH meter only needs 0.6 ml of sample.
 Suitable for e.g. foods, soil, water-soluble cutting oil or alkaline cleaning liquid.
 - Quick measuring results in 3 seconds
 - Unconsumable KCl due to internal electrode liquid
 - Completely flat measurement unit allows easy cleaning
 - 100 measured data can be wirelessly transferred via near field communication (NFC)

Specifications

Measuring range	0 ... 14 pH
Resolution:	0.01 pH
Accuracy:	±0.10 pH (2.0 ... 12.0 pH)
Calibration points:	at 4.01 pH, 6.86 pH, 9.18 pH
Temperature compensation:	0.0 ... 50.0 °C
Dimensions (W x D x H):	66 x 31 x 109 mm
Power supply:	2 x AAA alkaline batteries
IP code:	IP 65

Type	PK	Cat. No.
PAL-pH	1	6.312 228

PHX 800	pH tester	1	6.266 914

3

3 Pocket pH testers Eutech™ EcoTestr

Thermo Scientific

Valuable and waterproof pH testers, easy to use. Suitable for general and industrial purposes, e.g. in laboratories, pools, aquariums and cooling towers.

- Sensor protective cap can be used as a container for samples
- Easy battery change
- Auto-calibration and auto-buffer recognition
- Up to 3 calibration points (only EcoTestr® pH 2)
- Waterand dustproof housing
- Long-lasting, fixed sensor
- Automatic temperature compensation (only EcoTestr® pH 2)
- Hold function freezes last reading temporarily

Specifications:

Range:	0.0 ... 14.0 pH
Resolution:	0.1 pH
Accuracy:	±0.1 pH
Protection class:	IP 67
Power supply:	4 x 1.5 V A76 batteries

Type	PK	Cat. No.
EcoTestr pH 2	1	6.233 465

1 Tester Expert pH

Simultaneously measure pH and temperature with a pocket sized tester designed to provide accurate measurements on the go for a variety of applications.

Thermo Scientific

- Large 4 digit double line display
- Display of battery life, status and recalibration
- Automatic temperature compensation (ATC)
- Automatic buffer recognition and calibration
- Auto-power-off

Specifications

pH range:	0 ... 14
Resolution:	0.1
Accuracy:	±0.1
pH calibration points:	1 to 3 points
Temperature range:	0 ... 50 °C
Resolution:	0.1 °C
Accuracy:	±0.5 °C + 1 digit
Operating temperature:	5 ... 45 °C
Dimensions (W x L x H):	43 x 170 x 30 mm
Weight:	90 g
Power supply:	Incl. 4 batteries (A76 or LR44 equivalent)
IP code:	IP 67
Warranty:	1 year

Type	PK	Cat. No.
Expert	1	6.284 896

pH Pocket Tester Elite pH/Elite pH Spear

Simultaneously measure pH and temperature with a pocket sized tester designed to provide accurate measurements on the go for a variety of applications. The Pocket Tester

Thermo Scientific

Elite pH has a leakproof, transparent wide-base cap for upright standing with fill line indicator.

The Elite pH Spear pocket tester features a spear tip open pore sensor. This rugged and user-friendly tester is ideal for direct measurement of solid or semi-solid samples.

- 1-push calibration
- Large 4-digit double line display
- Backlit graphic display
- Auto-hold readings
- Easy-to-operate, intuitive keypad
- Auto-off

Scope of supply:

Elite pH and Elite pH Spear: Tester incl. batteries and lanyard

Elite pH Kit and Elite pH Spear Kit: Tester incl. batteries, lanyard, soft carry case, buffer sachets set (pH 4.01, 7.00, 10.01, deionized water, 5 x 20 ml each)

Pocket tester Eutech™ pHTestr/pH Spear, waterproof

Waterproof, rugged pH testers with one hand operation for general and industrial purposes, e.g. frequent testing of pools, aquariums, cooling towers, in the chemical industry and food processing.

Thermo Scientific

- Large LCD display
- Easy maintenance and cleaning
- Waterproof and dustproof housing
- User-replaceable, rugged sensor
- Double junction sensor, pHTestr 10BNC only with BNC connector, without sensor
- Push-Button calibration with up to 3 points and Auto-Buffer recognition
- Buffer solutions USA 4.01/7.00/10.01 and NIST 4.01/6.86/9.18 usable
- Hold function, the last measured value remains on the display
- pHTestr 30, 10BNC and pH Spear with temperature display
- pH Spear tester with glass tip electrode for direct measurement of solid or semi-solid samples, e.g. in food processing
- Up to 500 hours operation time with single battery set

pH meter PHT 810

Portable pH meter with external electrode.

ebro

- BNC connection
- With automatic pH calibration
- Handy and robust
- Current value memory
- Simple calibration with keypad
- Electrodes for different applications
- Min/Max- and hold function

pH meter set contains: pH meter PHT 810, penetration electrode AT 206, punching pin, buffer solutions pH4 and pH7, KCl solution, carrying case, 2-point calibration certificate

H phrases: H315|H319

Specifications

Measuring range:	0 to 14pH
Accuracy:	±0.03pH
Resolution:	±0.01pH
Operating temperature:	0 to +50°C
Storage temperature:	-25 to +60°C

pH meter Eutech™ pH150/pH450 series

The best value waterproof meter for measuring pH, mV and temperature.

Thermo Scientific

- Large, three line LCD, shows pH or mV measurement with temperature and % slope
- Built-in memory function, stores up to 150 measurements along with temperature
- Auto buffer recognition, automatically identifies USA, NIST or DIN buffer sets for rapid calibration
- Indication of necessary recalibration
- Power with AA batteries or use optional AC adapter
- Features mV offset, calibrate to a Redox/ORP standard or use for pH electrode diagnostics
- Ready indicator, manual or automatic measurement hold feature and optional automatic shutoff function
- % slope and temperature displayed with each measurement
- Includes innovative Grip-Clip™, quickly and easily secures the electrode to your beaker or container

Additional features PH450

- Backlit display
- Extended memory stores up to 500 data sets, easy USB or RS232 output with optional data cables
- Built-in real-time clock stamps storedata and calibration data with time and date, meets standards for GLP (Good Laboratory Practices)
- Ability to use ion selective electrodes

Scope of supply PH15002K and PH45002K: Meter with electrode, ATC probe, Grip-Clip™ electrode holder, 2 x AA batteries, hard carry case, pH buffers, storage solution, rinse solution

6.284 900

Specifications

pH range:	-2.00 to 16.00
Resolution:	0.01
Accuracy:	±0.01
pH calibration points:	Up to 5 points (USA & NIST), up to 6 points (DIN)
mV range:	±2000 mV
Accuracy:	±0.2 mV +2 digits or +0.5 % of reading
Temperature range:	-10.0 to +110.0 °C
Resolution:	0.1 °C
Accuracy:	±0.5 °C
Power supply:	incl. 2 x AA batteries, >700 h continuous use, AC adapter (optional)
Dimensions (W x L x H):	83 x 200 x 57 mm
Weight:	500 g
IP code:	IP 67
Warranty:	3 years on the meter

pH meter FiveGo™ F2

Portable pH meter for field work and laboratories.

Mettler-Toledo Online

- Measurement made easy: A large, well-structured display, intuitive button arrangement and simple menu ensure measurements can be performed in just a few clicks.
- Ergonomic design for one handed operation: Thanks to its ergonomic design, handling the FiveGo™ is a comfortable experience. The foldable stand provides optimal viewing on flat surfaces.
- IP67 Water and dustproof: The IP67 waterproof protection makes the FiveGo™ portables able to withstand wet and demanding environments.

Scope of delivery:

F2-Meter: Meter only

F2-Standard kit: Meter with LE438 sensor

F2-Food kit: Meter with LE427 sensor and carrying case

F2-Field kit: Meter with LE438 sensor and carrying case

Pocket pH meters ProfiLine Series

The WTW ProfiLine, hand-held, pH/mV meters are robust and waterproof, according to IP67. They have LCD or graphics displays. The proven DIN socket for connecting pH electrodes permits pH measurement even in wet environments. The instruments can be operated by standard alkaline or rechargeable batteries.

2 | 3 pH and redox meter pH 3110 ProfiLine

Make testing of pH and redox potential simple. Easy operation virtually eliminates errors.

WTW®

All function keys of the 3110 can be operated even when wearing gloves; automatic calibration and AutoRead functions ensure stable and reproducible results.

The multifunctional display for pH, mV and temperature is always easy to read.

Measuring ranges

pH: -2.0 ... +20.0

3 pH/Redox-Meter SD 305 pH

NEW
Lovibond®

Robust and waterproof hand-held meter for field use. For measurements in drinking water, cooling/boiler water, waste water, pool water and surface water.

- Automatic temperature compensation
- Buffer recognition of Lovibond® standards (pH 4.01/7.00/10.01) and buffers according to DIN 19266
- Choice between 1-, 2- or 3-point calibration
- Evaluation of the sensor quality after each calibration
- Alarm function with adjustable limits
- Auto hold function
- Battery status indicator
- Redox measurement in mV or mVH according to DIN 38404-6
- Data transfer and evaluation via software possible

Scope of supply:

SD 305 pH/ORP (Set 1): Instrument, protective covering with electrode holder, carrying case, pH/Temp. electrode Type 231, pH buffer solution (4.01/7.00/10.01), storage solution for pH/ORP electrodes, batteries, manual

SD 305 pH/ORP (Set 2): Instrument, protective covering with electrode holder, carrying case, pH/Temp. electrode Type 226, temperature probe Pt1000, pH buffer solution (4.01/7.00/10.01), storage solution for pH/ORP electrodes, batteries, manual

SD 305 pH/ORP (Set 3): Instrument, protective covering with electrode holder, carrying case, Redox electrode Type 242, temperature probe Pt1000, ORP control solution (470 mV), storage solution for pH/ORP electrodes, batteries, manual

1 pH-meter HandyLab 100

The portable allrounder for pH/mV measurements. The HandyLab 100 increases the measuring speed and accuracy thanks to the AutoRead and the CMC function. AutoRead displays when the measuring value is stable and eliminates the risk of a premature reading of the faulty measuring value. CMC (Continuous Measurement Control) visualizes whether the measuring value is still within the calibration limits. Having storage capacity for up to 200 data sets, stored data can be viewed. The HandyLab 100 can process 1- to 5-point calibration with a choice of 22 stored buffer sets easily and comfortably.

2

- Durable design for daily measurements
- Connection: 2 x 4mm diam. for integrated or separate temperature sensor
- Contrast-rich and scratch-resistant clear glass LCD display
- Self-explanatory operation with one clear text line
- Display of the sensor status at one glance with Sensoface
- Calibration of up to 3 points with automatic buffer detection (from 10 buffers)
- Manual calibration by indicating random buffer values
- Real-time clock and display of battery charging status
- Extended operating time of more than 1.000 hours with standard batteries (4 x AA)

**HandyLab 750 additional features:**

- Store up to 5.000 data points.
- Micro-USB connection to communicate with the software HandyLab Pilot software for evaluation of data from digital Memosens® sensors.
- HandyLab Pilot software (included with delivery), allows easy management and evaluation of stored data and can be used for device configuration.

Supplied with: Set with pH meter, AquaLine 90pH, SKK K1A and DIN buffer solutions in ampoules

pH/Ion-Meter Seven2Go™ pro S8

Portable professional model for pH measurement

Mettler-Toledo Online

- New, intuitive menu structure with fast and easy T-Pad navigation
- Robust design with IP67 protection for use in harsh and demanding environments
- Intelligent Sensor Management (ISM®) functionality reduces the risk of errors
- New sunlight-proof screen guarantees screen readability even in direct sunlight
- New StatusLight gives a fast, visual confirmation showing if the meter is ready to measure or not
- Operating support for 12 languages with information shown in complete words and sentences
- Up to 5 point calibration with automatic buffer recognition and temperature compensation
- 8 predefined buffer groups and 1 user defined buffer group (1 user defined ion-standard)
- Automatic, manual and time dependant endpoint recording
- Data memory storage for 2000 GLP data points with weatherproof Micro-USB connection for data export
- Power requirements: 4 x 1.5V AA or 1.3V NiMH accumulators

Items supplied:

S8-Meter: Instrument, LabX direct pH, USB cable, electrode clip, base accessory, operating instructions, quick guide, test certificate, declaration of conformity and batteries.

S8-Standard kit: As S8-Meter, but also with InLab Expert Pro-ISM-IP67 and buffer sachets for pH 4.01, 7.00, 9.21 and 10.00.

S8-Field kit: As S8-Standard kit, but also with bottles for calibration and uGo™ carrying case.

S8-Biotech kit: As S8-Field kit, but with InLab Routine Pro ISM (incl. cable) instead of InLab Expert Pro-ISM-IP67.

S8-Fluoride kit: As S8-Standard kit, but with perfectION Fluoride instead of InLab Expert Pro-ISM-IP67, without buffer sachets.

LLG pH meter 7

1

The LLG pH Meter 7 is an easy-to-use, robust table-top instrument for measuring pH and redox potential. The large color-touch-display and the intuitive, language-independent user interface ensure fast and easy use. Particularly suitable for routine applications in laboratories, production plants and schools.

- Available as set with gel combination electrode ("Made in Germany") with temperature sensor
- Large color-touch-display with language-independent graphical user interface
- Automatic temperature compensation
- Memory for 500 values
- 3-point calibration
- Reminder function for upcoming calibrations
- BNC connection for the electrode
- RS232 interface for data transfer
- Electrode holder can be mounted left and right

Scope of supply:

LLG pH meter 7: pH meter, electrode holder, protective cover, power supply unit

LLG-pH Meter 7 set: pH meter, combination electrode, electrode holder, protective cover, power supply unit

Specifications

pH range:	0 ... 14	6.263 601
pH resolution:	0.01	
pH accuracy:	±0.01

pH meter LAB 845

2

Due to the intuitive operation and robust aluminum housing the pH-Meter LAB 845 is perfect for training and routine purposes.

SI Analytics

- Made in Germany
- USB Interface
- Data logger (storage of up to 4000 entries: Date, time, main measured value, secondary measured value, measured temperature) with adjustable interval
- Numerical password protection
- Selectable user language (German, English, French and Spanish)
- Configurable turn-off time
- Sturdy aluminium housing
- Graphic LCD display, backlit

6.270 548

Scope of supply: Stand, mains adapter, electrode as indicated and 6 DIN buffers (2 x pH 4.01, 2 x pH 6.87 and 2 x pH 9.18)

Specifications

Measuring range // Resolution // Accuracy	
pH:	0 - 14 // 0.01 // ±0.01 (±2 at calibration point)

pH-measurement/Table devices

GENERAL CATALOGUE EDITION 21

pH meters Eutech™ PH700/PH2700 series

Economical, user-friendly and accurate, the PH700 is the ideal choice for routine applications in laboratories, production plants and schools. The advanced PH2700 offers an easy to read screen that says more. View pH or ORP readings, with temperature, electrode status, calibration points, date and time all at once.

Thermo Scientific

- Large, easy-to-read display
- Ready indicator
- 5-point calibration with auto-buffer recognition
- Memory holds up to 100 data points
- Integral electrode holder

Additional features PH2700

- Up to 6-point calibration with auto-buffer recognition
- Quick, easy electrode diagnosis with multiple pH slopes and offset display
- Extended memory holds up to 500 data points, time and date-stamped for GLP compliance
- Alarm for re-calibration
- Auto-Log function for convenient continuous monitoring
- Password protection for setup and calibration

Scope of delivery: Meter with Integral Electrode Holder (except PH70040) and electrodes as indicated.

Specifications

	pH700 // pH2700
pH range:	0.00 to 14.00 // -2.000 to 20.000
Resolution:	0.01 // 0.001
Accuracy:	±0.002
pH calibration points:	Up to 5 points // Up to 6 preset or 5 custom
mV range:	±1999 mV // ±2000 mV
Accuracy:	±0.2 mV (±199.9 mV) // ±2 mV (beyond)
Temperature range:	0.0 to 100.0 °C
Resolution	0.1 °C
Accuracy:	±0.5 °C
Dimensions (W x L x H):	155 x 175 x 69 mm
Weight:	650 g
Power supply:	100-240 V adapter
IP code:	IP 54
Warranty:	3 years on the meter

3 Laboratory instrument inoLab® pH 7310

Reliable Documentation for pH measurement, if desired also available with built-in printer. A modern backlit graphic display with menu controlled user interface allows easy and intuitive operation. The mini USB-B interface provides fast data transfer to a PC. The internal memory can record up to 5000 GLP complying data including ID, date and time. The housing and the keypad are easy-to-clean. Up to five calibration points cover almost the complete pH range. A calibration history of the 10 last calibrations allows conclusions on the state of the sensor. An integrated thermal printer (58mm width) is ready for printout of the measured data (option). **Supplied with:** meter, power supply, stand and USB cable.

pH meter FiveEasy™ pH F20/FiveEasy Plus™ pH FP20

FiveEasy™ and FiveEasy™ Plus benchtop meters provide high quality pH/mV measurements with the simple click of a button.

Mettler-Toledo Online

- Large, easy to read and easy to understand display with all information visible at a glance
- Five self-explanatory buttons making operation simple and easy
- Fast and easy connectivity for simple and secure data transfer (FP only)
- Electrode arm extension pole included

F20-Meter: Meter with CD operating instructions, QuickGuide, declaration of conformity, test certificate and power supply

F20-Standard: as F20-Meter, plus plastic LE438 3-in-1 pH electrode and 1 each x 4.01, 7.00 and 9.21 buffer sachets

FP20-Meter: Meter with CD operating instructions, QuickGuide, declaration of conformity, test certificate and power supply

FP20-Standard: as FP20-Meter, plus plastic LE438 3-in-1 pH electrode and 1 each x 4.01, 7.00 and 9.21 buffer sachets

FP20-Bio: as FP20-Meter, plus glass LE410 3-in-1 pH electrode and 1 each x 4.01, 7.00 and 9.21 buffer sachets

FP20-Micro: as FP20-Meter, plus glass LE422 micro pH electrode and 1 each x 4.01, 7.00 and 9.21 buffer sachets

FP20-TRIS: as FP20-Meter, plus glass LE420 pH electrode with moveable sleeve diaphragm and 1 each x 4.01, 7.00 and 9.21 buffer sachets

Specifications

Measuring range (Accuracy)

pH F20/FP20: 0.00 to 14.00pH/-2.00 to 16.00pH ($\pm 0.01\text{pH}$)

mV:

-2000 to 2000mV ($\pm 1\text{mV}$)

Temperature F20/FP20:

0 to 100°C (0.5°C)/-5 to 105°C (0.3°C)

Input:

BNC, Cinch (NTC 30k Ω)

Temperature compensation:

ATC and MTC

Power supply:

100-240V/50-60Hz/12V DC

Calibration F20:

3 points, linear, 4 predefined buffer groups

Calibration FP20:

5 points, linear/segmented, 4 predefined buffer groups

FP20 only:

Memory: 200 measurements

Interface: RS232, USB, Reference input

1 pH meter SevenCompact™ S210

The SevenCompact™ pH meter S210 is the perfect choice for a wide range of applications. At the same time, working with the S210 is like child's play. Starting a measurement or calibration has never been easier, requiring only a single keypress.

- Fast and accurate measurements
- User-friendly operation
- Menu guidance in 12 languages
- Clear, well arranged color display
- Many peripheral options
- GLP compliant

Supplied with:

S210-Basic: Instrument, electrode holder, protective cover, operating instructions, quick guide, declaration of conformity and test certificate

S210-Kit: As per S210-Basic, additionally with InLab® Expert Pro-ISM, guide to pH measurements and 2 buffer sachets for pH 4.01, 7.00, 9.21 and 10.00.

S210-Bio: As per S210-Kit, but with InLab® Routine Pro-ISM cable kit instead of InLab® Expert Pro-ISM.

S210-U: As per S210-Kit, but with InLab® Versatile Pro instead of InLab® Expert Pro-ISM.

GENERAL CATALOGUE EDITION 21

1 pH/Ion meter SevenCompact™ S220

The colour display with its well-designed icons and menu settings in 10 languages makes operation genuinely intuitive. Applications range from routine measurements through sample analysis, data handling and data archiving in compliance with GLP regulations. Simply innovative design that meets the requirements for a universal, easy-to-operate pH/Ion meter.

Mettler-Toledo Online

- User friendly instrument for demanding users
- Security and high reproducibility thanks to Intelligent Sensor Management (ISM®)
- Improved quality of measurements through professional calibration support
- Comprehensive service package including IQ/OQ
- Integrated USB and RS232 interfaces for data exchange

Supplied with:

S220-Basic: Instrument, electrode holder, protective cover, operating instructions, quick guide, declaration of conformity and test certificate

S220-Kit: As per S220-Basic, additionally with InLab® Expert Pro-ISM, guide to pH measurements and 2 buffer sachets for pH 4.01, 7.00, 9.21 and 10.00.

S220-Bio: As per S220-Kit, but with InLab® Routine Pro-ISM cable kit instead of InLab® Expert Pro-ISM.

S220-U: As per S220-Kit, but with InLab® Versatile Pro instead of InLab® Expert Pro-ISM.

S220-Micro: As S220-Kit but with InLab® Ultra Micro instead of InLab® Expert Pro-ISM

S220-uMix: As S220-Kit but also including the uMix™ magnetic stirrer

Combined redox electrodes InLab®

Redox combination electrodes for measuring the oxidation/reduction potential in aqueous solutions. The signal is generated on the surface of the indicator electrode by an electron exchange with the oxidation/reduction system of the measured medium. Without temperature sensor. With Safelock™ end ring for easy refilling of the reference electrolyte and complete sealing in closed position. For use with a wide variety of measuring instruments.

Mettler-Toledo Online

InLab® Redox: For general purpose. With platinum ring indicator electrode

InLab® Redox Pro: For emulsions, wastewater analysis and general purpose. With movable ground joint junction and platinum ring indicator electrode

InLab® Redox L: For large samples. With platinum ring indicator electrode

InLab® Redox Au: Combined redox electrode with gold ring indicator electrode

InLab® Redox Ag: Combined redox electrode with silver ring indicator electrode

InLab® Redox Micro: For small samples. With platinum ring indicator electrode

Please order connection cable separately.

1 Ion selective combination electrodes perfectION™

With integrated reference electrode. Easy cleaning of the diaphragm between measurements with Click & Clear™ (except Na electrode): by pressing the electrode head, the electrolyte solution flows through the diaphragm. The electrolyte can be easily emptied and refilled. Optimum contact between sample and electrolyte solution is always guaranteed.

Mettler-Toledo Online

Scope of delivery: Sensor with permanently connected 1.2 m cable with BNC connection, 60 ml reference electrolyte, operating instructions.

Scope of delivery Na-electrode: Sensor with S7 plug head, diaphragm made of glass with higher sensitivity to sodium, 25 ml reference electrolyte, operating instructions.

2 Ion selective, gas-sensitive electrodes

Modular half cell with exchangeable diaphragm and S-7 plug head for determining the concentration of individual ions in aqueous solutions. Easy to use and require comparatively low expenditure on apparatus thereby offering advantages over wet chemistry and instrument analysis methods. Ion selective electrodes must be used in conjunction with a suitable reference electrode (InLab® Reference, cat no. 9.041 590).

pH-measurement/Ion selective Electrodes-Electrode accessories

GENERAL CATALOGUE EDITION 21

1

6.252 026

Ammonia gas sensing ISE Electrode

Gas and ion selective electrode for determination of ammonia content in aqueous solutions. For rapid and precise measurement of ammonia.

Thermo Scientific

Scope of delivery: Waterproof BNC connector, 1 m cable, 20 loose membranes, preassembled outer body and membrane cap, 2 x 60 ml bottles of electrode filling solution, spout cap and tweezers.

Specifications

Concentration range:	0.01... 17000 ppm ammonia (NH_3)
	0.01... 14000 ppm nitrogen (N)
Temperature range:	0...50 °C
Electrode resistance:	<5000 MΩ
Length/Ø:	150 mm/16 mm
Cable length:	1 m

Type	PK	Cat. No.
Ammonia ISE electrode 9512BNWP	1	6.252 026 1

3. Analytical measurement and testing

pH-measurement/Buffer solutions

1 LLG-pH-Buffer solutions with colour coding in twin-neck dispensing bottles

The ready-to-use buffer solutions offer excellent quality, precision and advantages in use. The calibration vessel, integrated into the twin-neck dispensing bottles, allows the particularly economical dispensing of solution and prevents contamination.

Features

- Accuracy ± 0.01 , tested and certified at 25°C
- Temperature dependence data table printed on the label
- Traceable to NIST
- Shelf-life: 24 months (pH 7 and 10) or 36 months (pH 4) from date of production
- Colour-coded

pH-value at 25 °C	Colour	Capacity ml	PK	Cat. No.
4.00	red	250	1	9.040 868
7.00	yellow	250	1	9.040 869
10.00	blue	250	1	9.040 871

2 LLG-pH buffer solutions with colour coding

The ready-to-use colour coded LLG-pH buffer solutions offer excellent quality, precision and are designed to suit all end user requirements. Supplied in 1L bottles and conveniently colour coded to eliminate any risk of confusion between the 3 pH values.

- Accuracy ± 0.01 , tested and certified at 25 °C
- Temperature dependence data table printed on the label
- Traceable to NIST

pH-value at 25 °C	Colour	Capacity ml	PK	Cat. No.

Conductivity meter FiveGo™ F3

Portable conductivity meter for field work

Mettler-Toledo Online

- Measurement made easy: A large, well-structured display, intuitive button arrangement and simple menu ensure measurements can be performed in just a few clicks.
- Ergonomic design for one handed operation: Thanks to its ergonomic design, handling the FiveGo is a comfortable experience. The foldable stand provides optimal viewing on flat surfaces.
- IP67 Water and dustproof: The IP67 waterproof protection makes the FiveGo portables able to withstand wet and demanding environments.

Supplied with:

F3-Meter: Meter only

F3-Standard kit: Meter with LE703 sensor

F3-Field kit: Meter with LE703 sensor and carrying case

2 Conductivity meter CT 830

With automatic measuring range switching.

ebro

The meter is the ideal choice for determination of conductivity, salinity and temperature and combines the features for mobile application in the field with the precision and comfort of a laboratory meter. In the standard version the meter CT 830 is supplied with conductivity sensor AT 830 C and 1.50m cable. It is ideally suited for overall applications in the field and in laboratories. Two parallel, largely dirt-insensitive graphite electrodes, the integrated temperature sensor for parallel temperature measurement, an automatic temperature compensation and the wide measuring range are the benefits of the conductivity sensor.

Supplied with: Meter incl. conductivity sensor, calibration solution 0.1N/KCL 1288µS and case

2

Specifications

Conductivity meter SD 325 CON

NEW
Lovibond®

The portable instrument with data logger is ideal for determining electrical conductivity in aqueous media. With a simple keystroke, further parameters such as TDS, salinity or resistance can be selected and conveniently read off. The selection of different measuring cells allow the determination of low ($< 200 \mu\text{S}/\text{cm}$) and very high conductivities ($< 1000 \text{ mS}/\text{cm}$) with highest precision.

- Automatic recognition of conductivity standards
- Alarm function with adjustable limit values
- Auto hold function
- Selectable reference temperature ($20^\circ\text{C}/25^\circ\text{C}$)
- Automatic temperature compensation
- Battery status indicator
- Low power consumption
- Data transfer and evaluation via software possible

Scope of supply:

SD 325 CON (Set 1): Conductivity meter, protective covering, transport case, 4-pol graphite electrode (diam. 12 mm, $< 200 \text{ mS}/\text{cm}$), conductivity standards, batteries, manual

SD 325 CON (Set 2): Conductivity meter, protective covering, transport case, 4-pol graphite electrode (diam. 16 mm, $< 1000 \text{ mS}/\text{cm}$), conductivity standards, batteries, manual

SD 325 CON (Set 3): Conductivity meter, protective covering, transport case, 2-pol stainless steel electrode (diam. 10 mm, $< 200 \mu\text{S}/\text{cm}$, pure water), flow through cell for pure water, batteries, manual

Specifications

Conductivity:	0.000 ... 1000.0 mS/cm
Temperature:	-5.0 ... 100.0 °C
TDS:	0.000 ... 5000 mg/l
Resistance:	0.000 ... 50.0 MΩ/cm
Salinity:	0.0 ... 70.0 PSU
Datalogger:	10000 Data sets automatically 1000 Data sets manually
Interface:	USB
Dimensions (W x D x H):	100 x 164 x 37 mm
Weight:	302 g
Power supply:	2 x AAA batteries (incl.)

Pocket conductivity meters ProfiLine

The ProfiLine hand-held conductivity meters have a waterproof (IP 67) housing and a completely sealed silicone membrane keypad with tactile feedback. A separate battery compartment allows easy exchange of standard alkaline, or rechargeable, batteries. The carefully laid out, large displays indicate the reading and other important information. The 3310 series meters have a backlit, graphics display and menu-controlled operation. A selection of application specific conductivity cells cover virtually all measurement tasks.

2 | 3 Conductivity meter ProfiLine Cond 3310

Comfortable and versatile conductivity meter with integral, time controlled, data logger and 5000 GLP-compliant record memory for extended data collection. Menu controlled, with backlit, graphics display for comfortable, safe operation. Wide range of conductivity cells attachable. GLP-supporting functions, enhanced choice of cell constants, automatic and manual temperature compensation (which can be switched off) with linear and non-linear functions for pure water and natural waters acc. to EN 27888.

WTW®

Specifications:

Measuring ranges/Resolution:	
Conductivity:	as Cond 3110, but additionally with $0.00\mu\text{S}/\text{cm}$ to $19.99\mu\text{S}/\text{cm}$ (when $K=0.1\text{cm}^{-1}$) $0.000\mu\text{S}/\text{cm}$ at $1.999\mu\text{S}/\text{cm}$ (when $K=0.01\text{ cm}^{-1}$)
TDS:	0 to 1999mg/l, 0.0 to 199.9g/l
Spec. resistance:	0.0 to 999MΩ/cm
Memory:	5000 records (measured value, temperature, date, time, ID)

Cond 3310 Set 1	case set including conductivity probe TetraCon 325 and accessories	1	9.774 400

The inoLab® series from WTW

The inoLab® benchtops are perfectly designed for modern laboratory surroundings. The key pads are clearly outlined and easy-to-operate, their smooth surfaces are easy-to-clean and the operation is self-explanatory. All meters include a universal power supply and a convenient stand with sensor support. If desired they can be ordered in application oriented sets including sensors and accessories.

1 Laboratory instrument inoLab® Cond 7110

Modern conductivity measurement is easy to do. the inoLab® Cond 7110 has all important functions for measuring conductivity like adjustable reference temperature and different methods of temperature compensation. A big LCD segment display makes readings easy and a well-arranged keypad provides convenient operation. The automatic AutoRead function supports correct and repeatable results. Each meter come with a stand and accessories.

Specifications

Ranges:	All values ± 1 digit
Conductivity:	0.00 ... 1000 mS/cm $\pm 0.5\%$ of measured value 0.00 ... 19.99 $\mu\text{S}/\text{cm}$ at $K = 0.1 \text{ cm}^{-1}$
Salinity:	0.0 ... 70.0 (acc. IOT)
Temperature:	-5.0 ... 105.0 °C ± 0.1 °C
AutoRead:	automatic
Power supply:	Universal power supply, 100V to 240V, 50/60Hz, 4 x 1.5V AA or 4 x 1.2V NiMH

Conductivity meter inoLab® Cond 7310

This is the inoLab® Cond 7310 or inoLab® Cond 7310P. A modern backlit graphic display with menu controlled user interface allows easy and intuitive operation. The mini USB-B interface provides fast data transfer to a PC. The internal memory can record up to 5000 GLP complying data including ID, date and time. The housing and the keypad are easy-to-clean. The inoLab® Cond 7310 has the possibility to connect different standard and special conductivity electrodes and has automatic and manual temperature compensation (can even be switched off for pure water measurements according pharmacopeia) for linear and non-linear function according EN 27 888. An integrated thermal printer (58mm width) is ready for printout of the measured data (option). The scope of delivery includes meter, stand, power supply and USB cable.

Conductivity meters FiveEasy™ F30/FiveEasy™ Plus FP30

FiveEasy™ and FiveEasy™ Plus benchtop meters provide high quality conductivity measurements with the simple click of a button. They are the perfect choice for reliable measurement data at a reasonable price.

Mettler-Toledo Online

- Large, easy to read and easy to understand display with all information visible at a glance
- Five self-explanatory buttons making operation simple and easy
- Fast and easy connectivity for simple and secure data transfer (FP only)
- Electrode arm extension pole included

F30/FP30-Meter: Meter with CD operating instructions, QuickGuide, declaration of conformity, test certificate and power supply

F30/FP30-Standard: as F30/FP30-Meter, plus LE703 conductivity sensor and 1 each x 1413 $\mu\text{S}/\text{cm}$ and 12.88 mS/cm standard sachets

Specifications

Measuring range (Accuracy)

0.01 $\mu\text{S}/\text{cm}$ to 200 mS/cm / 0.01 $\mu\text{S}/\text{cm}$ to 500 mS/cm (± 0.5 % of measured value)

Conductivity F30/FP30:

0.01mg/l to 200g/l / 0.01mg/l to 300g/l

TDS F30/FP30:

0 to 100 °C (0.5 °C) / -5 to 105 °C (0.3 °C)

Calibration F30:

1 point, 3 predefined standards

Conductivity measurement/Table devices

Conductivity meters SevenCompact™ S230

The colour display with its well-designed icons and menu settings in 10 languages makes operation genuinely intuitive. Applications range from routine measurements through sample analysis, data handling and data archiving in compliance with GLP regulations. Simply innovative design that meets the requirements for a universal, easy-to-operate conductivity meter.

Mettler-Toledo Online

- User friendly instrument for demanding users
- Security and high reproducibility thanks to Intelligent Sensor Management (ISM®)
- Improved quality of measurements through professional calibration support
- Comprehensive service package including IQ/OQ
- Integrated USB and RS232 interfaces for data exchange

Supplied with:

S230-Basic: Instrument, electrode holder, protective cover, operating instructions, quick guide, declaration of conformity and test certificate

S230-Kit: As per S230-Basic, additionally with InLab® 731-ISM, guide to conductivity measurements and 2 calibration sachets for 1413µS/cm and 12.88mS/cm.

S230-USP/EP: As per S230-Kit, but with InLab® 741-ISM instead of InLab® 731-ISM and without calibration sachets for 12.88mS/cm.

9.704 165

Specifications:

GENERAL CATALOGUE EDITION 21

1 | 2 Conductivity meter SevenExcellence™ S470

Modular professional system for measurements of pH, redox potential, conductivity, salinity/TDS and ion concentration. Fits up to three modules in any composition and order, can be expanded with additional measurement parameters at any time.

- Large, high resolution 7" colour touch display (capacitive), very clear and easy to operate
- Modularity and flexibility; up to 3 measuring modules can work in parallel, expansion to 3 channels possible
- Universal communication via 2 x USB, Ethernet (LAN) and RS232
- Plain text user interface in 10 languages with menu guidance in full sentences
- OneClick™ operation concept to quickly start frequently used functions and preferred methods
- Storage for user methods
- Highest security and GxP support (ID protection, sophisticated user management, limits/alarms, integrated radio clock, etc.)
- Intelligent sensor management (ISM®)
- Connection of stirrer, sample changer, PC, barcode reader, keyboard, local or network printer possible
- Storage up to 20000 data sets (measurements, calibrations, methods)
- 17 predefined, 60 user-defined methods
- 5 point calibration (pH), 13 pre-defined and 20 user-defined buffer groups, incl. temperature chart
- uPlace™ electrode arm with perfect vertical movement
- Compatible with all METTLER TOLEDO electrodes (Recommended: ISM® electrodes)

S470-Basic: Includes instrument, 1 x conductivity expansion unit, 1 x pH/mV expansion unit, 1 x blank expansion unit, uPlace™ electrode holder, semi-transparent cover, operating instructions, installation and quick guide, LabX® direct pH PC software, declaration of conformity and test certificate.

S470-Kit: As S470-Basic but with InLab® Expert Pro-ISM, guide to pH measurements and 2 buffer sachets for pH 4.01, 7.00, 9.21 and 10.00.

S470-USP/EP: As S470-Kit but with InLab® 741-ISM instead of InLab® 731-ISM and InLab® Pure Pro-ISM instead of InLab® Expert Pro-ISM, BNC/RCA-MultiPin™ ISM-cable (1.2 m), and without 1413 µS/cm and 12.88 mS/cm calibration sachets.

Conductivity measurement/Electrodes

Conductivity cell probes

Standard conductivity cell probe TetraCon® 325:

4-pole cell with integral temperature sensor. Cable length 1.5 metres. Measuring range: 1 μ S/cm to 2S/cm.

WTW®

TetraCon® 325-3:

Like TetraCon® 325, but cable length 3 m

Special conductivity cell probe TetraCon® 325/C:

As TetraCon® 325, 4-pole cell with integral temperature sensor, but with sensor head made of chemically resistant PEEK. Cable length 1.5 metres.

Measuring range: 1 μ S/cm to 2S/cm

Ultra-pure water conductivity cell probe LR 325/01:

With integral temperature sensor and flowthrough vessel D 01/T for measuring very low conductivity ranges (<1 μ S/cm) e.g. boiler feed water or deionised water. Cable length 1.5 metres. Min./max. insertion depth 35/110mm and flowthrough, measuring range: 0.001 μ S/cm to 200 μ S/cm.

Conductivity flowthrough cell TetraCon® DU/T:

4-pole conductivity cell with integral temperature sensor for standard applications. Connection via 10mm diameter tubing nozzles (the adapter cable KKDU with 1 metre cable is required for connection). Filling volume 7ml. Measuring range: 1 μ S/cm to 1000 μ S/cm.

IDS conductivity cell probe TetraCon® 925:

Intelligent digital 4-pole cell with integral temperature sensor. Automatical transfer of the cell constant. For connection to WTW IDS measuring instruments. Cable length 1.5 metres. Measuring range: 1 μ S/cm to 2S/cm.

TetraCon® 925-3:

Like TetraCon® 925, but cable length 3 m

IDS conductivity cell probe TetraCon® 925/LV:

Intelligent digital 4-pole cell with integral temperature sensor. Fork design, suitable for small volumes (at least 2.5ml) as well as for viscous samples.

Automatical transfer of the cell constant. For connection to WTW IDS measuring instruments. Cable length 1.5 metres. Measuring range: 1 μ S/cm to 2S/cm.

IDS conductivity cell probe LR 925/01:

Intelligent digital 2-pole cell with integral temperature sensor and flowthrough cell D 01/T for measuring of low conductivity values (<1 μ S/cm) e.g. in boiler feed water or ion exchange water. Automatical transfer of the cell constant. Cable length 1.5 metres. Min./max. immersion depth 35/110mm and flow through measurement. Measuring range: 0.01 μ S/cm to 200 μ S/cm.

Dissolved oxygen meter FiveGo™ F4

Portable dissolved oxygen meter for field work.

Mettler-Toledo Online

- Measurement made easy: A large, well-structured display, intuitive button arrangement and simple menu ensure measurements can be performed in just a few clicks.
- Ergonomic design for one handed operation: Thanks to its ergonomic design, handling the FiveGo is a comfortable experience. The foldable stand provides optimal viewing on flat surfaces.

F4-Meter: Meter only

F4-Standard kit: Meter with LE621 sensor

F4-Field kit: Meter with LE621 sensor and carrying case

Oxygen meter SD 315 Oxi

NEW

Lovibond®

The portable hand-held measuring instrument SD 315 Oxi meets the daily requirements for a robust and reliable instrument for the determination of dissolved oxygen in aqueous media. The Clark oxygen sensor with integrated temperature probe enables immediate measurements without time-consuming run-in time (polarisation time).

- Simple calibration against air or according to DIN EN ISO 5814
- Alarm function with adjustable limits
- Automatic pressure and temperature compensation
- Auto Hold Function
- Automatic switch-off individually selectable from 1 to 120 min
- Backlit LCD display
- Sensor status display in % after each calibration
- Salinity correction
- Parameter: dissolved oxygen (O₂), O₂ concentration in mg/l, O₂ saturation in %, temperature in °C/°F
- Battery status indicator
- Flexible stand at the rear allows the unit to be set up or fastened to a belt.
- Data transfer and evaluation via software possible

Scope of supply: Instrument, protective covering, electrode holder, carrying case, galvanic oxygen sensor, KOH refill electrolyte, spare membrane, calibration bottle with sponge, batteries, manual

Specifications

O ₂ concentration:	0.0 ... 70.0 mg/l
O ₂ saturation:	0.0 ... 600.0 %

The inoLab® series from WTW

The inoLab® benchtops are perfectly designed for modern laboratory surroundings. The key pads are clearly outlined and easy-to-operate, their smooth surfaces are easy-to-clean and the operation is self-explanatory. All meters include a universal power supply and a convenient stand with sensor support. If desired they can be ordered in application oriented sets including sensors and accessories.

2 Oxygen meter inoLab® Oxi 7310

Reliable Documentation for dissolved oxygen measurement, if desired also available with built-in printer. This is the inoLab® Oxi 7310 or inoLab® Oxi 7310P. A modern backlit graphic display with menu controlled user interface allows easy and intuitive operation.

WTW®

The mini USB-B interface provides fast data transfer to a PC. The internal memory can record up to 5000 GLP complying data including ID, date and time. The housing and the keypad are easy-to-clean. The inoLab® Oxi 7310 supports the long proven WTW galvanic sensors, CellOx® 325 and StirrOx® G. A calibration history of the 10 last calibrations allows conclusions on the state of the sensor. Calibrations versus external standards e.g. Winkler titration, are possible, too. The meter includes automatic barometric pressure and temperature compensation. An integrated thermal printer (58 mm width) is ready for printout of the measured data (option). The scope of delivery includes meter, stand, power supply and USB cable.

Specifications

3 Galvanic Dissolved Oxygen Sensor CellOx® 325

Membrane covered galvanic dissolved oxygen for measurement of water and aqueous solutions. Low maintenance and without polarization time. The CellOx® 325 is a dissolved oxygen sensor with built-in temperature compensation by a NTC 30 kOhm sensor and membrane leakage monitoring for field and laboratory applications. It has a fast response ($t_{99} < 60$ s) and a low-maintenance operation. The application ranges from surface water, waste water treatment, BOD measurement to industrial and special applications. An electrolyte filling is sufficient for up to 6 months service life. The calibration vessel is included in the delivery. For Oxi 3xx, Oxi 3xxi, ProfiLine Oxi 197, ProfiLine Oxi 197i, ProfiLine Multi 197i, Multi 340i, Oxi 3205, Oxi 3210, Oxi 3310, ProfiLine Oxi 1970i, ProfiLine Multi 1970i, inoLab®.

1 Oxygen sensor StirrOx® G

For inoLab® Oxi 730, ProfiLine 197i/1970i, inoLab® 740 Oxi, inolab Oxi 7310

WTW®

Self-stirring oxygen sensor.

- single-handed use
 - high reproducibility
 - ready for immediate use, no polarisation period necessary
 - extremely low internal consumption of oxygen by the electrode
 - no zero point calibration necessary
 - OxiCal®-SL calibration and storage vessel included
 - 6 months operation with one electrolyte filling
 - IMT function compensation
 - membrane leakage monitoring, damaged membranes are indicated.
- Supplied with case, spare parts and maintenance solutions.

Type

PK Cat. No.

2 Oxygen sensor DurOx® 325

For use with Oxi 3xxi, ProfiLine Oxi 1970i, ProfiLine 3205, 3210, 3310.

WTW®

Membrane-covered oxygen sensor with low flow requirement and removable cage guard, for field applications (fish farm revival pools) and for educational purposes.

- ready to measure - no polarisation time
- IMT compensation via two integral temperature sensors
- service life with one electrolyte filling approx. 6 months
- minimal flow requirement
- no zero current
- sensor is watertight (IP 68 - 2)
- standard with 3m cable and watertight plug
- standard with calibration/storage vessel OxiCal® -D
- standard with cage guard SK-D

Multiparameter measurement/Devices

GENERAL CATALOGUE EDITION 21

1 Multiparameter meters SD 335

Depending on the set, the portable multi-parameter measuring device is ideally suited for the precise determination of pH, redox, temperature, conductivity/TDS/salinity as well as saturation and concentration of dissolved oxygen.

- Intuitive user interface thanks to graphical LCD display
- Simultaneous determination of up to three parameters due to galvanic isolation
- Selection between multi-parameter display or single value display
- Setting of alarm limits for parameter monitoring
- Micro-USB connection for software-free data transmission and power supply
- Data logger records measurement data incl. time stamp and measuring point ID in a fixed time interval or manually at the push of a button
- Automatic recognition of standard solutions
- Evaluation of the sensor quality after calibration
- Rechargeable NiMH batteries

Scope of supply: Meter, protective armouring, electrode holder for 2 electrodes, pH/temp. electrode type 231, pH buffer (4.01/7.00/10.01), storage solution for pH/ORP electrodes, 3 x AAA-NiMH rechargeable batteries, user manual

SD 335 Multi (Set 1) pH/Con/Temp. additionally: Conductivity electrode LC 12 (< 200 mS/cm), conductivity solution 1413 µS/cm (NIST)

SD 335 Multi (Set 2): pH/DO/Temp. additionally: Galvanic oxygen sensor (2 m cable), refill electrolyte, membrane heads, calibration bottle with sponge

SD 335 Multi (Set 3): pH/Con/DO/Temp. additionally: Conductivity electrode LC 12 (< 200 mS/cm), conductivity solution 1413 µS/cm (NIST), galvanic oxygen sensor (2 m cable), refill electrolyte, membrane heads, calibration bottle with sponge

New logo - new name:
Aqualytic® becomes Lovibond®!

1 Multi parameter HandyLab 680

The HandyLab 680 increases the measuring accuracy via:

SI Analytics

- IDS technology. The digitalization of the measuring signal eliminates interferences.
- AutoRead function. Autoread provides a stable, precise measuring value.
- CMC (Continuous Measurement Control) visualizes whether the measuring value is within the calibration range.
- QSC (Quality Sensor Control) informs about the actual condition of the electrode and therefore increases operation safety.

The HandyLab 680 increases the operator comfort via:

- IDS Technology. The secure allocation of the calibration data to the sensor eliminates any uncertainty about the date and results of its last calibration. This saves time and money while assuring the highest confidence in your measurements.
- Traceability of the measuring values by the digital and automatic capture of all sensor data.
- User administration can be activated to allow tiered access and capabilities ensuring security and confidence of your data.
- Transmission of all data in *.csv format via USB interface to the PC or the USB memory stick, or, as an alternative, formatted transfer to Excel by means of MultiLabImporter (included in the delivery).

Supplied with:

HL680pH/CondVersat: pH/Cond meter Set HandyLab 680 with conductivity electrode LF413T IDS, pHElectrode A7780 IDS, case Z530 and protective armouring Z389 for general applications

HL680pH/Cond/OxVer: pH/Cond/OX meter Set HandyLab 680 with oxygen electrode FDO1100 IDS, conductivity electrode LF413T IDS, pHT electrode A7780 IDS, case Z530 and protective armouring Z389 for general applications

Specifications

pH

Measuring range: 0.000 ... 14.000pH
Resolution: ±0.001pH
Accuracy: ±0.004pH

mV

Measuring range: ±1200.0 mV
Resolution: ±0.1mV
Accuracy: ±0.2mV

Temperature

Measuring range: -5.0 ... +105.0°C
Resolution: ±0.1°C
Accuracy: ±0.2°C

Conductivity

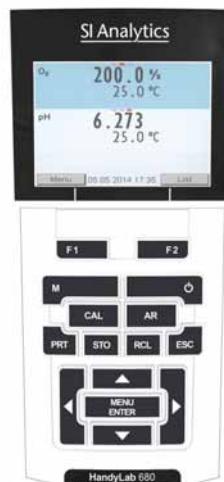

Measuring range: 0.00 ... 2000mS/cm
Resolution: ±0.1mS/cm, ±0.01µS/cm, ±0.001µS/cm
Accuracy: ±0.5% of mean value
Specific resistance: 0.00 Ωcm ... 100 MΩcm ±0.5% of mean value
Salinity: 0.0 ... 70.0 (acc. to IOT)

Multiparameter measurement/Devices

GENERAL CATALOGUE EDITION 21

1

1 Multiparameter meters ProfiLine pH/Cond 3320

The pH/Cond 3320 has a robust, waterproof housing (IP67) and is equipped with a memory as well as a data logger with an adjustable interval between 1 s and 60 min. All entries contain GLP-supporting data, like the date, time and ID number. The modern, waterproof USB interface is used for easy and quick data transfers. Applications: Process chemistry, Life Science, food and beverage industry, pharmaceutical industry (measurement of pH and conductivity according to pharmacopeia).

WTW®

- Two inputs for the simultaneous measurement of pH/mV/ISE/redox potential and conductivity
- Backlit graphic display for the parallel display of the measured values
- Perfect for monitoring process applications
- Waterproof USB interface

Scope of delivery pH/Cond 3320 Set 2: Professional pH and redox meter for mobile measurements. Meter in transport case with SenTix® 41, TetraCon® 325, buffer solution STP 4 and STP 7, conductivity standard 0.01 mol/l KCl, manual, stand, beaker, CD-ROM, driver software for USB, batteries, cable.

Specifications

Measuring range/Resolution

pH:	-2.000 ... 19.999 ±0.005 pH
mV:	-2500 ... +2500 ±1 mV
ISE (mg/l, µmol/l, mg/kg, ppm, %):	0.000 ... 999999
Conductivity:	0.000 µS/cm ... 1000 mS/cm
Salinity:	0.0 ... 70.0
TDS:	0 mg ... 199.9 g/l
Temp.:	-5.0 ... 105.0 °C ±0.1 °C
Memory:	manually 200/5000 automatically
Power supply:	4 x 1.5 V AA or 4 x 1.2 V NiMH battery

2

2 Multiparameter meter ProfiLine Multi 3320

The Multi 3320 for the measurement of pH, ORP, conductivity and dissolved oxygen (electro-chemical) is an ideal meter for environmental applications in the areas of ground and surface water measurement, in aquatic cultures as well as in wastewater treatment plants and much more. The Multi 3320 has a robust waterproof housing (IP 67) and memory with data logger with adjustable interval between 1 s and 60 min. The keypad can also be operated when wearing gloves and is easy to clean under a water jet.

WTW®

- Two inputs for simultaneous measurement of pH and conductivity or pH and dissolved oxygen
- Backlit graphic display for parallel output of measured values
- All conventional WTW pH electrodes, combined ISE electrodes, conductivity measuring cells and galvanic oxygen sensors can be connected to the meter.
- Waterproof USB interface

Scope of delivery Multi 3320 Set 1: Professionel pH and conductivity meter for mobile measurements. Meter in field case with SenTix® 41, CellOx® 325, TetraCon® 325, sensor accessories, manual, stand, beaker, CD-ROM, driver software for USB, batteries, cable.

*depending on oxygen sensor and measuring media

The inoLab® series from WTW

The inoLab® benchtops are perfectly designed for modern laboratory surroundings. The key pads are clearly outlined and easy-to-operate, their smooth surfaces are easy-to-clean and the operation is self-explanatory. All meters include a universal power supply and a convenient stand with sensor support. If desired they can be ordered in application oriented sets including sensors and accessories.

Laboratory instruments inoLab® Multi 9620 IDS/ 9630 IDS

Securely traceable with the cutting edge inoLab® Multi 9630 IDS and inoLab® Multi 9620 IDS.

WTW®

- Secure measurement data
- Digital sensor recognition
- Complete documentation
- Wireless ready

High-tech made by WTW for challenging applications. Two digital inoLab® multi parameter instruments for IDS sensors for simultaneous measurement of equal or different parameters and sensors. Two (inoLab® Multi 9620 IDS) or three sensors (inoLab Multi 9630 IDS) could be connected either by cable or via wireless modules. A large color graphic display protected by a glass plate supports the representation of readings and information. The anti-bacterial keypad minimizes the danger of microbiological contaminations. The robust lower case made of zinc diecast provides proper stand and perfect shielding against interferences. A high quality stand for alternative left or right mounting allows easy adaptation to the requirements at the working place.

6.283 614

Secure measurements

- Digital data transfer eliminates interferences, provide secure calibration data and makes documentation of sensor data easy.
- The smart sensor rating (QSC) gives information about the true condition of an IDS pH electrode and increases safety of operation
- The CMC function for pH visualizes the optimum measuring range and supports correct measurements.
- Visual display for the channel in order to provide correct allocation of channel and sensor.

6.285 517

Documentation according GLP/AQA

- Automatic digital recording of all sensor data for distinct documentation
- Optional user administration for clear allocation of user and measurement results and assigning different access levels
- Transfer of data as *.csv format via USB to PC, if desired transfer direct to Excel (MultiLab Importer, part of scope of delivery or as download from internet)
- Additional transfer to USB memory drive or selected printer

Compatible to conventional pH measurement

- pH module (accessory) capable of being integrated for pH, ISE and ORP electrodes with DIN or BNC plug and 4 mm banana plug. For temperature sensor.

IDS WLM Kit. For wireless measurement of pH/ORP, conductivity, dissolved oxygen, or turbidity. Consisting of a wireless module for sensor and meter, USB charger and universal USB power supply.

Multiparameter measurement/Devices

GENERAL CATALOGUE EDITION 21

1

1 | 2 Multiparameter meters

Selected IDS-Sensors:

2

SenTix® 940: Low maintenance combined pH electrode with ATC, QSC suitable, memory for 10 calibrations, stored serial number, pH 0.000 to 14.000 ($\pm 0.004\text{pH}$), temperature range 0.0 to 80.0°C, $\pm 0.2^\circ\text{C}$. Also available with plug head for cable or wireless modules.

SensoLyt® 900: Low maintenance polymer electrolyte pH electrode with built-in temperature sensor, pressure resistant up to 10 bar, QSC suitable, memory for 10 calibrations, saved serial number, pH 2.000 to 12.000 ($\pm 0.004\text{pH}$), temperature range from 0.0 to 60.0°C, $\pm 0.2^\circ\text{C}$. Only available with plug head for cable, MPP or wireless modules.

SenTix® 950: Combined pH-electrode with plastic shaft, 3 mol/l KCl, ATC, QSC-suitable, memory for 10 calibrations, stored serial number, pH 0.000 to 14.000 ($\pm 0.004\text{pH}$), temperature range 0.0 to 80.0°C, $\pm 0.2^\circ\text{C}$. Also available with plug head for cable or wireless modules.

SenTix® 980: Combined pH-electrode with plastic shaft, 3 mol/l KCl, ATC, platinum wire junction, QSC-suitable, memory for 10 calibrations, stored serial number, pH 0.000 to 14.000 ($\pm 0.004\text{pH}$), temperature range 0.0 to 100.0°C, $\pm 0.2^\circ\text{C}$. Also available with plug head for cable or wireless modules.

TetraCon® 925: Robust, general purpose 4-electrode conductivity cell with graphite electrodes incorporating integral temperature sensor. Memory for 10 calibrations, stored serial number, measuring range 10 $\mu\text{S}/\text{cm}$ to 2000 mS/cm $\pm 0.5\%$ of value, 0.0 to 100.0°C, $\pm 0.2^\circ\text{C}$. Also available with plug head for cable or wireless modules.

LR 925/01: 2-electrode stainless steel conductivity cell for low conductivities, integrated temperature sensor, flow through vessel, memory for 10 calibrations, stored serial number, measuring range 0.01 $\mu\text{S}/\text{cm}$ to 200 $\mu\text{S}/\text{cm}$ $\pm 0.5\%$ of value, 0.0 to 100.0°C, $\pm 0.2^\circ\text{C}$. Also available with plug head for cable or wireless modules.

FDO® 925: Extremely fast ($T_{99} < 60\text{ s}$) and precise optical DO sensor for field and laboratory applications. Handy, suits in different BOD bottles. Waterproof for depth measurement to 100m. Bevelled, air bubble repelling membrane, Green light technology for extended operation time. Insensitive against H₂S. O₂ concentration: 0.00 to 20.00mg/l, O₂ saturation: 0.0 to 200.0% O₂ partial pressure: 0.0 to 400hPa. Accuracy: $\pm 0.5\%$ of value. Also available with plug head for cable or wireless modules.

The information for meter precision refers to the sensors' built-in, electronic, measuring technology.

Multiparameter meters MultiLine® IDS

Professional digital multiparameter meters for mobile measurement, with 3, 2 or 1 universal measurement channels, wireless preparation, colour graphic display (black/white display for Multi 3510), data logger manually or automatically (timed) and 2 (1 for Multi 3510) waterproof USB interfaces suitable for field use. Easy to clean with a soft brush under water jet.

WTW®

Multi 3630: The Multi 3630 IDS with three universal measurement channels is suitable for all WTW IDS pH, ORP, dissolved oxygen sensors, conductivity cells and turbidity sensors, whether connected to cable or wireless. Documentation of meter and sensor data. User control over MultiLab® users. With USB-A and Mini USB-B interface and colour display.

Multi 3620: The Multi 3620 IDS with two universal measurement channels is suitable for all WTW IDS pH, ORP, dissolved oxygen sensors, conductivity cells and turbidity sensors, whether connected to a cable or wireless. Documentation of meter and sensor data. User control over MultiLab® users. With USB-A and Mini USB-B interface and colour display.

Multi 3510: Sequential multi-parameter measurement. All WTW IDS pH, ORP, dissolved oxygen sensors, conductivity cells and turbidity sensors can be connected to the universal channel, either with cable or wireless module. Data transfer to PC with MultiLab® Importer. With Mini USB-B interface and black/white display.

Wireless module MultiLine® IDS WLM-S

Wireless measurement of pH/Redox, conductivity, dissolved oxygen and turbidity.

WTW®

- Bluetooth® LE
- Universal plug head
- Opening for electrolyte solution refilling (only pH electrodes with liquid electrolyte)
- Signal LED (RGB)

Suitable for IDS portable meters MultiLine® Multi 3630 IDS/3620 IDS/3510 IDS, as well as for IDS laboratory meters inoLab® Multi 9630 IDS/9620 IDS/9310 IDS.

Specifications

Range:	About 10 m
Continuous operating times	
IDS pH/ORP electrodes:	60 h
IDS Conductivity cells:	30 h (conductivity up to 1 S)
IDS Oxygen sensor:	9 h
IDS Turbidity sensor:	5 h
Protection class:	IP43
Power supply:	Re-chargeable LiPo battery 230mAh

2

2 Laboratory instrument inoLab® Multi 9310 IDS

Intelligent, digital IDS sensors promotes the inoLab® Multi 9310 IDS to a perfect all-rounder. The universal digital input is ready for all available laboratory IDS sensors.

WTW®

No matter whether pH, conductivity or dissolved oxygen, when plugged into a suitable sensor the inoLab® Multi 9310 becomes either a pH, conductivity or dissolved oxygen meter. An integrated thermal printer (58mm width) is ready for printout of the measured data (option). Includes meter, power supply, stand and USB cable. The inoLab® Multi 9310 IDS is wireless ready.

Multiparameter measurement/Devices

pH/conductivity meters SevenCompact™ Duo S213

Compact, universal dual-channel meter for measuring pH and conductivity as well as resistivity, salinity and TDS.

- Suitable for digital and analogue sensors
- Quick and easy calibration with up to 5 calibration points
- Automatic temperature compensation
- Memory for 2000 values
- Large TFT colour display
- Robust construction
- Intuitive, simple operation

Scope of supply:

S213 Meter: Device incl. electrode holder, power adapter, protective cover, operating instructions, declaration of conformity and calibration certificate

S213 Standard kit: Same as S213 meter, additionally with InLab® Expert Pro-ISM pH sensor and InLab® 731 ISM conductivity sensor, 2 bags each of buffer pH 4.01, 7.00, 9.21, and 10.01, 2 bags each of conductivity standards 1413 µS/cm and 12.88 mS/cm

S213 Water Kit: Same as S213 meter, additionally with InLab® Pure Pro ISM pH sensor and InLab® 741 ISM conductivity sensor, 2 bags each of buffer pH 4.01, 7.00, 9.21 and 10.01, 2 each of conductivity standard 1413 µS/cm

3 Precision balances Type EMB

The Precision balances EMB are entry-level devices in the field of laboratory balances.

Kern & Sohn

They can be stacked with a stack frame (optionally available) and can also be operated by battery, as an alternative to mains power, which means that they have the flexibility to be used in different locations.

- Simple and convenient 2-key operation
- Tare function facilitates formulation work
- Flat design
- Batteries included
- EMB 100-3 with ring-shaped draught shield
- Hook for underfloor weighing
- Large LCD display
- AUTO-OFF function after 3 min

Dimensions (W x D x H): 170 x 240 x 39 mm

EMB 100-3/EMB1000-2: 170 x 240 x 54 mm

Net weight: approx. 750 g

1 Precision balance EHA

The compact all-round model for laboratory, industry and teaching.

- High precision
- Large, shock proof weighing plate made from stainless steel
- Particularly flat design
- Simple and convenient 5-key operation
- Level indicator and levelling feet as standard
- Adjusting program CAL for quick setting of the balance accuracy
- Battery operation
- Universal mains adapter EU, GB

2 Compact balances Compass™ CX

Balance series with high battery life for daily weighing tasks. With a large weighing platform for a variety of mobile weighing applications in laboratories, industry and education.

OHAUS

- Battery life up to 1000 hours in continuous operation
- Backlit LCD display, digit height 18 mm
- Easy and convenient 2-button operation
- ABS housing and stainless steel weighing platform with non-slip feet

Scope of delivery: Balance incl. 3 AA batteries included.

Please order power adapter separately.

Dimensions (W x D x H): 135 x 201 x 41 mm

6.281 354

Portable Balances, Scout® SKX

- Superior overload protection and practical stackable design for convenient storage
- Bright backlit LCD and 4 button operation make the new scout easy to see and use
- Multiple connectivity options are available for data logging and communication
- Fast weighing speed and high resolution delivers repeatable and reliable results
- Application: Weighing, density determination, mole weighing
- Display: Backlit LCD: 6-digit 7-segment with white LED backlight
- Operation: AC adapter (included), batteries (not included)
- Communication: Optional RS232, USB host, USB device, Bluetooth or Ethernet
- Construction: ABS housing, stainless steel pan, replaceable in-use cover
- Design Features: Fast stabilization time, menu lock switch, stackable design, security slot, integral weigh below hook for below balance weighing applications, transportation lock, removable stainless steel weighing platform, stability indicator, overload and underload indicators, low battery indicator, auto shut-off

Portable Balances, Scout® STX

- Navigate quickly and efficiently using the informative color touchscreen display
- Fast weighing speed and high resolution deliver repeatable and reliable results
- Superior overload protection and stackable storage drive overall durability
- Multiple weighing modes and languages for simplified weighing
- Application: Weighing, percent weighing, parts counting, check weighing, dynamic/animal weighing, totalization, density determination, display hold, mole weighing
- Display: Full-color touchscreen WQVGA graphic LCD (4.3" diagonal), QWERTY keyboard and numeric keypad to quickly input GLP and GMP data and other application data
- Operation: AC adapter (Included), batteries (not included)
- Communication: Optional RS232, USB host, USB device, Bluetooth or Ethernet
- Construction: ABS housing, stainless steel pan, replaceable in-use cover
- Design Features: Fast stabilization time, up-front level indicator, up to 9 operating languages, save-to-USB function, menu lock switch, stackable design, security slot, integral weigh below hook for below balance weighing applications, transportation lock, removable stainless steel weighing platform, stability indicator, overload and underload indicators, low battery indicator, auto shut-off

Portable Balances Navigator™

The rugged and multifunctional Navigator™ is a powerful balance for essential weighing applications as weighing, parts counting, percent weighing and checkweighing, providing high accuracy and repeatability for laboratory, industry and education.

- Backlit LCD display, digit size 20 mm
- 4 quick keys for easy operation of multiple weighing modes
- User-selectable external span calibration or linearity calibration, digital with external weight
- ABS housing with stainless steel weighing plate
- Stability indicator and low-battery indicator
- Optional RS232, USB or Ethernet interfaces

Please note:

Models with type suffix M are approved devices according to EN 45501 Class III

Scope of supply: Balance, mains adapter

3 | 4 Digital weighing platforms KDP

NEW

Universal weighing platforms for flexible connection into process chains. All recorded values can be transferred to the system as digital data using the available interfaces and processed further.

Searching and remote control of the balance using external control devices or computers with the KERN Communication Protocol (KCP). KCP is a standardised interface command structure for KERN balances and other instruments which allows you to recall and manage all relevant parameters and device functions. You can therefore simply connect KERN devices with KCP to computers, industrial control systems and other digital systems. In a large number of cases the KCP is compatible with the MT-SICS protocol. DAkkS calibration certificate optionally available.

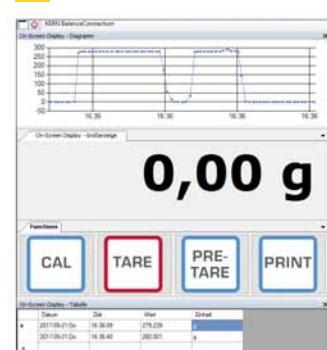

- PRE-TARE function
- Freely programmable weighing unit
- Level indicator and levelling feet

Scope of supply: Digital weighing platform KDP, Software balance connection, universal mains adapter (EU, GB, CH, USA), KDP 300-3 additionally with draught shield

Specifications

Overall dimensions (W x D x H):	165 x 166 x 75 mm
Cable length:	1.2 m
Weight:	1.2 kg
Permissible ambient temperature range:	5 ... 35 °C
Material weighing plate:	plastic, with conductive lacquer
KPD 300-3	stainless steel
KDP 3000-2, KDP 10K-4, KDP 10K-3	plastic, with conductive lacquer
Data interface:	USB

Compact Balances EK-AEP, Ex-protected

NEW

A&D Inst.

Compact, lightweight balance for precise weighing in potentially explosive atmospheres (zones 0, 1 and 2). Equipped with an optical data output for transferring measuring results to device in a distant, safe area.

- Easy-to-read backlit LCD display, digit size 16 mm
- Hygienic and chemically resistant stainless steel (SUS304) weighing pan
- Comparator function for faster and more accurate filling, packing, sorting, etc
- Adjustable response characteristics depending on the degree of drafts and vibrations at the location
- Multiple weighing units: g, oz, lb, ozt, ct, mom, dwt, gr, N, in addition to pcs (counting mode), % (percent mode), SG (specific gravity)
- Battery operation (4 x AA alkaline batteries 1.5 V, approx. 250 hours)
- Auto power OFF function

Please order fibre optic cable and optical communication interface AD-1611 separately.

Precision balance Type PCB

Compact scale for your laboratory. Due to the Recipe and piece counting function, as well as the grand precision this scale is perfect for the daily use in the Laboratory.

Kern & Sohn

- Protective working cover over keyboard and housing is enclosed as standard.
- Modern, backlit LCD display, digit height 15 mm
- Optional battery operation, 9V Block, not included.
- AUTO-OFF function to preserve the battery, can be switched off
- Stainless steel weighing plate, the models PCB 100-3, PCB 250-3 and PCB 350-3 has a plastic weighing plate

Overall (W x D x H): 163 x 245 x 85mm

1 Precision balance KB

Convenience model at an economical price

Kern & Sohn

1

- User guidance step by step in the display
- Freely programmable weighing units, e.g. display directly in special units such as the length of thread g/m, paper weight g/m², or similar
- Precise counting. The automatic reference optimization gradually improves the average value of the piece weighing
- Numerical tare deduction for container weighing. Useful when checking loads
- Ring-shaped draft shield standard, 90 x 40mm dia. x ht. for models with readability d = 0.001g

Also available with DKD certified calibration weight, thermal printer, statistics printer at additional cost.

Precision balance EWJ

Verifiable entry level model in the upper laboratory class

Kern & Sohn

2

- Concept of easy use: All primary functions have their own key on the keypad
- Automatic internal adjustment time-controlled every 2 hours. Guarantees high degree of accuracy and makes the location irrelevant
- Compact size, practical for small spaces
- Capacity display: A bar lights up to show how much of the weighing range is still available
- RS-232 and USB interfaces for transferring weighing data to the PC, printer, USB sticks etc. Excluded the -SM Models.

EWJ 300-3/EWJ 600-2SM/EWJ 600-2M: Draft shield with removable cover and opening for using a pipette, with a weighing chamber of (W x D x H) 134 x 128 x 80 mm

EWJ 300-3H: Large glass draft shield with a weighing chamber (W x D x H) 175 x 155 x 217 mm

GENERAL CATALOGUE EDITION 21

Balances/Precision balances

1

9.901 011

Precision balances type EW-N and EG-N

High quality laboratory balances, housed in a robust and stable plastic casing. With bar graph capacity display which shows the current available weighing range remaining. Fitted with protective working cover for casing and keyboard. Suitable for EC verification (only EG-N models, factory option at additional cost - details on request). Convenient, internal automatic calibration (only type EG-N) as well as extensive configuration and a menu of applications. Draught shield supplied with all 0.001g readability models. Additionally supplied with parts counting facility, percentage weighing function, flush-mounted platform. Optional available: Thermal printer, statistics printer, internal Akku-Pack, DKD calibration certificate for balance and optional test weight.

Printers for KERN ® balances

For printing weights. Compatible for all balances with RS232 interface. Please state your balance model when ordering, so that the printer can be preconfigured in the factory to suit your balance.

Kern & Sohn

Matrix needle printer for archiving: Not suitable for the PNS/PNJ and PES/PEJ models

Thermal printer with statistics functions: Not suitable for counting scales, EWJ models, PFB models and moisture analyzers

4

6.270 591

Precision balance PNS/PNJ

With robust tuning fork weighing system for fast display of the weight value, accurate dosing and high mechanical load capacity.

Kern & Sohn

- PNJ models with internal calibration function and guaranteed high accuracy, thus location-independent and ideal for mobile applications which require verification
- PNS models with external calibration function
- Capacity display: A bar lights up to show how much of the weighing range is still available
- Accurate counting: The automatic reference optimization gradually improves the average value of the part weight
- Compact dimensions, advantageous when space is limited
- Stainless steel weighing plate
- Models 600-3 and 600-3M have a large removable glass draft shield and a weighing chamber measuring (W x D x H) 172 x 171 x 160 mm.
- Large LCD display, digit height 16.5 mm
- Permissible ambient temperature range: 5 to 40 °C

1 Precision balances PR

The precision balances PR combine the basic weighing functions, weighing, piece counting and percent weighing with competitive performance, providing high accuracy and repeatability for laboratory, industrial and educational applications.

OHAUS

- Backlit LCD display
- 4 quick keys for easy operation of multiple weighing modes
- RS 232 interface
- User-selectable span calibration points
- Detachable stainless steel weighing platform
- Integrated weigh-below-hook
- Auto-tare
- Overload, underload and stability indicator

Please note:

Models with extra code /E with external calibration, all other models with internal calibration, models with extra code M are approved instruments according to EN 45501; OIML R76.

2 Precision balances PES/PEJ

Robust laboratory and industrial precision scale for heavy items.

Kern & Sohn

- Only PEJ: Automatic internal adjustment
- Only PES: Adjusting program CAL for quick setting of the balance accuracy, with an external test weight (must be purchased separately)
- Metal housing: robust and sturdy
- Weighing with tolerance range (checkweighing): Input of 2 upper and 2 lower limit values through 4 arrow keys. An audible and visual signal assists with the portioning, dispensing or grading
- Draught shield standard on all models with readout = 0.001 g, weighing space (W x D x H): 170 x 150 x 100 mm. Removable metal cover with pipette opening
- Underfloor weighing: load support with hook on the underside of the balance (only for models with a weighing plate size of 140x120 mm and 200x200 mm)
- Fluorescent display, bright with high contrast, digit height 13 mm
- Permissible ambient temperature: 10 °C/30 °C

GENERAL CATALOGUE EDITION 21

Balances/Precision balances

1

1 Precision balances Pioneer® PX

High-performance, economical balances with high accuracy and repeatability for applications in laboratories, industry and education. For basic weighing, parts counting, percent weighing, dynamic weighing and density determination.

OHAUS

- 2 line, backlit LCD display
- 4 quick keys enable the most common weighing modes
- USB and RS 232 interface for data exchange with PCs and PLCs
- User-selectable span calibration points
- Real time clock with GLP/GMP data
- Cast metal lower housing, removable stainless steel weighing pan
- Integrated weigh-below-hook
- Auto-tare
- Many weighing units selectable, a custom unit can be defined
- Overload, underload and stability indicator
- 4 menu languages

Please note:

Models with extra code /E with external calibration, all other models with internal calibration, models with extra code M are approved instruments according to EN 45501; OIML R76.

Precision balance Type PLS/PLJ

- ergonomically optimised keypad for left and right-handed users
- ring-shaped glass draught shield standard for all models with a weighing plate size of 110 mm dia. Removable metal cover with pipette opening. Weighing space 150 mm dia., height 60 mm
- The PLJ with a weighing plate size of 110 mm dia. also includes a rectangular draft shield with a weighing chamber of 160 x 140 x 205 mm
- count/weight switchover at the press of a button
- precise counting. The automatic optimisation of reference weight gradually improves the average value of the piece weight. The automatic optimisation of reference weight gradually improves the average value of the piece weight
- weighing with tolerance range Input of an upper/lower limit value. A visual signal assists with portion division, dispensing or grading
- percentage determination makes it possible to store a given weight value (100%) and to determine deviations from this target value in %
- density determination of liquids and solids with immediate display of the density on the display
- pre-Tare function for manual deduction of a known container weight. Useful for checking fill-levels

6.270 252

Precision balance Type PBS/PBJ

- only PBJ: Automatic internal adjustment in case of a change in temperature or time-controlled at defined intervals
- Metal housing: robust and sturdy
- Large backlit, LCD display, digit height 14 mm
- Dosage aid: High-stability mode and other settings can be selected
- Weighing with tolerance range (checkweighing): Input of an upper/lower limit value. A visual signal assists with portion division, dispensing or grading
- Totalizing of individual weighing results
- Identification number: 4 numeric positions, printed on calibration protocol
- Automatic data output to the PC/printer every time the balance is steady
- Draft shield standard, on all models with readout d = 0.001 g, weighing space (W x D x H): 180 x 193 x 87mm

Single-cell advanced technology:

- Fully automatic manufactured weighing cell from one piece of material
- Stable temperature behaviour
- Short stabilisation time: 3 sec
- Shock proof construction
- High corner load performance

Specifications

Overall dimensions, without draft shield (W x D x H): 209 x 322 x 78mm
Dimensions weighing space (W x D x H): 180 x 193 x 87mm
Permissible ambient temperature: 10°C/30°C
Weight: approx. 3kg

GENERAL CATALOGUE EDITION 21

Balances/Precision balances

1

1 Precision Balances Adventurer® AX

- Fast stabilization and reliable operation to ensure solid weighing performance and accurate, repeatable results.
- Two USB ports with GLP/GMP tracking capabilities assist the monitoring and reporting of the data.
- The wide viewing angle 4.3" colour touchscreen provides access to all applications.
- Reduced footprint due to two piece, top-mounted draft shield doors
- The 0.01g models feature large weighing pans
- AutoCal™ automatic internal calibration system or traditional external calibration (external calibration models -/E)
- EC Type Approved models available
- Applications: Weighing (17 units + custom unit), parts counting, percentage weighing, check weighing, dynamic weighing, totalization/statistics, formulation, density determination, display hold.
- Display: 4.3" (109 mm) Full-colour VGA graphic touchscreen with user-controlled brightness,
- Operation: Mains operation.
- Communication: RS232, USB Host, USB Device (included). GLP/GMP compliant data output with real-time clock
- Construction: Die-cast metal base, ABS top housing, stainless steel pan, glass draft shield with two piece top mounted side doors and sliding top door (0.1 and 1mg models only), illuminated up-front level indicator, integral weigh below hook, security bracket, calibration lock, full housing in-use cover
- Design features: Two-piece, top mounted, space-saving draft shield with removable panels on 0.1mg and 0.001g models. AutoCal™ automatic internal calibration or external calibration. Level assist feature with illuminated level indicator. Selectable environmental and auto-print settings. Integral weigh below hook. Protective full housing in-use cover. Software lock switch.

GENERAL CATALOGUE EDITION 21

Balances/Precision balances

1 | 2 | 3 Precision balances Cubis® II

Modular premium balances for research and development or analytical laboratories. The Cubis® II platform is a completely configurable, high-performance portfolio of both lab weighing hardware and software. The combinability of the display unit, weighing module, draft shield and software packages for various applications and functions allows the individual adaptation to all weighing tasks.

Sartorius Lab Instruments

- Monolithical weighing system
- Seamless connectivity to diverse laboratory information systems without the need of additional software
- Integrated climate sensor
- Status center notifications
- Full data integrity following ALCOA+ principles
- Supports all requirements for FDA directive 21 CFR part 11 and EU Annex 11 compliance
- Complete traceability via advanced audit trail and reporting function

MCE Essential User Interface:

- Large, high-contrast TFT touch display
- Factory-installed basic set of essential weighing applications
- Activated by touch key, touch-free using IR sensor or gesture sensor (optional)

MCA Advanced User Interface:

- Large 7" color touch display
- Factory-installed basic set of essential weighing applications
- Various QApp packages for optional software extension
- Activated by touch key, touch-free using IR sensor or gesture sensor (optional)

1 Analytical balance KERN ABS-N/ABJ-NM

The bestseller in analytical balances, now with high-quality single-cell weighing system and EC type approval (Type ending M)

Kern & Sohn

- Only ABJ-NM: Automatic internal adjustment in the case of a change in temperature $> 2^{\circ}\text{C}$ or time-controlled every 4 hours
- Only ABS-N: Adjusting program CAL, external test weights at an additional price
- Dosage aid: High-stability mode and other filter settings can be selected
- Simple recipeweighting and documenting with a combined tare/print function. In addition, the mixing ingredients for the recipe are numbered automatically and printed out with their corresponding number and weight value
- Identification number: 4 numeric positions, printed on calibration protocol
- Automatic data output to the PC/printer each time the balance reaches a steady state
- Large LCD display, digit height 14 mm

Single-cell advanced technology:

- Fully automatic manufactured weighing cell from one piece of material
- Stable temperature behaviour
- Short stabilisation time: Steady weight values within approx. 3sec under laboratory conditions
- Shock proof construction
- High corner load performance

Specifications

Overall dimensions (W x D x H): 210 x 340 x 325mm

Dimensions weighing space (W x D x H): 174 x 162 x 227mm

Permissible ambient temperature: 10°C/30°C

Net weight: approx. 6kg

2 Analytical balances ALS-A/ALJ-A

Kern & Sohn

Analytical balances with large weighing ranges.

- Only ALJ-A: Automatic internal adjustment in the case of a change in temperature $> 1.2^{\circ}\text{C}$
- Only ALS-A: Adjusting program CAL for quick setting of the balance accuracy, external test weights at an additional price
- Ergonomically optimised keypad for left and righthanded users
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed
- Compact size, practical for small spaces
- Percentage determination: makes it possible to store a given weight value (100 %) and to determine deviations from this target value
- Backlit LCD display, digit height 17 mm
- Weighing plate made of stainless steel

Specifications

Overall dimensions, incl. draught shield (W x D x H):

210 x 340 x 330 mm

Weighing space (W x D x H):

160 x 140 x 205 mm

Net weight:

approx. 5.7 kg

3 Balances, electronic, analytical, ABT series

Analytical and semi-microbalances which are suitable for verification.

Kern & Sohn

All models have automatic calibration adjustment function by internal, motor-driven, calibration weight. It is possible to log ISO/GLP-compliant weighing or calibration data at any time via an accessory printer (not supplied) or data interface (bi-directional RS232-C).

Additionally, the balances have formulation, piece counting and percentage determination functions, as well as a flush-mounted weighing platform. All models are supplied with a modern, all-glass draught shield with sliding doors to the left, right and top.

Also available with DKD certified, ionizer, thermal printer, statistic printer at additional cost.

Single-cell advanced technology:

- Fully automatic manufactured weighing cell from one piece of material
- Stable temperature behavior
- Short stabilisation time: Steady weight values within approx. 4 sec under laboratory conditions
- Shock proof construction
- High corner load performance

Weighing pan, stainless steel:

80mm dia.

Weighing chamber (W x D x H):

168 x 172 x 223mm

Dimensions (W x D x H):

217 x 356 x 338mm

Mains adapter:

220V

1 Analytical balance ABP

This new generation of analytical balances combines the highest level of precision with large weighing capacities. Thanks to the new Single-Cell Generation, the weighing result is displayed in a fraction of the time with comparable models.

Kern & Sohn

Together with the intuitively structured menu, this means that you can work efficiently and rapidly.

1

- Navigation pad for super quick navigating through the menus
- Automatic internal adjustment in the case of a change in temperature $\geq 1^{\circ}\text{C}$ or timecontrolled every 4 h, guarantees high degree of accuracy and makes the balance independent of its location of use
- The minimum weight of sample can be manually stored in the balance or automatically calculated, with warning message when the weighing is below this value
- Dosage aid: High-stability mode and other filter settings can be selected
- Simple recipe weighing and documenting with a combined tare/print function
- Menu language DE, GB
- Automatic data output to the PC/printer each time the balance is steady
- Large glass draught shield with 3 sliding doors for easy access to the items being weighed
- DM-models: Incl. Multi-function weighing plate for minimising the effect of currents of air in the weighing space and for easy fixing and weighing of protruding samples as sample paper, PCR containers or micro centrifuge tubes

Specifications

Overall dimensions, incl. draught shield (W x D x H): 213 x 407 x 344 mm

Analytical balances Entris® II

The evolution of the Entris® balance series. The large portfolio offers the right model for every weighing task. With many convenience functions for efficiency and accuracy in the laboratory. Quality "Made in Germany".

Sartorius Lab Instruments

- Modern sensors ensure very fast stabilisation time
- Automatic, internal calibration and adjustment function (isoCAL) for all "i" models
- Weighing platform made of stainless steel
- Excellent readability and operability with hybrid touch display
- Automatic detection of connected Sartorius accessories
- Direct data transfer to connected PCs with USB-C and RS232 interface without need of additional software
- 12 integrated applications with GLP/GMP-compliant protocol
- Easy to clean, high chemical resistance
- Multilingual interface

2 Analytical balances Entris® II

High weighing space, easy access to weighing platform through side doors and upper sliding door. Specially coated windscreens against electrostatic charge.
 All models also available as approved versions for EU/France.

GENERAL CATALOGUE EDITION 21

Balances/Analytical balances

1

1 Analytical balances Adventurer® AX

- Fast stabilization and reliable operation to ensure solid weighing performance and accurate, repeatable results.
- Two USB ports with GLP/GMP tracking capabilities assist the monitoring and reporting of the data.
- The wide viewing angle colour touchscreen provides access to all applications.
- Reduced footprint due to two pieces, top-mounted draft shield doors
- AutoCal™ automatic internal calibration system or traditional external calibration (external calibration models -/E)
- EC Type Approved models available
- Applications: Weighing (17 units + custom unit), parts counting, percentage weighing, check weighing, dynamic weighing, totalization/statistics, formulation, density determination, display hold.
- Display: 4.3" (109 mm) Full-colour VGA graphic touchscreen with user-controlled brightness,
- Operation: Mains operation.
- Communication: RS232, USB Host, USB Device (included). GLP/GMP compliant data output
- Construction: Die-cast metal base, ABS top housing, stainless steel pan, glass draft shield with two piece top mounted side doors and sliding top door, replaceable in-use cover
- Design features: Two-piece, top mounted, space-saving draftshield with removable panels on 0.1mg and 0.001g models. AutoCal™ automatic internal calibration or external calibration. Level assist feature with illuminated level indicator. Selectable environmental and auto-print settings. Integral weigh below hook. Protective full housing in-use cover. Software lock switch.

2 Analytical balances Quintix®

Intuitive application guidance, start of applications with only one keystroke.
Maximum accuracy at all times. Made in Germany.

Sartorius Lab Instruments

- The balance automatically adjusts itself when the pre-set temperature and time is exceeded
- Coloured Touchscreen Display
- Easy cleaning
- "Plug & Work" connectivity to printer or computer via USB port for simple GLP-compliant logging, direct data transfer to Microsoft® Windows programs without further software
- Password protection and supervisor lock for protection against unintentional changes
- Integrated underfloor weighing
- Easy cleaning: For cleaning of the windshield, the side windows, the sliding cover and all stainless steel parts are easily removable.
- Extra large adjustable feet for easy levelling

GENERAL CATALOGUE EDITION 21

Balances/Analytical balances

1

1 Analytical Balances PR

The analytical balance PR combines the basic weighing functions, weighing, piece counting and percent weighing with competitive performance, providing high accuracy and repeatability for laboratory, industrial and educational applications.

OHAUS

- Backlit LCD display
- Draftshield
- 4 quick keys for easy operation of multiple weighing modes
- RS 232 interface
- User-selectable span calibration points
- Detachable stainless steel weighing platform
- Integrated weigh-below-hook
- Auto-tare
- Overload, underload and stability indicator

Please note:

Models with extra code /E with external calibration. All other models are equipped with an internal calibration.
Models with extra code M are approved instruments according to EN 45501; OIML R76.

1 Analytical balances Pioneer® PX

High-performance, economical balances with high accuracy and repeatability for applications in laboratories, industry and education. For basic weighing, parts-counting, percent weighing, dynamic weighing and density determination.

OHAUS

1

- 2 line, backlit LCD display
- 4 quick keys enable the most common weighing modes
- Draftshield
- USB and RS 232 interface for data exchange with PCs and PLCs
- User-selectable span calibration points
- Real-time clock with GLP/GMP data
- Cast metal lower housing, removable stainless steel weighing pan
- Integrated weigh-below-hook
- Auto-tare
- Many weighing units selectable, a custom unit can be defined
- Models with removable side draftshield doors and static removal bar made from ABS
- Overload, underload and stability indicator
- 4 menu languages

Please note:

Models with extra code /E with external calibration. All other models are equipped with an internal calibration. Models with extra code M are approved instruments according to EN 45501; OIML R76. Models with extra code D are with dual range function.

GENERAL CATALOGUE EDITION 21

Balances/Analytical balances

1

4.671 854

Micro Balances BM

NEW

A&D Inst.

Analytical Balances with easy removal of static electricity via a built-in fan-free ionizer and anti-static windshield. Wide range of accessories for a variety of applications, e.g. holder for microcentrifuge tubes or aluminium vessels.

- Clearly readable, white-lit LCD display
- Large weighing chamber, suitable for flasks
- Integrated sensors for temperature, humidity and air pressure
- Internal calibration automatic, based on temperature change, manual, triggered by the operator
- Weighing units: g, mg, oz, ozt, ct, mom, dwt, GN, Tael, Tola, piece (counting), %
- Memory up to 200 data sets
- RS-232C interface and Quick USB Standard.

2 | 3 | 4 Analytical balances Cubis® II

Sartorius Lab Instruments

Modular premium balances for research and development or analytical laboratories. The Cubis® II platform is a completely configurable, high-performance portfolio of both lab weighing hardware and software. The combinability of the display unit, weighing module, draft shield and software packages for various applications and functions allows the individual adaptation to all weighing tasks.

- Monolithic weighing system
- Seamless connectivity to diverse laboratory information systems without the need of additional software
- Integrated climate sensor
- Status center notifications
- Full data integrity following ALCOA+ principles
- Supports all requirements for FDA directive 21 CFR part 11 and EU Annex 11 compliance
- Complete traceability via advanced audit trail and reporting function

MCE Essential User Interface:

- Large, high-contrast TFT touch display
- Factory-installed basic set of essential weighing applications
- Activated by touch key, touch-free using IR sensor or gesture sensor (optional)

MCA Advanced User Interface:

- Large 7" color touch display
- Factory-installed basic set of essential weighing applications
- Various QApp packages for optional software extension
- Activated by touch key, touch-free using IR sensor or gesture sensor (optional)

GENERAL CATALOGUE EDITION 21

Balances/Moisture balances

1

1 Halogen Moisture Analyser DBS 60-3

Modern moisture analyser with 10 memories and graphic display

Kern & Sohn

- Halogen quartz glass heater 400 W
- Backlit LCD display, digit height 15 mm: Previous drying time, current temperature, unit for displaying the results, current moisture content in %, drying mode/Status display drying
- Observation window over the sample, useful during initial adjustment
- Internal memory for automatic sequence of 10 drying programs and 100 drying processes carried out
- The last value measured remains on the display until it is replaced by a new measurement
- Sample description for up to 99 samples, 2 digits, freely programmable, and is printed in the measuring protocol
- Date and time display as standard
- 10 sample plates included
- Table of applications: There are many practical examples in the operating instructions

Specifications

Readability:	0.01 % or 0.001 g
Weighing range, max:	60 g
Reproducibility, weight of sample 2 g:	0.15 %
Reproducibility, weight of sample 10 g:	0.02 %
Temperature range:	+50 to +200 °C
Dimensions (W x D x H):	204 x 336 x 167 mm

Type	PK	Cat. No.
DBS 60-3	1	9.901 441

Suitable accessories can be found in our online shop.

Moisture analyser DAB 200-2/DAB 100-3

Moisture analyser with user-friendly graphics display and 15 memories for drying programs.

Kern & Sohn

- Halogen quartz glass heater 400 W
- Backlit LCD display, digit height 14 mm
- Display of: Drying process active, Active heating profile, Active switch-off criteria, Previous drying time, Current temperature, Moisture display in %, Interim result in moisture-%
- Observation window above the sample, useful during initial setting
- Internal memory for automatic sequence of 15 complete drying processes and 5 drying processes carried out
- The last value measured remains on the display until it is replaced by a new measurement
- 50 sample plates included

Specifications

Recommended humidity range:	5 ... 80 %
Temperature range:	40 ... 199 °C in steps of 1°C
Dimensions (W x D x H):	240 x 365 x 180 mm
Weight:	4.82 kg

Power supply: 230 V AC, 50 Hz

2

2 Moisture analyser DAB 200-2

Model with lower resolution, whereby the switch-off criterion is reached faster, which saves time. Ideal for quick tests and spot checks.

Kern & Sohn

Specifications

Readability:	0.05 % or 0.01 g

DAB 100-3	1	6.281 836

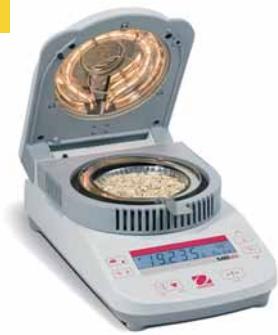

1 Moisture balances MB23 and MB25

The Moisture Analyzers MB-23 and MB-25 provide stable results with 0.1% or 0.05 % moisture resolution because of precision weighing technology. They are supplied with either an infra-red, or halogen, heating system. Applicable for most applications. Graphical interface control. No programming necessary.

OHAUS

- Halogen (MB-25) or infra-red (MB23) technology
- Sample holder included in MB25 but as option in MB23
- Delivered with 50 x 90 mm aluminium sample dishes and protective cover

1

Specifications

	MB23 // MB25
Capacity:	110 g
Repeatability 3 g/10 g:	0.3 %/0.2 % // 0.2 %/0.05 %
Readability:	0.1 % or 0.01 g // 0.05 % or 0.005 g
Timer:	1 ... 99 min, 30-second increments to 60 min
Temperature range:	50 ... 160 °C
Operating temperature:	5 ... 40 °C
Pan size (diam.):	90 mm
Dimensions (W x D x H):	170 x 130 x 280 mm
Net weight:	2.3 kg
Power supply:	100 - 240 V, 50/60 Hz

Type	PK	Cat. No.
MB23	1	9.947 604
MB25	1	9.947 605

2 Halogen Moisture balance MB27

Ideal for routine moisture determinations, that require precise results up to 0.01 % and high capacity up to 90 g. Optimal for applications e.g. in the food, agriculture, chemical and pharmaceutical sector. Easy setting of the parameters. Compact instrument with easy-to-clean heating chamber.

OHAUS

- Backlit LCD display
- Tare Range to capacity by subtraction
- Displays % moisture or % solids or weight (g), temperature, time
- Bidirectional interface(RS-232)

2

Halogen moisture balances MB90 and MB120

Moisture Analysis Made Simple and Powerful.

OHAUS

- The precisely controlled halogen heating dries samples quickly and ensures uniform heating to yield fast, precise and repeatable results of 0.01 % readability
- Designed with effortless maintenance in mind; removable pan handler and heating chamber components that make cleaning quick and easy, no tools needed
- Icon-based menu navigation on the easy-to-read touchscreen display makes operating intuitive
- MB120's Temperature Guide analyzes a sample and determines the optimal drying temperature
- Applications: Percent Moisture Determination, Percent Moisture Regain Determination, Percent Solid Determination, Weighing
- Display 4.3": TFT color touchscreen display
- Operation: Power cord (included)
- Communication: RS232 with GLP/GMP data output, USB Host and USB Device (included)
- Construction: Metal base, ABS top housing, halogen heat source, stainless steel pan support, stainless steel pan handler, in-use cover

Design Features MB90: Three shut-off criteria (manual, timed or auto), two drying profiles (standard and fast), storage up to two methods, user guide, 40 to 200 °C heating temperature range (1 °C increments), 13 operational languages

Design Features MB120: Seven shut-off criteria (manual, timed, autofree %/s, autofree mg/s, A30, A60 and A90), four drying profiles (standard, fast, ramp and step), storage up to 100 methods and 1000 test results for all methods, user guide, 40 to 230 °C heating temperature range (1 °C increments), 13 operational languages

3 Moisture Analyser MA35

- Fully automatic heating of a sample by two powerful metal tubular-shaped heating elements (also called dark radiators)
- Particularly simple operator guidance using self-explanatory pictograms
- Sample quantity 5-15g
- % moisture content, % dry weight, ATRO value, g residue, mg weight loss
- Shutoff criteria (optional): fully automatic, timer setting (0.1-99min.), manual
- Access to sample chamber through hinged cover with large opening angle
- 1 program saved in a non-volatile memory (freely selectable parameters)
- Printout using an optional, external printer (Cat. No. 6.238 838)
- Fixed standard configuration GLP report for measuring results, calibration, adjustment (5 languages selectable)
- External calibration using optional weight sets
- Data interface RS232 C-S/V24-V28, 7 data bits (ASCII) 1 parity bit

Sartorius Lab Instruments

Specifications

Readability:

0.01 % or 0.001 g

Weighing range, max:

35 g

Reproducibility, weight of sample 1g:

±0.2 %

Reproducibility, weight of sample 5g:

±0.05 %

Temperature range:

40 ... 160 °C, in increments of 1 °C

Power consumption:

400 VA

Dimensions (W x D x H):

224 x 366 x 191mm

3. Analytical measurement and testing

Balances/Moisture balances-Weights

1 Moisture Analyser MA160

The MA160 moisture analyzer is designed for quick and reliable determination of the moisture content of liquids, pastes and solids using the thermogravimetric method.

Sartorius Lab Instruments

Suitable for the use in QA laboratories and for process control. For testing of foods, beverages, pharmaceuticals, chemicals, sugar, paper materials and products for environmental protection.

- High-performance AURI heating unit for homogeneous drying
- Heating elements are fast, extremely rugged and durable
- Exceptionally high-speed measurements (up to 30 % faster)
- Fast and precise method development
- Memory capacity for storage of methods and results
- Method import and export via SD card
- Reliable performance testing
- Effortless cleaning
- User-friendly operation
- Downward compatibility with MA150 and MA35

Balances/Accessories

GENERAL CATALOGUE EDITION 21

1

1 Weighing boat parchment paper, Kjeldahl 609, nitrogen-free

Ideal for weighing and transporting all types of sample. Especially for determination of nitrogen according to Kjeldahl (e.g. determination of total protein content in foodstuff). Made of nitrogen-free parchment paper. Can be dropped into the Kjeldahl flask and be dissolved together with the sample.

Whatman

Type	Width mm	Length mm	Height mm	PK	Cat. No.
Kjeldahl 609	10	55	10	100	9.069 011

2

2 Weighing boats MN 808, Paper, nitrogen-free

Pack of 100 pieces.

MACHEREY-NAGEL

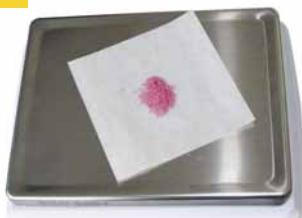

Paper

Dimensions: 58mm x 10mm x 10mm

Type	Length mm	Width mm	Height mm	PK	Cat. No.
MN 808	58	10	10	100	9.301 069

Other sizes and weighing aids available on request.

3

3 LLG-Weighing paper

- Not treated with nitrogen during production
- Smooth surface
- 45 g/m² paper
- Block of 500 sheets

Dimensions (D x W) mm	PK	Cat. No.
76 x 76	500	6.272 246
102 x 102	500	6.272 247
152 x 152	500	6.272 248

4

4 Weighing paper MN 226

Transparent, smooth. 40 g/m² paper

MACHEREY-NAGEL

Block of 100 sheets.

Type	Width mm	Length mm	PK	Cat. No.
MN 226	90	115	100	9.058 975

Further weighing aids available on request.

Weighing Papers, Grade 2122

The weigh paper sheets reliably allow samples to be transferred to scales without adding unwanted substances that could impact analytical results.

Whatman

- Smooth surface allows samples to slide off with ease and not be retained on paper.
- Shiny pergamyne paper allows visual determination that all sample has been removed.
- Extremely thin (0.03 mm) and lightweight (40 g/m²) for safe and secure sample transport.
- No glue or additives (residue-free).

Note: This paper is not low in nitrogen. Therefore, it should not be used for Kjeldahl analysis.

Dimensions (D x W) mm	PK	Cat. No.
150 x 150	500	7.009 805
100 x 100	500	7.009 806

5

5 Playing card rejects

Standard size for use as disposable sample carriers or spatulas. Pack size: 1 kg, not sorted.

3 Balance bench with granite slab

Constructed to absorb vibrations and oscillations, which would otherwise distort the weighing result. With a granite slab positioned on absorbing rubber components as surface for placing the analytical balance. The work surface surrounds the slab and offers many storage options. The sturdy aluminium frame has four height-adjustable feet, which can be used to accurately level the balance bench on an uneven floor. The inlet on front of the table offers the possibility to work at the bench in an ergonomic standing or seated position without touching the table. All surfaces are easy and hygienic to clean.

Description

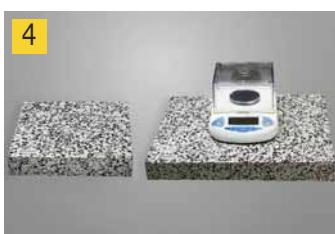

Balance bench with granite slab

PK Cat. No.
1 6.262 477

3

4

4 Anti-vibration platform, Vibrasorb

For absorbing and damping vibrations down to 16Hz. Comprises of a moulded terazzo slab supported on four vibration absorbers with non-slip feet. Suitable for isolating sensitive analytical instruments such as balances and microscopes. Will support up to 16kg.

GENERAL CATALOGUE EDITION 21

Thermometers/Laboratory thermometers

1 LLG-Exact-Temp thermometers

For monitoring critical temperature conditions in deep freezes, refrigerators, cold rooms, blood bank refrigerators, incubators and warming chambers.

- thermometer certifiable to National Standards
- supplied with works test certificate
- thermometer stem safely encapsulated in PTFE
- each thermometer is mounted in a square-shaped shatter-proof plastic bottle filled with a liquid to ensure accurate readings despite the opening and closing of instrument doors.
- each thermometer has an individual serial number.

2 Digital Maxima-Minima-Thermometers Exact-Temp

The unbreakable plastic bottle is filled with a special medium to ensure accurate measurements even at open doors.

Ludwig Schneider

- Thermometers traceable to international standards (with certificate of conformance and accuracy)
- Accuracy: $\pm 0.5^\circ\text{C}$, resolution 0.1°C
- Temperature units: °C or °F
- 3 display modes: maximum, minimum and ambient temperature
- Alarm function
- 3 m long cable (diameter: 1mm)
- Alkaline battery (AAA) included
- Breakage protected PETG plastic bottles (with 30ml ethylene glycol mixture)
- Bottles with magnets attached for easy wall or door mounting
- Individual serial numbers
- The instruments are available with works certificate on request.

Thermometers/Laboratory thermometers

Mini temperature indicators

Self-adhesive, temperature-sensitive films that respond to certain temperature increases by changing colour. If the respective temperature is exceeded, the corresponding field changes colour permanently within 2-3 seconds. For monitoring products or processes where a certain maximum temperature should not be exceeded.

Temperature indicators WarmMark™

Self-adhesive indicators to monitor temperature exceedance and duration, e.g. when transporting temperature-sensitive goods. The indicator reliably indicates whether the temperatures were above the selected temperature limit by red dots. In addition, the indicator provides information on the duration of the temperature exceedance (the time is based on a constant temperature overrun of 2 °C above the limit value of the indicator).

Transport Control

- Selection of different temperatures
- Clear display of temperature exceedances and the duration of the exceedance
- Self-adhesive, easy to apply
- ISO-certified
- Dimensions (W x D x H): 19 x 46 x 1.5 mm

Refrigerator thermometers TMX series

Digital minimum/maximum thermometers for monitoring refrigerator temperatures. **ebro**
 Display of the current temperature and the set minimum/maximum limit values. Models 310 and 320 are equipped with an internal and an external temperature sensor, models 410 and 420 with 2 external temperature sensors.

- Visual and acoustic alarm when limit values are exceeded
- The external temperature sensor is located in a glycol bottle or in a metal capsule, depending on the device.
- With 3-point calibration option
- Incl. factory calibration certificate for -20 and 60 °C

Specifications

Temperature range external sensor: -50 ... 70 °C
 Temperature range internal sensor: 0 ... 50 °C
 Resolution: 0.1 °C
 Accuracy: -20 ... 40 °C: ±0.5 °C/±1.0 °C for remaining temperature range
 Cable length: 3 m
 Housing material: ABS
 IP code: IP 20
 Dimensions (W x D x H): 100 x 23 x 110 mm
 Power supply: 1 x AAA

Type	PK	Cat. No.
310, with internal and external sensor in glycol bottle	1	4.666 540

GENERAL CATALOGUE EDITION 21

1

1 LLG-Digital pocket thermometer Type 12050

Measuring range -50 to +150°C, accuracy ±1°C. Probe made of stainless steel, 120 x 3.5mm, with protective plastic sleeve and clip, with battery 1 x 1.5V (LR44). Overall dimensions (L x W): 75 x 20mm.

Type	PK	Cat. No.
LLG-Digital pocket thermometer Type 12050	1	9.236 706

2

2 LLG-Digital pocket thermometer Type 12060

Measuring range -50 to +150 °C, accuracy ±1 °C. With hold function. Probe made of stainless steel, 125 x 3.5mm, with protective plastic sleeve and clip, with battery 1 x 1.5V (LR44). Dimensions (L x W): 60 x 20mm.

Type	PK	Cat. No.
LLG-Digital pocket thermometer Type 12060	1	9.236 701

3

3 LLG-Digital pocket thermometer Type 12070

Measuring range -50 to +300°C, accuracy ±1°C until 150°C, above ±2°C. With hold function. Probe 200 x 3.5mm with tip made of stainless steel, with adjustable protective plastic sleeve and clip, with battery 1 x 1.5V (LR44). Dimensions (L x W): 78 x 25mm.

Type	PK	Cat. No.
LLG-Digital pocket thermometer Type 12070	1	9.236 702

4

4 Thermometer Pocket-Digitemp

Waterproof instrument in plastic housing (food-grade).

Dostmann electronic

Low budget, durable instrument for measuring temperature in air, gas, liquid and ductile substances (acc. to EN 13485).

Range of applications: Food (HACCP), industry and agriculture.

Features: waterproof, 1-second measuring frequency, Max-Min-Hold function, °C/°F-selectable.

Sensor:	NTC
Measuring range:	-40°C to +200°C
Resolution:	0.1°C
Accuracy:	±0.8°C (at 0°C to 100°C) others 1.5°C
Dimensions:	202 x 20 x 16mm (long version) 150 x 20 x 16mm (short version)
Probe dimensions:	126 x 3.5mm (long version) 75 x 3.5mm (short version)
Weight:	40g
Protection class:	IP65

Type	PK	Cat. No.
short version	1	9.851 028
long version	1	9.851 029

5

5 Digital pocket thermometer ThermoJack/ThermoJack PRO

Foldable pocket thermometer, watertight. Ideal for measuring foods (acc. to EN13485), liquids etc. ThermoJack PRO with calibration certificate.

Dostmann electronic

Type	Measuring range °C	Accuracy °C	Resolution °C	Probe	PK	Cat. No.
ThermoJack	-40 ... +250	± 0.5 (-20 ... +150)*	0.1	70	1	9.851 997
ThermoJack PRO	-50 ... +350	± 0.5 (-30 ... +150)*	0.1	110	1	9.851 999

*otherwise ±1.0°C or 1%, the larger value applies

3. Analytical measurement and testing

Thermometers/Surface, Insertion thermometers

1 Digital pocket thermometer TLC 700

The practical folding thermometer TLC 700 is suitable for measuring the core temperature during transport, storage and receiving of goods. Thanks to the foldable penetration probe the waterproof thermometer (IP 65) can be stored safely. The device is primarily characterized by its small size and the large display and comes with a calibration certificate.

3 Precision hand-held measuring instrument Type 13760

NEW

Precision hand-held measuring instrument with Pt100 temperature sensor and data logger function for resistance thermometers.

Ludwig Schneider

- Functions: °C/°F selection, min/max memory, freeze display, calibration mode, data logger, automatic switch-off
- Relative measurement: saves the last measured temperature and shows the difference to the most similar measurement
- Display: date/time, backlit, battery status
- Pt100 temperature sensor 4-wire, class A, IEC751 (replaceable)

Scope of supply: Thermometer, Pt100 temperature sensor, carrying case, power adapter

Specifications

Measuring range:	-100 ... +400 °C
Accuracy:	±0.2 °C (-50 ... +150 °C)
Resolution:	0.01 °C
Ambient temperature:	0 ... +50 °C
Memory:	16000 values
Material Thermometer/Probe:	plastic/platinum
Dimensions Thermometer (W x D x H)/Probe (Ø x L):	185 x 65 x 36 mm/5 x 230 mm
Cable length:	1.5 m
Power supply:	9 V battery or 9 V DC power adapter

1 Stem thermometer, bluetooth H-B®, stainless steel

NEW

Bel-Art Products

Monitor the temperature of critical environments remotely with Bluetooth wireless data transfer from the thermometer to the THERMSmart app (available for iPhone and Android devices).

- Maximum signal distance is approximately 40 meters
- Alarm sounds to alert user if temperature falls outside of the set parameters
- Includes countdown timer function
- Alarm and timer settings savable for reuse
- LCD screen
- Includes certificate of compliance indicating accuracy for 4 temperature points and multi-language (English, French, German, Italian, Portuguese and Spanish) instructions
- Individually serialised and RoHS compliant
- Batteries included (CR2032)

1 Temperature data logger Type 15210

NEW

1

Ludwig Schneider

Temperature data logger with 4 channels, suitable for temperature sensors type K, J, E, T, N, R, S.

- Functions: °C/°F selection, min/max/AVG memory, freeze display, hi/low alarm, Bluetooth, data logger, automatic switch-off
- Display: 4 channels at the same time, date/time, backlit, battery status
- Data transfer via Bluetooth or USB

Scope of supply: Data logger, 2 x cable sensors type K with flat plug (1 m length), software, Bluetooth adapter, micro USB cable, carrying case

Specifications

Temperature range:	-200 ... +1370 °C
Resolution:	0.1 °C (> 600 °C 1 °C)
Accuracy:	±0.1 % (> 600 °C 0.7 °C) of measured value
Memory:	32000 data per input
Dimensions (L x W x H):	187 x 75 x 29 mm
Weight:	290 g
Power supply:	4 x 1.5 V battery UM-4 or AAA

Type	PK	Cat. No.
15210	1	6.313 339

2 Combination Infrared and Penetration Thermometer TLC 750i

2

Handy, waterproof infrared thermometer with large measurement range for non-contact measurement of the surface temperature and secure core temperature measurement with the folding penetration probe. For time-saving, precise temperature measurements at incoming goods, production and storage of diverse goods and food. Conform to HACCP and DIN EN 13485. With battery and factory calibration certificate.

- Display with backlight for reading in dark environments
- Display can be upside down for reading from both sides
- Double laser pointer

Specifications

Measurement range:	-50 to +250 °C
Accuracy infrared:	±4 °C (-50 to -30.1 °C) ±2.5 °C (-30 to -18.1 °C) ±1.5 °C (-18 to -0.1 °C) ±1.0 °C (0 to +65 °C) ±2.0 °C or 2 % (+65 to +250 °C) ±0.5 °C (-30 to +99 °C) otherwise ±1 °C (1 %), larger value applies
Accuracy penetration probe:	
Resolution:	0.1 °C
Distance : spot ratio:	8 : 1
Sensor:	Type T
Operating temperature:	-25 to +50 °C
Dimensions (L x W x H):	169.5 x 44 x 23 mm
Weight:	approx. 140 g
Battery:	2 x AAA (Micro), replaceable
Deactivation:	automatically after 15 sec., deactivatable
IP code:	IP 65

Type	PK	Cat. No.
TLC 750i	1	6.289 927

GENERAL CATALOGUE EDITION 21

Thermometers/Temperature meters

1

1 Infrared thermometer, DualTemp Pro, with penetration probe

For simple, rapid, non-contact, temperature measurement.

- dual display
- wide measurement ranges:
- infra-red: -33 to +250°C
- conventional penetration probe: -55 to + 250°C
- measuring spot: distance ratio 2.5:1
- Max./ Min., Hold functions
- auto-off after 15 secs.
- belt-clip included
- accessories: certificate of calibration & pilot drill for taking measurements from frozen items

Resolution:

0.2°C

Accuracy (IR):

-33°C to 0°C ±1.0°C ±0.1/1°C

0°C to +65°C ±1.0°C

+65°C to +200°C ±1.5%

below -5°C ±1.0°C

-5°C to +65°C ±0.5°C

above +65°C ±1%

Spectral sensitivity:

6 to 14µm

Adjustable emissivity:

0.10 to 1.00

Operating temperature:

0 to 50°C

Battery:

Lithium cell CR2032

Dimensions:

24.2 x 39.8 x 156mm

Weight:

380g (incl. packaging)

Type	PK	Cat. No.
DualTemp Pro	1	9.851 023

2

2 Infrared-Thermometer Slim Flash

Non-contact temperature measurement via infrared. Response time 1 second.

Dostmann electronic

Measuring range -33 to +199°C, Accuracy ±2°C or 2%, incl. CR2032 button cell.

Type	PK	Cat. No.
Infrared-Thermometer Slim Flash	1	9.851 998

3

3 Infra-red thermometer ScanTemp 385

With IR thermometers you can measure surface temperature. A short response time and non-contact measurement are key advantages. ideal for monitoring applications such as:

- moving parts (running paper webs...)
- registering the surface temperature of gears and motors
- checking live electrical parts (components, transformers...)
- newly coated or painted parts
- food and corrosive substances

Specifications

Temperature range:	-35°C ... 365°C
Precision:	±2% or 2 °C, the higher value counts
Response time:	< 1 sec
Spectral sensitivity:	6 ... 14µm
Operating temperature:	0 ... 50 °C
Optical resolution:	12:1
Laser:	Spot laser
Dimensions (L x W x H):	147.9 x 112.6 x 41.4mm
Weight:	150 g (incl. packaging)
Battery:	2 x 1.5V AAA Batteries

Type	PK	Cat. No.
ScanTemp 385	1	9.851 996

3. Analytical measurement and testing

Thermometers/Temperature meters

1 Infra-red thermometer with double-laser sighting, ScanTemp 485

For contact-free measuring of surface temperature, highest precision due to special glass lens, with double-laser sighting.

TFA Dostmann

1

**Specifications**

Temperature range:	-50 ... +800°C
Precision:	±2 % or 2 °C, the higher value counts
Response time:	0.5 seconds
Dimensions (L x W x H):	42 x 85 x 152 mm
Weight:	140 g
Battery:	1x 9V battery included

Type	PK	Cat. No.
ScanTemp 485	1	6.240 840

2 Infrared Thermometers TFI 260/TFI 54

Non-contact measurement of the surface temperature with infrared. Ideal for fast and secure measurements of moving or energized parts and food. With batteries and factory calibration certificate.

ebro

2

**Specifications:**

Measurement range:	-60 °C to +550 °C
Accuracy:	±2 °C or 2 % (at 0 °C to +550 °C), whichever is larger
Resolution:	0.1 °C
Distance : spot ratio:	12:1
Operating temperature:	0 °C to +50 °C
Response time:	1 sec.
Emissivity factor:	0.95 fixed (0.1 to 1.0 possible)
Dimensions (L x W x H):	153 x 115 x 48 mm (TFI 260) 144 x 117 x 43 mm (TFI 54)
Weight (with batteries):	177 g (TFI 260), 180 g (TFI 54)
Battery:	2 x 1.5 V AAA, replaceable
IP code:	IP 20 (TFI 260), IP 54 (TFI 54)

Thermometers/Temperature data logger

GENERAL CATALOGUE EDITION 21

1

1 Disposable data logger TempMate-S1

The single-use data logger TempMate-S1 with its built-in USB connector, is the ideal solution for low-cost temperature monitoring of transports. TempMate-PDF loggers directly useable with pre-programmed configuration or reprogrammable with Tempbase Software according to each customer's specifications. To download the recorded data, simply connect TempMate-S1 directly to the USB port. A PDF and CSV report will automatically be generated, covering temperature graph, detailed data list and statistical information. No hardware (cable, interface) or software is required.

Dostmann electronic

- Auto generating PDF and CSV format data report
 - 110 days run time 16.000 measurements, 10 minuteinterval
 - Reprogrammable with Tempbase Software free of charge
 - Up to 5 alarm points configurable
 - Integrated USB connector
 - LED Alarm indicators
 - Serial number sticker
 - Inclusive certificate
 - Food proof according to HACCP

Specifications

Temperature Range:	-30 ... 70 °C
Accuracy:	±0.5 °C at -20 ... +40 °C/±1.0 °C in remaining range
Resolution:	0.1 °C
Data Memory:	16.000 measurements
Recording Cycle:	110 days
Sampling Interval:	10 min
Shelf Life:	24 months
Dimensions (L x W x H):	80 x 47 x 7 mm
Weight:	14.6 g
IP code:	IP 67/NEMA 6
Certifications:	Calibration Certificate, EN 12830 S, T, C, D, 1

Type	PK	Cat. No.
TempMate-S1	1	6.285 049

2

2 Data Logger LOG32T

The LOG32T is perfectly designed for product transportation or storage applications. Ambient conditions in power plants.

Dostmann electronic

- Ambient conditions in power plants:
 - Memory size: 60 000 measurements
 - Usable without software (default settings) (15-minute-interval, without alarm settings)
 - Optional free of charge software download for alarm setting and free adjustable recording interval (30sec to 24h)
 - Automatic PDF creation
 - Battery lifetime > 3 years (recording interval >15 minutes)
 - Status and Alarm-LEDs, acoustic signal
 - Includes wall mount
 - HACCP (EN12830) conform
 - IP65 watertight

Specifications

Measuring range:	-40 ... +70°C
Accuracy:	±0.5°C (-10 ... +40°C), otherwise ±1.0°C
Resolution:	0.1°C
Memory:	60 000 measurements
Interface:	USB (integr.)
Housing:	ABS
Dimensions (L x W x H):	100 x 19 x 19mm
Weight:	70g
Battery:	1 x 3.6 Volt Lithium ½ AA

Type	PK	Cat. No.
LOG32T	1	9.726 431

Data Logger EBI 20-T1/EBI 20-TE1

1

Applications:

- transport
- storage monitoring
- refrigeration areas and coldrooms

Features:

- waterproof
- visual Alarm
- max/min values on display
- stores 40.000 readings, can be read off at any time
- replaceable battery

Scope of supply:**EBI 20-T1:** Temperature Logger**EBI 20-T1-Set:** Temperature Logger, evaluation software, Interface**EBI 20-TE1:** Temperature Logger with external probe**EBI 20-TE1-Set:** Temperature Logger with external sensor, evaluation software, Interface

9.908 069

Specifications

Measuring range temperature:	-30 to +70 °C
Accuracy, temperature:	±0.5 °C (-20 to +40 °C); ±0.8 °C for remaining measuring range
Resolution temperature:	0.1 °C
Memory:	40.000 samples
Sensor:	NTC
Operating temperature:	-30 to +70 °C
Storage temperature:	-40 to +70 °C
Measuring period:	1 minute to 24 hours
Measuring mode:	immediate loop measurement, measurement from starting point, start immediately until memory full, start/stop measuring, start when button pressed
Battery:	3V lithium (CR 2450), can be replaced by user

7.626 604

Mini data logger testo 174T

The mini data logger for temperature, testo 174T, is ideal for accompanying transports.

Testo

Simply positioned close to the goods, e. g. in containers and refrigerated rooms, the data logger monitors temperature continuously, securely and unobtrusively.

The free software ComSoft testo 174 allows fast programming of the data logger and easy analysis.

- High data integrity, even with empty battery
- Large measurement data memory
- Watertight in accordance with IP65
- Compact and robust
- Conforms to EN12830
- Issue of alarms via display
- Data transfer to the PC via USB interface
- Reliable temperature measurement for the monitoring of sensitive goods and cold chain during storage and transport

testo 174T: Mini data logger, 1-channel, incl. wall bracket, battery (2 x CR 2032 Lithium) and calibration protocol.

testo 174T-Set: Mini data logger, 1-channel, incl. USB interface for programming and reading out the logger, wall bracket, battery (2 x CR 2032 lithium) and calibration protocol.

Specification

Probe type:	Internal NTC temperature sensor
Measuring range:	-30 to +70°C
Accuracy:	±0.5°C
Resolution:	0.1°C
Operating temperature:	-30 to +70°C
Storage temperature:	-40 to +70°C
Battery type:	2 x 3V button cell (2 x CR 2032 lithium), can be changed by user
Battery life:	500 days (15 min measuring cycle, +25°C)
Protection class:	IP65
Meas. cycle:	1min - 24h (can be selected)
Memory:	16.000 readings
Software:	can be used with Windows XP, Vista, Win7

Type	PK	Cat. No.
testo 174T	1	7.626 604 1
testo 174T-Set	1	7.626 614

2 Temperature logger LOG200E

NEW

Data logger with motion sensor, integrated USB interface for automatic PDF output and wall mount. For internal temperature measurement and recording. With connection for an external PT100 temperature sensor.

Dostmann electronic

- Freely adjustable recording interval from 10 seconds to 24 hours
- Min- and Max-values can be reset in the display
- Time marking function ("Time Marker") during data recording
- With movement sensor for shock recording
- Memory for approx. 60000 measurements
- Automatic output as PDF file, device can also be used without software
- No driver installation needed
- Status and alarm LEDs, with buzzer
- Display can be switched off
- Battery life > 4 years at > 15 min measuring interval
- Software available for download on the manufacturer's website (free of charge)

Temperature sensors are available as accessory.

Scope of supply: Data logger, wall mount, battery, USB cover, screws and dowels

Specifications

Temperature range internal:	-40 ... 70 °C
Temperature accuracy internal:	±0.4 °C (-10 ... 40 °C), otherwise ±1 °C
Temperature range external:	-200 ... 850 °C
Temperature accuracy external:	±0.2 °C or 0.3 % (the greater value applies)
Temperature resolution:	0.1 °C
Housing:	ABS
Dimensions (W x D x H):	42 x 20 x 91.5 mm
Weight:	70 g
Power supply:	1/2 AA 3.6 V

Type	PK	Cat. No.
LOG200E	1	6.311 945

Standard PDF Data Logger EBI 300

PDF data logger with different temperature sensors.

ebro

- For temperature monitoring related to HACCP/IFS issues or other perishable goods
- Transportation of fresh, cool and deep cool products
- Monitoring of fridges and deep freezers
- Evaluation without software, PDF are automatically generated
- Minimise training, user errors and IT costs using EBI 300's simple, easy to use design and standard software.
- Ensure data integrity since no data manipulation is possible
- EN 12830, ATP, VO(EG) 37/2005 Compliant
- Factory calibration certificate included
- Programmable via the free online configurator at www.ebi300.com
- No separate interface for programming and reading

EBI 300: PDF data logger with internal temperature sensor

EBI 300 TE: PDF data logger with external temperature sensor, internal temperature sensor can be used additionally.

EBI 300 TH: PDF data logger with external humidity and temperature sensor, internal temperature sensor can also be used.

Thermometers/Temperature data logger

1

9.908 098

High Precision PDF Data Logger EBI 310

PDF data logger with different temperature sensors. Compared to the EBI 300, the EBI 310 is characterized by shorter measuring intervals and higher storage capacity.

ebro

- Automatic pdf-report creation with temperature/time values
- Transport of drugs, inoculants, blood products and primary products
- Transport of all temperature sensitive products
- Storage of reference samples in refrigerators and deep-freezers
- "Traffic light principle" by limit exceeded
- IQ/OQ procedures through standardized software and standard reporting process possible
- GMP, pharmaceutical law compliant; EN 12830, ATP, VO (EG) 37/205 compliant, 21 CFR Part 11 conform (Winlog.basic)
- Programmable via the free online configurator at www.ebi300.com

EBI 310: Data logger with internal temperature sensor

EBI 310 TE: Data logger with external precision temperature sensor, internal temperature sensor can be used additionally. Measurements in high and low temperature range

EBI 310 TH: Data logger with external humidity and temperature sensor, internal temperature sensor can be used additionally. Monitoring the relative humidity in storage and transport

EBI 310 DI: Data logger with external precision temperature sensor, internal temperature sensor can be used additionally. Precise temperature measurement for dry ice and freezers. Logger also works in dry ice.

EBI 310 TX: Data logger with temperature dual adapter for two exchangeable temperature sensors (not included in the scope of supply), internal temperature sensor can be used additionally.

Temperature data logger testo 175 T3

Temperature data logger with 2 connections for external temperature sensors, e.g. immersion sensor, surface or air sensor. Data is stored even if the battery is changed or empty.

Testo

- Suitable for rough environmental conditions
- Protected against splashing and jetting water
- With the appropriate temperature sensors, temperatures from -50 to 1000 °C can be measured and recorded
- Memory for 1 million values
- With easy-to-read LCD display
- Battery life up to 3 years
- With Mini USB connection and SD card slot
- Software for reading out the values is available as free download on the manufacturer's website

Scope of delivery: Temperature data logger with 2 connections for external temperature sensors type T and type K, flexible immersion probe type K, wall bracket, lock, batteries and calibration protocol.

Accuracy:	± 3 % R.H. (40 to 60%), ± 3.5 % R.H. (20 to 40% and 60 to 80%), otherwise ± 5 % R.H.
Interface:	USB (integr.)
Housing:	Plastic (ABS)
Battery:	1 x 3.6V ½ AA Lithium
Dimensions:	100 x 19 x 19mm
Weight:	70g

Type	PK	Cat. No.
LOG32TH	1	9.726 422

3. Analytical measurement and testing

Thermometers/Temperature-Humidity logger

1 Temperature/Humidity data logger LOG 210

- PDF-data logger with display
- Memory size: 100.000 measurements
- Usable without software (default settings) (5-minute-interval, without alarm settings)
- Automatic PDF creation
- Movement sensor for shock recording e.g.: door or windows closing
- Free adjustable recording interval: 10 seconds to 24 hours
- Max-Min-Display memory (resettable)
- Time marking functions for measuring results
- Battery lifetime approx. 4 years (recording interval >15 minutes)
- Status- and Alarm-LEDs
- Includes wall mount

Free software LogConnect, for configuring (alarms, interval, changing display settings) or LogGraph2 for comfortable graphical and tabular display of measured values, incl. drag and zoom. Software is available as download.

Specifications

Temperature

Measuring range:	-40 to +70 °C
Accuracy:	0.1 °C
Precision:	±0.5 °C (0 to +60 °C), otherwise ±1.0 °C

Humidity

Measuring range:	0 to 100 % R.H.
Resolution:	0.1% R.H.
Accuracy:	±3 % R.H. (40 to 60 %), ±3.5 % R.H. (20 to 40 % and 60 to 80 %), otherwise ±5 % R.H.
Interface:	USB (integr.)
Housing:	Plastic (ABS)
Battery:	1 x 3.6 Volt Lithium ½ AA
Dimensions:	91.5 x 42 x 20 mm
Weight:	approx. 70 g

Type	PK	Cat. No.
LOG210	1	6.284 758

2 Temperature and humidity logger LOG210 TC

Data logger with motion sensor, integrated USB interface for automatic PDF output and wall mount. For measurement and recording of temperature and humidity and 2 connections for external type K thermocouples.

- Freely adjustable recording interval from 10 seconds to 24 hours
- Min- and Max-values can be reset in the display
- Time marking function ("Time Marker") during data recording
- With movement sensor for shock recording
- Memory for approx. 60000 measurements
- Automatic output as PDF file, device can also be used without software
- No driver installation needed
- Status and alarm LEDs, with buzzer
- Display can be switched off
- Battery life > 4 years at > 15 min measuring interval (free of charge)
- USB interface for data transfer
- Software available for download on the manufacturer's website

Temperature and humidity sensors are available separately.

Scope of supply: Data logger, 2 thermocouples type K (1 m length), wall mount, battery, USB cover, screws and dowels

Specifications

Temperature range internal:	-40 ... 70 °C
Temperature accuracy internal:	±0.5 °C (0 ... 60 °C), otherwise ±1 °C
Temperature range external:	-150 ... 1370 °C
Temperature accuracy external:	±0.5 °C or 0.5 % (the greater value applies)
Temperature resolution:	0.1 °C
Humidity range:	0 ... 100 % r.H.
Humidity accuracy:	±3 % r.H. (40 ... 60 % r.H.), ±3.5 % r.H., (20 ... 40 and 60 ... 80 % r.H.), otherwise ±5 % r.H.
Humidity resolution:	0.1 % r.H.
Housing:	ABS
Dimensions (W x D x H):	42 x 20 x 91.5 mm
Weight:	70 g
Power supply:	1/2 AA 3.6 V

Type	PK	Cat. No.

9.908 070

Temperature/Humidity data logger EBI 20-TH1

Applications:

- reliable temperature and temperature/humidity recording
- transport
- storage monitoring
- refrigeration areas and coldrooms

Features:

- excellent price/performance ratio
- visual Alarm
- max/min values on display
- stores 40.000 readings, can be read off at any time
- replaceable battery

ebro

Specifications

Measuring range temperature:	-30 to +70°C
Measuring range humidity:	0% to 100% R.H.
Accuracy, temperature:	±0.5°C (-20 to +40°C); ±0.8°C for remaining measuring range
Accuracy, humidity:	±3% R.H. (10 to 90% R.H.)
Resolution temperature:	0.1°C
Resolution humidity:	0.1% R.H.
Memory:	40.000 samples
Sensor:	NTC for temperature/capacitive for humidity
Measuring period:	1 minute to 24 hours
Measuring mode:	immediate loop measurement, measurement from starting point, start immediately until memory full, start/stop measuring, start when button pressed
Battery:	3V lithium (CR 2450), can be replaced by user
IP code:	IP 52
Housing:	ABS
Dimensions:	69mm x 48mm x 22mm

Temperature/Humidity data logger testo 174 H

The mini data logger for temperature and humidity, testo 174 H, is ideal for monitoring temperature and humidity sensitive goods in storage. The testo 174 H also monitors building climate, continuously, securely and unobtrusively. The free software ComSoft basic allows fast programming of the data logger and easy analysis.

Testo

- Humidity sensor with long-term stability
- High data integrity, even with empty battery
- Display of the current temperature or humidity value
- Issue of alarms via display
- Data transfer to the PC via USB interface

testo 174H: Mini data logger, 2-channel, incl. wall bracket, battery (2 x CR 2032 lithium) and calibration protocol.

testo 174H-Set: Mini data logger, 2-channel, incl. USB-interface for programming and reading out the logger, wall bracket, battery (2 x CR 2032 lithium) and calibration protocol.

Specification

Probe type:	NTC temperature sensor and internal capacitive humidity sensor
Measuring range:	0 to 100% RH, -20 to +70°C
Accuracy:	±0.5°C, ±3% RH
Resolution:	0.1% RH, 0.1°C
Operating temperature:	-20 to +70°C
Storage temperature:	-40 to +70°C
Battery type:	2 x CR 2032 lithium
Battery life:	1 year (15 min measuring cycle, +25°C)
Protection class:	IP20
Meas. cycle:	1min to 24h (can be selected)
Memory:	16000 readings
Software:	ComSoft basic (Windows)

Type	PK	Cat. No.
testo 174H	1	6.239 884 2
testo 174H-Set	1	6.239 883

3. Analytical measurement and testing

Thermometers/Temperature-Humidity logger

1 Temperature/Humidity data logger LOG 110

Large display for actual value, battery status display, easy to use software.
 Perfect designed instrument for transportation or storage.
 - quality surveillance in laboratories, at the production or in the storage
 - ambient conditions in manufacturing facilities
 - monitoring from storages after HACCP
 - ambient conditions in power plants
 - monitoring of fridges for the pharma industry
 - memory for 60 000 data sets

2 Wireless temperature data logger EBI 25-TH

Wireless temperature and humidity data logger. With internal temperature sensor and external humidity sensor.

ebro

2

- Readout via wireless interface
- Replaceable battery
- LCD display
- Memory for 288 values per channel

The IF 400 base station and the Winlog.web/Winlog.wave PC software (see "Accessories for EBI 25 data loggers) are required for programming and evaluating the EBI 25TH data logger.

Scope of delivery: temperature and humidity data logger, operating manual

Specifications

Sensors:	Temperature: NTC/Humidity: capacitive
Channels:	1 x internal, 1 x external
Measuring cycle:	1 min ... 24 Hrs..
Temperature measuring range:	-30 ... 60 °C
Humidity measuring range:	0 ... 100 % r.H
Temperature accuracy (± 1 digit):	±0.5 °C (-20 °C ... 40 °C)
Humidity accuracy (± 1 digit):	±0.8 °C (40.1 ... 60 °C)
Temperature resolution:	±3 %
Humidity resolution:	0.1 °C
IP code:	0.1 % r.H
Battery life:	IP 20
Operation and storage temperature:	approx. 2 years
Dimensions (W x D x H):	-30 ... 60 °C/-40 ... 85 °C
Power supply:	48 x 27 x 95 mm
	1 x Lithium battery 3.6 V, replaceable

1 Temperature, humidity, pressure and CO₂ logger LOG220E

1

Dostmann electronic

Data logger for temperature, humidity and pressure recording with an external connection for a CO₂ sensor or humidity, pressure and temperature sensor. Incl. wall mount.

- Freely adjustable recording interval from 10 seconds to 24 hours
- Min- and Max-values can be reset in the display
- Time marking function ("Time Marker") during data recording
- With movement sensor for shock recording
- Memory for approx. 60000 measurements
- Automatic output as PDF file, device can also be used without software
- No driver installation needed
- Status and alarm LEDs, with buzzer
- Display can be switched off
- Battery life > 4 years at > 15 min measuring interval
- USB interface for data transfer
- Software available for download on the manufacturer's website (free of charge)

Temperature, pressure humidity and CO₂ sensors are available separately.

Scope of supply: Data logger, wall mount, battery, USB cover, screws and dowels

Specifications

Temperature range internal:	-40 ... 70 °C
Temperature accuracy internal:	±0.5 °C (0 ... 60 °C), otherwise ±1 °C
Temperature range external:	-200 ... 850 °C
Temperature accuracy external:	±0.2 °C or 0.3 % (the greater value applies)
Temperature resolution:	0.1 °C
Humidity range:	0 ... 100 % r.H.
Humidity accuracy:	±3% r.H. (40 ... 60 % r.H.), ±3.5 % r.H. (20 ... 40 % and 60 ... 80 % r.H.), otherwise ±5 % r.H.

Timing/Timers

1

1 LLG-Short period timer with alarm

Easy-to-use combination timer and stopwatch, with large display and alarm function from/up to 99 min. and 59 sec. With magnet for easy fixing. Battery LR 44 inclusive.

Dimensions (Ø x H): 54 x 16.5mm
Weight: approx.40g

Type	PK	Cat. No.
LLG-Short period timer with alarm	1	9.260 150

2

2 LLG-Timer Cube

With 4 pre-set countdown times. Place the cube with the desired time facing up and the counting down starts immediately.

- Pulsing LED when timer is counting
 - Automatically rotating flip display shows the remaining time
 - After expiration, the elapsed time is displayed until the alarm ends
 - Optional pre-alarm shortly before time expires
- Dimensions (W x H x D): 60 x 60 x 60 mm
Weight: 58 g
Power supply: 2 x 1.5 V AAA (not incl.)

Type	PK	Cat. No.
5-15-30-60 minutes	1	6.291 217

3

3 LLG-Timer pro

The LLG-Timer pro can be used simultaneously as real time clock and timer. The countdown timer also runs when time is visible.

- Big 6-digit LCD display
- Digital stopwatch (counting up)
- Short timer (counting down)
- With memory function
- Stopwatch and countdown up to 23 h 59 min. 59 sec.
- Optical and acoustic alarm when timer expires
- Incl. magnet for mounting, hanging bracket and stand (fold-out)

Dimensions (W x H x D): 82 x 68 x 20.5 mm
Weight (with battery): 82 g
Power supply: 2 x AAA 1.5 V (not included)
Warranty: 12 months

Type	PK	Cat. No.
LLG-timer pro	1	6.311 351

4

4 LLG-Dual-Timer, 2-channel

The LLG-Dual-Timer offers two separate timers in one instrument. One fixed time can be stored per channel.

- Big 6-digit LCD display
- Digital stopwatch (counting up)
- Short timer (counting down)
- With memory function
- Stopwatch with tenths of a second
- Stopwatch and countdown up to 99 h 59 min. 59 sec
- Optical (red LED) and acoustic alarm (2 volume levels), when timer expires
- Incl. magnet for mounting, hanging bracket and stand (fold-out)

Dimensions (W x H x D): 97 x 79 x 21 mm
Weight (with battery): 95 g
Power supply: 2 x AAA 1.5 V (not included)
Warranty: 12 months

Type	PK	Cat. No.
LLG-Dual-Ttimer	1	6.311 350

1 LLG-Timer Triple pro

NEW

1

The LLG-Timer Triple pro offers three separate timers in one instrument. One time can be stored per channel. This Timer can be used simultaneously as real time clock and timer. The countdown timer also runs when time is visible.

- Big 6-digit LCD display
- Digital stopwatch (counting up)
- Short timer (counting down)
- With memory function
- Stopwatch and countdown up to 23 h 59 min. 59 sec.
- Optical and acoustic alarm when timer expires
- Incl. magnet for mounting, hanging bracket and stand (fold-out)

Dimensions (W x H x D): 68 x 88.7 x 16.2 mm

Weight (with battery): 87 g

Power supply: 2 x AAA 1.5 V (not included)

Warranty: 12 months

Type	PK	Cat. No.
LLG-Timer Triple pro	1	6.313 417

2 LLG-Timer with Triple Alarms, 1-channel

2

Choice of vibration, sound and/or light alarms makes this timer perfect for high noise locations.

- Vibration, light and loud buzzer sound alarms can function at one time, or be independently turned off
- Maximum run time: 19 hours: 59 minutes/99 minutes: 59 seconds;
- Timer accuracy: ± 7 seconds/day
- Count direction: up/down; displays elapsed time after countdown
- Last time set memory
- Key press confirmation feature gives an audible indication of data entry
- Lay it flat on a bench, use the flip-open stand for a vertical view, carry it on a lab coat with the convenient pocket clip, or use the magnetic back for metal surface attachment
- Requires two AAA batteries (included)
- Individually tested, inspected, and calibrated using NIST
- Includes Certificate of Calibration with unique report number, stated corrections and standard used for the calibration, and multi-language instructions (English, French, German, Italian, Portuguese and Spanish)

Dimensions (W x H x D): 45 x 75 x 20 mm (without clip portion)

Type	PK	Cat. No.
LLG Timer with Triple Alarms, 1-channel	1	6.266 707

3 LLG-Timer with White Board, 4 channel

3

This four-channel timer has a built-in white board that helps keeping track of time and other critical information.

- Audible alarm for each channel
- Built-in white board and dry erase marker with eraser tip (included) helps keep track of crucial information
- Programs: hours/minutes; Displays: hours/minutes/seconds
- Maximum run time: 23 hours: 59 minutes
- Timer accuracy: ± 5 seconds/day
- Count direction: up/down; displays elapsed time after countdown
- Last time set memory
- Key-press confirmation feature gives an audible indication of data entry
- Lay flat on a bench, use the flip-open stand for a vertical view, or use the magnetic back for metal surface attachment
- Requires two AAA batteries (included)
- Individually tested, inspected, and calibrated using NIST
- Includes Certificate of Calibration with unique report number, stated corrections and standard used for the calibration, and multi-language instructions (English, French, German, Italian, Portuguese and Spanish)

Dimensions (W x H x D): 114.3 x 88.9 x 25.4 mm

2 Thermohygrometer, TA 100

TFA Dostmann

2

- Very fast humidity sensor
- Dewpoint and max./min. function
- °C/°F-switchable
- Hi-Lo alarm with red warning LED

Specifications

Temperature	
Measuring range:	-40°C to +70°C
Display resolution:	0.1°C
Accuracy:	±1°C
Humidity	
Measuring range:	1% to 99% R.H.
Display resolution:	0.1%
Accuracy:	±4% from 35% to 75% remaining range ±5%
Working temperature:	-40°C to +70°C
Batteries:	2 x 1.5 Volt AAA
Dimensions:	105mm x 105mm x 44mm
Weight:	150g (incl. packaging)

Type	PK	Cat. No.
TA 100	1	9.726 405

3 Digital thermo-hygrometer for room and outdoor measurement

NEW

3

TFA Dostmann

For simultaneous monitoring of indoor and outdoor temperature/humidity.

- Measurement of outdoor data via cable sensor (cable length approx. 1.5 m)
- Display of minimum and maximum values and observation over a freely selectable period of time
- Min-/Max function
- For hanging and standing

Scope of supply: Thermo-hygrometer, battery

Specifications

Temperature range:	-10 ... 60 °C
Temperature accuracy:	±0.8 °C at 10 ... 30 °C, otherwise ±1 °C
Temperature resolution:	0.1 °C
Humidity range:	10 ... 99 %
Humidity accuracy:	±3.5 % at 30 ... 80 %, otherwise ±5 %
Humidity resolution:	1 %
Power supply:	1 x 1.5 V AAA
Dimensions (W x D x H):	102 x 21 x 110 mm
Weight:	144 g

Type	PK	Cat. No.
Digital thermometer/hygrometer	1	9.726 418

Thermohygrometer testo 608

Continuous monitoring of indoor climate

The economic thermohygrometer testo 608-H1 measures humidity, temperature and dewpoint continuously. The large display is easy to read even at a distance. With wall mounting and table holder for flexible positioning. The accurate testo 608-H2 alarm hygrometer reliably indicates when humidity and temperature limits have been exceeded, for example in greenhouses, warehouses, cleanrooms, museums, laboratories etc.

- Continuous display of temperature and humidity or dewpoint
- With dew point calculation and max/min display
- Battery monitoring

Additional features testo 608 H2:

- LED alarm, warns if limits are exceeded
- High accuracy $\pm 2\%$ rH

3. Analytical measurement and testing

Climate and environment measurement/Special climate meters

1 Sound level meter SU 130, class II

1

Sound level meter for noise measuring.

SAUTER

- Delivered in a hard carrying case
- Multi measuring functions: Lp: Standard sound level measuring function, Leq: Energy equivalent sound level measuring mode (type A), Ln: Shows the deviation from a pre-defined limit in %
- Selectable methods of evaluation: A: As sensitive as the human ear, C: Sensitive for noisier environmental conditions, where there are machines, plant, motors etc., F: For areas where sound intensity does not vary
- Function to set limits: Programmable target value for go/no-go test values
- Track function for continuous recording of variable environmental conditions
- Peak Hold Mode to capture peaks
- Internal memory for measured values, for 30 measurements. Can be displayed on the PC
- Data interface RS-232, included

**Specifications**

Measuring range

Lp A: 30 to 130 dB

Lp C/Lp F: 35 to 130 dB

Leq: 30 to 130 dB

Ln: 0 to 100 %

Readability: 0.1 dB

Dimensions (W x D x H): 236 x 63 x 26 mm

Net weight: approx. 170 g

Power supply: 4 x 1.5 V AAA (not included)

2 Sound level meter class I and II

NEW

SAUTER

2

For measurements for workplaces which are outdoors, e.g. at airports, on building sites, in road construction etc. with broad access to spectrum thanks to the highly-accurate 24-Bit A/D converter.

- Different sound pressure levels can be selected, such as, for example, Laeq, LcPeak, LaF, LaFMax, LaFMin, SD, SEL, E
- The optimised analogue frontend switch reduces the ambient noise and increases the linear measuring range
- Three profiles and 14 user-defined measurements can be calculated in parallel with different frequency and time weighting
- LN statistics and display of the graph showing the progression of time
- User-defined integral interval measurement up to a maximum of 24 hours is possible
- Frequency weighting (filter) A, B, C, Z
- Time interval during measurement: F (fast), S (slow), I (pulse)
- Freely-definable limits for the output of an optical alarm signal
- Peak Hold Mode to capture peaks
- Octavo function for targeted sound analysis
- Track function with graphic display of a measurement
- Calibration mode (with optional calibrator)
- Trigger mode: Analogue signal to switch the device on or off with 3.5 mm plug
- Automatic measurement for timer function is possible
- Measured value recording frequency selectable: 10, 5, 2 Hz
- Data transfer using MicroSD (4 GB), RS-232 or USB
- Option of fitting a column on the rear of the housing, 1/4 thread

**Scope of supply:** Sound level meter, memory card, hard carrying case**Specifications**

1 Light measuring instrument SO

Light measuring instrument for precise light measurement up to 200.000 Lux

SAUTER

- Measures illumination in the workplace
- Helps to determine whether a workstation has insufficient light or whether there is too much light
- Photo sensor: silicon diode
- Cosine correction for angular incident light
- Sturdy protective cover for the photo sensor
- Increased service life: Impact protection through a protective casing
- Track function for continuous recording of variable environmental conditions
- Peak Hold Mode to capture peaks
- Selectable measuring units: fc (foot-candle), lx
- AUTO-OFF function
- Delivery in a robust box

Specifications

3. Analytical measurement and testing

Climate and environment measurement/Special climate meters

1 Precision handheld instruments P700 series

For temperature, moisture and airflow.

Dostmann electronic

For highly accurate temperature measurements with USB PC online interface.

(Optional: Windows SmartGraph software for graphical and tabular documentation, etc). Integral probe calibration for sensor tolerance compensation. Min.- Max.- Hold- and AVG- functions. The large LCD shows two measurements synchronously, even temperature differences can be displayed (P705, P755, P755-Log, P770).

Specifications

General (all models):

USB interface, Max-Min memory, Hold function, true average calculation over a freely selectable period, Auto-off function, measured quantities can be freely assigned to instrument channels, comprehensive calibration options (selectable 1-point, 2-point or 3-point calibration), large display with bar graph for simultaneous display of 2 measured values

P700/P705:

1/2 measurement channels (Pt100 4-wire probe, thermocouples type J, K, L, N, T, R, S), measurement ranges and accuracies: Pt100: -200 to +850°C (±0.1 °C -100 to +200°C, otherwise ±0.1% of measurement value) thermocouples, DIN types (-200 to +1760°C)

P710/P715:

1/2 measurement channels (Thermocouples type K, J, L, N, T), measurement ranges and accuracies: -200 to +1370°C (±0.2 °C from 0 to +200 °C, ±0.5 °C to 1000 °C, otherwise ±1.0 °C of measurement value)

Thermocouples acc. to EN 60584

P750/P755/P755-Log:

1/2 measurement channels (Pt100 4-wire probe, thermocouples type J, K, L, N, T, R, S, moisture, flow), measurement ranges and accuracies: Pt100: -200 to +850°C (±0.03°C -50 to +200°C, ±0.05°C -200 to +200°C, otherwise ±0.05% of measurement value), thermocouples, DIN type (types J, K, L, N, T 0 to 200 °C, ±0.3°C, +200 to +1000°C ±1.0 °C, otherwise ±1.5°C; type R, S ±1.0 °C +0.1% of measurement value) humidity 0 to 100% R.H. (±1.5%R.H.), flow 0 to 40 m/s (±0.5% of measurement value +1.0% of final value)

P770:

2 measurement channels (Pt100, thermocouples type J, K, L, N, T, R, S, moisture, flow), measurement ranges and accuracies: Pt100: -200 to +850°C (±0.1 °C -100 to +200°C, otherwise ±0.1% of measurement value) thermocouples, DIN types, humidity 0 to 100%R.H. (±1.5%R.H.), flow 0 to 40 m/s (±0.5% of measurement value) Dimensions (L x W x D)/ weight: 200 x 85 x 40mm/300g

1 Thermometer testo 440 Laboratory kit

Laboratory kit with Pt100 probe for reliable and precise temperature measurement and documentation. Particularly suitable for use in corrosive media due to the laboratory probe, whose coating is made of the tried-and-tested DURAN® laboratory glass. The testo 440 air velocity & IAQ measuring instrument automatically detects the connected probes, and the stored, structured measurement menus makes work considerably easier in a wide variety of applications. For example it can be used to optimally adjust air conditioning and ventilation systems.

- Structured measurement menu for long-term measurements
- Internal data storage and USB port for flexible data export
- Parallel connection of up to three probes possible: one Bluetooth® probe, one wired probe and one temperature probe with thermocouple type K connection
- Versatile, expandable with an extensive selection of digital probes

Scope of supply: Climate measuring instruments, 3x AA batteries, USB cable and calibration protocol, glass-coated digital Pt100 laboratory probe, basic case for testo 440 and 1 probe

2 ASTM Hydrometers

Precision hydrometers acc. to ASTM E2995-14 for determination of density for mineral oil, with thermometer "mercury free".

Ludwig Schneider

Hydrometer with thermometer, error-limit for density: $\pm 0,5 \text{ kg/m}^3$, with thermometer -20 to +65°C in 1°C, blue filling, error-limit $\pm 1^\circ\text{C}$. With works calibration on request. With blue, environmental friendly filling of thermometers. Each item packed in plastic tubes for breakage protection.

3

3 Hydrometers, high-quality plastics, PC

Hydrometers made of high-quality plastics (polycarbonate).

Ludwig Schneider

- Breakage protected (no glass breakage)
- Fully made of resistant polycarbonate (PC)
- High transparency (like glass), easy-to-read scales
- High precision and reproducibility
- Suitable for applications in food, pharmaceutical and cosmetic industries as well as many others
- Measuring units: specific gravity, density, Oechsle, % mass, Brix, saturation, ° Baumé, etc.
- Made in Germany
- Works certificate available on request (option)
- Food safety according to HACCP

2 Pycnometers, BLAUBRAND®, Borosilicate glass 3.3.

DIN ISO 3507, gay-lussac type. Including individual certificate. Adjusted.

BRAND

Reference temperature 20°C. With NS10/19 capillary stopper. Stopper top ground and polished. Inscription in highly contrasting blue enamel. The volume in cm³ is specified to a precision of 3 decimal places. Calibrated to contain. Every pycnometer is calibrated with its own stopper; hence, stoppers are not interchangeable. Each bottle and its stopper is marked with an unique matching identification number.

Nom. capacity cm ³	PK	Cat. No.

3 Pycnometers, Borosilicate glass 3.3., incl. DAkkS calibration certificate

BLAUBRAND®. The volume in cm³ is specified to a precision of 3 decimal places. Every pycnometer is calibrated with its own stopper, hence, stoppers are not interchangeable.

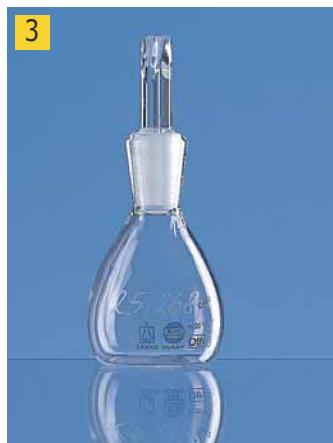

BRAND

Each bottle and its stopper is marked with an unique matching identification number.

All BLAUBRAND® density bottles are supplied with one accompanying individual certificate in the original packaging.

- DIN ISO 3507
- Gay-lussac pattern calibrated
- Calibrated to contain (TC, In)
- Reference temperature 20°C
- With NS10/19 capillary stopper
- Top of stopper ground and polished
- Inscriptions in high contrast blue enamel

Nom. capacity cm ³	PK	Cat. No.
5	1	6.238 790
10	1	6.258 623
25	1	6.801 879

3 Density meters Densito/DensitoPro

Robust density meters for mobile use with easy handling and user guidance. Ideal for rapid and accurate routine measurements in quality assurance, incoming and outgoing goods inspection.

Mettler-Toledo Online

DensitoPro equipped with RFID and barcode reader for rapid and reliable tracing of samples.

- Automatic sampling pump
- Available measurement scales: API, °Baumé, Brix, density, Ethanol, H₂SO₄, proof (US and IP), °Plato, specific gravity, user-defined concentration
- Automatic temperature compensation
- Memory for up to 1100 results
- Backlit measuring cell
- Adjustable limits with customisable colours in the display
- Bright display with good readability

Specifications

Density range:	0 ... 3 g/cm ³
Resolution:	0.0001 g/cm ³
Accuracy:	±0.001 g/cm ³
Sample temperature range:	0 ... 50 °C
Resolution.	0.1 °C
Accuracy:	±0.2 °C
Sample volume:	2 ml
Memory:	1100 samples
Display:	2.4" colour display, backlit
Interfaces:	USB-A, USB-C
Power supply:	Removable and rechargeable Li-Ion batteries

DensitoPro with RFID and barcode reader	1	6.291 653 4

1 Density meters DMA 35

Portable, digital measuring device for the determination of density, relative density and concentration. DMA 35 EX and DMA 35 EX Petrol are certified according to ATEX for applications in hazardous environments.

- On-site measurements for fast reactions
- Oscillator principle (borosilicate glass oscillator)
- Sample filling via manual filling pump or syringe
- Complete data control through traceability
- Viscosity correction for measurements also on highly viscous samples
- Gesture control for one-handed measurement
- Recognition of results outside the tolerance limit
- Measuring of density, relative density, alcohol concentration, sugar/extraction concentration, API functions, H₂SO₄ concentration, ten programmable custom-specific measuring units
- Robust case with exchangeable cell
- 3 years warranty

1

Anton Paar

Scope of supply: Density meter, filling tube, adapter for syringe filling, syringes, transportation case, rubber protection for measuring cell, 3 x batteries, allen key, instructions.

Specification

Density range:	0 ... 3 g/cm ³
Resolution:	0.0001 g/cm ³
Accuracy:	±0.001 g/cm ³
Sample temperature range:	0 ... 100 °C
Temperature measurement range:	0 ... 40 °C
Resolution:	0.1 °C
Accuracy:	±0.2 °C
Reproducibility standard deviation (acc. to ISO 5725):	0.0007 g/cm ³
Sample volume:	2 ml
Data memory:	1024 measurement results, 250 sample IDs, 30 measuring methods
Display:	coloured LCD, self-rotating
Interfaces:	Bluetooth®, RFID
Dimensions (W x D x H):	103 x 245 x 126 mm
Weight:	660 g
Power supply:	3 x Mignon alkaline batteries, 1.5 V LR06 AA
IP code:	IP 54

Type	PK	Cat. No.
DMA 35 Standard	1	6.313 803
DMA 35 EX	1	6.313 804
DMA 35 EX Petrol	1	6.313 805

2 Standards for density, kinematic and dynamic viscosity

Reagecon

2

To calibrate, control or validate all types of viscometers including capillary, flow cup, rotational, falling ball, falling/rising object, stabinger and vibrational viscometers. Tested and certified according to ASTM method D 2162, ASTM method D4052 and ISO 17025 (INAB Ref. 264T).

- Usable for fluids up to 100 °C
- In 500 ml glass bottle

3. Analytical measurement and testing

Density determination/Density meters

GENERAL CATALOGUE EDITION 21

1 Density meter DMA 501

NEW

Anton Paar

Density meter for measuring of chemicals, pharmaceuticals, cosmetics and food. Suitable for samples with difficult properties like paste, inhomogeneous, sedimenting and particulate samples or aerosol sprays.

The DMA 501 contains all relevant concentration tables and formulas for calculating product specific parameters and the results are displayed in the appropriate unit. Automatic filling and measuring with the optional available industrial peristaltic pump possible.

- Camera image of the measuring cell (U-view™) for viewing the correct sample filling, whereby potential filling errors due to inhomogeneous samples, gas bubbles or particles are automatically detected with the FillingCheck™ function
- Splash-proof front
- Fanless temperature control of the sample
- User-defined layouts of the measurement display with result outputs for individual requirements
- Documentation and traceability of data
- Elimination of external influences through the implementation of a standardised sample handling
- Integrated temperature and humidity sensor
- Integrated pressure sensor for adjustment
- Automatic full-range viscosity correction of results
- 3 years warranty

Specifications

Density measuring range/Accuracy:	0 ... 3 g/cm ³ /0.001 g/cm ³
Reproducibility standard deviation (acc. to ISO 5725):	0.0004 g/cm ³

1 Density meter DS7700/DS7800 sets

Each set contains all necessary accessories from tube sets to nozzles and adapters to a splash guard for the manual sample supply. The devices are suitable for almost all liquids, emulsions, pastes, etc. thanks to the chemical-resistant sample-contacting parts made of borosilicate glass and PTFE. Depending on the set, samples are fed manually via syringe, semi-automatically via peristaltic pump or fully automatically via autosampler.

A.KRÜSS Optronic

**Set 1:** Low sample volume, samples of any degree of viscosity, semi-automatic drying, small Tygon tube set**Set 2:** Low sample volume, samples of any degree of viscosity, aggressive samples, splash protection for addition of aggressive samples, tube sets suitable for every type of samples, semi-automatic drying, small Tygon and PTFE tube set**Set 3:** Moderate to high sample volume, low to slightly viscous samples, semi-automatic sample feeding and cleaning, semi-automatic drying, large Tygon tube set**Set 4:** High sample volume, low-viscous to slightly viscous samples, fully automatic sample supply and cleaning, fully automatic drying (no interchange of tubes required), large Tygon tube set**Set 5:** High sample volume, low-viscous to slightly viscous samples, tube sets suitable for any kind of sample, fully automatic sample supply and cleaning, fully automatic drying (no interchange of tubes required), large PTFE tube set

Scope of supply: Density meter with drying unit, waste container, operating instructions, test report, set-dependent tube set, set-dependent peripheral devices

Specifications

Measuring range:	0 ... 3 g/cm ³
Sample volume by manual injection:	0.9 ml
Temperature range/Accuracy:	10 ... 40 °C/±0.02 °C

B-ONE PLUS

1 | 2 Viscometers B-ONE PLUS/FIRST PLUS

The rotational viscometer determines the viscosity of liquids by the torque with different measuring spindles. With the B-ONE PLUS, you can determine measurement times for thixotropic products. When entering the density of the product, the kinematic viscosity can also be determined. The viscometer is used mainly in the areas of cosmetics, pharmacy, colour production and chemistry.

Lamy Rheology SARL

Delivery as a single unit or with the spindle sets L1-L4 or R2-R7.

- Measurement at different speeds
- Viscosity range up to 240 000 000 mPas
- 7" touch screen
- Different spindle sets
- Easy to use
- Wide range of applications
- Stable stand
- Display settings: viscosity, speed, torque, measuring time, measurement geometry
- Viscosity unit cp or mPas
- Language French, English, Russian, Spain

FIRST PLUS additionally with:

- PT100 for accurate temperature measurement
- Connections for RS232, USB, LAN
- Software optional

Viscometers ViscoQC

These viscometers cover the entire viscosity range with three models:
L for low viscosity, R for medium viscosity and H for highly viscous samples.

Anton Paar

- Digital levelling function for verification of the alignment
- Magnetic spindle coupling for a quick exchange of spindles
- Automatic spindle recognition Toolmaster™ prevents errors in spindle selection
- T-Ready™ automatically displays the adjustment of the sample temperature
- Automatic speed search TruMode™ finds the right speed for unknown samples
- Automatic spindle protection detection TruGuard™ for automatic detection of the guard
- Predefined modes/methods: manual mode TruMode™, stop at specific torque/specific temperature
- Data transfer via V-Collect PC software Dymo® LabelWriter™

Scope of supply: Viscometer, Toolmaster™, magnetic coupling, 4 spindles (R and H) or 6 spindles (L) out of AISI 316L, tripod, power supply unit, USB-cable, data collection software V-Collect, printed SOP, instructions

Specifications

Temperature range:	15 ... 80 °C
Accuracy:	±1 %
Repeatability:	±0.2 %
Dimensions (L x W x H):	361 x 281 x 444 mm
Weight:	6.2 kg
Power supply:	100 ... 240 V, 47/63 Hz, 24 V, 3 A

3 Viscosimeters ROTAVISC

Viscosimeters with a large range of functions to determine the viscosity of liquids in all areas of application, ranging from laboratory to quality control. The devices are suited for different viscosity ranges and are available with or without controlling software.

3

- Highest measurement accuracy
- Stepless speed adjustment
- 4.3" TFT display
- Digital level
- Simple ramp function
- With connection for ext. PT100 sensor

Scope of supply: Viscosimeter incl. standard spindle set, protective bracket, temperature sensor and ROTASTAND stand. ADVANCED models include labworldsoft 6 Visc software for controlling different devices, eg. temperature control systems and other measuring devices

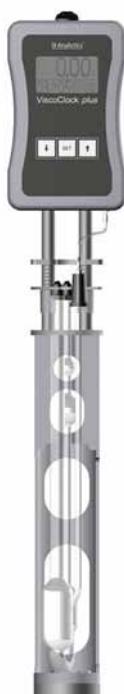

Specifications

Rotation speed:	0.01 ... 200 rpm
Temperature range:	-30 ... +300 °C
Accuracy:	1 %
Repeatability:	0.2 %
Stroke max.:	200 mm
Dimensions stand (L x W x H):	351 x 372 x 629 mm
Weight:	7.1 kg

Viscosity determination/Viscosimeter

1

1 Measuring instrument for viscosity analysis ViscoClock plus

The ViscoClock plus is an electronic timing unit for glass capillary viscometers used to determine kinematic and relative viscosity. Succeeding the well-proven ViscoClock, the new instrument features data storage and simpler handling. The ViscoClock plus is designed for SI Analytics Ubbelohde (DIN; ASTM; Micro) and Micro Ostwald viscometers.

SI Analytics

To determine absolute kinematic viscosities, viscometers have to be used which are calibrated for automatic measurements. The ViscoClock plus automatically measures the flow time of temperature-stabilized liquids in capillary viscometers by means of infrared light barriers.

The viscometer including a sample is inserted into the ViscoClock plus and immersed into a thermostatic bath for temperature stabilization. After thermostating, the sample is pumped into the measuring bulb, and the flow time is detected automatically. The large display enables easy read-off of flow times and additional information: date, time, sample ID and viscometer ID.

The ViscoClock plus can be used in all SI Analytics bath types.

ViscoClock plus: Electronic timing unit for glass capillary viscometers, power supply 100-230 V and manual pump.

ViscoClock plus M1: Device incl. thermostatic bath for temperatures from +10 to +60 °C

ViscoClock plus M2: Device incl. thermostatic bath for temperatures from -40 to +150 °C

Specifications

Measuring range: Up to 999.99 secs./resolution 0.01 sec.

Timing accuracy: ±0.01 sec. ±1 digit

Measuring range viscosity: 0.35 to 10000 mm²/sec. (cSt)

USB interface: For connecting an USB stick or a printer (TZ 3863)

Operating temperature: Stand: -40 to +150 °C

Dimensions (W x D x H): Electronic measuring unit: +10 to +40 °C

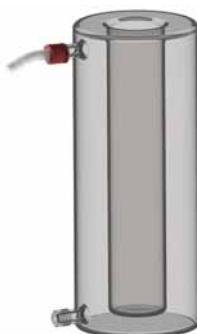

Weight: approx. 90 x 30 x 515 mm

approx. 450 g (without viscometer)

Power pack approx. 220 g

2 Thermostat vessel for ViscoClock plus, DURAN®

SI Analytics

NEW

For tempering of samples in a viscometer, as an alternative to a special glass-panelled bath thermostat. ViscoClock plus has to be connected via hoses to a suitable thermostat bath circulator. For safety reasons, the range of measuring temperatures is restricted to ±15 °C compared to room temperature. The use of an additional magnetic stirrer is recommended.

Specifications

Temperature range: 10 ... 40 °C

Accuracy: ±0.05 K

3 Test stand TVL-XS, manual

NEW

SAUTER

The redesigned, superfine spindle enables exact testing in a force-measurement range up to 100 N in particularly fine steps and, in conjunction with the fine-dosing crank, ensures safe, reliable operation. For testing of low levels of force with short distances, such as, testing keyboard overlays, biological samples, blister packs.

3

- For vertical and horizontal use
- High level of security with repeated measurements
- Large base plate with various holes for fixture mountings
- Suitable for all SAUTER force measuring device up to 100 N (not included with the delivery)

Specifications

Travel distance per knob rotation (one turn):	2 mm
Dimensions (W x D x H):	300 x 250 x 160 mm
Net weight:	4.5 kg

3. Analytical measurement and testing

Material testing/Hardness measurement

GENERAL CATALOGUE EDITION 21

1

Shore D Shore A0

Shore A

1 Shore hardness testers HB/HD

Shore hardness testers for hardness determination of plastics through penetration measurement

SAUTER

- Typical application: Measurement of penetration depth (Shore).
- Material thickness of the sample, min. 4 mm
- Particularly recommended for internal comparison measurement. Standard calibrations e. g. to DIN 53505 are not possible because of very narrow standard tolerances
- Can be attached to the test stands TI-AC (for Shore A and Shore A0) and TI-D (for Shore D)

Shore A for rubber, elastomers, neoprene, silicone, vinyl, soft plastics, felt, leather and similar materials

Shore A0 for foams, sponges

Shore D for plastics, formica, epoxides, plexiglass etc.

2

2 Shore hardness testers, analogue, HB

Compact handheld durometer for plastics with drag indicator.

SAUTER

- Max mode: Holds the maximum value in the display
- Point mode: Shows one instant value
- Screws to screw on to the TI: M7 fine thread
- Delivered in a plastic carrying case

3. Analytical measurement and testing

Material testing/Hardness measurement

Leeb hardness tester, mobile

1

The Leeb hardness tester measures metallic samples and offers mobility and flexibility compared to stationary tabletop devices and testing devices with internal sensor.

- External impact sensor
- All measurement directions possible (360°) thanks to an automatic compensation function
- Internal memory for up to 600 data groups
- Mini statistics function: displays the measured result, the average value, the impact direction, date and time
- Measurement value display: Rockwell (Type A, B, C), Vickers (HV), Shore (HS), Leeb (HL), Brinell (HB)
- Automatic unit conversion: The measuring result is automatically converted into all specified hardness units
- Measuring with tolerance range (limit-setting function): Upper and lower limiting can be programmed
- Acoustic and visual signal
- Matrix display: Backlit multi-function display
- Robust metal housing

Scope of supply:

HK-D: Mobile Leeb hardness tester, hard carrying case

HK-DB: Mobile Leeb hardness tester, hard carrying case, standard block for calibration, hardness approx. 800 HLD

2 Digital torque measurement

2

For torque testing of bottles and other packaging with screw tops. Quick pin system: The four bottle mounts are pushed in, instead of being screwed in, to save time. This allows you to reconfigure quickly for other bottle sizes.

- Can be used in both directions of rotation
- Metal housing
- Capacity display: A bar lights up to show how much of the measuring range is still available
- Peak hold mode to capture peaks
- Function to set limits: Input of an upper/lower limit value
- Visual and acoustic signal
- AUTO-OFF function
- Back-lit LCD graphic display
- Internal data memory saves up to 500 measurements
- Memory contents can be transferred to the PC using optional software
- USB and RS 232 data interfaces
- Rubber feet with anti-slip feature

Scope of supply: Digital torque measurement, four bottle mounts with rubber coat, sturdy carry case

Material testing/Surface analysis

USB Hand held microscopes for industry

Dino-Lite digital USB microscopes are powerful, portable and easy to use for many different applications in the Industry and for Material Sciences. Most models have a polarizer for working with reflective objects. In addition to the standard white light LEDs, ultraviolet or infrared LED models are available for specific samples and applications.

Dino-Lite

- USB 2.0, maximum 30 fps
- 1.3 or 5 MP image resolution
- Edge sensor for very low image errors or vignetting
- Extended Depth of Field (EDOF)
- Extended Dynamic Range (EDR)
- Automatic Magnification Reading (AMR)
- Adjustable Polariser
- Flexible-LED-Control (FLC)

Scope of supply: Carrying pouch, Software CD for Windows and Mac OS (not for EDOF, EDR models), calibration slide, manual

1 Polarisation microscope Panthera TEC POL

NEW
Motic

Powerful polarisation microscope for all material sciences. Maximum flexibility for all applications in polarisation microscopy, suitable for transparent as well as opaque samples from the education sector and industrial quality assurance.

- Tube type Siedentopf, swiveling
- Widefield oculars for spectacle wearers with diopter adjustment on both oculars
- CCIS® Plan achromatic objectives UC PL (strain-free)
- Reversed coded nosepiece with single centering holes
- Bertrand lens and slot for compensators
- Focusable and centerable Achromat Swing-out Abbe condenser N.A. 0.90/0.13 (strain-free) and rotatable polariser
- Illumination acc. to Köhler, with interchangeable illuminator
- Motic LightTracer: Light memory, sleep mode (auto on-off), nosepiece LED light intensity and mode indicator
- Coaxial coarse and fine focusing system with tension adjustment
- Compact, built-in mechanical stage
- Integrated power supply with sleep mode
- Visual camera output
- USB 2.0 for external camera power

Scope of supply: Microscope, dust cover, power cord, Allen key, blue filter, halogen bulb, LED module, adjustable key for nosepiece, interference color chart, screws for metal extension support

Analytical instruments and systems/Melting point determination

Melting point meters LLG-uniMELT 2 und 3

Ideal for determination of the melting point of powders up to 360 °C and substances that do not have a clear transparent melting point.

Both devices have a USB interface that permits printing a measuring protocol or generating a PDF file that corresponds to the demands of a contemporary QMS documentation.

Properties for both models:

- Digital temperature control on large display
- Selectable user language German or English
- Sample can be monitored through a magnifying glass with integrated light
- For capillaries with 1.4mm outer diameter
- Text display of error messages
- Keyboard covered with foil for easy cleaning
- USB port
- Height adjustable table stand
- Operating instructions in German, English, Spanish, French and Russian.
- Brief instructions right at the device
- Up to 3 measurements could be stored and printed as protocol at the same time
- The protocol contains all the relevant data of the probe, the measurement and the device

1

6.263 685

LLG-uniMELT 2: For visual, semi-automatic measurement with magnifying glass.

In this model, the melting point is determined visually (max. and then saved by pushing the "Save" key. The value can be printed or stored by pushing the memory button and read on the display until the device is switched off or a new measurement is performed.

2

6.263 686

Specifications

Measuring range:	25.0 °C ... 360.0 °C
Resolution:	0.1 °C
Accuracy:	±0.4 °C
Reproducibility:	±0.3 °C
Heating rate at fast heating:	to 200 °C approx. 4 min; to 350 °C approx. 8 min
Heating rate when measuring:	1 °C/min
Magnifying glass:	20 dpt/3 x
Lighting:	2 x LED
Dimensions housing (W x D x H):	230 x 65 x 260 mm
Dimension table stand (W x H):	85 x 55 mm
Dimensions capillaries:	1.45 x 80 mm
Weight:	4.0 kg
Power supply:	88 ... 264 V, 50 Hz
IP code:	IP 20
Warranty:	3 years

GENERAL CATALOGUE EDITION 21

Analytical instruments and systems/Melting point determination

1

1 2

Melting point apparatus, Electrothermal IA 9100/9200/9300

The updated and improved IA9000 Series Digital Melting Point Apparatus offers an easy way to measure the melting points of up to 3 samples simultaneously without sacrificing accuracy; the temperature resolution is within 0.1 °C. The starting temperature of the approximate melting range can easily be input via the membrane keypad using the simple intuitive menus. The unit quickly heats up to this temperature and gives an optical and acoustic signal once it has been reached. When the operator then presses another key, the device begins to heat up at a constant rate (IA 9100 fixed at 1 °C/min., IA 9200 and IA 9300 adjustable between 0.2 to 10 °C/min. in increments of 0.1 °C).

Electrothermal

Up to 4 melting points (IA 9300 up to 6 melting points) can be recorded and transferred to the memory as discreet temperatures for later recall on the display. Model IA 9200/9300 provides the opportunity for computer-supported data analysis. An accessory printer enables documentation of the results, date, time (real time) and sample number.

- Ergonomic design ideal for multiple users.
- Height-adjustable extension arm and a viewing head that may be rotated to suit each user.
- The viewing head holds a viewing magnifier that offers 8X magnification.
- The extension arm is completely collapsible and can be neatly folded away into the unit, so that the unit can be stored flat to save space.
- Each IA9000 series model comes supplied with a pack of 50 capillary tubes.

2

Dimensions (W x D x H):	200 x 350 x 85 mm
Weight:	2.5 kg
Input:	220 -240 V
Output:	15 V
Power:	45 W
Oven chamber illumination:	3 x white Super Flux LED's
Illuminous Intensity (per LED):	3500 Lux
Oven temperature range:	5 to 400°C
Digital thermometer sensor:	Platinum resistance thermometer (PT100)
Measuring range:	Amb. to 400 °C
Resolution:	0.1 °C
Accuracy:	±0.5°C at 20°C linearly to ±1.0°C at 350°C
Display:	12 x 2 backlit matrix LCD

3. Analytical measurement and testing

Analytical instruments and systems/Melting point determination

1 Melting Point Meter M5000

For powdery substances with a melting point up to 400 °C. A fan cooling allows fast measurements in every range of temperature. The display provides a clearly-arranged readout of all important measuring data.

A.KRÜSS Optronic

1

- Fully automatic measurement by means of transmission optics
- 1 capillary intake
- LCD display
- Alarm signal when reaching the melting point
- Fast cooling through integrated fan
- Digital display of all important data
- Display in German or English
- With RS-232 interface for printer CBM910
- Easy-to-clean membrane keypad

Scope of supply: Melting Point Meter, protective cover, 100 capillaries

Specifications

Temperature range:	25 ... 400 °C
Resolution:	0.1 °C
Accuracy:	±0.3 °C (25 ... 200 °C) ±0.5 °C (200 ... 400 °C)
Preheating rate:	up to 300 °C approx. 4.0 min up to 400 °C approx. 7.5 min
Heating rate:	1 °C min⁻¹
Capillary-Ø:	1.4 mm
Capillary intake:	1
Dimensions (W x D x H):	220 x 340 x 150 mm
Weight:	4.1 kg
Power supply:	90 ... 264 V
IP code:	IP20

Type	PK	Cat. No.
M5000	1	6.264 452

2 Melting Point Meter M3000

The M3000 provides fast and easy examination of powdery substances with a melting point up to 360 °C. Due to the triple capillary intake, it is possible to analyse three samples within one measurement run. Thanks to the preheating rate and the integrated fan cooling, fast measurements are possible in any temperature range.

A.KRÜSS Optronic

2

- Semi-automatic measurement by means of 10x magnification optics
- 3 capillary intakes
- LCD display
- Monitoring of the illuminated sample via lens
- Fast cooling through integrated fan
- Digital display of all important data
- Display in German or English
- With RS-232 interface for printer CBM910
- Easy-to-clean membrane keypad

Scope of supply: Melting Point Meter, protective cover, 100 capillaries

Specifications

Temperature range:	30 ... 360 °C
Resolution:	0.1 °C
Accuracy:	±0.3 °C (30 ... 200 °C) ±0.5 °C (200 ... 360 °C)

3. Analytical measurement and testing

GENERAL CATALOGUE EDITION 21

Analytical instruments and systems/Melting point determination

1

1 Automatic Melting Point Apparatus, SMP50

Accurately and reliably determining the melting point of up to three samples simultaneously.

Stuart

The SMP50 has a custom designed user interface based on an established Android platform for intuitive setup and navigation. All operation is via the 7" colour touchscreen. Once programmed, users can leave the SMP50 to complete the melt analysis independently, alternatively the melt can also be observed on the screen live or post melt. During post melt review additional measurement tags can be added if required, such as meniscus point or the automatically obtained result can be overwritten.

A generous 8 GB on board storage is included, which should comfortably hold approximately 300 melts files including videos. Results can also be transferred via USB stick on to PC or can be printed directly from the unit via the accessory printer.

The SMP50 features a useful storage drawer to house all standard capillary tubes.

All units are factory supplied with a calibration certificate showing individual serial number for traceability. The SMP50 also conforms to Pharmacopoeia and GLP.

Specifications

No of samples:	3 simultaneously
Temperature range:	Ambient to 400 °C
Temperature resolution:	0.1 °C
Display:	7" HD Colour
Ramp rates:	0.1 to 20 °C in 0.1 °C increments
Temperature sensor:	PT1000 Platinum resistance
Memory:	8 GB (approx. 300 results with video)
Cool down time:	350 to 50 °C (approx. 12 min)
Heat up time:	50 to 350 °C (approx. 6 min)
Data transfer:	USB Flash drive
Sample level:	2 to 3 mm in 50 mm or 100 mm length capillaries
Weight:	4.6 kg
Power supply:	120-230 V, 50/60 Hz

4 Magnetic stirrer Hei-Mix L

Without heating. For heat-sensitive samples, because the top plate is insulated from the motor.

Heidolph

- Gentle and protective treatment of samples due to smooth start function
- Hermetically-sealed housing prevents corrosion and increases the service life of the unit
- When working with dry ice a robust thermal insulation prevents corrosion inside the housing which prohibits dripping of condensate on the electronic components
- Due to the Kera-Disk® ceramic coating, the top plate is chemical-resistant and scratch-proof

Specifications

Stirring quantity (H ₂ O):	20 l
Speed range:	100 ... 1.400 rpm
Permissible ambient temperature:	5 ... 31 °C
Permissible relative moisture:	80 %

4. Stirring, Shaking, Mixing

Magnetic stirrers / Hotplates/Without heating, with motor

1 Multi-position Magnetic stirrer AMI 4, illuminated

Multi-position magnetic stirrer with illuminated stirring positions for stirring volumes up to 5 l per position. With epoxy-coated metal housing for protection against liquid spills.

Velp Scientifica

- 4 stirring positions
- Gentle start-up
- Illuminated stirring positions
- Electronic speed control up to 1100 min⁻¹
- Low height

Specifications

Stirring volume each (H:O):	5 l
Motor rating:	4.8 W
Speed (max.):	1100 min ⁻¹
Number of stirring positions:	4
Distance between stirring positions:	150 mm
Display:	Analog
Dimensions (W x D x H):	600 x 270 x 55 mm
Weight:	4.0 kg
Power supply:	100 ... 240 V, 50/60 Hz
Warranty:	3 years

Multi-position magnetic stirrers RO 5/10/15 series

Without heating. 5, 10 or 15-position digital magnetic stirrers, designed for synchronous stirring. The magnetic coil technology provides noiseless and consistent stirring on all positions. Speed remains constant, even when load changes. The closed and compact design allows easy cleaning and protects the equipment against the penetration of liquids. Additionally, a removable transparent anti-slip mat is included.

IKA

- Adjustable reverse operation
- Eco-mode for a low self-warming of the surface
- Wear free magnetic coils
- Error Code Display
- Easy operation with touch keypad
- Suitable for continuous operation
- Adjustable speed in increments of 10rpm

Magnetic stirrers / Hotplates/Without heating, with induction

1

1 Magnetic stirrer LLG-uniSTIRRER 1

An **ultra-flat** inductive magnetic stirrer without heating with timer. The modern magnet coil technology consists only of non-moving parts and therefore guarantees a wear-free drive.

For a better mixing of samples it is possible to change the direction of rotation every 30 seconds.

- **Timer** (1 min to 99 min, infinitely)
- 100 % wear- and maintenance-free inductive drive
- LED-display for an exact adjustment of the rotation speed
- Digital regulated rotation speed
- Alteration of the stirring direction
- Protection class IP 65
- Stainless steel surface

Delivery includes: magnetic stirrer, power cable, adapters for UK and universal plug.

Specifications

Stirring positions:	1
Stirring quantity (H_2O):	0.8 l

3 Magnetic stirrer atexMIXdrive 1 with external control

2mag

Explosion protected. 1 stirring position with maintenance-free and wear-free inductive drive for powerful mixing of liquids. Jerk-free stirring even at low speed.

- Very robust construction, easy to clean, with maximum resistance
- Completely sealed housing made from stainless steel
- Magnetic stirrer is water- dust- and germproof
- Control unit atexMIXcontrol or atexMIXcontrol cleanroom with protection class IP65
- Magnetic stirrer submersible in water- or oil baths
- Suitable for use in CO₂ incubators and ovens
- Certified acc. to ATEX II 2G Ex mb IIC T4 Gb

The magnetic stirrer can only be used together with control unit atexMIXcontrol or atexMIXcontrol cleanroom, which have to be ordered separately. Magnetic stirrer, control unit and power supply are firmly connected to each other to ensure Ex protection.

GENERAL CATALOGUE EDITION 21

Magnetic stirrers / Hotplates/With heating and motor

1

1 | 2 Magnetic stirrer with heating LLG-uniSTIRRER 5, complete package

Universal magnetic stirrer with an outstanding price-performance ratio. Safety features include a "hot" warning **display** and a stirring function that continues to run until the plate temperature is below 50 °C, even when the device is switched off. A digital timer enables unattended operation and can be set from 1 min to 99 h 59 min. When the set time has elapsed, the unit stops automatically. An integrated control function offers precise control of the heated fluid temperature via a remote PT1000 temperature probe. The device is equipped with a Ø 135 mm stainless steel plate with glass ceramic, suitable for the LLG-Universal reaction block systems.

- **Timer** (1 min to 99 h 59 min)
- Maintenance-free, brushless DC motor
- Stainless steel plate with glass ceramics coating
- Digital control and **backlit display**
- Stirrer and display can be controlled remotely via an RS232 interface
- Hot surface indicator
- Sturdy metal housing
- Powerful stirring
- Connection for PT1000, integrated control function

2

Scope of delivery: Magnetic stirrer with PT1000 probe, rod and holder

Specifications

Max. stirring quantity (H ₂ O):	20 l
Speed:	100 ... 1500 min ⁻¹
Accuracy:	±1 min ⁻¹
Magnetic bar:	max. 80 mm
Display:	LCD
Heating plate:	Ø 135 mm
Permissible ambient temperature:	5 ... 40 °C
Temperature range:	RT ... 340 °C
Setting accuracy:	±0.1 °C
Control accuracy:	±0.2 °C
Heat output:	550 W
Safety temperature:	360 °C
Dimensions (W x D x H):	160 x 285 x 85 mm
Weight:	2.8 kg
Power supply:	200 ... 240 V, 50/60 Hz

Magnetic stirrers / Hotplates/With heating and motor

1 | 2 Magnetic stirrer with heating LLG-uniSTIRRER 7, complete package

Universal magnetic stirrer with an outstanding price-performance ratio. Safety features include a "hot" warning display and a stirring function that continues to run until the plate temperature is below 50 °C, even when the device is switched off. An integrated control function offers precise control of the heated fluid temperature via a remote PT1000 temperature probe. The device is equipped with a stainless steel plate with glass ceramic (184 x 184 mm).

- Maintenance-free, brushless DC motor
- Digital control and **backlit display**
- Stirrer and display can be controlled remotely via an RS232 interface
- Hot surface indicator
- Stainless steel plate with glass ceramic
- Sturdy metal housing
- Powerful stirring
- Connection for PT1000, integrated control function
- Mountable rod on the left and on the right side of the stirrer

Scope of delivery: Magnetic stirrer with PT1000 probe, rod and holder

1 | 2 LLG-RCT standard safety control

Magnetic stirrer with new technology and new functions:

- integrated temperature control
- incl. PT 1000 temperature sensor (PT 1000.60)
- exact temperature and speed setting via digital display, even when switched off
- digital display of set safety temperature limit
- hot top indicator, hot surface warning to prevent burns
- digital error code display
- with adjustable safety circuit of heating plate temperature (50 to 360 °C)
- safety magnetic stirrer with heating, suitable for unsupervised operation
- DIN 12878 connector for attaching a contact thermometer, e.g. ETS-D5; enables precise temperature control directly in the heated medium
- enhanced safety due to improved heat control technology
- enclosed assembly (IP42) guarantees long service life
- highly polished, aluminium hotplate for optimal heat transfer
- improved magnetic coupling
- supplied with housing protection cover H 98
- Tested acc. to DIN EN IEC 61010-1

Scope of supply: magnetic stirrer, temperature sensor PT1000 , screwdriver, protective cover, C16 mains cable (H11)

Specifications

Max. stirring quantity (H ₂ O):	20 l

4. Stirring, Shaking, Mixing

Magnetic stirrers / Hotplates/With heating and motor

1 Magnetic stirrer ARE

Magnetic stirrer with aluminium heating plate for stirring speeds up to 1500 min⁻¹.

Velp Scientifica

- Suitable for stirring volumes of up to 20 l
- Operating temperature up to 370 °C
- Chemical- and scratch-resistant heating plate
- Electronic speed control for stable stirring speeds
- Torque compensation to keep the speed constant even on viscosity changes

Specifications

Volume (H ₂ O):	20 l
Power rating:	630 W
Speed (max.):	1500 min ⁻¹
Number of stirring positions:	1
Display:	Analog
Temperature range:	RT ... 370 °C
Stirring position material:	Aluminium
Stirring position:	Ø 155 mm
Dimensions (W x D x H):	165 x 280 x 115 mm
Weight:	2.6 kg

2 Magnetic stirrers RH basic/digital

Economic magnetic stirrer with heating. High heat output of 600 watts and the steel-copper compound hot plate ensures rapid heating. Adjustable safety temperature from 50 to 370 °C. Soft-start stirring motor. Includes M 10 thread for a support rod.

IKA

Strong magnetic field and wide speed range for volumes up to 15 litres.

RH basic white/RH digital white with chemically resistant hot plate.

RH digital only: Bushing according to DIN 12878 for connecting an electronic contact thermometer, such as the ETS-D5. Highly accurate temperature control is possible with the sensor placed directly in the medium.

- Digital display of temperature and speed
- Error code display
- Easy operation with touch keypad

Magnetic stirrers SS/SD/SP/CS/CD/CP 152

With heating. Magnetic stirrers with strong magnets and powerful motor for mixing large volumes. The analog models have a LED display for the set and actual temperature of the device. With the digital models, the set and actual temperature is shown on the display, while the speed is indicated on the LED display.

Stuart

- Spill-resistant front control panel with a chemically toughened glass for extra resilience
- Hot surface warning light flashes when plate temperature is above 50 °C
- With an integral fixing point for a retort rod
- With BioCote, silver-based, antimicrobial protection

SP152/CP152 additionally with:

- Full-colour 10-cm TFT screen which simultaneously displays target settings and the actual temperature
- Individual profiles can be created and saved
- User calibration for adjusting the temperature output ($\pm 5\%$ at 50 and 450 °C)
- Incl. Pt100 Temperature sensor

Specifications

Maximum Stirring Capacity:	15 l
Display resolution:	1 °C
Accuracy:	±1 °C

Magnetic stirrer AREX-6 Connect PRO

Magnetic stirrer with ceramic-coated aluminium heating plate, stirring speeds up to 1700 min⁻¹, timer and PT100 temperature sensor. **With WiFi connection to the VELP Ermes Cloud Platform for uploading, managing, monitoring and exchanging results and parameters.**
Access to the device is possible via PC, Smartphone and Tablet.

Velp Scientifica

Equipped with extensive safety functions: independent safety circuits protect the device in case of overtemperature, adjustable temperature limitation, warning in case of hot surface, protection against unattended heating as well as alarm and switch-off function if the temperature sensor is not immersed in the medium.

- Suitable for stirring volumes up to 20 l
- Powerful, brushless motor
- Torque compensation to keep the speed constant even on viscosity changes
- Reverse of stirring direction
- Resistant housing made of die-cast
- Chemical- and scratch-resistant heating plate
- Gentle start of the stirrer
- Temperature control via software up to 370 °C
- All settings configurable on menu
- Clear display of all parameters
- Software updates by WiFi

Magnetic stirrers / Hotplates/With heating and motor

Magnetic Stirrers MR Hei-PLATE

The Hei-PLATE series with heating consists of models Hei-Standard, Heidolph
Hei-Tec and Hei-Connect.

- The chemically resistant KeraDisk® hot plate allows for immediate heat transfer resulting in quick heat-up times
- In case the heating function fails, stirring will not be discontinued to prevent bumping
- A separate on/off button for heating prevents unintentional heat-up
- With fire-resistant aluminum die-cast housing, which prevents the stirrer from damage, even if exposed to highest temperatures
- In case of a short-circuit, damage to the temperature sensor or disorder of the process, the unit powers off completely
- The temperature sensor consists of two independent safety circuits which switches off heating in case of any overtemperature situation
- Hermetically-sealed housing protects all mechanical and electronic components from aggressive environments
- With connection for optional temperature sensor Pt 1000

Hei-Tec and Hei-Connect additionally with:

- Digital display enables full process monitoring and precise setting of all parameters.
- This unit features a digital display and allows for easy setting and monitoring of values in the illuminated readout
- An illuminated button indicates clearly if the stirring mode is activated
- Precise adjustment of the desired hotplate temperature by turn-push-button
- Overheating protection by a safety circuit that switches off heating if the temperature sensor is not immersed in the media vessel

Specifications

Stirring quantity (H ₂ O):	20 l
Speed range:	100 ... 1400 rpm
Heating power:	800 W
Temperature range:	20 ... 300 °C

1 Magnetic stirrer RCT 5 digital

1

Powerful Magnetic stirrer with glass surface for demanding stirring tasks. The stirring process can be programmed individually from beginning to end and so the reaction runs reliably and safely even without monitoring.

- Alteration of the stirring direction is possible
- Timer functions or sequence programming is adjustable
- Set-up plate made of white, scratch-resistant ceramic coating
- Warning in case of a hot surface
- Adjustable safety circuit up to 370 °C
- USB-/RS232 interface

Specifications

Max. stirring quantity (H ₂ O):	20 l
Motor rating input/output:	50 W/9 W
Speed range:	50 ... 1500 rpm
Max. stirring bar length:	80 mm
Heating power:	850 W
Heating rate (1 l H ₂ O):	7.5 K/min
Temperature range:	ambient +13 to 310 °C
Heat control accuracy at 100 °C:	±5 K
Safety circuit:	50 ... 370 °C
Connection for ext. temp. sensor:	PT1000, ETS-D5, ETS-D6
Control accuracy with sensor PT1000, ETS-D5/ETS-D6:	±0.5 K/±0.2 K
Set-up plate Material:	Aluminium, ceramic coating
Set-up plate Dimensions:	137 x 137 mm
Overall dimensions (W x D x H):	160 x 270 x 85 mm
Weight:	2.6 kg
IP code acc. to DIN EN 60529:	IP 42
Power supply:	220-230/115/100 V, 50/60 Hz

2 Magnetic stirrer C-MAG HS 7 control

IKA

The magnetic stirrer C-Mag HS 7 control has a square top made of ceramic which offers excellent chemical resistance. The C-Mag HS 7 control improves over time with regular firmware updates. Control of kinetics and sensitive reactions are supported by the integrated timer and counter function.

4. Stirring, Shaking, Mixing

Magnetic stirrers / Hotplates/With heating and motor

GENERAL CATALOGUE EDITION 21

1 | 2 Magnetic stirrer/hotplates, RET basic

Wide speed range from 0/50 to 1700rpm. Integrated temperature control. Incl. PT 1000 temperature sensor (PT 1000.60). Exact temperature and speed setting via digital display, even when switched off. Set safety temperature limit displayed digitally. Hot Top indicator: hot surface warning to prevent burns. Digital error code display.

IKA

- With adjustable safety circuit of heating plate temperature (50 to 380°C)
- Safety magnetic stirrer with heating, suitable for unsupervised operation
- Bushing according to DIN 12878 for connecting a contact thermometer, e.g. ETS-D5, enables precise temperature control
- High level of safety thanks to improved heat control technology
- Enclosed assembly (IP 42) guarantees long service life
- Very broad temperature range (RT to 340°C)
- Extremely fast heating times
- Electronic speed control
- High magnetic adhesion
- Incl. protection cover H 100

Specifications

Magnetic stirring:

Volume stirred (water):	20L
Motor rating input/output:	16/9W
Speed adjustment:	Dial
Speed range:	50 to 1700 rpm
Maximum magnetic stirrer bar (L x dia.):	80 x 10 mm

Heating

Heat output:	600W
Heating rate (1 l H ₂ O in H15):	7 K/min
Temperature range:	Amb. to 340 °C
Accuracy:	±1 K
Speed control:	stepless
Adjustable safety circuit:	min 50 °C max 360 °C
Connection for ext. temperature sensor:	DIN 12 878
Control accuracy with temp. probe:	PT 1000/ ±1 K ETS-D 5/ ±0.5 K
Hotplate material:	Stainless steel
Dimensions:	dia. 135 mm
Dimensions (W x D x H):	160 x 270 x 95 mm
Weight:	2.5 kg
Protection system to DIN EN 60529:	IP 42
Tested to DIN EN IEC 61010-1.	
Supply requirements:	230 V 50/60 Hz

4. Stirring, Shaking, Mixing

Magnetic stirrers / Hotplates/With heating and motor

Electronic Contact thermometer ETS-D5/ETS-D6

3 possible operation modes guarantee optimum adjustment to your application:
Operating mode A: Suitable for work with varying parameters (from -50°C to 450°C).
 Adjustable safety temperature
Operating mode B: Suitable for repeated operation under uniform conditions and parameters
Operating mode C: Suitable for unsupervised operation
 - with optimised PID control
 - reset function
 - includes stainless steel sensor probe H 62.51
 - for all magnetic stirrers with a DIN 12878 class 2 contact thermometer connection, e.g. IKA®, Heidolph and Corning with adapter AD-C1.

ETS-D6 additionally with integrated pH measuring instrument (without pH electrode) and large, graphic LCD display with multilingual user guide.

3 Multiposition magnetic stirrer with heating Multi-HS digital

3

For synchronous stirring and heating at homogeneous temperatures up to 120°C.

Velp Scientific

- CerAlTop™ plate - easy cleaning and maximum resistance
- Brushless motor guarantees constant speed
- SpeedServo™ technology maintains speed constant when viscosity changes
- Digital interface with icons
- Integral timer
- Programmable auto-reverse of the stirring direction
- Safe hot plate warnings when the plate temperature is above 50°C
- The Lock feature prevents unintentional changes

Specifications

Multi-HS 6 // Multi-HS 15	
Max. stirring quantity per stirring position (H ₂ O):	400 ml // 250 ml

2 Magnetic stirrers/hotplates, multi-position, RT 5/10/15

Digital magnetic hotplate stirrers with 5, 10 or 15 positions, designed for synchronous heating and stirring. The magnetic coil technology provides noiseless and consistent stirring on all positions. The surface temperature is infinitely adjustable up to 120°C, producing a maximum medium temperature of 70°C (depending on type of vessel). Speed remains constant, even when load changes.

IKA

- Homogeneous temperature distribution across heating plate
- Adjustable reverse operation
- Eco-mode for a low self-warming of the surface
- Wear free magnetic coils
- Error code display
- Easy operation with touch keypad
- Suitable for continuous operation
- Adjustable speed in increments of 10rpm

Specifications

Max. stirring quantity per stirring position (H ₂ O):	0.4 l
Distance between stirring places:	90 mm
Speed range:	0 to 1000 rpm

1 | 2 | 3 | LLG-Universal reaction block system for magnetic stirrers

Universal alternative to oil bath

The reaction block allows syntheses to be carried out in round flasks at temperatures of up to 250 °C. As a result, with this system, oil as a heat transfer media is made redundant and your lab is a safer place. The reaction block ensures safety at work and prevents oil baths and heating mantles from overheating in your lab. The messy oil clean-ups that results from changing oil or removing flasks from an oil bath will be eliminated. Injuries and burns from hot oil will never happen again. Uniform mixing is also guaranteed because there is no interference to the magnetic field from the aluminium blocks. This system ensures optimal heat transfer from the heating plate directly into the medium.

- Universal model
- For round plates of 135 to 145mm diameter
- With adapter plate for all square plates of min. 145mm length side

- Reaction blocks are available in six standard sizes.
- Delivered adapter allows the use with either IKA or Heidolph magnetic stirrers.
- Syntheses in round flasks without oil bath up to 250 °C.
- Uniform and constant mixing
- High-precision thermal conduction directly into the reaction block
- Safe and clean working
- Made in Germany

1 Magnetic stirring bars ASTEROID, triangular, PTFE

2mag

More than 4x higher torque transmissible. Unbeatably enhanced mixing effect in comparison to conventional stirring bars. Strong, stable, long-lasting magnetic field, with no demagnetization effect. Concave design for minimal surface contact and reliable rotation, triangular shape for powerful shear force and enhanced mixing at lower rotational speeds. Significantly higher rotation speeds achievable, high quality, even and sealed PTFE encapsulation. Conform to FDA requirements, steam sterilisable at 121 °C. Multiple enhancements against all types of magnetic stirrers.

1 | 2 Overhead stirrer LLG-uniSTIRRER OH2, digital

Cost-effective laboratory stirrer designed for simple stirring tasks for quantities up to 20 l (H₂O). Automatic speed adjustment in the range between 50 and 2200 min⁻¹ via microprocessor-controlled technology. Safety circuits ensure automatic cut-off in an anti-stall or overload situation. Actual and set speed are constantly monitored ensuring no undesired speed variations, even if the sample viscosity changes.

- Brushless, maintenance-free motor
- Digital speed display
- **Display for speed or torque changeable**
- Infinitely adjustable speed
- **Overload protection**
- Non-slippery mat
- Slim casing
- Quiet operation
- Error code display
- RS232 port

Stand:

Stainless steel stand incl. boss head, dimension (W x D x H): 200 x 310 x 780 mm, non-slippery mat

Stirrer:

4-blade propeller stirrer, stainless steel, shaft length 400 mm, stirrer diameter 50 mm

Scope of supply: Overhead stirrer LLG-uniSTIRRER OH2, stand, non-slippery mat and 4-blade-propeller stirrer

Overhead Stirrers MINISTAR Digital

These powerful overhead stirrers convince with perfect basic functionalities. They have a compact, space-saving design and are easy-to-use.

- Operation via a stable rotary knob
- Hardened glass display for maximum visibility and chemical resistance
- Display clearly shows the rotational speed
- Regular software updates can be made rapidly and simply via the USB interface
- Chemical resistant housing
- Microprocessor-controlled speed governor for constant rotational speed, even with changes in viscosity
- 10 years warranty

Overhead stirrer EUROSTAR 20 digital

Overhead stirrer designed for simple stirring tasks for quantities up to 15 l (H_2O). It automatically adjusts the speed through microprocessor controlled technology within the speed range of 0/30 to 2000 rpm. Safety circuits installed ensures automatic cut-off in an anti-stall or overload conditions. Continuous comparison of shaft speed to desired speed is maintained and variations are adjusted automatically. This guarantees a constant speed even with changes in viscosities of the sample.

Overhead stirrer EUROSTAR 400 digital/400 control

Powerful laboratory stirrer for highly viscous applications and intensive mixing for quantities up to 150 l (H₂O). It automatically adjusts the speed through microprocessor controlled technology. Safety circuits installed ensures automatic cut-off in an anti-stall or overload conditions. Continuous comparison of shaft speed to desired speed is maintained and variations are adjusted automatically. This guarantees a constant speed even with changes in viscosities of the sample.

EUROSTAR 400 digital:

- Digital speed display
- Infinitely adjustable speed
- Push-through agitator shafts
- Overload protection
- Short-term overload operation
- Slim casing
- Quiet operation
- Error code display

EUROSTAR 400 control additionally:

- Multilingual TFT display
- Programmable functions
- Integrated temperature measurement
- Interval operation
- Timer function
- Adjustable safety circuit
- Locked function
- Connection for external temperature sensor

Scope of supply EUROSTAR 400 control: Overhead stirrer, temperature sensor H 67.60, WiCo holder WH 11

Heating Magnetic Stirrers

ARE/AREX-6 Series

More than hot plate stirrers! Superior Safety and state-of-the-art thermoregulation delivering you an Organic synthesis solution with all relevant accessories

Overhead Stirrers

OHS Series

Whatever your application, we've got you covered. Safe and powerful Overhead stirrers guaranteeing constant torque at any speed, ease-of-use, unique connectivity and reliability.

Vortex Mixers

IR Vortex

Unmatched experience! The truly ergonomic vortex mixer with patented IR sensor reducing arm stress.

Biochemical Oxygen
Demand

BOD EVO

Perform your Biochemical Oxygen Demand analysis without altering the incubation condition. Manage up to 80 BOD sensors directly from your PC thanks to the unique connectivity of VELP BOD EVO.

2 Overhead stirrer STARVISC 200-2.5 control

IKA

High precision torque-measuring stirrer with direct display of the measured values for a wide range of applications. Especially suitable for product development, because precise measuring is taking place during the manufacturing process and the viscosity can be calculated via the user friendly display. Samples no longer have to be taken separately.

- Viscosity calculation
- Stepless adjustable speed
- With detachable remote control - Wireless Controller (WiCo)
- Powerful stirrer for highly viscous substances

Specifications

Stirring quantity max. (H:O):	100 l
Max. viscosity:	100000 mPas

3 Flexible clutch

Required for stirring tasks using glass stirring rods. The flexible coupling compensates for any structural variances.

Clamping range: 6 to 10mm
Torque max. 10 Ncm

Type	PK	Cat. No.
FK 1	1	9.197 060

3

Globe Stirrer Couplings, POM

Made of POM, a plastic material with a good mechanical strength, powerful transmission of up to 300 Ncm, suitable for a speed of up to 1.200 rounds per minute, maximum misalignment of axes 10 mm. Ideal for balancing misalignment of axes between agitator and stirrer shaft, suitable for glass, metal or PTFE stirrer shafts.

- very low centrifugal forces due to low weight
- suitable for both left and right-handed rotation
- no resonance
- simple assembly by means of screw joints with clamp rings
- pivot (length 90 mm) can be shortened by the user

Overhead stirrers/Stirrer Heads-Stirrers

3 PLR compressed air laboratory stirrers up to 30 L for use in potentially explosive atmospheres, without/with tachometer

PLR compressed air laboratory stirrers are designed for all kinds of standard mixing tasks. The vane type, air-driven motor offers a high power density and is significantly lighter and smaller than an equivalent electric motor.

Buddeberg

9.778 950

9.778 960

**General specifications:**

- operating pressure max. 6 bar
- air consumption 260 L/min. at 6 bar
- power output 200W at 6 bar
- clockwise rotation
- ATEX certification

Basic models include:

- all-stainless steel housing
- continuously adjustable speed control valve
- support arm diam. 14 mm
- snap connection for NW 5
- output shaft L x diam. 26 x 10 mm

Compressed air powered stirrers, PLR, accessories

Connection couplings VK:

Fixed-diameter connection for motor/magnetic coupling drive shaft and stirring rod.
Suitable for use in potentially explosive atmospheres. Material No. 1.4404.

Buddeberg

Flexible glass stirring shaft couplings PK:

For stirring tasks using glass stirring rods. Elastic connector between motor and stirring shaft. Provides exact alignment of motor and shaft, and evens out axial and height differences. Accepts 6mm to 10mm diameter shafts.

Flexible glass stirring shaft couplings K:

For stirring tasks using glass stirring rods. Elastic connector between motor and stirring shaft. Provides exact alignment of motor and shaft, and evens out axial and height differences. Accepts 6mm to 10mm diameter shafts

Double-Cardan-Coupling DCK I:

With 8mm dia. hexagonal input drive receiver and 6mm square socket drive output.

How to select the correct stirring rotor size

Propeller stirrer
 $D_1 = D_2 \times \text{min. 0.1 to max. 0.5}$

Diagonal blade stirrer
 $D_1 = D_2 \times \text{min. 0.25 to max. 0.5}$

Anchor stirrer
 $D_1 = D_2 \times \text{min. 0.9 to max. 0.98}$

Dissolver stirrer
 $D_1 = D_2 \times \text{min. 0.2 to max. 0.5}$

BuddeMix
 $D_1 = D_2 \times \text{min. 0.3 to max. 0.75}$

Buddeberg Laboratory Technology GmbH develops and manufactures explosion-protected compressed air laboratory stirrers and industrial stirrers as well as magnetic stirrer couplings and drives for the chemical, pharmaceutical, coating and food industry.

Furthermore, we offer **individual solutions** tailored to suit your special requirements. Please feel free to contact us.

4. Stirring, Shaking, Mixing

Overhead stirrers/Stirrers

1 | 2 Propeller stirring rotors, 3-blade, stainless steel 1.4305

The 3-blade propellers produce axial flow, and reduce shear forces to a minimum, even at high stirring speeds, thanks to their optimised blade design. Recommended for medium to high speed operations. Other sizes available on request.

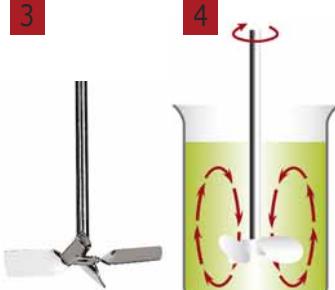

Type	Ø agitator mm	Ø agitator shaft mm	Length mm	PK	Cat. No.
R 1381	45	8	350	1	9.197 021
R 1382	55	8	350	1	9.197 022
R 1385	140	10	550	1	9.197 023
R 1388	140	10	800	1	9.197 024

3 | 4 Diagonal blade stirring rotors, 4-blade, stainless steel 1.4305

The 4-blade diagonal blade stirring rotor provides axial flow and creates increasing shear forces at higher stirring speeds. Recommended for medium to high speed operations. Other sizes available on request.

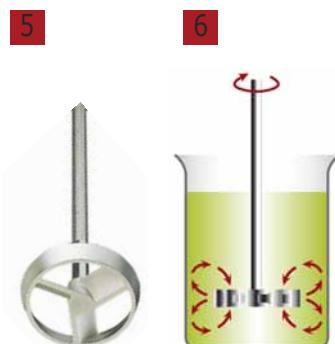

Ø agitator mm	Ø agitator shaft mm	Length mm	PK	Cat. No.
50	8	350	1	9.197 006
100	8	540	1	9.197 009
100	10	550	1	4.662 011

5 | 6 Turbine stirring rotors, 3-blade with guide ring, stainless steel 1.4305

The 3-blade turbine stirring rotor produces axial flow; the guide ring surrounding the blades reduces shear forces, and offers protection when contacting the wall or bottom of the vessel. Recommended for medium to high speed operations.

Ø agitator mm	Ø agitator shaft mm	Length mm	PK	Cat. No.
30	8	350	1	9.197 030
50	8	350	1	9.197 031
70	10	400	1	9.197 032

7 | 8 Dissolver stirring rotors, stainless steel 1.4404

The dissolver stirring rotor creates a radial flow with high turbulence. The mixture is drawn from top to bottom. High shear forces are created at the dissolver disk, which provides effective particle reduction. Recommended for medium to high speed operations.

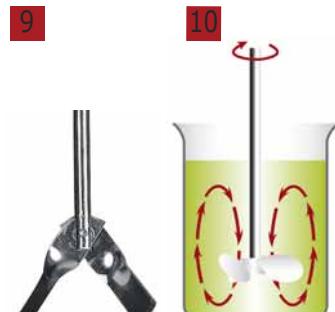

Ø agitator mm	Ø agitator shaft mm	Length mm	PK	Cat. No.
30	8	350	1	9.779 322
40	8	350	1	9.197 007
50	10	550	1	9.779 336

80	10	550	1	9.779 339
100	10	350	1	9.197 003

9 | 10 Centrifugal stirring rotors, 2-blade, stainless steel 1.4305

The folding blades of this 2-blade centrifugal stirring rotor open with increasing speed, allowing use with narrow-neck vessels. The stirring effect it provides is similar to a standard diagonal blade stirring rotor. Recommended for medium to high speed operations.

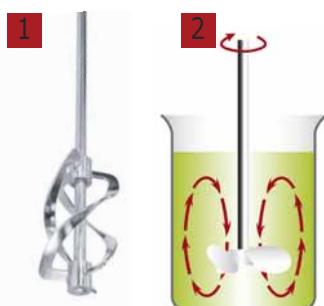

Ø agitator open / closed mm	Ø agitator shaft mm	Length mm	PK	Cat. No.
60/15	8	350	1	9.197 011
100/24	8	550	1	9.197 013

4. Stirring, Shaking, Mixing

GENERAL CATALOGUE EDITION 21

Overhead stirrers/Stirrers

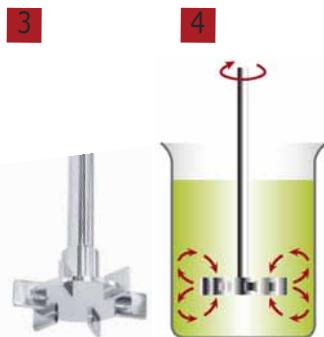

1 | 2 Spiral stirrer, stainless steel 1.4571

Generates axial flow. Medium is conveyed from the bottom upwards. For homogeneous mixing and heat exchange of medium to high viscosity media. Recommended for medium speed operations.

IKA

Type	\varnothing agitator mm	\varnothing agitator shaft mm	Length mm	PK	Cat. No.
R 3003	50	8	350	1	6.265 595

1 | 2 BuddeMix Stirring System 1 - 4

This novel stirring system has been conceived to mix low viscosity fluids as well as highly viscous media at slow speeds. Its special design creates inherent dynamic currents to produce perfectly homogeneous mixing results in very little time. Additional components like baffles, bottom bearings, etc. are not needed.

Advantages at a glance:

- suitable for low to highly viscous fluids
- stirs media containing solids and fibres without any difficulty
- gentle, low-shear stirring, due to slow stirring speed
- constant product temperature, with no heating effect
- short mixing times as the entire contents of the container are agitated
- no air addition, no foaming
- no baffles required
- low gear wear due to balanced forces
- minimal power consumption thanks to low speeds and short operation times
- easy cleaning
- material no. 1.4404

Particularly for potentially explosive atmospheres:

- a single stirring zone, near to the container base, ensures easy mixing of settled residues, e.g. in flow-through mixing containers
- no baffles required, thus no additional sources of ignition

Type	Ø agitator mm	Ø agitator shaft mm	Length mm	Material No.	PK	Cat. No.

Customised shaft length possible. Fine polishing Ra 0.6 to 0.8 µm and/or material certificate available on request.

Impellers VISCO JET®

The worldwide patented VISCO JET® Mixing System is the result of the so-called cone-principle. Turbulent flows are created at the taper end by acceleration, displacement and retardation. These flows advance through the stirred medium and result in the new dynamic mixing motion.

Heidolph

9.816 595

- One system for literally all mixing tasks for low to high viscosity media
- Patented cone-principle creates even at low speeds a turbulent flow which is unique to the VISCO JET®
- Even with high-viscosity media and gels which naturally do not mix by using common impellers you will observe an immediate flow through the entire beaker
- This technology allows for de-gassing of gels while preventing air intake and foaming
- Reduce process times significantly while performing the best mixing result ever

The stirring systems are made of stainless steel (V4A or AISI 316 Ti) or polyoxymethylene (POM).

Stirring rotors made of PTFE

The stirrer shafts consist of a PTFE-jacketed, stainless steel shaft and a stirrer paddle made of solid PTFE. The stainless steel core assures stability of the stirrer shaft and allows safe attachment of the stirrer chuck. Thanks to the thick PTFE coat and the paddle made of solid PTFE, the medium will only come into contact with PTFE. High chemical resistance makes it almost universally suitable. PTFE is extremely nonstick so that residues are repelled from shaft and paddle. The stirrer shafts are similar in size to (KPG) glass stirring rods and are therefore interchangeable easily.

Operating temperature: -200 °C to +250 °C

Additional sizes and accessories are available on request.

Information on the mixing effects of the different stirring geometries can be found in the descriptions of the stainless steel stirring rotors.

1

1 Propeller, 3 blades, PTFE

The blades are inclined at 45 °. Recommended for medium to high speed operations.

Mini Vortex Mixer VXMN series

Four Mini Vortex Mixer models for gentle to high-speed mixing are available. Analog model offers variable speed control, and digital model allows input of the exact speed and time to achieve reproducible results. Pulsing model features a unique pulse action that reduces heat generation, while providing more effective mixing and cell disruption. Fixed speed model offers one-touch, high-speed mixing.

OHAUS

VXMNFS: Fixed high speed mixing, TOUCH mode operation

VXMNAL: Auto/Off/On Rocker switch, Speed Knob: Variable 1 to 10 Dial Marks, continuous or TOUCH mode operation

VXMNDG: Auto/Standby/On Rocker Switch, LED Displays for Speed/Time, Up/Down Buttons for Set-Point Control, continuous or TOUCH mode operation

VXMNPS: Auto/Standby/On Rocker Switch, LED Displays for Speed/Time, Up/Down Buttons for Set-Point Control Pulse Button

Scope of supply:

VXMNFS/AL/DG: Vortexer incl. Cup head and 76 mm head with cover

VXMNPS: Vortexer incl. Cup head and 76 mm head with cover and stainless steel tube holder

Test Tube Shakers Reax top/control

Ideal for mixing samples in Eppendorf tubes, vials and similar vessels of different diameters at extremely high speed rates. The strong 5 mm vibration orbit yields the best results even with high viscosity media or solids out of solution and quickly gives a smooth and even dispersion. Short time and continuous mode.

Heidolph

Standard model Reax top:

- Features an analog dial speed control, no settings of specified rpm numbers

Precise model Reax control additionally with:

- Features analog dial speed control with accurate rpm numbers setting
- Electronic speed control provides constant rpm output even at very low speed and under changing loads
- Precise speed control with settings of specified rpm numbers

9.730 040

Scope of delivery: Test tube shaker incl. attachment diam. 20 mm. Optional attachment for vessels up to 50 mm available.

1

1 Test tube shaker, lab dancer

Inexpensive, compact test tube vortex shaker. Designed for mixing small test samples by touch function.

IKA

- Small, compact and reliable
- For small containers up to 30mm in diameter, e.g. test tubes, centrifuge tubes, Eppendorf tubes
- Fixed speed (2800rpm)
- Excellent mixing
- Top of housing and the test tube accessories are made from chemically inert plastic. The bottom section is a coated, zinc die-casting.
- Includes lightweight 12V mains adapter

Specifications

Mixing:	orbital
Orbit:	4.5mm
Capacity, volume:	1 tube, max. 50ml
Motor rating input/output:	1.2/0.8W
Speed:	2800rpm (fixed)
Dimensions (Diam. x H):	100 x 70mm
Weight:	550g
Material housing:	PP
Material attachment:	TPU
Material base:	Zinc, coated
Enclosure according to DIN EN 60529:	IP40
Supply requirements:	100-240V 50/60 Hz
Tested to DIN EN IEC 61010-1.

2

2 Shaker Vortex 3

Vortex shaker suitable for intermittent operation (touch function), activated by pressing shaker attachment, or for continuous operation.

IKA

- Wide speed range, infinitely adjustable
- Versatile, due to 3 accessory interchangeable attachments and 7 inserts (e.g. Eppendorf tubes, microtitre plates, 250ml Erlenmeyer flasks etc.), please order separately
- Attachments securely click onto shaker in any position
- Strap clamp (VG3.36) ensures easy holding of round/Erlenmeyer flasks
- Sturdy, die cast zinc casing
- Stable at high speeds due to special feet (silicone base with ultra-high vibration damping)
- Eccentric drive with ball bearings
- Self-ventilated motor allows continuous operation with minimal warm-up of the housing

Supplied with standard attachment.

Specifications

Vortex-Genie®-series

Robust and reliable shakers for speedy mixing and shaking of samples. Multiple accessories: e.g. adapter tops for test tubes, beakers, centrifuge tubes etc. Adapter tops can be changed easily with the snap fit system.

Scientific Industries

Vortex-Genie® 2: Variable speed for precise mixing from gentle to vigorous. Broad range of attachments for most tubes, plates and other containers. Hands-Free or Touch On control.

Vortex-Genie® 2T with an integrated timer: Timer function: (Touch On) 1-60 seconds, (Hands-Free) 1-60 minutes or continuous. Unit automatically stops at the end of user programmed time.

Digital Vortex-Genie® 2 with digital control and display of speed and time: Digital display provides accuracy, reproducibility and repeatability. Timer function: (Touch On) 1-99 seconds, (Hands-Free) 1-99 minutes or continuous. Specially configured unit for Applied Biosystems protocol available.

Vortex Genie® Pulse: Fully programmable vortex mixer with ON/OFF feature. Pulse 0.1 sec to 99 min.

Scope of supply: Vortexer, 3-inch Platform with rubber cover, Pop-off cup

4. Stirring, Shaking, Mixing

Shakers and mixers/Vortexer

GENERAL CATALOGUE EDITION 21

9.729 938

Shaker MS3 basic/digital

Compact, universal small shaker suitable for shaking tasks with all small vessels and microtitre plates.

- Continuous or touch operation (with standard attachment)
- Two operating modes available:

Mode A (safe mode with attachment detection)

the maximum speed of 3000rpm is only attained with the standard attachment in touch mode. When using other attachments the speed is limited to 1300rpm.

Mode B (without attachment detection)

a speed of 3000rpm is possible with all attachments.

- Stable in all speed ranges

- Sturdy, zinc, die-cast casing

MS 3 digital additionally with countdown function timer (1sec to 999min).

Items supplied with MS3 basic + digital: Standard attachment, universal attachment, one-hand insert

Additional items supplied with MS3 digital: Microtitre plate attachment, test tube insert with 6 holes for 12mm diameter tubes

2 Mini shaker Matrix Orbital

Powerful thermoshaker available for samples with small volumes, e.g. blood samples, pharmaceutical agents, DNA/RNA samples, DNA/RNA samples or Elisa assays. Without cross-contamination and with an optimal mixing result.

- Large and clear display with a simple menu structure allows for intuitive operation
- Two different speed modes for optimal mixing
- Speed adjustment according to insert, attachment and filling volume
- Robust aluminum die cast housing

Scope of supply: Shaker, 3 inserts (1 x 0.5 ml tubes, 1 x 1.5/2.0 ml tubes and 1 x 0.2 ml PCR tubes)

Specifications

Type of movement:	orbital
Orbit:	3 mm
Speed range:	300 ... 3000 rpm
Power consumption:	80 W
Max. permitted shaking weight (incl. attachment):	0.3 kg
Timer:	1 s ... 6000 min

2 Test tube shakers Multi Reax

Heidolph

2

Versatile Test tube shaker with 3 mm vibration orbit, accomplishes excellent results especially in large vessels. The Multi Reax allows for rigid to smooth dispersion of viscous media and solids.

- Short term and continuous run
- Stepless speed adjustment
- Digital display
- Timer function allows for unattended operation and can be set from 1 to 999 minutes. With acoustic alarm when the operation stops.

Scope of delivery: Test tube shaker incl. 2 attachments.

- Attachment for 26 vessels with diameters from 10 mm to 16 mm
- Attachment for 12 vessels with diameters from 16 mm to 32 mm

Specifications

Type of movement:	orbital
Orbit:	3 mm
Speed range:	150 ... 2000 rpm
Power consumption:	50 W
Permissible ambient temperature:	5 ... 31 °C

Type	PK	Cat. No.
Multi Reax	1	9.839 810

Vortex Mixers for multi tubes

Multi-Tube Vortexers are ideal for high throughput sample processing.

Holds up to 50 samples simultaneously. Interchangeable foam racks for vortexing tubes from 10 to 29 mm in diameter available. Vortexing action is created by securing the top of the sample in place while allowing the bottom to rotate freely in a 3.6 mm orbit. Suction cup feet reduce motion and prevent sliding on work surface. Analog and digital models, both microprocessor-controlled and run in continuous or timed mode.

- Digital Model is ideal for Applications that Require Accuracy and Repeatability
- Pulsing Mode on Digital Model to Enhance Vortexing Action
- Analogue Model Offers an Economical Alternative When Exact Speed/Time is not required

Scope of supply: Vortex Mixer incl. Tray Pad Set for support and one 12 mm Test Tube Foam Rack.

1 Shaker MixMate®

NEW

The 3-in-1 mixer for plates, tubes and vortex mixing. High speed instrument for the complete resuspending of pellets, mixing PCR setups, mixing viscous liquids and suspensions (incl. beads), mixing restriction digestions, immunoassays, colorimetric assays, reporter gene assays, vortexing numerous tube formats (e.g. 15 and 50 ml conical tubes). Fully mixing in plates (96 or 384-wells) or reaction tubes in seconds.

- High-speed mixer for fast and efficient mixing of small volumes in all common vessel formats up to 50 ml
- 5 soft keys with pre-defined standard mixing parameters for easy usage
- Integrated vortex function for individual sample mixing
- 2DMix-Control (planar mixing orbit) and anti-spill technology for controlled mixing in seconds, without lid wetting and cross-contamination
- Minimal hand/arm vibration transfer during vortexing (PhysioCare Concept®)
- Very stable, remains stationary even at maximum mixing speed
- Whisper quiet operation

Specifications

Type of movement:	orbital
Orbit:	3 mm
Speed range:	300 ... 3000 rpm
Touch vortex frequency	3500 rpm
Timer:	15 s ... 99.5 h, continuous
Noise level	<50 dB(A)

Shaker Multi Vortex Genie®/Vortex-Genie® Max

Robust and reliable shaking device for mixing and shaking of samples in Erlenmeyer flasks, vials, tubes, beakers or microplates.

Scientific Industries

- Digital display for speed and time
- Speed increase in steps of 10 rpm
- Robust metal case
- Secure stand at high speed thanks to supports with high vibration damping
- Can be loaded with e. g. max. 6 Erlenmeyer flasks 250 ml or 2 multi racks each for 12 test tubes (max. tube diameter 29 mm, length min. 85 mm)

Vortex-Genie® Max additionally:

- Unique ratcheting clamping system, ideal for repetitive protocols and use with open containers
- Fully programmable
- Revers and interval mixing
- Pulse function

3

Scope of supply:

Multi Vortex-Genie®: Shaker, Platform with clamp/tension roller (for securely attaching standing vessels), 2 multi-racks

Vortex-Genie® Max: Shaker, Platform with 2 ratcheting clamps

Orbital shakers SHLD series

These light Duty Shakers are designed for applications with loads up to 3.6 kg. Choose from two orbits and speed ranges to optimize your sample mix.

OHAUS

Microprocessor-controlled and available as an analog model with basic speed control, 3 digital models which include a non-slip mat. The mat can be removed to mount flask clamps and tube racks directly onto the tray. The digital Microplate Shaker model can hold up to 4 microplates or 2 microtube racks.

- Microprocessor Control
- Triple Eccentric Drive
- Speed Ramping Feature
- Spill-Resistant Design
- Suitable for CO₂ environments

Digital models additionally with:

- Overload protection
- LED display for speed and time
- Audible Alarm

Scope of supply:

0415AL/0415DG/0403DG: Shaker incl. built-in tray and non-slip rubber mat

Shakers and mixers/Orbital shakers

GENERAL CATALOGUE EDITION 21

1 Orbital shaker RS-OS series

A compact, orbital shaker with ideal swivel motion. The shakers can be set up individually by using the comprehensive range of accessories.

Phoenix Instrument

Features at a glance RS-OS 10/20:

- compact shaker for a maximum shaking weight of 2.5 and 7.5 kg
- Backlight LCD display for speed and timer adjustment.
- Speed, time and operating mode can be viewed simultaneously
- Comprehensive accessories
- Adjustable safety speed
- PC control via RS232 interface, the special Shaker PC software can realise the setting of instrument parameters on the PC and the display of working curves real-time.
- 2 years warranty

Please order attachments and further accessories separately.

1 | 2 Digital Orbital Shaker

- Electronically controlled and programmable shakers
- Slow, soft-start greatly decreases the risk of spills
- Erlenmeyer flasks, beakers, culture flasks and micro plates can easily be fixed using 8 rubber strips
- Digital LCD display for speed and run time control
- Integrated overload shutdown
- Permanent motor feedback, which automatically adjusts the speed even if the load is changed during operation
- Continuous mode or timer for up to 49 hours
- Soft rubber feet minimise system movement
- Platform with non-slip surface

Platform capacity:

Erlenmeyer Flasks e.g.: 25 x 50 ml, 16 x 125 ml, 9 x 250 ml, 4 x 500 ml, 4 x 1000 ml, 1 x 2000 ml

Beakers e.g.: 36 x 50 ml, 25 x 100 ml, 16 x 250 ml, 9 x 400 ml, 4 x 1000 ml

Deep well assay plates e.g.: 6 x standard (more if stacking is an option)

Heathrow Scientific

1

Supplied with: Orbital Shaker incl. universal attachment, universal power supply, non-slip rubber mat and 8 elastic ties

2

Specifications

Type of movement:	orbital
Orbit:	19.0 mm
Speed range:	20 to 300rpm
Max. Load:	4.5kg
Timer range:	1min to 49 hours or continuous
Speed display:	digital
Ambient conditions:	4 to 40°C; 20% to 40% RH, non-condensing
Platform interior dimensions:	279 x 279mm
Overall dimensions (W x D x H):	314 x 310 x 197 mm
Weight:	8.2kg
Power supply:	100 to 240 V, 50/60 Hz
Warranty:	5 years

3 Orbital shaker SSM1

- Smooth orbital shaking action
- Built-in digital timer
- Variable speed control 30 to 300rpm
- Supplied with non-slip mat for microplates etc.
- Optional accessory cradle system for flasks and bottles

The compact SSM1 provides a smooth uniform circular motion with an orbit of 16mm. It is supplied with a non-slip mat that can hold up to four microplates or diagnostic cards. Alternatively, an accessory cradle system is available that can accommodate a variety of vessels including flasks, bottles or beakers via four rubber securing bars. It will hold up to: 4 x 250ml or 2 x 500ml or 1 x 1000ml Erlenmeyer Flasks or bottles.

Speed is variable from 30rpm to 300rpm. Once set on the digital display, the shaking speed is effectively maintained even over long periods of time. Shaking times can be set to run for 1 second to 9 hours on the built-in digital timer, or the unit can also be set for continuous operation.

With BioCote, silver-based, antimicrobial protection.

Shakers and mixers/Orbital shakers

GENERAL CATALOGUE EDITION 21

1

1 Orbital Shaker PSU-20i

Powerful and efficient microprocessor controlled, multi-functional orbital shaker **providing all that is required to mix your samples: rotation, reciprocation and vibration.** This enables optimisation of the mixing whether in flasks, beakers, Petri dishes or other laboratory vessels.

- Orbital motion, orbital reciprocation and vibration functions all in one product
- Reciprocal rotation: 0 to 360° turning angle, in 30 degree steps
- Vibration: 0 to 5° turning angle, 1 degree steps
- Loading capacity: 8 kg
- Fully programmable sequence that can use one or all the functions
- 6 interchangeable platforms for vessels up to 1000ml including a multi-level platform to hold a large number of various microplates, Petri dishes and culture bags.

Grant

Scope of supply: Orbital Shaker PSU-20i, external power adapter, manual and certificate.

Optional Platform attachments please order separately.

Platform shaker Mini-300 Orbital-Genie®

NEW

Compact and powerful high-speed benchtop shakers with a choice of 3 models for various applications.

Scientific Industries

- Model with ratcheting clamps provides the flexibility for using a mix of different size and shape vessels on one single platform
- Model with flask clamps for accommodating various flask or beaker sizes
- Model with adhering mat is perfectly suitable for open containers
- Suitable for use in cold rooms and incubators (Not for CO₂ incubators)

4. Stirring, Shaking, Mixing Shakers and mixers/Orbital shakers

Orbital shaker SHHD series

With load capacities from 16 to 68 kg and over 70 accessory options, the Heavy Duty Shakers are designed to handle a range of applications. Available as analog or digital models with microprocessor control to provide variable speed and consistent shaking, while ramping to the set speed. Microprocessor displays the last set-point and will restart if power is interrupted. Built-in tray and non-slip rubber mat included with all models.

- Microprocessor Control
- Triple Eccentric Drive
- Speed Ramping Feature
- Spill-Resistant Design
- Suitable for CO₂ environments

Digital models additionally with:

- Patented Accu-Drive Shaking System
- Touchpad Control with Independent LED Displays for speed and time
- Speed Calibration Mode
- RS232 Interface
- Load Sensor and Overload Protection
- Audible Alarm

Scope of supply: Shaker incl. built-in tray and non-slip rubber mat

1 Orbital shakers SSL1

- digital speed selection up to 300rpm with soft start
- built-in digital timer
- reliable, quiet running mechanism
- fully adjustable cradle system

Stuart

This lab scale platform shaker has powerful yet quiet shaking mechanisms and has been designed for trouble-free, continuous use. The cradle type platforms have four rubber cushioned horizontal securing bars which can be easily adjusted both vertically and horizontally to hold most sizes and types of vessel, including flasks, bottles and beakers. For example, they will accommodate the following Erlenmeyer flasks or bottles: 12 x 250ml or 9 x 500ml or 6 x 1000ml or 2 x 2000ml. Speed is continuously adjustable and is set digitally. The speed is accurately maintained, even over long runs. A built-in digital timer allows shaking times from 1 to 999 minutes to be set. Alternatively the unit can be set for continuous operation.

With BioCote silver based antimicrobial protection.

Orbital shaker, KS 260 basic/Package/KS 260 control/Package

Compact, low-level, platform shaker with highly effective, orbital motion, maximum capacity 7.5 kg. Large selection of attachments enable use with a wide variety of vessel shapes and sizes. Electronic speed control and timer adjustment.

IKA

9.838 074

Only Orbital shaker KS 260 control / Package:

- Separate digital speed and timer displays with operating mode indication
- Timer: 0 to 9 h 59 min or continuous operation
- Controlled stop-point positioning function (enables use in automated robotic sampling routines)
- All functions can be controlled and documented using labworldsoft® software
- Interface: RS 232/analogue
- Special variant with reverse rotation function available on request

Attachments are not included - Please order separately.

1

1 Orbital shaker SHEX1619DG

Ideal for applications that require CO₂ and humidity for optimal cell growth, the Extreme Environment Shaker is designed for use in extreme environments such as CO₂ incubators. A remote controller allows for external control of settings without disturbing the incubator atmosphere, and the shaker base is placed inside of the incubator.

OHAUS

- Designed for use in CO₂ Incubators
- Can withstand extreme environments up to 100 % humidity
- Remote controller magnetically attaches to most incubators
- Patented Accu-Drive Shaking System
- Microprocessor Control
- Triple Eccentric Drive
- Speed Ramping Feature
- Spill-Resistant Design
- Touchpad Control with Independent LED Displays for Speed/Time
- Speed Calibration Mode
- RS232 Interface
- Overload Protection
- Audible Alarm

Scope of supply: Shaker incl. built-in tray and non-slip rubber mat

Specifications

9.838 046

AS 501.1 Universal attachment

For a variety of vessels (flasks, beakers etc.) with volumes of at least 50 ml (ideally greater than 250 ml). With tension rollers that can be mounted on 2 levels.

Usable area: 420 mm x 420 mm.

Dimensions (W x D x H) 480 mm x 500 mm x 120 mm. Weight: 4000 g.

AS 501.4 Gridded clip attachment

(Without spring clips). For shaking round bottom, flat-bottom, pear-shaped, volumetric and erlenmeyer flasks etc.

Minimum volume 25 ml. Dimensions (W x D x H) 475 mm x 460 mm x 95 mm, weight 2640 g.

Capacity: Number of fixing clips (volume held) 110 x AS 2.1 (25ml), 55 x AS 2.2 (50 ml), 35 x AS 2.3 (100 ml), 16 x AS 2.4 (250 ml), 12 x AS 2.5 (500 ml), 8 x AS 2.6 (1000 ml)

2

9.838 050

AS 501.5 Dish attachment

For the gentle movement of petri dishes, but also suitable for gentle mixing in vessels with large, flat bottoms (wide mouth erlenmeyers, beakers). Fitted with a non-slip, plastic mat.

Dimensions (W x D x H) 450 mm x 450 mm x 45 mm.

Usable area: 420 mm x 420 mm, weight 1120 g

Further accessories on request.

Orbital shakers Solaris™ 2000 and 4000

Robust, high-capacity orbital shakers for advanced research, production and routine tasks. Can be used in incubators, climatic cabinets and refrigerators. With variable speed adjustment from 15 to 525 min⁻¹.

Thermo Scientific

- For timer and continuous operation
- 99 individual programs can be stored
- Gentle starting and stopping of the device
- Automatic Imbalance detection with optical/acoustic alarm: the device stops until the incorrect loading has been corrected
- Automatic restart after disconnection of the power supply while maintaining all parameters
- Large, easy-to-read touchscreen display with speed and run time indication
- With maintenance-free, brushless motor
- Logging of warnings, alarms and operating steps
- USB and Ethernet connection for data output and device monitoring
- Low noise level
- Easily removable platforms and rounded corners for rapid cleaning

Scope of supply: shaker, mains cable, universal platform, platform screws and screw locking lacquer

4. Stirring, Shaking, Mixing

Shakers and mixers/Reciprocating shakers

1 Combi shaker KL 2

Mini shaker which can be switched between orbital and reciprocating motions. Includes flask attachment system with 3 clamping rollers. Versatile, for use in medical diagnostics, haematology, for cell cultivation or analysis. Max. load 4 x 500 ml or 2 x 1000 ml Erlenmeyer flasks.

Bühler

Scope of supply: Shaker and accessory platform with 3 clamping rollers and anti-slip mat.

Speed range:	30 ... 420 rpm with stepless electronic adjustment
Orbit or stroke:	8 mm
Max. loading:	2 kg
Platform (W x D):	300 x 300 mm
Timer:	0 ... 120 min/continuous
Overall (W x D x H):	355 x 455 x 195 mm
Weight:	13.5 kg
Supply requirements:	230 V, 50/60 Hz
Protection class:	IP 21

Type	PK	Cat. No.
KL 2	1	9.838 320

2 Flask shaker SF1

Creates a vigorous reciprocal shaking action. With clamps to accept 8 flasks up to 500ml capacity. With stepless variable speed control from 80 to 800 oscillations/min. and 10 to 60 minute timer with off and continuous run settings. Electronic feedback control ensures a constant speed irrespective of the load. For 230V 50Hz single phase supplies. With BioCote, silver-based, antimicrobial protection.

Stuart

Scope of delivery: Flask shaker incl. 2 arms, 8 clamps and allen key..

Please order extension kit for shaking of 12 bottles or flasks separately.

Specifications

Type of movement:	reciprocal
Orbit:	1.5 mm
Speed range:	8 ... 800 rpm
Max. Load:	3 kg
Timer:	10 ... 60 min/continuous
Power consumption:	50 W
Permissible ambient temperature:	5 ... 40 °C
Dimensions (W x D x H):	780 x 270 x 240 mm
Weight:	8.3 kg
Power supply:	230 V, 50 Hz

Type	PK	Cat. No.
SF1	1	9.950 372

3 Reciprocating shaker HS 501 digital

Low-profile laboratory shaker with large platform and 15kg load capacity. With continuously adjustable speed range: 0 to 300rpm, digital display and timer. Continuous operation is guaranteed even under extreme loads. Requires accessory attachments for operation (these are not supplied). Ideally suited for flasks, measuring cylinders and particularly separating funnels. Developed for universal applications.

IKA

Specifications

Type of movement:	reciprocal
Shaking diameter:	30 mm
Max. Load (with attachment):	15 kg
Motor rating input/output:	70/19 W
Speed range:	0 to 300rpm
Timer:	0 to 56 mins./continuous
Dimensions (W x D x H):	505 x 585 x 120 mm
Weight (without attachment):	26 kg
Protection class acc. to DIN EN 60529:	IP 21
Supply requirements:	230 V, 50/60 Hz
Tested to DIN EN IEC 61010-1.	

Type	PK	Cat. No.
HS 501 digital	1	6.270 850

9.838 305

Compact shakers, KS 15 series / KS 15 control

Robust shakers for medium loads. Cost-effective. Suitable for continuous operation.
From gentle orbital movement for cell or tissue cultures to powerful reciprocating movement of shallow vessels or separating funnels in food or environmental analysis. Programmable controller with Touch-Display and advanced features for control devices.

Bühlér

Comprises: shaker without platform. Requires, but is not supplied with, platform attachments for operation.

Accessories:

- Attachment Combifix KS with 3 clamping strips and rubber mat
- Universal tray KS with holes for spring clips

Shaking speed:

30 ... 420 rpm
continuously electronically adjustable, control devices in steps of 5

Orbit/travel:

4. Stirring, Shaking, Mixing

Shakers and mixers/Reciprocating shakers

Accessories for shakers HS/KS 260

AS 260.1 Universal attachment

Able to hold most types of container using adjustable tension rollers. Surface: 320 x 320mm

AS 260.2 Fixing clip platform

For shaking round bottom vessels, volumetric and Erlenmeyer flasks. Supplied without clips.

Max. number of clips (capacity held): 56 x AS 2.1 (25ml), 23 x AS 2.2 (50ml), 23 x AS 2.3 (100ml), 11 x AS 2.4 (250ml), 9 x AS 2.5 (500ml), 5 x AS 2.6 (1000ml)

AS 260.3 Petri dish attachment

For gentle mixing and suspension of cell cultures or growth media in petri dishes, culture bottles and containers. With integral anti-slide mat (PP).

AS 260.5 Separating funnel attachment

For HS 260 basic and control

For shaking, elution, extraction, gassing out, dissolving, enriching. The 3 tension rollers supplied are height-adjustable to accommodate different separating funnel sizes. The separating funnels are secured by means of O-rings (6 O-rings supplied).

Capacity: Number of funnels (pear shaped) x volume 6 x 50ml, 5 x 100ml, 3 x 250ml, 3 x 500ml

Rocking shaker 35 EZ

The Rocker 35 EZ is the next generation large capacity rocker from Labnet.

Labnet

This upgraded Rocker 35 is designed for durability in laboratories requiring a larger platform area and precise control over rocking parameters. It is backed by a 5 year warranty. Both speed and time are easily selectable and the analog control has been upgraded to display discreet values. The tilt is now easily adjustable with knob on side. This system can easily handle up to 5 kg of load so a double platform can be fully loaded without any variation to speed. This unit comes in both single and dual platform models and includes a ribbed non-slip rubber mat to keep containers in place.

1 Rocking Shaker, Mini, SSM4

This compact rocker is ideal where gentle mixing is required. It has a see-saw rocking action that creates a wave motion within vessels such as culture flasks, Petri dishes etc.

Stuart

- Small space saving design, ideal for personal use
- Gentle rocking action
- Digital speed control and built-in timer
- Optional tier system available to increase capacity
- supplied with a non-slip mat
- digital selection of both speed and time

An accessory tier system is available. Fitted in seconds, without the need for tools, it triples the available space for samples. With BioCote, silver-based, antimicrobial protection.

Specifications

Type of movement:	rocking
Rocking angle:	7°
Angle adjustable:	No
Speed range:	5 to 70rpm
Max. Load:	3kg
Platform dimensions (W x D):	235 x 235mm

2

2 Rocking shaker SSL4, large platform

Stuart

- Large platform rockers - ideal for multiple users
- Gentle rocking action
- Digital speed control and built-in timer
- Optional tier system available to increase capacity
- Incl. non-slip mat

This rocker has large platform able to accommodate a number of samples, ideal for a busy lab. It is very quiet in operation and designed to be run continuously.

The see-saw rocking action creates a wave motion within vessels such as culture flasks, petri dishes etc.

An accessory tier system is available. Fitted in seconds, without the need for tools, it triples the available space for samples. With BioCote, silver-based, antimicrobial protection.

2 Rocking shakers Duomax 1030

The Rocking shakers Duomax are suitable for the modular Incubator 1000 and are recommended for applications which require variable temperatures. With 2-dimensional tilting movement, suitable for petri dishes, culture bottles, erlenmeyer flasks and all standard vessels.
- 2 models available: Tilt angle to 5° for soft and gentle movements or tilt angle to 10° for a much stronger motion
- An overtemperature sensor preventatively shuts off the unit in a dangerous heat-up situation, particularly valuable for you in case of continuous operation
- Insulated drive system prevents any heat-up coming from the motor and consequently thermal damage to your sample
- Designed with a low center of gravity which prevents gliding at high speed, even on a damp surface
- Set and continuously adjust the variable speed on the analog control knob, suitable for all standard vessels
- An analog process timer allows for unattended operation. When the set time has elapsed, an acoustic alarm will sound and the operation stops

Orbital Platform S haker Belly Button®

IBI Scientific

This shaker is designed with available space in mind. The easily adjustable speed and platform pitch angle controls provide a wide range of agitation conditions, from extremely gentle to vigorous. The Belly Button® shaker is an exceptionally simple liquid agitation system consisting of an orbiting platform flexibly anchored at four corners so that the platform motion, when adjusted by the platform pitch control collar, is an extremely effective combination of rocking platform and orbital shaker.

- Compact version with low space requirement
- Ideal for cell and tissue culture applications, gel or blot processing
- Suitable for cold store and incubator
- Made of chemically resistant materials such as stainless steel and anodised aluminium
- Solid, robust and long-lasting design

BBUAAUV1S: With round 220 V power cord, white silicone mat and operation manual.

BBULS0001: With tube mat and round 220 V European power cord.

Tumbling Shakers SHWV series

The Tumbling Shakers are ideal for cell culture and blotting applications and are designed to be used in a variety of environmental conditions.

- Variable control (analogue model) or display (digital model) for speed, tilt and time
- Low Profile Design
- Microprocessor Control
- Independent Control Knobs (analogue)
- Overload Protection
- Speed Ramping Feature
- Spill-Resistant Design
- Clock timer
- Suitable for CO₂ environments

3 Tumbling shaker SSL3, large platform

- Large platform rocker - ideal for multiple users
- Gentle rocking action
- Digital speed control and built-in timer
- Optional tier system available to increase capacity
- incl. non-slip mat

Stuart

This rocker has a large platform able to accommodate a number of samples, ideal for a busy lab. Designed to be run continuously, they are very quiet in operation. The tumbling gyratory motion is ideal for low foaming agitation, DNA extractions, staining and de-staining procedures etc. The tilt angle can be adjusted to any position by hand to optimise mixing of vessels.

An accessory tier system is available. Fitted in seconds, without the need for tools, it triples the available space for samples.

With BioCote, silver-based, antimicrobial protection.

Specifications

Tumbling Shakers Polymax 1040/2040

The Tumbling Shakers Polymax are suitable for the Modular Incubator 1000 and are recommended for applications which require variable temperatures. With 3-dimensional tilting movement, suitable for Petri dishes, culture bottles, Erlenmeyer flasks and all standard vessels.

- An overtemperature sensor preventatively shuts off the unit in a dangerous heat-up situation, particularly valuable for you in case of continuous operation
- Designed with a low center of gravity which prevents gliding at high speed, even on a damp surface
- Set and continuously adjust the variable speed on the analog control knob, suitable for all standard vessels
- An analog process timer allows for unattended operation.

2 Orbital platform shaker Belly Dancer®

The undulating, three-dimensional motion of this lab shaker has been designed to provide optimal movement for tissue culture, staining and destaining gels, Northern, Southern or Western blotting and immunoprecipitation. The simple liquid agitation system, consisting of an orbiting platform, which is flexibly anchored at four corners, so that the platform movement, with an appropriately set inclination, is an effective combination of orbital and tumble shaker.

IBI Scientific

- Ideal for gel or blot processing

Thermo shaker LLG-uniTHERMIX 1 pro and 2 pro

The LLG-uniTHERMIX pro is ideal for shaking and temperature control of a variety of tubes or plates (depending on the block used). With its high temperature uniformity, fast heating rate and excellent mixing results the LLG-uniTHERMIX pro is perfect for the incubation of samples of any kind, in particular for Life Science applications, e.g. Enzyme reactions, transformations, denaturation of DNA and RNA. The heating blocks are magnetically attached to the LLG-uniTHERMIX pro and do not have to be screwed down.

- Easy and quick change of heating blocks due to magnetic fastening
- Precise temperature control system
- Temperatures up to 100 °C
- Temperature accuracy of ±0.5 °C (20 ... 45 °C)
- Efficient mixing up to 1500 rpm (depending on the heating block)
- Up to 9 storable programs
- Many block options available
- Automatic block recognition

LLG-uniTHERMIX 1 pro:

with shaking and heating function, Temperature range: RT + 5 °C ... approx. 100 °C

LLG-uniTHERMIX 2 pro:

with shaking, cooling and heating function, Temperature range: 15 °C below RT ... approx. 100 °C

Blocks must be ordered separately.

Scope of supply: thermal shaker, 4 suction feet

Shakers and mixers/Thermoshakers

GENERAL CATALOGUE EDITION 21

1

1 Thermoshaker PCMT for microtubes and PCR plates

Variable speed, variable temperature heating and cooling thermoshaker with a choice of blocks for microtubes and microplates. The PCMT can cool down to 15°C below ambient temperature.

Grant

- Fast heat-up and cooling times
- Temperature setting range +4°C to +100°C
- Temperature control range 15°C below ambient to +100°C
- Shaking speed: 250 to 1400 rpm
- Temperature uniformity at 37°C: ±0.1°C
- Choice of 5 interchangeable blocks
- orbit 2mm

Block is required and not included in delivery. Please order separately.

Applications:

- Genetic analyses, extraction of DNA, RNA and further sample preparation
- Biochemical studies of enzymatic reactions and processes
- Extraction of metabolites from cellular material

3 Thermo shaker AccuTherm

Labnet

The AccuTherm is a temperature controlled mixer that uses peltier technology to rapidly heat and cool precious samples. The combination of heating/cooling with mixing makes the AccuTherm ideal for many life science research applications in the fields of molecular biology, biochemistry and clinical chemistry. It's compact footprint incorporates an intuitive control panel with a large multicolor display, which allows users to easily program and view temperature, time and speed settings. Eight interchangeable aluminum blocks accommodate PCR plates and tubes ranging in size from 0.2ml to 15ml.

Microtube thermoshaker PHMT

By combining the mixing operation with the incubation phase, reaction process times and operator workload are reduced and efficiency of many procedures is increased, resulting in a higher throughput.

- temperature range: +5 to 100 °C
- uniformity at 37 °C: ±0.1°C
- shaking speed: 250rpm to 1400 rpm
- timed shaking operation: 1 min to 96 hours
- rapid heat-up
- continuous or timed operation, with alarm buzzer and automatic switch-off facility
- incl. interchangeable block
- mixing and incubation phases are combined reducing reaction processing times

Scope of supply: Thermoshaker with one block as indicated. Further blocks on request.

Thermal Shaker ISTHB

The Thermal Shakers and Cooling Thermal Shakers are designed for applications that require consistent and precise results. With heating, cooling and shaking capabilities. These shakers use interchangeable blocks to accommodate a wide variety of tubes and microplates. The easy-to-use, 4.3", colour, LCD touch screen allows the user to save and visibly track progress through the live status bar for five user defined programs, each with five individual steps. The unit's enhanced electronics and dual temperature sensors provide accurate, dependable temperature settings across the operating range.

- 4.3" colour LCD touch screen display provides an intuitive interface
- Rapid heating, cooling and high speed shaking ability
- Internal memory stores five separate 5-step programs, unlimited with USB
- Temperature ramp rate, 0.5 °C steps
- Single Point Calibration Mode
- Pulse Mode Feature
- Maximum Temperature Limiting Function
- Hot Top Indicator
- Audible Alarm

Scope of supply: Thermal Shaker incl. 1.5 ml block, clear rack and cover

1 Eppendorf ThermoMixer C

The Eppendorf ThermoMixer C combines unique mixing performance with excellent temperature control to consistently guarantee complete, dependable and reproducible test results. Improve your assay results by mixing and incubating samples at the same time.

Eppendorf AG

- Excellent mixing performance due to unique 2DMix-Control technology
- Prevent condensation and improve temperature homogeneity with the new ThermoTop
- Ergonomic design
- Eppendorf QuickRelease™ Technology for fast and simple block exchange of Eppendorf SmartBlocks™
- Highest flexibility thanks to broad choice of exchangeable SmartBlocks™
- Heating, mixing and cooling of all common tubes and microplates with a volume range of 5µl to 50ml

1

Now you can control the temperature of your samples with ease: The ThermoTop, with unique condensation protection technology, reliably prevents condensation formation on the tube lid and wall. It also improves temperature homogeneity. The Eppendorf ThermoTop does not have a cable connection. It is detected by the device as soon as it is positioned, via inductive signal transmission, and thermo-regulation starts automatically. The sample temperature is not affected: optimal sample protection with optimal reaction conditions produce optimal results.

2 Eppendorf ThermoMixer™ F0.5/F1.5/F2.0/FP

To simplify lab routines. Whether work with regularly 0.5, 1.5 or 2.0 ml reaction vessels or plates (MTP and DWP) - the customized systems from Eppendorf offer the perfect solution for special applications. The devices combine precise heating and mixing with the highest stability, even at maximum mixing frequency. Mixing and incubation steps can be performed independently.

1 Exchangeable blocks Eppendorf SmartBlocks™ and accessories for Eppendorf ThermoMixer™ C and ThermoStat C

Exchangeable blocks:

Eppendorf AG

Flexibility has never been this easy. Eppendorf offers a variety of SmartBlocks™ for tubes from 0.5ml to 50ml.

- Fast and simple block exchange due to Eppendorf Quick Release
- Optimized block design guarantees maximum temperature transfer to the sample

Transfer Racks:

- Autoclavable transport aid for tubes from 0.5 to 2.0 ml
- For transferring up to 24 tubes in/from the heating block at the same time
- Offers protection against burns when transferring hot samples

SmartExtender:

A heatable frame/attachment for mixer, with separate temperature control (3 °C above RT to 110 °C), for simultaneous operation at two different temperatures.

- Enables 2 incubations at the same time

1 Overhead mixer LLG-uniROTATOR 2

Analogue overhead mixer with vertical rotary motion for gentle but effective mixing. Ideal for biological samples. Suitable for cutting and mixing processes of powdered and liquid samples in tubes up to 50 ml. With easily interchangeable clamps that allow a quick cleaning of the mixer.

- Compact design
- Housing easy to clean
- Non-slip, adjustable screw feet

Scope of delivery: Overhead mixer incl. 12 clamps each for 2 ml, 15 ml and 50 ml tubes

Specifications

Type of movement:	overhead
Speed:	0 ... 80 min ⁻¹
Rotation angle:	360°
Permissible shaking weight (incl. attachment):	2 kg
Permissible relative moisture:	80 %
Permissible ambient temperature:	5 ... 40 °C
Motor rating input:	20 W
Dimensions (W x D x H):	530 x 150 x 190 mm
Power supply:	100 ... 240 V, 50/60 Hz

2 Vertical mini rotator PTR-25

Compact, economy solution with simple to use controls, providing thorough mixing of samples in tubes up to 50ml. Suitable for preventing blood coagulation in tubes and for fulfilment of procedures of extraction of biological components. For use in cold rooms and incubators.

Grant

- 360° vertical rotation
- Vertical rotation speed range: 5rpm to 30 rpm
- Timer: 1 min to 24 hours, with audible alarm and automatic switch-off
- Simple to use controls
- Platform accommodating 22 tubes (up to 16mm diameter) is included as standard

Type	Plug type	PK	Cat. No.
PTR-25 EU/UK		1	9.721 016

3 Vertical mini rotator RotoFlex™ Plus

This simple benchtop rotator is ideal for a number of laboratory applications including DNA purification, hybridization or sample mixing. It is digitally controlled and can also be set in an oscillating mode to increase mixing efficiency. This tube rotator accepts tubes from 0.5 to 50 ml. The rotisseries to hold each of the tubes are included in the set.

Argos Technologies

Features:

- 360° revolution, adjustable angle from 0 to 90°
- Speed: 10 to 40 rpm, adjustable
- For tubes of 0.5 to 50 ml, interchangeable tube racks
- Can be used in a cold room or incubator (4 °C to 60 °C)

Type	PK	Cat. No.
RotoFlex™ Plus	1	6.281 561

Overhead shaker Trayster basic/digital

Overhead shaker with vertical rotation for smooth but effective mixing with a fixed speed. Ideal for biological samples, particularly blood samples. Suitable for separating and mixing processes of powdered and liquid samples in Eppendorf tubes and Greiner tubes up to 50 ml. The easy removable attachments allow simple and quick cleaning of the unit of spilled samples.

IKA

- Different attachments allow a variety of applications
- Usable at 4 to 50°C in incubators
- Suitable for continuous operation
- Easy operation by foil keypad

Trayster digital only:

- Timer: Countdown, adjustable from 1s to 99h 59min
- Counter: Display of shaking time
- Error code display

Attachments are not included. Please order separately.

Tube Roller Mixer, SRT6, SRT6D, SRT9, SRT9D

3

There are four models available, two analogue models with either 6 or 9 rollers, with a fixed speed of 33 rpm. Or two more advanced digital models with either 6 or 9 rollers, with digitally controlled speed between 5 and 60 rpm and programmable timer.

Stuart

The rollers conveniently detach to accommodate larger vessels. Recommended for mixing blood samples, viscous substances and liquid-solid suspensions where minimum aeration is required. Units can be used in incubators up to 60 °C and humidity up to 80 %, or in cold rooms down to 4 °C.

- Rocking and rolling action for complete mixing
- 6 or 9 roller design with footprint
- With antimicrobial BioCote protection

3 Tube roller RM 2

Robust tube roller with gentle tilting and rolling movement. Small space requirement. Suitable for all common tube sizes, bottles and other cylindrical vessels with a diameter of up to 80 mm.

Bühler

- Gentle start-up for optimum development of cell cultures.
- Minimal heat emission, thus no influence on the ambient conditions
- Can be used at CO₂ concentrations up to 5%.
- Easy setting of speed and time via LED display
- Drip tray and plastic rollers can be removed for easy cleaning
- Overhead attachment available as accessory

2 | 3 Microtitre shaker LLG-uniPLATESHAKER 1

The LLG-uniPLATESHAKER 1 has been designed for accommodating and mixing a single micro plate. Due to its **small footprint** it can be used in working areas with limited space such as fume hoods and bio safety cabinets. It can also be used inside a cold-room.

- Digital display with speed and time settings
- **Variable speed** from 300 to 1800 min⁻¹
- Maintenance-free brushless DC motor
- Orbital Diameter of 2 mm for thorough mixing
- Timer setting from 1 to 99 min and continuous mode
- **Universal fit**; comes with interchangeable clamps for different micro plate sizes
- Comes with foam attachment for 20 x 1.5/2 ml microtubes

Scope of supply: shaker, mains adapter, 2 attachments (foam attachment and attachment for microtitre plates), 6 clamps

Microplate thermoshaker PHMP/PHMP-100/PHMP-4

For 96- and 384-well plates. The PHMP is a variable speed, variable temperature microplate shaker incubator with excellent temperature uniformity across the microplate.

Grant

The patented heated lid and base which completely cover the plate produce a controlled micro-environment. This is combined with powerful orbital shaking to produce the maximum yield from your incubations.

- Stability ± 0.1 °C, uniformity ± 0.25 °C, rapid heat-up
- For standard 96 or 384-well plates (max. 14mm height)
- Variable speed: 250 rpm to 1200 rpm
- 2mm shaking orbit for effective mixing
- Temperature setting range: +25 to 60°C, PHMP-100: +25 to 100°C

Sampling/Samplers, gas

1

1 Sampling bags, FEP

Made from 5 mil (125 µm) FEP fluoropolymer film, these flexible, sturdy bags are heat sealed on all four sides for complete chemical resistance and leak-proof operation.

Saint Gobain

They are inert to most chemicals and have low permeability which limits sample loss. Available with either a nickel-plated, brass on/off valve that accepts 6.4 mm I.D. flexible tubing or with PTFE/silicone septum in polypropylene housing for use with a hypodermic needle. These FEP bags are easy to use. They can be stored for an unlimited period prior to use. Applications include gas sample analysis, extracting air samples from smokestack exhaust systems, monitoring air quality or calibrating instruments in the field. The bags are individually packaged.

- Chemically resistant
- Flexible
- Will not contaminate sample

2

2 Sampling bags, PVDF

Reusable bags made of 2 mil (50 µm) PVDF fluoropolymer film, Chemware® Gas Bags offer an economical alternative for analysis of noncorrosive gases. Durable, heat-sealed

Saint Gobain

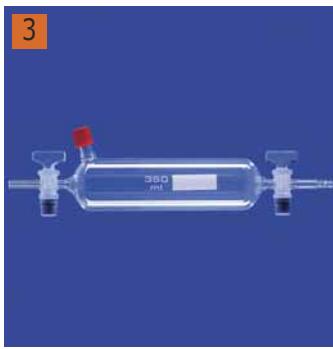

seams ensure leak-proof operation. Available with either a nickel-plated, brass on/off valve that accepts 6.4 mm I.D. flexible tubing or with a PTFE/silicone septum in a polypropylene housing for use with a hypodermic needle.

Applications include sampling carbon monoxide, sulfur dioxide, hydrogen sulfide, radon and mercaptan.

The bags are individually packaged. When used for liquid samples, bags should be supported with a tray. Custom sizes and configurations available on request.

- Flexible
- Will not contaminate sample
- Choice of fitting style: on/off or septum
- For use in gas sampling trains
- Use for gas or liquid sample containment

1 Core Sampler Quick Picker, Stainless steel V4A or PP

Bürkle

1

Suitable for removing bulk materials from sacks or large bags and depositing them directly into sample bottles. Simple to use and clean. Crevice-free to prevent sample residues causing cross-contamination which could affect subsequent sample results. Complete with cleaning brush and two 250 ml sample bottles.

Lock seal close-it and close-it food & pharma please order separately.

3 | 4 Sampler Silo Drill, aluminium or stainless steel V2A

Bürkle

If bulk goods are transported over long distances (e.g. in trucks, railway goods wagons), separation may occur. Taking the sample just from the surface therefore leads to the wrong result. Representative samples from all layers of the silo can be taken with the SiloDrill. The SiloDrill fits through all standard openings with its diameter of 90 mm.

- Of stainless steel AISI 304 (1.4301) or aluminium
- Standard length 150 cm, extendable in increments of 100 cm, max. 350 cm
- Scraper edge for cohesive substances
- Drill tip with drilling blades for easy boring

For wide neck bottles with screw cap see page 70.

5. Sample preparation

GENERAL CATALOGUE EDITION 21

Sampling/Samplers, Solids

1

1 2

Zone samplers, Multi/All-layer/Jumbo/Uno, steel V4A or aluminium

Bürkle

For sampling bulk goods of all types. Available in various different lengths and materials:

Multi-sampler: With several closed chambers for multi-point sampling from several predetermined sampling depths. Available in stainless steel V4A/PTFE, stainless steel V4A/V4A or aluminium. Tube diameter: 25 mm.

All-layer-sampler: with open inner tubes for cross-sectional sampling through all layers of the sample. Emptied via the open tube end of the sampler. Available in stainless steel V4A or aluminium. Tube diameter: 25 mm.

Jumbo-sampler: generally as the All-layer-sampler with open tube end. With a tube diameter of 50 mm, ideal for coarse grains and larger quantities. For multi point sampling the chambers can be separated by PTFE separators.

Uno-sampler: With a closed chamber, for target samples from a pre-determined sample depth.

2

Easy emptying with the emptying device.

Lock seal close-it and close-it food & pharma please order separately.

3

Emptying device, stainless steel

Bürkle

Emptying zone samplers were often a matter of patience and a steady hand.

Now it's easier and faster with Bürkle's emptying device. Just lay the zone sampler onto the stainless steel stand, adjust the funnels along the sample chambers, and, after turning the sampler, the media will directly flow into the containers below. Quality materials ensure that the emptying device is autoclavable.

Description	PK	Cat. No.
Emptying device	1	6.236 050

4

Zone sampler, accessory cleaning brush, PVC/stainless steel

For thoroughly cleaning of Zone samplers.

1 Sampler Tubes, V4A stainless steel, according to ISTA

Bürkle

Sampler for free flowing, bulk goods up to approx. 1cm diameter. This makes it possible, for example, to remove hazel nuts, blends of tea, grain or similar items from large sacks.

Operation: Insert Tubes into a sack to the desired sampling depth, while keeping the collection tube closed using your hand. When you take away your hand, the sample flows directly through the open tube into the container or sampling bag beneath it.

- choice of 2 lengths, 40 cm and 80 cm
- also for coarse-grained bulk goods
- AISI 316 stainless steel
- corresponds to ISTA standard for seed lengths of 10 mm and 5 mm

1

Lock seal close-it and close-it food & pharma please order separately.

2 Disposable spatulas for foodstuffs SteriPlast®, PS

Bürkle

Blue. As a result of the long, ergonomically-shaped, stable handle and a sharp blade, it is possible to even penetrate directly into containers such as paper or plastic sacks. The spatula for foodstuffs is ideal for sampling powders, granulates and pastes.

The shade of blue that is used does not occur in a natural form in foodstuffs. Because of this, the spatulas or parts of them can be quickly found and easily identified in a visual check if they are ever mixed into production. The detectable spatulas have a special additive in the material that makes them visible to metal detectors or X rays. They can therefore be rejected with standard systems for checking for foreign objects, even though they are made of plastic.

- Individually packed, gamma-sterilized
- Production, assembling and packaging acc. to Cleanroom class 7 (10000)
- According to EU food and FDA guideline

3 Anti-tamper seal-it, self-adhesive roll

If a container opening is closed with Seal-it, then the container cannot be opened without destroying the seal-it label. Seal-it is additionally provided with several cross-perforations which immediately tear when manipulated like a motorcar tax disc. Seal-it can be used to securely seal bottles, sample bags, sacks, specimen bags, envelopes, etc. The white labelling field on the seal-it can be written on with all conventional writing tools with, for example contents information, sampling date, name of operator, etc.

- Clear identification via numbers in sequence
- Integrated control label with the same number, for accompanying documents
- 500 consecutively numbered labels in each roll
- Format 178 mm long, 30 mm wide
- Tear-off perforation for each label

Type	PK	Cat. No.
Seal-it	500	7.622 477

Sampling/Samplers, Solids

GENERAL CATALOGUE EDITION 21

1

1 | 2 Control seals for sampling close-it

White/plain or coloured with labelling field. close-it has a sandwich-type structure (aluminium/ paper) and seals the container hermetically (vapour barrier).

Bürkle

The rear of the label is coated with a powerful adhesive. This means that close-it sticks firmly to most commercial containers, even to surfaces coated with fine powder, slightly moist or even frozen surfaces where conventional labels or adhesive tape will not stick.

close-it food & pharma ensures as well the necessary success when resealing sample openings, as it reliably prevents products from escaping after sampling. The adhesive complies with the European guidelines for foodstuffs and FDA guidelines. Just like the original, close-it food & pharma has a barrier layer of aluminium foil, which makes the close-it food & pharma perfectly suited to sampling foodstuffs, pharmaceuticals, cosmetics, food additives, even frozen goods - any applications in which the product must not be contaminated by contact with the adhesive.

Sampling/Samplers, Solids

GENERAL CATALOGUE EDITION 21

1 Disposable scoops for foodstuffs SteriPlast®, PS

Bürkle

Blue. The food scoop is ideal for powders, granulates and pastes. The shade of blue that is used does not occur in a natural form in foodstuffs. Because of this, the scoops or parts of them can be quickly found and easily identified in a visual check if they are ever mixed into production. The detectable scoops have a special additive in the material that makes them visible to metal detectors or X rays. They can therefore be rejected with standard systems for checking for foreign objects, even though they are made of plastic.

- Individually packed, gamma-sterilized
- Production, assembly and packaging according to clean room class 7 (10000)
- According to EU food and FDA guideline

1 | 2 Sampling Dippers DispoDipper LaboPlast®/SteriPlast®, PP, blue transparent

Bürkle

Scaled sampling tube manufactured in a clean room specially designed for disposable use. Due to the blue colour, it is also perfect for use in the food, animal feed and pharmaceutical industries. After sampling, the container can be closed and is leakproof. DispoDipper is completely manufactured in one piece and can be used for sampling and subsequent transport of the sample in one device. In this way, cross-contamination or sample impurities are almost impossible. For sampling, first remove the cover at the predetermined breaking point. Then take the sample with the sample container and close it securely. After sampling, the handle at the predetermined breaking point can be detached from the sample container. This allows for easy and space-saving transport of the sample.

- Individually packaged and optionally sterilised by gamma rays (SteriPlast®)
- Production and packaging according to clean room class 7
- Complies with EU food requirements and FDA regulations

Sampling/Samplers, Liquids

GENERAL CATALOGUE EDITION 21

Sample Taking System INGENIOUS

A new, easy-to-handle sample taking system for manual sampling.

Windaus-Labortechnik

General purpose thanks to

- quick and easy exchange of the sample taking equipment
- simple change by pressing the spring mechanism
- extremely strong fiber glass telescopic poles, non-corrosive
- for up to 20 different sample taking devices
- four different fiber glass telescopic poles extensible from 1.5 m up to 6.00 m in length

Please order telescopic poles separately.

1

1 Fiber glass telescopic pole INGENIOUS

Very robust telescopic pole, ideal for sample taking. Fiber glass makes it almost indestructible and non-corrosive. Comfortable to carry even at low temperatures.

Windaus-Labortechnik

Simple extension and adjustment mechanism. You can change the length easily by a quarter rotation. (Pic. 3).

At telescope poles of 3.85 to 6 meter the length could be easily changed by using the clamp (Pic. 2).

Comfortable use of spring mechanism. This type can take all samplers and catchers with universal connecting part.

Length m	PK	Cat. No.
1.45 - 2.75	1	6.801 684
1.50 - 3.85	1	6.241 444

Angled sample beaker	stainless steel	1	100 x 130	1	6.313 766

1 All purpose clamp for sample bottles, stainless steel

For various bottles with neck diameters from 10 to 80 mm and volumes of max. 1000 ml.
With adjustable click-in angle from 0 to 180°.

Type	Material	PK	Cat. No.
All purpose clamp for sample bottles	stainless steel	1	6.228 232

NEW

2 All purpose clamp, stainless steel with silicon coating

For bottles or containers with a diameter of up to 110 mm. With 3 holder elements coated with a silicone tube for a very safe grip. With adjustable click-in angle from 0 to 180°.

Type	Material	PK	Cat. No.
All purpose clamp	stainless steel/silicone	1	6.313 765

NEW

Sampling system TeleScoop

TeleScoop is a versatile sampling system with exchangeable tools for a wide range of applications. *Bürkle*
The tools (angular beaker, pendulum beaker, bottle holder, stainless steel beaker and dip net
e.g. for taking solid and organic samples from water courses) are attached to the rod by a practical
snap-in joint. Ideal for sampling from baths, tanks, shafts, open water courses etc. Sampling depths down to
6 M can be reached with the adjustable telescopic aluminum rod.

3 TeleScoop Telescopic Rods, aluminium

The individual rods have been provided with an end stop. This means that one rod cannot accidentally slip out of another rod. The telescopic rods cannot be rotated radially. *Bürkle*

- Increased rigidity by using cold-rolled profile rod
- Springs made of stainless steel

3

Description	Length m	PK	Cat. No.

6 Liquid sampler MiniSampler, PE

Bürkle

Taking samples is quick, easy, clean and practical.

With the MiniSampler, the sample liquid only comes into contact with the suction hose
and the sample bottle. Cross contamination is largely prevented. Bottles can be tightly sealed immediately after the
sample is taken with a tamper-evident cap.
The single use, PE suction hose can be quickly replaced, ensuring that samples are never contaminated. A new hose
can be used for each sample if required. Because of its small diameter (8 mm) and flexibility the hose can reach
sampling areas that are otherwise inaccessible. Also suitable for viscous oils.

Included:

Supplied with ten 100 ml PE bottles, 10 m of PE suction hose (6 x 8 mm), 1 hose cutter , 1 hose weight
(V2A/nickel-plated brass) and 20 seal-it safety seal labels in a carrying case.

Type	PK	Cat. No.
MiniSampler	1	9.303 970

1 | 2 Vampire Sampler

The self-priming peristaltic pump is also suitable for dirty or particle-containing substances with a viscosity of max. 500 mPas. Ideal for sampling from barrels, tanks, wells, water separators, waste water and sewage treatment plants. The samples are fed directly into the sample container via the closed hose system.

Bürkle

- Battery-powered hose pump
- Easy cleaning and exchangeable hoses prevent impurities
- Suction depth up to 5 metres

Scope of supply: Drive unit, pump head, pump hose (30 cm, Marprene), suction hose (5 m, PE), hose connector (PP), sample bottle (250 ml, LDPE), bottle basket, two rechargeable batteries, battery charger

Type	PK	Cat. No.
Vampire sampler, complete	1	9.303 851

Suitable accessories can be found in our online shop.

3 Disposable liquid samplers, HDPE

Bürkle

In numerous situations, rapid and contamination-free samples have to be taken. DispoSamplers are perfect for this application. They are cleanroom-manufactured, individually-packed and always ready-to-use. Avoid expensive decontamination or cleaning of soiled samplers. Gamma-sterilised versions are also available.

ViscoDispo: For high viscosity-media up to 100000 mPas.

LiquiDispo: For liquids and slightly viscous media.

DispoPipette: For taking all-layer and target-point samples from low viscosity-media.

DispoTube: For taking all-layer and target-point samples from liquids.

4 Sampler LiquiSampler, PTFE/FEP or PP

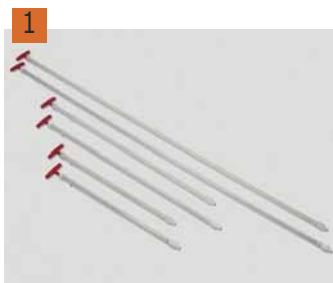

Bürkle

DIN EN ISO 15528. For liquids. Made of ultra pure and chemically inert PTFE/FEP or PP for contamination-free sampling. Practical push button, single-handed operation. Suitable for point, cross-sectional, and bottom sampling. Ideal for sampling from open and closed drums, kegs, tanks, silos, water sources (ponds, lakes, streams, rivers). Suitable for all commercial kegs and drums with openings of at least 32 mm diameter. All surfaces are non-porous and crevice-free preventing accumulation of dirt. Only round-profile screwthreads, suitable for food hygiene applications, are used. Simple to dismantle and clean.

3 Sample bags SteriBag Premium, tamper-proof

Bürkle

The SteriBag Premium sample bags uniquely combine a high degree of security, sterility, tamper evident closure and traceability, they are used to securely transport and for the storage of samples. After sampling, the sample can be filled directly into the sterile sample bag. The tamper-evident closure seals the bag liquid-tight and secure. When trying to open the closure again, the word "STOP" appears clearly visible. Both the sample bag and the tear-off field are labeled with a unique tracking number, this allows complete documentation and traceability.

SteriBag Premium is suitable for many demanding applications in the food, pharmaceutical, medical area as well as in cleanroom or biotechnology sectors.

- Sterilised by gamma rays (10^{-6})
- With integrated tamper-proof closure for manipulation evidence
- Unique identification via tracking number
- Food-safe

2

2 Sample bags Whirl-Pak® Stand-Up, PE, sterile, free standing

Easy sample handling due to the specially gusseted bottom which flattens out when the sample is placed inside, allowing the bag to stand up on its own. It works just like a bottle or beaker, however it cost less, is shatterproof and uses a fraction of the storage space.
The integrated wire closing system ensures the tightness of the sample bag.
With write-on label for clean and easy identification. Temperature range: -210 to 82 °C.

4

4 Filter bags Whirl-Pak®, PE, sterile

All the bags use the same filter material. These special bags contain a third layer of finely perforated polyethylene, which filters out the solids in the sample when used in a homogeniser blender. This allows for easy pipetting of the sample. The hole diameter in the filter layer measures 0.33 mm and there are 285 holes per square cm. The filter is sealed into the perimeter of the bag on the sides and bottom, allowing the sample to be placed in the bag on either side. The liquid will transfer through the filter, but the solids stay on one side. With write-on label. Temperature range: -210 to 82 °C.

Sampling/Sample containers

Special sample bags Whirl-Pak®, PE, sterile

Whirl-Pak® bags are sterile polyethylene laboratory sample bags used to transport samples for biological testing and other applications.

Temperature range -210 to 82 °C.

Available versions:

- With outside pocket for paperwork. Keeps important paperwork dry, clean, and separate from the sample
- Made of black pigmented PE-film providing maximum protection for samples that are sensitive to light
- With white or blue sterile scoop or sterile teaspoon

Sample bags Whirl-Pak® Thio-Bags®

These bags are specially designed for sampling chlorinated water for example for Legionella testing. Each sterile bag contains a nontoxic, nonnutritive tablet containing active sodium thiosulfate to neutralise chlorine at the time of collection.

The bag is EPA approved and has the additional benefits of saving time, utility costs, storage space, disposal costs, and replacing sample containers. With Write-On strip for clean and easy identification. Temperature range: -210 to 82 °C.

1 Sample bottles, PP, for water sampling, sterile

These gamma sterilised bottles are specially designed for taking, handling, transporting and storing water samples. Manufactured either as clear or amber colour from polypropylene.

ISOLAB

Clear bottles are manufactured from glass-like transparent special grade polypropylene. Amber bottles are manufactured from an amber coloured clear polypropylene which is highly translucent but still preventing the UV light penetrating inside the bottle. Square body form offers easy handling, and optimum space saving solutions during storage period. Wide bottle neck (GL 50) provides easy filling and pouring. Cap is made from PE with self sealing lock with integral security ring. Unique cap inner design ensures hermetical closure and guarantees an excellent leak and contamination proof bottle. Embossed graduation (precision of ±2%) on side wall enables volume verifications. Each bottle is labelled specifying e.g. sample and source descriptions, code and lot numbers and expiry date. Bottles with liquid sodium thiosulfate (20 mg/l - acc to ISO/FDIS 19458:2006) are ideal to analyse water meant for human consumption, swimming pools, and any other water where chlorine may modify the composition of the sample. Empty bottles, without sodium thiosulfate; ideal to sample water for physical and chemical analysis, as well as for other sample requirements that demands sterile bottles. Single packed bottles available on request.

Laboratory Blender Waring® 8010/8011

Versatile laboratory mixer ideally suited for general laboratory work.

WARING®

Supplied either with a 1 L stainless steel container or a 1.2 L glass container.

Models 8010 EG/ES with mechanical timer (3 minutes).

- Two velocity settings (18000 or 22000 rpm)
- Epoxy coated motor housing
- Two-piece lid vinyl/styrene

Scope of supply: Mixer, container (stainless steel or glass) with handle and lid.

Mixers MICROTRON® MB 550/MB 800

The systems MICROTRON® MB 550 and MB 800 are specially designed for mixing, dispersing, homogenizing, emulsifying and size reduction of cuttable materials. Four different attachments made from glass with volumes of 125 ml, 250 ml, 500 ml and 1000 ml are available for the MICROTRON® MB 550. Attachments made from stainless steel with volumes of 2000 ml and 4000 ml are available for the MICROTRON® MB 800. Both systems are safety laboratory devices: grounded, double safety isolated, radio screened. A safety system prevents uncontrolled starting and therewith personal injuries: the mixer can only be started with well attached safety hood or lid. In case the hood or lid will be removed during operation the device will be stopped automatically. Both systems are designed to withstand high loads; they are space saving and always ready to use.

KINEMATICA

Mixing jars and protective hoods - please order separately. Mixer MICROTRON® MB 550 can only be started with attached safety hood.

Specifications

Dry Mill POLYMIK® PX-MFC 90 D

The PX-MFC 90 D is suitable for dry sample grinding in the laboratory. It's possible to change the hammer and cutting mill sets.

KINEMATICA

- The blade grinding attachment is used for processing of dried, stringy and fibrous and grease-free materials.
Application: Wood, straw, dried grease-free meat, leather, paper, carbon, synthetics etc.
- The hammer grinding attachment is used for processing of dried, brittle and grease-free materials.
Application: Dried grain, dried beans, bones, rock, ceramics etc.
- Sieves 0.2 mm up to 6 mm diameter
- Safety system prevents start when lid is open
- Powerful three-phase motor
- Milling chamber with interchangeable inserts
- LED display
- Working volume of 300 ml (Funnel volume)
- 1000 Watt, 3-phase motor provides a low noise level during operation, with 230 Volt connection
- Sieves from 0.2 to 6 mm mesh size
- Integrated speed control with LED display for speed and status messages
- Speeds from 50 to 6.000 rpm for maximum grinding efficiency
- The motor cannot be operated when the chamber door is open
- Integrated overheating, overload and rotor blocking protection
- Safety stopper for certain grinding materials

Scope of supply: Mill with Hammer or Cutting Mill sets, 2 mm sieve, tool set and wooden stand with 12 collection tubes.

Specifications

Application volume:	Hopper 300 ml
Sieves:	0.2, 0.5, 0.8, 1.0, 1.5, 2.0, 3.0, 4.0, 5.0, 6.0 mm
Motor input power:	1000W
Speed range:	speeds up to 6000 min ⁻¹
Drive Dimensions (L x W x H):	251 x 325 x 480 mm
Tested to:	IEC/EN 61000-6-2/EN 61000-6-3 IEC/EN 61010-2-51

1 Planetary Ball Mill BM40

NEW

1

For rapid grinding of soft, hard, brittle and fibrous materials down to a final fineness of less than 1 µm in laboratories and pilot plants. Also suitable for colloid grinding. Suitable for use in geology, mineralogy, metallurgy, ceramics, materials research, mechanical alloying, pharmacy, chemistry, biology and analysis preparation.

- Grinding platform with 4 stations for up to 8 grinding bowls
- Suitable for continuous operation
- Grinding time digitally adjustable from 0 to 999 minutes
- Variable speed of the sun wheel from 30 to 400 min⁻¹
- For dry and wet grinding
- Programmable grinding parameters
- Automatic reversal of direction to avoid agglomerations
- Ventilated grinding chamber for cooling the grinding bowl
- Control via 7" LCD display with one-button operation
- Safety interlock
- Grinding bowls made of different materials and with different capacities available as accessories

Grinding bowls and balls are not included in the scope of supply and must be ordered separately.

Specifications

Feed size:	<10 mm
Final fineness:	<1 µm, <0.1 µm (colloidal grinding)

1 Centrifugal Mill FM200

For fine grinding, homogenising and mixing of soft, brittle, fibrous and hard samples in the laboratory and pilot plant. The high grinding efficiency is ensured by the high speed rotor and the ring sieve used. A final fineness of less than 100 µm can be achieved. The mill guarantees a high sample throughput and low-noise operation.

- Exchangeable ring sieves
- Variable speed control from 6000 to 18000 min⁻¹
- Simple operation via touch control panel
- Efficient sample cooling
- Ground samples are collected in a pan
- Feed hopper with anti-blocking device
- Motor with overload protection
- Easy cleaning
- No tools required to dismantle the parts in contact with the sample
- Electronic and mechanical safety interlocks
- Comprehensive range of ring sieves and rotors available

Ring sieves and rotors are not included in the scope of supply and must be ordered separately.

Specifications

Feed size:	<10 mm
Final fineness:	<100 µm
Speed range:	6000 ... 18000 min ⁻¹
Rotor diameter:	95 mm
Performance:	760 W
Dimensions (W x D x H):	400 x 456 x 490 mm
Weight:	33 kg
Power supply:	220 V, 50 Hz

1 Ultra Centrifugal Mill ZM 200

Application:

Extremely rapid and gentle size reduction of soft to medium-hard and fibrous materials.
Ideal for grinding, e.g., chemicals, foods and feeds, washing powder, plastics, fertilizers, pharmaceutical raw materials and finished products.
Also suitable for cryogenic grinding.

Retsch

Features:

- gentle on the material thanks to 2-step rotor/screen system
- wide speed range, adjustable from 6 000 to 18 000 min⁻¹
- patented cassette system for maximum sample recovery and easy cleaning
- defined final fineness due to ring sieves with aperture sizes from 0.08 to 10 mm
- comfortable safety housing with automatic cover closure
- motor compartment and electronics protected against dust and material penetration
- wide range of accessories with different rotors, ring sieves and cassettes

Specifications:

- Feed size: up to 10 mm
- Final fineness: down to 40 µm
- Batch: up to 300/4500 ml (with cyclone)
- Size (W x D x H): 410 x 365 x 515 mm
- Weight: approx. 38 kg
- Mains connection: 230 V, 50/60 Hz

Supplied with:

ZM 200 with cassette 900 ml.
Rotors and ring sieves have to be ordered separately.

Further rotors and ring sieves on request (e.g. for grinding without heavy metal contamination).

1

1 Cross beater mill SK 300

The cross beater mill SK 300 is used for batch-wise or continuous preliminary and fine size reduction. This robust mill is suited for laboratories as well as for the rough conditions of a production environment. Thanks to the powerful drive and rotor speed up to 4000 rpm it is often possible to achieve a final fineness <100 microns in one process.

Retsch

Features:

- High throughput for batch-wise size reduction of large sample volumes
- Suitable for feed sizes up to 25 mm
- Adjustable speed from 2000 to 4000 rpm
- Defined final fineness due to bottom sieves with aperture sizes from 0.12 to 10 mm
- Rapid cleaning thanks to easily removable cassette, hopper and push fit rotor
- Ring filter and collecting vessel with convenient, dust-tight bayonet catch
- Quick-action door lock safety lock and electric brake

Function principle:

Size reduction in the SK 300 takes place by impact and shearing effects. The air drawn in through the hopper by the cross beater accelerates the discharge of the ground material. The airborne fine fraction is separated off by a downstream filter system.

Supplied with: Cross Beater Mill with grinding insert, cross beater, baffle plates, filter hose and 5 l collecting vessel.

Bottom sieves and base frame, please order separately.

Feeders and bottom sieves in further sizes are available on request.

Solutions in Milling & Sieving

1 Mortar Grinder RM 200

Suitable for dry and wet grinding of soft, brittle, hard and paste-like samples. Depending on the sample, amounts from approx. 10 ml up to 190 ml can be reduced in size, triturated and homogenised. With beech wood scraper (special accessory) for pharmaceutical and homeopathic applications. The RM 200 is exceptionally easy to operate and clean. With digital time control and performance display, scale for reproducible pestle setting, built-in automatic switch-off and rapid motor-stop.
Please order mortar and pestle separately.

Specifications

Feed size*:	max. 8 mm
Batch size/Feed volume:	10 to 190 ml
Final fineness*:	approx. 10µm
Dimensions (W x D x H):	400 x 370 x 480 mm

2 Cutting Mill CM100M1

NEW

For crushing soft, tough, fibrous and hard grinding materials. The mill guarantees a high sample throughput of more than 30 kg/h and can be operated batchwise or continuously. The samples are crushed by the strong cutting and shearing forces. The crushed sample passes through a bottom sieve into the collection bucket.

- Variable speed control from 500 to 3000 min⁻¹
- Simple operation
- Rotor chamber can be quickly locked and easily cleaned
- Low sample heating due to rapid grinding process
- Various bottom sieves and rotors available as accessories
- High work safety due to motor protection switch and motor brake
- Electric safety switch to prevent the mill from starting when rotor chamber is open
- Extensive range of rotors, bottom sieves and further accessories available

Bottom sieves and rotors are not included in the scope of supply and must be ordered separately.

Specifications

Feed size:	<25 mm
Final fineness:	<100 µm

Suitable accessories can be found in our online shop.

1 Cutting Mill SM 100/200/300

Rapid and gentle size reduction of bulky, soft, medium-hard, fibrous, elastic and thermally sensitive materials.

Retsch

The most powerful model, the SM 300, is especially suitable for cutting heterogeneous mixtures such as household waste, plastic materials, computer and electronic scrap. The mills are also used for organic materials like wood, roots, bones, plants and feed pellets. They can be equipped with various rotors and hoppers. The SM 300 features a variable speed which makes it perfectly adaptable to the particular application requirements.

Features:

- powerful size reduction thanks to 3kW drive with high torque and RES technology (SM 300)
- perfect adaptation to application requirements by variable speed from 100 rpm to 3000 rpm (SM 300)
- optimum cutting effects thanks to double acting cutting bars (SM 200, SM 300)
- quick and easy cleaning without tools due to fold-back housing with smooth surfaces and push-fit rotor and sieves (SM 200, SM 300)
- defined final fineness due to bottom sieves with aperture sizes from 0.25 mm to 20 mm
- wide range of accessories including various hoppers, collection systems, rotors and sieves

Supplied with:

SM 100 with 5 L collecting receptacle (Please order rotor, hopper, bottom sieve and base frame separately)

SM 200/SM 300 with 5 L collecting receptacle, base frame (Please order rotor, hopper and bottom sieve separately)

Accessories available on request.

Batch mills Tube Mill control/Tube Mill 100 control

1

Suitable for disposable and reusable grinding chambers. By using the disposable grinding chambers the possibility of cross-contamination and the effort of cleaning is eliminated.

The mills can be used for hard (Mohs hardness up to 5), dry and brittle materials. They are especially suitable for grinding seeds, such as corn and wheat. Increased safety, the operation of the mill is only possible with properly closed grinding chamber and closed lid.

- Clearly arranged, multilingual OLED-display
- USB interface for control and documentation of all the parameters
- Interval operation available
- Stepless adjustable speed
- Adjustable safety speed and time
- Programmable and storable test conditions
- Reproducible test results
- Timer
- Easy operation with touch keypad
- Dust proof sealed housing
- Quiet operation

1 Grinding mill, A 10 basic

Newly designed batch mill for grinding of hard, brittle, soft and fibrous materials for volumes up to 50 ml.
Because samples may be embrittled directly in the grinding chamber; tough, oily and aqueous samples can also be grinded.
During development of the mill, particular emphasis was placed on safety.
The mill will only start when the lid is closed and it can only be opened at standstill.
A quick stop feature further increases the safety of user.

- Digital timer
- Counter: Display of grinding time
- Interval operation
- Brushless motor for long life and low noise
- Integrated cooling connections
- Error Code Display
- Easy handling with keypads
- Easy exchangeable beater/cutter for a variety of applications
- Grinding chamber reduction for small sample amounts (included with delivery)
- Easy opening and closing of the lid with a bayonet lock

Specifications

Motor rating input/output:	300/240 W
Speed:	25 000 rpm
Chamber vol.:	50 ml

1 Grinding mill, A11 basic

Batch mill for 2 different grinding procedures:

Impact grinding of hard, brittle or non-elastic grinding materials with high-grade stainless steel beater. This beater can be used for a Mohs hardness up to 6 (incl. with delivery). Cutting grinding for pulverizing soft, fibrous materials with a cutting blade (not incl. with delivery).

- Moist and gluey materials can be pulverized by adding water
- Grinding chamber made of Tefcel (PTFE, glass fibre-reinforced) with stainless steel inlet (1.4571), useful volume 80 ml (incl. with delivery).
- For embrittlement of grinding materials with liquid nitrogen in the grinding chamber
- Optionally, a 250 ml grinding chamber is available

Accessories for Grinding mill, A11 basic

IKA

A 11.1 Spare beater: For pulverising substances with a Mohs hardness up to 6.

A 11.2 Cutter: For pulverising soft, fibrous grinding materials.

A 11.3 Beater, hard metal: For pulverising substances with a Mohs hardness up to 9, chrome-carbide coated

A 11.4 Grinding container, 250 ml: Made of polycarbonate with stainless steel inlet. Not suitable for cooling with N₂, only applicable with double beater A 11.6.

A 11.5 Spare grinding container, 80 ml: Made of Tefcel (PTFE, glass fiber-reinforced) with stainless steel inlet.

Excellent resistance to chemicals and low temperatures (- 200 °C).

A 11.6 Dubbel beater: For use up to Mohs hardness 3. Only applicable with grinding chamber A 11.4.

A 11.7 Funnel: Prevents splashing by pouring in liquid nitrogen in the grinding chamber A 11.5.

Universal mill MultiDrive basic/control

Universal mill for the pre- and fine comminution of hard, soft or fibrous samples.

IKA

- Adjustable interval operation
- Integrated cooling in the grinding bowl
- Ground product and coolant remain disconnected
- USB interface

MultiDrive control additionally with:

- Temperature measurement and vessel recognition using RFID
- Temperature limit can be set for temperature-sensitive materials, or for specific planned reactions
- Integrated weighing function for weighing without transferring the material
- Dispersion vessel and a disposable tube are available as accessories

Please order vessels separately.

3 Knife mill HM100

NEW

The HM100 knife mill is used for grinding soft, medium-hard, brittle and fibrous materials. Especially suitable for samples with a high water, oil or fat content. The 2 knives are driven by a 900 W motor to achieve a reliable grinding result. Suitable for applications in agriculture, biology, medicine and food technology.

- For soft, elastic, fibrous, aqueous, oily or fatty samples
- Electronically controlled speed
- Samples are grinded in only 10 to 30 seconds
- Up to 700 ml sample volume
- Autoclavable grinding vessels
- Grinding vessels available in various materials
- Cutting knives with 2 stainless steel and titanium blades available
- Easy operation
- Quick start
- Coarse and fine grinding in one step
- Interval, reverse and manual mode available

Scope of supply: Knife mill, 1 l grinding vessel made of plastic (autoclavable), lid, stainless steel knife

Specifications

Feed size:	40 mm
Feed quantity:	50 ... 700 ml
Ult. fineness:	<300 µm

Grinding/Mills

GENERAL CATALOGUE EDITION 21

1 Knife mill PULVERISETTE 11

NEW
Fritsch

For reproducible homogenisation of all common samples in food or feed testing, pharmaceuticals, chemicals and many other applications. The quietly operating knife mill is ideal for gentle grinding and homogenisation of moist, oily and greasy as well as dry, soft, medium-hard and fibrous samples within seconds.

- Motor power up to 1250 Watt
- Variable speed setting with turbo function
- Standard, reverse and interval operation
- Knife blades with 4 cutting edges, up to 56000 cuts per minute
- Feed quantity up to 1400 ml (depending on material)
- Average grinding time only 30 seconds (depending on material)
- Fast cryogenic grinding
- 20 SOPs can be stored, USB interface for SOP management and generation of grinding reports
- Easy cleaning
- Sample-contacting parts such as grinding containers, lids and knives can be autoclaved

Scope of supply: Knife mill, grinding container 1.4 l made of polycarbonate, standard lid, standard knife made of stainless steel

Specifications

Max. feed size:	40 mm
Final fineness:	<300 µm
Speed range:	2000 ... 10000 min ⁻¹ , turbo function up to 14000 min ⁻¹ for 6 s

1 Knife Mills GRINDOMIX GM 200/GM 300

Retsch

The Knife Mills Grindomix GM 200 and GM 300 are suitable for the rapid and reproducible size reduction and homogenisation of food and feed materials. They can process substances with a high water, oil or fat content just as quickly and reliably as dry, soft and medium-hard products.

Features:

- Very fast and reproducible grinding and homogenisation of foodstuffs, final fineness < 300 µm
- Speed-controlled industrial motor
- Autoclavable grinding tools
- Boost function allows short-term increase of speed up to 14.000 rpm (GM 200)
- For sample volumes up to 700 ml (GM 200) or 4500 ml (GM 300)
- Digital display of grinding time and speed
- Interval operation possible
- Optional gravity lid for automatic adjustment of grinding chamber volume
- Storage of 4 program sequences possible (GM 200)
- 8 or 10 parameter combinations can be stored (GM 200/GM 300)
- Drive power: ~ 1000 W (GM 200); continuous 1.1 kW, short term peak 3 kW (GM 300)
- Electrical supply data: 220-240 V, 50-60 Hz

1

**Supplied with:**

GM 200 complete with 1 L plastic container, standard lid and stainless steel knife.

GM 300 complete with 5 L plastic container, standard lid, stainless steel knife and scraper.

Grinding/Mills

GENERAL CATALOGUE EDITION 21

1 Micro Ball Mill GT300

NEW

For grinding and mixing of hard, medium-hard, soft, elastic and fibrous samples. Also suitable for cell disruption and DNA/RNA extraction. The mill is designed for very short processing times and high sample throughput. The grinding containers carry out horizontal, circular-arc-shaped oscillations and the grinding balls ensure effective grinding and mixing of the sample.

- Only 30 seconds average processing time
- 2 grinding stations for bowls with a volume of 5 to 50 ml
- Multifunctional clamping device, which also holds adapters for reaction vessels
- Grinding time digitally adjustable from 1 second to 100 minutes
- Variable speed from 180 to 1800 min⁻¹
- Control via LCD display
- Programmable grinding parameters, up to 10 programs can be stored
- Transparent cover
- Safety interlock
- Grinding chamber, clamping system and swivel arm made of stainless steel
- Maintenance-free direct drive
- Grinding bowls made of different materials with volumes up to 50 ml available as accessories

Grinding bowls and balls are not included in the scope of supply and must be ordered separately.

Mixer Mills MM 400/500

The mixer mills are true laboratory "all-rounders". They have been developed specially for grinding, homogenising and mixing of small amounts of sample in only a few seconds. They are also perfectly suitable for the disruption of biological cells as well as for DNA/RNA recovery.

Retsch

1 Mixer Mills MM 400

The MM 400 can also be used for cryogenic and wet grinding.

- Grinding by impact and friction, for up to 20 samples per run
- 3 different grinding modes: dry, wet or cryogenic (MM 400)
- Screw-top grinding jars for leak-proof grinding (MM 400)
- 9 Standard Operating Procedures can be stored

Specifications

Feed size:	≤ 8 mm

1 Mixer Mill CryoMill

The CryoMill is designed for the cryogenic size reduction of materials which cannot be ground at room temperature or whose composition would be changed by it. The grinding jar is cooled before and during the grinding process with liquid nitrogen through an integrated cooling system. Thus the sample is embrittled and its volatile components are preserved. The size reduction principle is the same as that of the well-proven Mixer Mill MM 400. The CryoMill can also be operated without the cooling system which makes it suitable for a wide range of applications.

Retsch

- Powerful cryogenic grinding by impact and friction, up to 30 Hz
- Closed LN₂-system (autofill) for enhanced safety, avoids any contact of the user with LN₂
- Screw-top grinding jars for convenient, leak-proof operation
- Clearly structured user interface, memory for 9 SOPs
- Wide range of accessories including LN₂-feeding systems, various jar and ball sizes, adapter racks, materials

Specifications

Feed size	up to 8 mm
Ultimate fineness	< 5 µm
Charge	max. 1 x 20 ml
Adjustable frequency range	5 to 30 Hz (300 to 1800 rpm.)
Dimensions (W x D x H)	385 x 675 x 370 mm
Weight	40 kg
Power supply:	100 - 240 V, 50/60 Hz

Type	Min. speed rpm	Max. speed rpm	Max. Feed quantity/ Flow rate ml	PK	Cat. No.
CryoMill	300	1800	20	1	9.739 299

Please order Autofill, grinding jars and grinding balls separately.

1 Planetary Ball Mills PM 100/100 CM/200/400

Planetary Ball Mills are suitable for mixing and grinding soft, medium-hard, extremely hard, brittle and fibrous materials. They are used whenever high degrees of fineness down to the submicron range are to be achieved in a very short time. In addition to dry and wet grinding, they are also suitable for colloidal grinding and mechanical alloying. Typical materials are minerals, ores, chemicals, ceramics, soils, household and industrial waste etc.

Retsch

Features:

- extremely high ultimate fineness down to submicron range
- 1, 2 or 4 grinding stations
- grinding jar volumes from 12 ml to 500 ml
- suitable for long-term trials and continuous use
- programmable starting time
- power failure back-up ensures storage of remaining grinding time
- reproducible results due to digital parameter setting
- 10 parameter combinations can be stored
- single button operation with graphic display
- automatic grinding chamber ventilation for cooling the grinding jars
- grinding jars in 7 sizes and 8 different materials available

Supplied with: Planetary Ball Mill only. Grinding jars and grinding balls have to be ordered separately.

The PM 100 CM is a Planetary Ball Mill with a speed ratio of 1:1.

Size reduction is not so much achieved by impact but by pressure and friction which is more gentle on the material.

Specifications

1 Mortar grinder PULVERISETTE 2

For wet and dry grinding of hard, medium-hard, soft, brittle and temperature-sensitive samples for analysis, quality control and materials testing. It even grinds difficult samples with a moist, fibrous or elastic structures using liquid nitrogen. And it's also excellently suited for mixing or homogenisation of organic and inorganic solids or liquids.

Fritsch

- Reproducible and accurate grinding results
- Precise adjustment and readout of the pestle pressure
- Short grinding and mixing times
- Loss and dust free

Max. feed size: 8 mm
 Max. sample quantity: up to 190 ml
 Final fineness: 10 ... 20 µm
 Supply requirements: 100-120/200-240 V/1~, 50/60 Hz, 300 W
 Dimensions (W x D x H): 310 x 460 x 410 mm
 Net weight: 24 kg

3 Planetary ball mills PULVERISETTE 5/6 classic line

Ideal for fast, loss-free fine grinding of hard, medium-hard, brittle and fibrous materials - dry or in suspension in the areas of geology, mineralogy, metallurgy, ceramics, materials research, mechanical alloying, pharmaceuticals, chemistry, biology, sample preparation for analysis. Sample can be processed from a few mg to several kg at a wide range of fineness levels down to less than 1 µm. They are especially easy to operate and fast and easy to clean. Suitable for continuous, heavy duty usage and guarantee safe clamping of the grinding bowls.

Fritsch

Matching grinding parts of 7 different materials are available to provide max. protection against undesired contamination. In addition to size-reduction, planetary ball mills can also be used for mixing and homogenising of emulsions and pastes or for mechanical alloying and activation.

FRITSCH also offers a Planetary Mill Generation *premium line*, for fast high-tech grinding down to the nano range, worldwide unique in operation, performance and safety, a new reference class. Information on the Planetary Mill PULVERISETTE 5 *premium line* and Planetary Micro Mill PULVERISETTE 7 *premium line* can be found in the LLG Online Shop.

2 Variable Speed Rotor Mill PULVERISETTE 14 classic line

Fritsch

Ideal for fast, effective comminution of soft to medium-hard, brittle, fibrous materials, as well as difficult-to-mill and temperature-sensitive samples. Cryogenic grinding, dispersion and homogenisation are also one of the areas of operation. The variable speed rotor mill is an ultra-centrifugal mill with variable speed settings between 6.000 rpm and 20.000 rpm and automatic speed regulation for constant milling in the areas of analytic, biology, chemistry, agriculture and forestry, foodstuffs, plastics and textiles, pharmaceuticals, environment, RoHS. For optimal material feeding the Vibratory Feeder LABORETTE 24 (optional) is recommended.

Max. feed size:	10 mm
Throughput:	up to 5 l/h

Rotors and sieve rings are also available in others designs and materials. An extensive accessory programme with impact bar, pin insert, sample exhauster with Cyclone separators and much more is available for your specific application.

Cutting mills PULVERISETTE 15 and Universal Cutting mills PULVERISETTE 19

Ideal for pre and fine comminution of soft to medium-hard as well as fibrous or brittle, tough materials. They are essential for the areas of plastics, textiles, agriculture and forestry, environmental, construction materials, chemistry and foodstuffs. All cutting parts can be removed for cleaning in just a few seconds without tools, unbeatable fast, simple and efficient. Variable rotational speeds, different rotors, various knife geometries and replaceable blades ensure maximum flexibility and durability. For controlling the abrasion properties, the cutting tools are offered in different materials. The optimum airflow ensures fast comminution and secure protection against clogging. The FRITSCH Cyclone separators (optional) for sample exhaustion enable simple feeding due to the strong airflow, increase throughput, and reduce the thermal load of the samples.

Instruments also available in other voltages.

Funnels, rotors, sieve inserts/sieve cassettes and collecting vessels must be ordered separately.

FRITSCH also offers a Cutting Mill Combination which consists of the Universal Cutting Mill PULVERISETTE 19 and Power Cutting Mill PULVERISETTE 25.

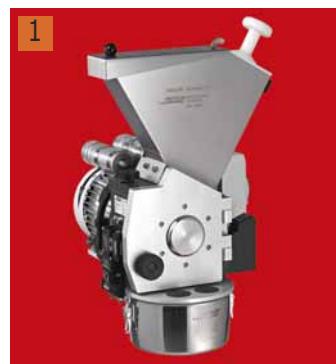

The important effect is that samples with feed particle size of 120 mm max. can be ground to a few 100 µm within a short time and in a single operation. Ordering data on request.

The Universal Cutting Mills PULVERISETTE 19 are also available completely in stainless steel.

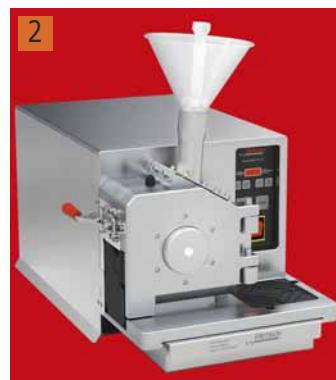

NEW: Universal Cutting Mill PULVERISETTE 19 now with variable rotational speed for optimal adjustment of the cutting speed to your sample material

Variable 300-3000 rpm is ideal for fine comminution of dry soft to medium-hard sample materials as well as fibrous materials and plastics.

Variable 50-700 rpm for powerful comminution of hard, tough-elastic and temperature-sensitive samples or an excessively high fine share need to be avoided.

Grinding/Jaw breaker

GENERAL CATALOGUE EDITION 21

1 Jaw Crusher, BB 50

Benchtop Jaw Crusher for the rapid and gentle, coarse and preliminary size reduction of hard, brittle and ductile materials. Continuous digital gap width adjustment with scale, enhanced ultimate fineness up to 0.5 mm.

Retsch

- Large fold-back hopper
- Removable crusher arm for easy cleaning
- Adjustable speed allows adaptation to sample characteristics
- Convenient operating keypad with digital display
- Memory for gap width setting
- Wear compensation with zero-point adjustment

Features:

- Throughput/charge: single items, charges to 3000 ml
- Supply requirements: 220-240 V, 50 Hz

2 Jaw Crushers, BB 100, BB 200, BB 300

For rapid and gentle coarse grinding and crushing of hard, brittle and tough materials.

Retsch

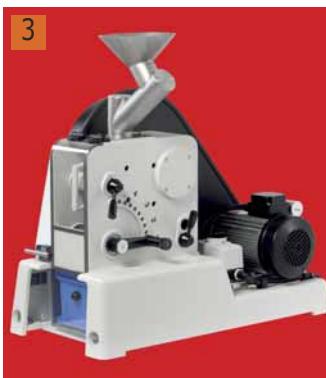

Continuous gap adjustment with scale and zero-point adjustment for wear compensation.

Excellent performance with enhanced final fineness, robust construction, fitted with quick-release hopper receiver with safety switch and casing. Standard model is supplied with manganese steel breaking jaws.

Features:

- High throughput
- Continuous gap width adjustment
- Braking motor with safety switch
- Final fineness approx. 2 to 5 mm
- Easy cleaning of grinding chamber
- Supply requirements 400 V 3-ph, 50 Hz

1 Analytical Sieve Shakers AS 200 basic/digit/control, AS 300 control, AS 450 basic, AS 450 control

Sieve shakers are used in research & development, quality control of raw materials, interim and finished products as well as in production monitoring.

Retsch

Features:

- Sieving with 3D effect
- For wet and dry sieving
- Short sieving times
- Low-noise, maintenance-free

Please order clamping device, test sieves and collecting pan separately.

AS 200 basic: favourably priced basic model.

AS 200 digit cA: powerful comfort model with touch-sensitive keypad, digital display, interval sieving.

AS 200 control: like AS 200 digit, but microprocessor-controlled, with freely selectable intervals and digital vibration amplitude setting. It can be calibrated and, for the first time, allows 100 % reproducible sieving results worldwide, even if different instruments are used. The AS 200 control has an integrated interface for the evaluation software EasySieve®. At the same time it also offers all the requirements for test materials monitoring according to ISO 9000.

AS 300 control: like AS 200 control; also suitable for sieves up to 315 mm diameter and for higher loads.

AS 450 basic: budget-priced basic model for sieving up to 15 kg of material.

AS 450 control: with CET technology, It is the first Sieve shaker which operates with a three-dimensional sieving motion

Specifications

Analytical Sieve Shakers AS 400 control, AS 200 tap/ jet

AS 400 control:

The AS 400 control is used for the sieving of dry goods with test sieves of a diameter up to 400 mm. The uniform, horizontal circular motion ensures exact separation of the product to be sieved.

- Sieving with circular sieving motion according to DIN 53477
- Free digital adjustment of all process parameters (time, speed, interval)
- Memory for up to 9 SOPs
- Integrated interface for evaluation software EasySieve®
- Electrical supply data: 100-240 V, 50/60 Hz

Please order clamping device, test sieves and collecting pan separately.

The clamping devices of AS 200 and AS 300 are also suitable for the AS 400.

Retsch

AS 200 tap:

For sieve analysis of certain products such as activated carbon, abrasives, coal, spices and diamonds, as specified in the corresponding standards.

- Horizontal, circular sieving motion with vertical taps
- Suitable for dry sieving
- Robust and maintenance-free
- Electrical supply data: 230 V, 50 Hz

Please order test sieves and collecting pan separately.

AS 200 jet:

The air jet sieving machine AS 200 jet is particularly suitable for light materials with particle sizes in the lower micron range which tend to agglomerate.

- Open Mesh Function to reduce the number of near-mesh particles
- Operation with standard Retsch sieves, 203 mm (8") diameter, 1" or 2" high
- Adapter for 200 mm sieves optional
- Free manual (standard) or automatic (accessory) pressure regulation
- High flexibility through adjustable nozzle speed
- Memory for up to 9 SOPs, additional Quick Start mode
- Electrical supply data: 230 V, 50/60 Hz

Please order test sieve and vacuum cleaner separately.

1 Vibratory sieve shaker ANALYSETTE 3 PRO and SPARTAN

For quantitative particle size analysis of dry samples and suspensions of all kind by dry and wet sieving with woven test sieves. FRITSCH Sieve Shakers satisfy all requirements for accurate and reproducible sieving analysis and perform automatic sieve analysis with the control and evaluation software AUTOSIEVE, which is delivered as trial version for 90 days. The top model ANALYSETTE 3 PRO guarantees absolutely reproducible sieving results due to automatic amplitude control, programme selection, can be integrated as testing device into any quality management systems, has an RS232-interface, to mention only some of its innovative and practical features.

Sieving:	dry or wet
Sieve diameters:	100 mm, 200 mm or 8"
Maximum number of sieves:	10 x 50 mm (full) or 16 x 25 mm (half) height
Sieves:	woven mesh metal sieves
Measuring range:	Dry sieving: 20 µm to 63 mm Wet sieving: 20 µm to 10 mm
Sample quantity:	Dry sieving: up to 2 kg (depending on the sample material and sieve used) Wet sieving: 20 to 100 g
Sieving time:	Dry sieving: 3 to 20 min Wet sieving: 3 to 10 min
Power supply:	100-240 V/1~, 50-60 Hz, 50 W
Dimensions (W x D x H):	370 x 400 x 200 mm
Net weight:	21 kg

LABWARE

Test Sieves

Features:
Retsch

- Previously unattained product quality owing to advanced manufacturing processes and continuous optical inspection.
- High quality joining technology guarantees permanently taut wire mesh.
- High level of corrosion resistance and easy to clean owing to the use of high-alloy stainless steel.
- "one-piece cast" sieve frame and seamless mesh joint prevent cross contamination.
- Maximum stability and optimum density of the sieve stack.
- 15 % lighter than traditional sieves whilst at the same time having larger sieving area.
- Clear sieve marking and traceability by individual laser engraving on each sieve.

2 Analytical Sieve Test Sand

Test materials can be used to check analytical sieves between the scheduled calibration dates and to demonstrate the presence of the required properties, as well as the suitability of analytical sieves. A test material for analytical sieves with frequent mesh widths (2.0 mm - 1.0 mm - 0.5 mm - 0.25 mm - 0.125 mm).

Normensand

- Pack of 3 bottles, 202 g each
 - Grain size : from 0.125 mm to 2.00 mm
 - Data sheet for the use of traceability for analytical sieves
- Each bottle contains a mixture of different sizes.

Description	PK	Cat. No.
Analytical Sieve Test Sand	3	9.739 500

Ultrasonic Baths, SONOREX SUPER

Heavy duty ultrasonic baths for cleaning or sample treatment in aqueous liquids.
 Suitable for laboratory and respiratory protection area, industry, workshop and service area.
 - Stainless steel tank and housing
 - Drip water protected
 - With integral tank drain tap (G 1/2) for easy emptying (RK 106 with G 1/4)
 - Radio shielded

Bandelin

Models with Type addition H with adjustable temperature range.

3 | 4 Mesh, Polyamide

Thermo-fixed Polyamide (Nylon) mesh is temperature stable from -40 °C to +115 °C. In water from 95 °C to 100 °C. Stability in acids is limited and dependant on concentration and temperature. Nylon exhibits outstanding stability in alkalis, including sodium and potassium solutions. Its chemical behaviour with respect to organic solvents is moderate to good. Minimum mesh width: 102 cm, Length: 1 m

Other sizes available on request.

3 Rotatory cone sample divider LABORETTE 27

For reliable, representative sample division of solids and suspensions without conversion.

Fritsch

Divides the samples at up to 3000 graduations per minute into up to 30 partial streams via a rotating cone head. Dividing accuracy up to 99.9 %. Can be combined with 6 different dividing heads.

- Compact basic unit with robust cast aluminium housing
- Easy cleaning due to removable dividing head
- variable partition ratios
- Maintenance-free drive motor with slipping clutch
- Quick clamping device for sample tubes 250 and 500 ml
- For optimum sample allocation, the vibratory feeder LABORETTE 24 (optional) is recommended.

Specifications

Division ratio:	1:8, 1:10, 1:30

Dispersing unit OV5

For dispersing, homogenising and stirring of biological samples, pharmaceutical products, cosmetics and food.

Velp Scientific

- Fast assembly of the appropriate rotor/stator combination
- With overload protection, soft start and safety switch
- Large selection of rotors and stators
- Distance between feet: 200 mm

4.666 710

Also available as set:

- Dispersing unit OV5
- Stand with mounting for disperser and sample vessel
- Dispersing tool VSS2CSR2 for dispersing solid/liquid systems. Suitable for the ceramic, pharmaceutical and petrochemical industry as well as for waste water treatment

4.666 728

1 Homogeniser, handheld, POLYTRON® PT 1200 E (Eco Line)

This ergonomic handheld homogeniser is ideal for quick processing of small sample quantities and volumes. The ergonomic design and low weight of the PT 1200 E makes it easy for repeated usages. There are many different styles of aggregates available from 3 mm in diameter for volumes down to 0.01 ml to 12 mm for volumes up to 250 ml. If cross contamination from sample to sample is a concern, we offer single use synthetic aggregates in 7 and 12 mm diameters. One of the more recent additions to our line is the PT-DA 20/2 X EC aggregate which was specifically designed for tablets.

KINEMATICA

- 24 Volt, 100 Watt low-voltage motor with safety transformer
- Analogue motor speed control up to 25.000 rpm
- Aggregate tips speeds up to 12 m/s to produce the finest particles possible
- Soft start prevents splashing of homogenate from sample vessel
- Thermal fuse for overload protection
- Ergonomic, user-friendly design
- Aggregate replacement using one-handed quick-release coupling (type E)
- Various models of EasyClean dispersing aggregates
- Height-adjustable stand (optionally available)

Applications: General homogenisation applications, 5. Sample preparation for subsequent extraction of pharmaceutical agents (API), Cell disruption, RNA/DNA isolation from tissue, Dispersion of small quantities from plants, animals or human tissue

Dispersing heads must be ordered separately.

Specifications

Application volume:	0.05 to 250 ml
Motor input power:	100 W
Dispersing heads:	diam. 3, 5, 7 and 12 mm and diam. 20 mm X EC-E116
Speed range:	Stepless up to 25.000 rpm
Drive Dimensions (L x W x H):	220 x 44 x 55 mm
Weight drive:	440 g
Power supply:	90-250 V ±10 %, 50/60 Hz
IP code:	IP 20
Tested to:	EN/IEC 61010, 61326-1

2

2 Homogeniser, stand, POLYTRON® PT 2500 E (Ecoline)

The PT 2500 E is the ideal solution for cost-conscious laboratories. It is able to perform homogenisations with volumes from 0.05 to 2500 ml. The electronic control system continuously monitors the speed and automatically adjusts it, keeping it constant with changing viscosity. The speed is easily seen on the large digital display. Dispersing heads with a variety of styles and diameters are available to provide optimum particle size reduction when using this drive. There are many different styles of aggregates available from 3 mm up to 25 mm

KINEMATICA

- Aggregate tip speeds up to 32 m/s
- Soft start prevents splashing of homogenate from sample vessel
- Thermal fuse for overload protection
- Speed remains constant even when viscosity changes
- Aggregate replacement using one-handed quick-release coupling
- Insulated motor housing keeps motor noise to a safe, approved level
- Various models of EasyClean dispersing aggregates
- Digital display

Stand and dispersing heads must be ordered separately.

Specifications

Application volume:	0.05 ... 2500 ml
Motor input power:	500 W
Dispersing heads:	diam. 3, 5, 7 and 12 mm and diam. 20 mm and 25 mm
Speed range:	Stepless 500 to 30.000 rpm
Dimensions Drive (W x D x H):	76 x 157 x 236 mm
Weight Drive:	1.8 kg
Power supply:	90 ... 230 V ±10 %, 50/60 Hz
Protection class acc. to DIN:	IP 20
Tested to:	IEC/EN61326-1/IEC/EN 61000-6-2/EN 61000-6-4 IEC/EN 61010-2-51

1 Stand Homogenisers POLYTRON® PT 10-35 GT (Ecoline)

1

Cost effective dispersing unit for applications with operating volumes up to 10 liters. KINEMATICA
 The powerful motor is useful for sample preparation and also for formulation in scale-up matters. More than 30 dispersion aggregates with different geometries, designs, sizes, materials and coatings are available for selection. The electronic control system continuously compares the pre-selected rpm speed with the actual speed and adjusts it so that the speed remains constant even as the viscosity increases.

- Aggregate tip speeding up to 34 m/s
- Soft start to prevent splashing of homogenate from sample vessel
- Integrated overheating, overload and blocking protection
- Speed remaining constant even when viscosity changes
- Aggregate replacement using one-handed quick-release coupling (type F)
- Insulated motor housing keeps motor noise to a safe, approved level during operation
- Various models of EasyClean dispersing aggregates

Applications: General homogenisation applications (dispersion and emulsification), Formulation of lotions, creams and food, Production of oil-water emulsions, Dispersion of small quantities from plants, animals or human tissue

Stand and Dispersing heads must be ordered separately.

Specifications

Application volume (water):	0.1 ... 10000 ml
Motor input power:	1200 W
Speed range (stepless):	500 ... 30000 rpm
Dimensions Drive (W x D x H):	95 x 210 x 247 mm
Weight Drive:	3.2 kg
Power supply:	90 ... 230 V ±10 %, 50/60 Hz

2

High performance dispersing unit with powerful drive, stepless speed control, high tip speed and a variety of interchangeable dispersion aggregates for a wide range of dispersing and mixing applications. KINEMATICA

- Aggregate tip speeding up to 32 m/s
- Easy operation with an on-off switch, speed control and membrane keypad
- Intelligent variable speed control for long equipment life
- Integrated overheating, overload and blocking protection
- Speed remaining constant even when viscosity changes
- Aggregate replacement using one-handed quick-release coupling (type F)
- Easy cleaning of the unit thanks to EasyClean design

Applications: General homogenisation applications (dispersion and emulsification), Formulation of lotions, creams and food, Production of oil-water emulsions, Dispersion of small quantities from plants, animals or human tissue

Dispersing heads must be ordered separately.

Specifications

Application volume (water):	0.1 ... 30000 ml

Stands for Homogenisers POLYTRON®

HS 1200 E: Holder for the support of drive, transformer, four dispersing aggregates and two tools.

KINEMATICA

ST-P 13/320: Stainless steel plate stand with anti-slip mat made of silicone, with height-adjustable holder for the drive and for fastening the base station.

ST-P 01/200: Stainless steel joint stand (gas spring) with two rivet plugs for safe fixing of the basic station. The drive holder can be rotated in any direction, raised and lowered.

ST-P 15/320: Stainless steel plate stand with height-adjustable holder for drive support and for safe fixing of the basic station.

ST-P 20/600: Plate stand with two rod design. Height adjustable.

ST-P 10/600: Plate stand with one rod design. Allows easy and safe height adjustment of the drive unit.

Material: Aluminum

ST-F 10/600: H-foot stand made of anodized aluminum and the height adjustable, swiveling PTFE-coated work table with vessel holder. Material: Aluminum

ST-P 14/590+500: Electric plate stand with lifting telescopic bar for more ease of use. Incl. up/down button and mat to prevent slipping. Stroke 500 mm. The electronics are designed for ambient temperatures of +5 °C to +40 °C and were tested per EN 60335-1 and UL 962.

ST-P 21/700: Stainless steel plate stand with two rod design. Height adjustable. For more safety, the drive unit cannot be twisted sidewise or rotated.

Dispersing heads for Homogeniser POLYTRON®

Type addition EC (STANDARD DISPERISING HEADS): The universal geometry uses two rows of teeth, is suitable for a large spectrum of laboratory applications, and it is reliable and efficient.

KINEMATICA

Type addition BEC: High-turbulence mixing head, suitable for suspension of solid particles and for high viscosity applications.

Type addition W: Dispersing head for fibrous and tough materials.

Type addition SYN (SYNTHETICS): Disposable dispersing heads for the processing of multiple samples per day, where the required sterilization of stainless steel dispersing heads represents a significant time limitation.

Available in PES/Special POM. Sterile packed.

Type addition E: Coupling type E

Type addition F: Coupling type F

Disperser System Ultra-Turrax® Tube Drive

Disperse, stir and grind using a single drive unit. Patented disposable disperser system for volumes from 2 to 50 ml with hermetically sealable, disposable sample tubes.
 Provides protection and safety from: Infectious samples, toxic substances, strong-smelling materials.
 - no possibility of cross-contamination
 - suitable for individual or serial operations
 - increased safety due to low voltage (24V) power
 - chemically resistant plastic containers
 - anti-locking function

IKA

Dispersing tubes (20 and 50 ml) with pierceable membrane and γ -sterilised are available on request.

Specifications

Viscosity max.:	5000 mPas
Noise without element:	50 dB(A)
Power supply:	100 ... 240 V, 50/60 Hz

Homogeniser T 10 basic ULTRA-TURRAX®

IKA

Small dispersing instrument for volumes from 0.5 ml to 100 ml (H₂O). It offers a wide speed range from 8000 rpm to 30000 rpm that enables users to work at high circumferential speeds even with small rotor diameters. A broad choice of dispersing elements guarantees a wide range of applications.

- Quick-connect coupling for changing dispersing elements easily
- Ideal for manual operation due to its light weight and ergonomic design
- Extremely mobile due to direct line power (no transformer required)
- Stainless steel dispersing elements can be cleaned quickly and easily as they can be dismounted without tools
- Plastic disposable dispersing elements are available in two sizes, particularly suitable for PCR analysis
- High performance drive ensures immense speed stability
- Quiet operation

Dispersing heads must be ordered separately.

1 Homogeniser T 25 digital ULTRA-TURRAX®

High-performance dispersing instrument for volumes from 1 to 2000 ml (H_2O) with digital speed display. It offers a wide speed range from 3000 to 25000 rpm that enables users to work at high circumferential speeds even with small rotor diameters. A broad choice of dispersing elements adds versatility. Applications ranges from homogenizing waste water samples, use in laboratory reactors, dispersion tasks under vacuum/pressure and sample preparation in medical diagnostics.

- Digital speed display
- Electronic speed control
- Electronic overload protection
- Stainless steel dispersing elements can be cleaned quickly and easily
- Plastic disposable dispersing elements are available in two sizes
- Error code display
- Quiet operation

Dispersing heads must be ordered separately.

Homogenisers T 25 easy clean digital/T 25 easy clean control

High-performance homogeniser with electronic speed control and a large variety of dispersing heads for many fields of applications. In combination with an IKA laboratory reactor it is also possible to conduct dispersion tasks under vacuum or pressure.

IKA

- Quick and easy cleaning of the dispersing tools, no disassembling required
- Brushless motor guarantees dust-free and silent operation
- USB interface for control and documentation via labworldsoft®
- Timer/counter function
- Increased safety through tool recognition and IP-Code

T 25 easy clean control, additionally:

- Integrated temperature measurement for permanent monitoring of the medium temperature
- Remote control with WiCo

Dispersing heads must be ordered separately.

All existing S 25 dispersing elements are compatible with T 25 easy clean digital.

Specifications

Motor rating input/output:	500/400 W
Working volume range (H:O):	1 ... 2000 ml
Viscosity max.:	5000 mPas
Speed range:	3.000 ... 25.000 rpm
Speed display:	LED
Speed control:	stepless
Noise without element:	70 dB(A)
Extension arm diam.:	13 mm
Dimensions (W x D x H):	89 x 161 x 270 mm
Weight:	3.0 kg
Power supply:	220 ... 240 V, 50 ... 60 Hz

1 High-power homogeniser T 50 digital ULTRA-TURRAX®

1

Powerful dispersing instrument for volumes from 0.25 to 30 l (H₂O) with digital speed display.
It offers a wide speed range from 500 to 10000 rpm that enables users to work at high circumferential speeds even with small rotor diameters. A broad choice of dispersing elements guarantees a wide range of applications. Reproducible operations due to constant speed even with changes in viscosities.

- Digital speed display
- Electronic speed control
- Electronic overload protection
- Stainless steel dispersing elements can be cleaned quickly and easily
- Smooth start
- Error code display

Dispersing heads must be ordered separately.

Ultrasonic homogenisers SONOPLUS HD 2000

Suitable for homogenising, deagglomerating, emulsifying, suspending, accelerating chemical reactions or disruption of cells, bacteria, fungi or spores. The devices of the SONOPLUS HD 2000 series are characterised by optimised process times and quickly available reproducible results.

- LC display for amplitude, pulse level and time
- Pulse mode, AMPLICHRON®-circuit
- Batch mode/sequencing
- Interference suppression

Also available for medicine products according to the guideline for in-vitro-diagnostica 98/79/EG.

1 Ultrasonic homogeniser, SONOPULS HD 2070.2

For volumes 1 to 200 ml. Ready-to-operate set for volumes from 2 to 50 ml consisting of:

- HF generator GM 2070.2
- Ultrasonic converter UW 2070
- Standard horn SH 70 G

NEW

Bandelin

To reduce the noise level when sonicating samples with an ultrasonic homogeniser. The lower part of the interior and the removable bottom tray are made of stainless steel and are therefore chemically resistant and easy to clean.

- Noise reduction of up to 30 dB-AU
- LED interior lighting
- Acrylic glass window
- With effective ventilation system
- With opening (40 x 70 mm) for cooling tubing, sample circulation or the SONOPULS temperature sensor on the back
- Removable bottom tray
- Easy retrofitting for use with sonotrodes or cup booster possible

The stand HG 40 is required to attach the ultrasonic converter. Please order separately.

5 Gravimetric dilutor DiluFlow®, 1 or 2 pumps

All stainless steel with a new design, ultra-low profile for easy use under laminar flow.

interscience

- Available in 1 or 2 pumps.
- Quick and accurate
- Compact and user-friendly
- RS232 output for LIMS and printer, USB

Supplied with

1 BagOpen® 400 DiluFlow®, 1 fixed arm, 1 power cord, 1 ø 6.4 mm tubings set per pump for GL45 bottle, 1 drip tray, 1 user's manual, guarantee

Specifications

Range:	from 0.1 g to 3000 g
Dilution Precision:	> 98 %
Dimensions (W x L x H):	310 x 415 x 400 mm
Weight:	10.5 kg

Type	PK	Cat. No.
DiluFlow® with single pump	1	9.569 991
DiluFlow® with double pump	1	9.569 992

Laboratory mixer, BagMixer® 400

For sample preparation with easily adjustable paddle system. The BagMixer® is available in 3 sizes and blends all sample types prior to their microbial analysis. Thanks to their unique adjustable paddle system the blending chamber can be adjusted to the sample volume. Combined with the variable speed, a higher bacterial recovery rate is achieved. All BagMixer® units are fitted with a timer. Constructed in stainless steel. The fully opening door enables easy cleaning.

Laboratory mixer, BagMixer® 400Series S

BagMixer® 400 S/400 SW are a new generation of lab blenders, silent, easy-to-use and with sturdy design.

interscience

With a significantly lower noise level during mixing, it is suitable for all types of laboratory applications. For high bacterial extraction. No cross contamination with sterile homogenizer filter bags.

BagMixer® 400 S without viewing window, **BagMixer® 400 SW** with viewing window.

- Silent mixing with less than 48 db
- Homogenization of the samples in 60 sec.
- LiquidSensor detects leaking bags
- 4 adjustable speeds
- Digital operating display
- LightCode system indicates the mixed state by coloured light
- White LED light illuminates the mixing chamber

All units have a 3-year warranty and life guarantee for shock absorbers and window door.

GENERAL CATALOGUE EDITION 21

Blender bags, BagSystem®

These gamma-ray sterilized bags have a high mechanical stability and ensure safety for the samples.

interscience

The filters inserted in the bags filter the liquid during sample preparation (washing process) and retain sample particles.

BagLight®: Bag without filter, for all microbiological laboratory applications.

BagLight® Multilayer: Like BagLight® with strong multilayer film.

BagLight® Multilayer U: Like BagLight® with strong multilayer film and U-bottom.

BagPage® and BagPage®+: Homogenizer bag with a micro-perforated filter that extends over the entire width of the sample bag (full-size filter).

BagPage® R: Like BagPage® with non-woven filter.

BagPage® F: Like BagPage® for flow cytometry.

BagPage® XR: Like BagPage® extra resistant.

BagFilter® P: Bag with non-woven filter (side filter). Removal of the filtered solvent with BagPipet®. With pre-cut for pipetting.

BagFilter® Roll: Bag with non-woven filter (side filter). With waterproof quick-closure by resealable sticker.

BagFilter® Pipett: Bag with non-woven filter (side filter). With resealable pipette access for micropipettes.

BagFilter® Pipet & Roll: Bag with non-woven filter (side filter). Combines the resealable Pipette access with waterproof quick-closure.

2 Glass Stirrer Bearings, PTFE

Combination of a borosilicate glass piece with ground joint, an interior PTFE shaft guide with integrated special gasket and a GL screw cap made of PPS. The special gasket made of PTFE and an FPM o-ring which is compressed by a GL screw cap provide a good sealing of the stirrer shaft. This gasket can be exchanged after wearing. Suitable for vacuum, perfect bearing for stirrer shafts made of stainless steel, glass and for BOLA Stirrer Shafts.

3 Stirrer Bearings, PTFE

The sealing rings on these bearings ensure a perfect sealing. The ground joint no longer sticks, BOLA the danger of breaking is reduced and the cone can be removed easily from the socket. A special gasket made of PTFE and an FPM o-ring which is compressed by a GL screw cap provide a good sealing of the stirrer shaft. This gasket can be exchanged after wearing. Suitable for vacuum, perfect bearing for stainless steel, glass and BOLA Stirrer Shafts.

Distillation, synthesis/Distillation-Accessories

GENERAL CATALOGUE EDITION 21

1 Air regulator Type HM-2

For tubes: 8 mm to 15 mm diameter, 6mm to 12.5 mm diameter

For air-leak capillary tubes. Acts as a fine regulation valve (needle valve). Plastic body. Brass needle with fine thread.

Type	PK	Cat. No.
HM-2	1	9.194 011

2

2 Boiling stones, Type A

Developed for use in preparatory work. For distillation and reflux in aqueous, neutral and alkaline solvents, even under a vacuum. Effective in even the smallest volumes of liquid and after multiple interruptions. Prevents any bumping. Natural product.

Capacity g	PK	Cat. No.
250	1	9.012 306

3

3 Boiling stones, Type B

Specifically for analytical work. Can be used for distillation in a clean, neutral and basic environment. Not suitable for vacuum distillation. Effective in the smallest amounts of liquid, also after multiple distillations. Prevents "bumping". Ceramic product with relatively high level of purity and abrasion resistance.

Capacity g	PK	Cat. No.
200	1	9.012 307

4

4 Boiling stones behrotest®

behrotest® boiling stones are made from a ceramic material. Compared to conventional boiling stones made of glass, they provide optimum protection against defervescence due to their porosity and their shape, even with badly blended samples. behrotest® boiling stones are chemically pure and guarantee unadulterated results when determining the COD, the Kjeldahl nitrogen etc.

Capacity g	PK	Cat. No.
100	1	9.920 710

5

5 Boiling chips, type Resistant

Developed for preparatory and analytical purposes. Suitable for biochemistry, biotechnology, microbiology, microanalysis. Can even be used in strong acids and alkalis, and in all solvents and oxidants. Suitable for vacuum and high-vacuum distillation. Reduces distillation times in rotary evaporators. No abrasion, absorption of substances or solvents. Softening (evaporation) occurs at 2500 °C. Can be sterilised by dry heating. Effective in even the smallest volumes of liquid, even after multiple interruptions. Prevents any bumping. Highly resistant.

Capacity g	PK	Cat. No.
50	1	9.012 308

1 Separating funnels, Squibb-pattern, borosilicate glass 3.3

Safety/overpressure valves, with spring loaded spherical ground joint seal

When laboratory ground devices are used under vacuum or/and slight overpressure, the use of this combined overpressure safety valve can be recommended. These valves act as immediately closing safety valve under vacuum and they allow under overpressure the visual control of the bubble formation in the blocking liquid. The real sealing is effected by a special designed spherical ground joint (cup and ball) on which an adjustable spring power acts. It is supported by a free to chose blocking liquid which should be higher viscous for vacuum operations. The sealed climbing tube at the spherical ground cup serves as a guide and prevents that the liquid climbs back into the apparatus.

4 NS-Glass stoppers, hollow borosilicate glass 3.3

Manufactured from borosilicate glass 3.3 which is resistant to heat and almost all chemicals.

ISOLAB

They meet the highest quality standards according to DIN 12252. Lower closed end of stopper features a "drip-tip" to ensure adhered liquid is returned to the flask. Hexagonal flat head prevents the stopper from rolling and allows stopper to be stood on end preventing contamination of the ground surface.

Distillation, synthesis/NS joints accessories

1 Sealing tape, PTFE

For covering areas which require protection against chemicals of all types at temperatures of -150 to +260 °C.
Non-swelling. Easy loosening of seams even after continuous operation. Supplied in rolls as outlined below.

Width mm	Length cm	Wall thickness mm	PK	Cat. No.
12.8	670	0.1	1	9.404 952
24.0	670	0.1	1	9.404 955

1

2 BUDDE - joint grease

For all glass joints. Transparent, vacuum tight, water washable and water soluble.
Maintains practically the consistency between -30 °C and +200 °C, non-solidifying.
Compatible with most elastomers. Tube of 80 g.

Weight g	PK	Cat. No.
80	1	9.116 950

2

Silicone high vacuum grease

Temperature stable and can be used up to 10^{-6} , from -40 to approx. +150 °C, at temperatures above +200 °C the silicone grease polymerizes and begins to outgas. Tube of 100 g.

Type	PK	Cat. No.
Low viscous	1	9.116 901
Medium viscous	1	9.116 911
Highly viscous	1	6.286 771

3

4 Joint grease, K.W.S

Without silicone. Designed as vacuum and high vacuum grease. No silicone derivatives, polymerisation or gumming.
Excellent adhesion and viscosity. Acid/alkaline resistant. Locked joints can be loosened by brief, gentle heating.
Can be used to make temporary glassware repairs. Biodegradable. Non-toxic in normal use.

Working temperature range: -40 ... 200 °C, to 10^{-5} mbar
Vapour pressure: 0.00001 mbar.

Capacity ml	PK	Cat. No.
30	1	9.116 924

4

5 Rotating joint grease, silicone-free, Alsirol

Silicone-free stopcock grease. No silicone derivatives, polymerisation or gumming. Excellent adhesion and viscosity.
Stable grease film enables safe, long term use. Low heat-up occurs during rotation even if operation is continuous.
When sealing glassware systems with glass and metal stirrers and shafts Alsirol protects rotating, precision-ground
sockets and stirring shafts against glass abrasion. Also suitable for lubricating rotating metal and glass components.
Acid and alkali resistant. For use under vacuum and high vacuum. Biodegradable. Non-toxic in normal use.

Working temperature range: -40 to +200 °C
Vapour pressure: 0.00001 mbar

Capacity ml	PK	Cat. No.
50	1	9.116 925

Rotary Evaporator RV 3

The new RV 3 is the ideal entry-level model of the IKA rotary evaporator portfolio. Thanks to specially designed glass guides, the vertical condenser makes extremely efficient use of the 1500 cm² cooling surface.

- 4L water heating bath with digital temperature display and carrying handles
- Mechanical lift end-point safety stop
- Locking mechanism: red indicator shows unlocked position of the vapor tube
- Manual lift for precise positioning of the glassware, single-handed, suitable for left and right-handed operators
- Adjustable immersion angle
- Stepless speed setting with dial control and speed display
- Flask clamping mechanism with integrated push-off function for easy exchange of evaporation flasks

IKA

Rotary evaporator RV 10 digital

The RV 10 digital is a robust and reliable lab companion. Its optimized bath volume allows for fast heat-up times. The vertical condenser unit has special designed glass tubes that utilize the 1500 cm² surface extremely efficient. That's why the RV 10 digital delivers reliable and reproducible process results that are usually reserved for more costly systems. Additional features such as smooth start, left-right interval or timer function capability support the user in their daily lab work. Another important aspect of the RV 10 digital are the sophisticated safety features. The motorized lift has an automated lift-out function in case of power outage to prevent superheating of the solvent. Safety temperature circuits can be set individually. Dry-run protection, adjustable lower end stop and lock function of bath setting, complete the line of safety features. Furthermore, IKA offers a choice of coated glassware for increased safety needs. The RS 232 interface allows for remote control via IKAs "labworldsoft". The Heating bath is controlled via the IR interface from the main unit.

- Universal water/oil heating bath
- Motorized lift with "safety-stop" function
- RS 232 and IR Interface
- Optimized heating bath volume for fast heat-up
- Highly efficient 1500 cm² condenser unit
- Ergonomically placed handles on Heating bath
- Left-right interval
- Timer function
- Dry-run protection
- Safety temperature circuits
- Lower-end stop
- Push-off mechanism to loosen tight fitted glassware
- Easy and safe operation due to ergonomical design of the user interface

Scope of supply:

RV 10 digital V: Rotary evaporator RV 10 digital, heating bath HB digital, vertical glassware RV 10.1, vapor tube RV 10.70

RV 10 digital V-C: Rotary evaporator RV 10 digital, heating bath HB digital, vertical glassware, coated RV 10.10, vapor tube RV 10.70

RV 10 digital V FLEX: Rotary evaporator RV 10 digital, heating bath HB digital, Woulf bottle, spherical joint clip RV 05.10, clamp, NS 29 RV 10.88, vapor tube RV 10.70

Rotary evaporators/Instruments

GENERAL CATALOGUE EDITION 21

Rotary evaporator RV 10 auto/RV 10 auto pro

The rotary evaporator RV 10 auto has a bright, high-contrast, TFT, color-graphic control panel, an integrated vacuum controller and a cooling water monitoring. Additional safety for users is provided by individually adjustable temperature safety circuits, protection against boiling dry, adjustable end-point recognition to prevent glass breakage, and a locking function. The USB port or the RS-232 interface enable remote control with the IKA "labworldsoft" software package and an update option with the firmware update tool. Thanks to specially designed glass guides, the condenser makes extremely efficient use of the 1500 cm² cooling surface.

The Rotary evaporator RV 10 auto pro rotary evaporator is fitted with the full-automatic vacuum pump VACSTAR digital. This enables better automatic detection of the solvent boiling point. The Vacstar digital is controlled directly from the drive unit of the RV 10 auto via the data cable provided.

- Integrated solvent library with 40 preset solvents and expansion option
- Optimized heating bath volume for rapid achievement of working temperature
- Programming option for up to ten individual procedures
- Smooth start
- Right or left rotation
- Timer function
- Coated flask and condenser as an option
- Automatic vacuum management
- Motorized lift with "safety-stop" function

1 Rotary Evaporator RC 600/RC 900

RC 600

Fit for purpose

All functions operated centrally via membrane keypad providing exceptional ease of use

Comprehensively robust

Device design and details were especially developed for intensive use

Safe and compact

Cordless heating bath with pour spout, fixed tube guide, easy flask exchange - typical hazards eliminated thanks to well thought out safety features

RC 900

Sleek design, minimum footprint

The RC 900 takes up very little space and offers maximum ease of use

Whisper quiet for a pleasant working environment

The lift and rotation of the RC 900 are virtually silent

Versatile use, simple operation

The system offers central remote control for all functions, and operation via touchscreen and control knob. Stepless adjustable flask inclination.

2 Rotavapor® R-100

2

The Rotavapor® R-100 is a high-quality rotary evaporator to meet the essential needs in classical laboratory applications. It is capable of a manually adjusting the rotation speed from 20 to 280 rpm and is equipped with an action jack lift for manual lifting of the evaporating flask.

Heating Bath B-100

Temperature range of 20 °C to 95 °C. Max. evaporating flask size: 4000 mL (3 kg).

Digital display of set and actual temperature (alternating).

Standard Joint

SJ 29/32

Glass Assembly

Option V: Vertical condenser(V): Vertical condenser used along with a recirculating chiller or tap water.

Option C: Cold trap (C): Cold trap used for low boiling solvents along with e.g. dry ice for cooling.

Protective Coating

Option 1: Without coating

Option 2: Transparent PLASTIC+GLAS (P+G) safety coating. Protect against mechanical damage.

In the event of breakage there is no loss of sample.

2 Rotavapor® R-100 with vertical glass assembly

Heating bath B-100, manual lift.

GENERAL CATALOGUE EDITION 21

Rotary Evaporator Rotavapor® R-300

The rotary evaporator R-300 meets the highest needs in convenience, productivity and versatility. The rotation speed, heating temperature and lift position is shown digitally on the integrated display. Automatic change of the direction of rotation programmable.

Lift System

- Option 1: Manual lift
- Option 2: Electronic lift

Heating Bath

Option 1: B-301. Temperature range of 20 °C to 95 °C (water). Max. evaporating flask size: 1000 mL (3 kg). Cordless connection.

Digital display of set and actual temperature, rotation speed, lift position. Lock of heating temperature. Fast heat up time.

Option 2: B-305. Temperature range of 20 °C to 220 °C. Max. evaporating flask size: 5000 mL (3 kg). Cordless connection.

Digital display of set and actual temperature, rotation speed, lift position. Lock of heating temperature.

Standard Joint

SJ 29/32

Glass Assembly

Option V: Vertical condenser (V): Vertical condenser used along with a recirculating chiller or tap water.

Option C: Cold trap (C): Cold trap used for low boiling solvents along with e.g. dry ice for cooling.

Other glass assembly configuration on request

Protective Coating

Option: Transparent PLASTIC+GLASS (P+G) safety coating. Protect against mechanical damage.

In the event of breakage there is no loss of sample.

Rotary Evaporator Hei-VAP Core

- Available as hand or motor lift
- Clear digital display for monitoring the current values and separate button to display the set values
- Two separate operating knobs for adjusting the rotation speed and heating temperature with LED ring light system for activity indication
- Activated lock feature prevents inadvertent adjustments
- Residual heat indicator when >50 °C
- Standby button stops all functions and lifts the evaporator flask out of the heating bath on motor lift models
- Ergonomically optimized heating bath handles sit securely in your hand
- Easily adjust immersion depth up to 155 mm and the tilt angle of the evaporating flask from 20° to 80°
- Grease-free operation thanks to innovative sealing technology
- Ventilation cap with PTFE inlet and free of ground joints. Optionally available with replenishment valve
- Optional cable extension. The operating panel can be detached for use outside closed fume hoods

Heidolph

Scope of supply: Flask clamp Easy-Clip, vapour tube, ventilation cap, heating bath, 1-l receiving flask, 1-l evaporating flask.
Supplied condenser as indicated.

3 4 5 Mini centrifuge LLG-uniCFUGE 3 with timer and digital display

A compact and reasonably priced mini centrifuge with brushless and non-wearing high-efficiency motor. Stepless speed adjustment from 0 to 6000 min⁻¹. Microprocessor controlled regulation for load-independent accuracy and integrated imbalance control. Integrated timer (0 - 25 minutes) and high speed constancy for reproducible results. Quick stop when the lid is opened. 2 flow-optimised rotors for 8 x 1.5/2 ml or 16 x 0.2 ml tubes reduce noise level and heat generation. Supplied with suction feet for a stable operation.

The following types of vessel can be used:

- 8 x 1.5 ml micro tubes
- 8 x 2 ml micro tubes
- 16 x 0.2 ml micro tubes

By using the fitting adapter:

- 8 x 0.4 ml micro tubes
- 8 x 0.5 ml micro tubes

Scope of supply: Centrifuge, rotor for 8 x 1.5/2 ml tubes, rotor for 16 x 0.2 ml tubes, adapter for 8 x 0.2/0.4/0.5 ml tubes

4

Specifications

Max. RCF:	2000 x g
Max. speed:	variable up to 6000 min ⁻¹
Motor:	brushless DC motor
Max. load:	8 x 1.5/2 ml or 16 x 0.2 ml PCR tubes
Timer:	0 ... 25 min, continuous
Dimensions (diam. x H):	160 x 116 mm
Weight:	1.1 kg
Power supply:	100 ... 240 V, 50/60 Hz
Warranty:	3 years

5

1 2 Mini centrifuge LLG-uniCFUGE 5 with timer and digital display

Fixed angle rotor with lid, made of aluminium for 12 x 1.5/2 ml tubes with optimised aerodynamics which minimize heat and noise during operation. Operation in RPM or RCF mode possible by simple switching. Short-Spin mode with selectable RZB and RPM values. **Large LCD (3.9") display** with intuitive interface. **Integrated imbalance-detection** with automatic shutdown. Wide suction feet provide a stable base. The centrifuge can be controlled via computer by using the included software that can store up to 99 user-defined programmes. Operational record output to Excel.

1

The following types of vessel can be used:

- 12 x 0.2 ml PCR tubes
- 12 x 0.4 ml centrifuge tubes
- 12 x 0.5 ml centrifuge tubes
- 12 x 1.5 ml centrifuge tubes
- 12 x 2.0 ml centrifuge tubes

Scope of supply: Centrifuge with rotor for 12 x 1.5/2 ml tubes, power supply with USB cable, 12 Adapters for 0.4/0.5 ml tubes, 12 Adapters for 0.2 ml tubes, Allen wrench with T handle, Software CD

Optional:

- Rotor for 16 x 0.2 ml tubes or 2 x 8 PCR-stripes (Cat. No. 6.263 535)

2

3 Mini Centrifuge C1601

NEW

Labnet

Once sample area is loaded and the lid is closed, the rotor rapidly accelerates to 6000 rpm.
Ideal for bringing small droplets to the bottom of tubes for micro-filtrations or basic separations.

- Quick release rotor system, no tools needed to exchange rotors
- Electronic braking, for rapid deceleration
- Dual lid switch
- Compact, rugged design

Scope of supply: Mini Centrifuge C1601, Rotor for 8 x 1.5/2.0 ml tubes, Rotor for 4 x 8-strip tubes, individual adapters for 0.2 ml, 0.25 ml and 0.5 ml tubes, fits in rotor 6770-RT, power adapter 24 V

Specifications

Max. RCF:	2000 x g
Max. speed:	6000 rpm
Max. capacity:	8 x 1.5/2.0 ml or 4 x 0.2 ml strips
Dimensions (W x D x H):	172 x 147 x 122 mm
Power supply:	100 ... 240 V, 50/60 Hz

GENERAL CATALOGUE EDITION 21

1

1 Mini-centrifuge mini G

Mini-centrifuge for all applications which do not require high speeds, e.g. micro-filtrations and cell separation. Transparent cover allows constant observation of centrifuge. The mini-centrifuge can be used for both PCR-vessels and PCR-strips. As a safety feature, the centrifuge will run only when the lid is closed. Lid opens easily with the press of a button.

IKA

- Fixed speed of 6000 rpm
- Digital timer adjustable from 1 to 99 min
- Integrated quick stop
- Fast start-up of speed
- Compact design and quiet operation
- Rotor exchangeable without tools
- Easy operation with touch keypad

Specifications

Max. RCF:	2000 xg
Max. speed:	6000 rpm
Max. capacity:	8 x 2.0 ml
Timer:	1 to 99 min
Power consumption:	12 W
Dimensions (W x D x H):	155 x 175 x 105 mm
Weight:	1.4 kg

2

2 3 4 Mini-Centrifuge Sprout®/Sprout® plus

New SnapSpin™ rotors - a new approach to compact centrifuge use! Introducing the next generation of the Sprout® mini-centrifuge loaded with new features for increased efficiency in the lab. Two new SnapSpin rotors (a six-place standard rotor and an eight-place strip rotor) snap-in and out for fast and easy changes! Plus, two sets of adapters accommodate all major microtube and PCR® tube styles (2.0, 1.5, 0.5, 0.2 mL) for customized use. The Sprout is ideal for microfilter cell separations and HPLC samples. With most spins lasting around 20 seconds, the ergonomically designed lid is specifically designed to fit in the palm of your hand for easy repeat opening and use. Made with UV resistant plastic.

Heathrow Scientific

Operation is now faster and easier: Snap in rotor, load and close. For repeated spins, simply close the lid to reactivate. An internal safety switch ensures the Sprout will not operate without the lid open.

Small size offers minimal benchtop space and removable cord for compact storage.

- Low noise and vibration
- Small size
- Quick Spin feature for short spins.
- Numbered tube positions
- Unit will not operate without lid in place
- Power Adapter with power cords for worldwide usage

3

Sprout® plus additionally with:

- Locking lid for added protection when the unit is in use
- Larger lid to accommodate longer and skirted tubes and taller tube lids

Scope of delivery:

- Two easy change, tool-free rotors. 1. Circular, one-size rotor for six 1.5- and 2.0 ml tubes or use with adapters to spin six 0.5 ml tubes. 2. Strip rotor for two 8 x 0.2 ml PCR tube strips or 16 x individual 0.2 ml PCR tubes. Six 0.2 mL and six 0.5 mL adapters for customized use.
- Storage Case, PP - Keeps rotors and adapters contained and dust-free
- Tube Rack, PP - Convenient for handling samples before and after quick spins. For 16 x 2.0/1.5 ml micro centrifuge tubes (diam. 12 mm).
- 4 replacement lid o-rings

4

Specifications

Max. RCF:	2000 xg
Max. speed:	6000 rpm
Max. capacity:	6 x 1.5/2.0 ml tubes or 2 x 8-strips PCR
Power consumption:	7.3 W
Dimensions (W x D x H):	128 x 153 x 104 mm
Weight:	1.45kg
Power supply:	100-240 VAC, 50/60 Hz, 0.6 A

6. Distillation, separation, filtration

Separating, centrifuging/Minicentrifuges

1 2 3 Centrifuge/vortexer, Combispin PCV-2400

Combined centrifuge/vortex mixer for microtubes and 0.2 ml strips. For independent centrifuge and vortex mixing, or mixing of an individual tube concurrently with spinning of multiple tubes. The vortex cup, located at the top of the central shaft, emerges through an opening in the closed lid. In spin-mix-spin applications, the Combispin can be used with very low reagent volumes.

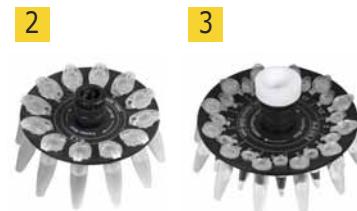

- Continuous operation or short spin
- Further rotors on option: 8 x 1.5/2.0 ml + 8 x 0.5 ml microtubes or 6 x 1.5/2.0 ml + 6 x 0.2 ml microtubes or 2 x 8-well 0.2 ml stripes

Scope of supply: Centrifuge, rotor for 12 x 1.5 ml tubes, rotor for 12 x 0.5 ml + 12 x 0.2 ml tubes

Specifications

Max. RCF:	700 x g
Max. speed:	fixed at 3500 rpm
Max. capacity:	12 x 1.5 ml or 12 x 0.5 ml + 12 x 0.2 ml or 2 x 8-well strips 0.2 ml
Power consumption:	11 W
Dimensions (W x D x H):	190 x 235 x 125 mm
Weight:	2.1 kg
Power supply:	120 ... 230 VAC, 50/60 Hz, 12 VDC

Type	Description	PK	Cat. No.
PCV-2400 incl. 2 rotors		1	9.721 001

4 Centrifuge Multi-spin PCV-6000

Combined centrifuge/vortex mixer for microtubes and 0.2 ml strips. For independent centrifuge and vortex mixing operations, or a programmable sequence of spin and mix phases of multiple tubes.

- Vortex mixing intensity: three stage adjustment (soft, medium and hard)
- Interchangeable rotors for 2.0 ml, 1.5 ml, 0.5 ml, 0.2 ml microtube combinations and 0.2 ml strips
- Timed vortex mixing: 1 sec to 20 sec
- Supplied with 2 rotors: 12 x 1.5/2.0 ml and 12 x 0.5 ml plus 12 x 0.2 ml

Specifications

Max. RCF(bottom of tubes)	2350 x g
Max. speed	6000 rpm
Max. capacity:	12 x 1.5/2.0 ml or 12 x 0.5 ml plus 12 x 0.2 ml or 2 x 0.2 ml strips of 8
Spin Timer	1 sec to 30 min
Power consumption	24 W
Dimensions (W x D x H):	190 x 235 x 125 mm
Weight:	2.5 kg
Power supply:	100 - 240 V, 50/60 Hz
Input voltage	24 V

PCV-6000 Centrifuge Multi-spin		1	9.721 004

5 Centrifuge CVP-2

The CVP-2 enables the simultaneous sample preparation of multiple samples at one time. Versatile through being able to hold non-, semi- and fully-skirted PCR plates with no additional accessories required.

- Centrifuge and vortex mixer combined for significant time saving
- Independent vortex and centrifuge timers with up to 999 cycles
- Adjustable rpm or 4 programmable presets
- Consistent preparation of up to 192 samples continuously

Specifications

Max. RCF:	245 x g
Max. speed Centrifuge/Vortexer:	300 to 1500 rpm/300 to 1200 rpm
Max. capacity:	2 PCR plates
Timer Centrifuge/Vortexer:	0 to 30 min/0 to 60 sec
Power consumption:	24 W
Dimensions (W x D x H):	285 x 350 x 190 mm
Weight:	approx. 6 kg
Power supply:	100 - 240 V, 50/60 Hz
Input voltage:	24 V

GENERAL CATALOGUE EDITION 21

1

1 Minicentrifuges MiniSpin® and MiniSpin® plus (General Lab Product)

The powerful and user-friendly MiniSpin® and MiniSpin® plus microcentrifuges are extremely compact and have a small footprint. Depending on your needs, you can choose between two models. MiniSpin® plus provides the speed required for molecular biology separations.

Eppendorf AG

- Especially quiet due to its carefully balanced drive
- Maintenance-free motor
- Clear digital display
- Minimal sample heating (after 20 min. at max. speed only 12 °C max.)
- Separate short-spin button
- Automatic lid opening
- Integral power supply unit
- Capacity: 12 x 1.5/2 ml containers
- Autoclavable rotor (121 °C, 20 min.)
- Start-up/slow-down time less than 13 secs. (to/from max. speed).

Additional features of MiniSpin®

- Includes standard anodised aluminium rotor
- Timer can be set for up to 30 minutes

Additional features of MiniSpin® plus

- Includes "Black Line" aluminium rotor
- Speed/rcf display switch
- Timer can be set for up to 99 minutes
- Permanent centrifuging option

This centrifuges are General Lab Products for research purposes.

1 General purpose centrifuge LMC-3000

NEW
Grant

1

Low speed benchtop centrifuge for biomedical applications with changeable rotors for accommodating centrifuge tubes (10 to 15 ml or 50 ml) or standard 96-well microtitre plates. Suitable for a wide range of analytical applications including biomedical, bio-organic and immunoenzyme analysis.

- Easy set-up of spin speed and time via 2-line LCD display and push buttons
- Powerful and quiet motor (59.4 dBA) with soft start-up and run-down function
- Timer with automatic switch-off
- Automatic imbalance switch-off
- Lid lock when centrifuge is running
- Sturdy metal housing and lid
- Compact design with small footprint

Please order rotors separately.

Specifications

Max. RCF tubes/microplates:	1700 x g/560 x g
Max. speed tubes/microplates:	100 ... 3000 rpm/100 ... 2000 rpm

NEW
Grant

2

Refrigerated Centrifuge for temperature control of biomaterial during cell suspension separation. For use in incubators and closed laboratory rooms. It ensures conditions necessary for reproducibility of sample preparation stage connected with cell destruction and extraction of its heat-labile components (metabolites, enzymes, hormonal factors, cytokines, etc.). With changeable rotors for accommodating centrifuge tubes (10 to 15 ml or 50 ml) or standard 96-well microtitre plates.

- Easy set-up of spin speed and time via 2-line LCD display and push buttons
- Powerful and quiet motor (65 dBA) with soft start-up and run-down function
- Timer with automatic switch-off
- Automatic imbalance switch-off
- Lid lock when centrifuge is running
- Sturdy metal housing and lid
- Compact design with small footprint

Please order rotors separately.

Microcentrifuge Prism™/Prism™ R

Operation can be timed, continuous or momentary, using the "quick" button. Vibration free operation is ensured by an isolation system. In the event of a significant imbalance, operation of the centrifuge is automatically stopped. Deceleration at the end of a run is very quick, but will not disrupt samples. Supplied with a uniquely designed 24 x 1.5 ml/2.0 ml rotor that allows easy access to the tops of the sample tubes. Individual tube slots in the solid aluminum rotor support tubes along their length and contain the sample in the event of tube failure. The rotor is seated on a tapered shaft which facilitates easy removal for cleaning and autoclaving.

Labnet

Adapters for smaller tubes and PCR strips -please order separately.

Benchtop centrifuge Sigma 2-7

Innovative LED running indicator, with blue light

Sigma-Laborzentrifugen

- Clearly organised display
- Large buttons
- Motorised lid lock for easy, effortless operation
- Low noise level, 55 dB(A) at maximum speed
- Corrosion-resistant, easily cleaned stainless steel drum
- Automatic method for serum tubes
- 10 program memory slots
- Low temperature rise in continuous operation
- Zero-maintenance motor
- Two acceleration and braking curves: soft and fast
- Compact device fits on every lab bench
- Imbalance monitoring and shutdown
- Overspeed monitoring
- Window in lid for independent speed measurement
- Manufactured in compliance with EN 61010-2-020

Please order rotor separately. Further adapters for beakers on request.

Specifications

Laboratory centrifuge Sigma 2-16P/2-16KL

Available as uncooled (Sigma 2-16P) and cooled (Sigma 2-16KL) model.

Sigma-Laborzentrifugen

- Universal laboratory centrifuge for swing-out and fixed-angle rotors
- Spincontrol Universal
- Backlit Start, Stop, and Lid Open buttons
- Sedimentation in swing-out vials up to 4 x 100 ml or up to 20.000 x g in fixed-angle rotor
- Zero-maintenance brushless drive
- Selectable speed up to 15.000 rpm
- Low-speed operation down to 100 rpm also possible
- Rotor identification prevents overspeed operation
- Stainless-steel centrifuge bowl
- Imbalance switch
- Easy lid opening with gas spring support
- Window in lid for independent speed checking
- Produced in compliance with the latest national and international standards (e.g. EN 61010-2-020)

Cooled centrifuge Sigma 2-16KL

- Spincontrol L
- Universal laboratory centrifuge with speed range up to 15.300 rpm
- Rotor cooling also possible at standstill; CFC-free refrigerant

Please order rotor separately. Further rotors available on request.

1 Microlitre centrifuge Z 167 M

The Z 167 M is ideally suited for the routine centrifugation of reaction tubes. Equipped with a powerful drive, it accelerates the 18 x 1.5/2.0 ml rotor in a very short time to approx. 16.000 xg. Color visual representation of the operating state such as standstill, sleep mode or centrifugation.

- Microprocessor with large LCD display
- Electromagnetic lid lock
- Active imbalance identification and cut-off
- Air Cooling System
- Permanent indication of pre-set and actual values
- Storage of up to 99 runs
- Noise level < 57 dBA, at max. speed
- Splash-proof foil keyboard with touch function
- Manufactured in accordance to International Safety Regulations, i.e. IEC 61010

Scope of supply: Microlitre centrifuge Z 167 M incl. angle rotor for 18 x 1.5/2.0 ml

Specifications

Max. RCF:	15.994 xg
Max. speed:	14.000 rpm
Max. capacity:	18 x 1.5/2.0 ml
Timer:	59 min 50 s/10 s increments 99 h 59 min/1 min increments
Power consumption:	130 W
Dimensions (W x D x H):	280 x 350 x 240 mm
Weight:	12 kg
Power supply:	230 V, 50/60 Hz

Description	PK	Cat. No.
Microlitre centrifuge Z 167 M incl. angle rotor for 18 x 1.5/2.0 ml	1	4.665 708

1

2 Microlitre centrifuge Z 216 M/Z 216 MK

The Z 216 M and Z 216 MK are setting new standards in this centrifuge class. Capable of centrifuging up to 44 x 1.5/2.0 ml at each run. Due to their compact design and quiet running properties they are fitting perfectly in their working area. The powerful refrigeration system of Z 216 MK keeps samples at temperatures as low as 4 °C during a continuous run at 20000 xg.

- Maintenance-free induction drive
- Microprocessor with large LCD Display
- Motor driven lid lock
- Active imbalance-identification and cut off
- Standstill cooling
- Audible signal at the end of each run
- Rapid acceleration and deceleration (see rotor data)
- Lowest sample temperature 4 °C at 20000 xg
- Noise level < 60 dBA at 20000 xg
- Extremely compact with a space saving footprint
- Quick access to samples with a snap on lid
- Aerosol tight rotor option
- Manufactured according to international safety regulations, i.e. IEC 61010
- Distinct control panel

GENERAL CATALOGUE EDITION 21

1

1 Microliter Centrifuge Z 207 M

The Microliter Centrifuge, Z 207 M was designed specifically for small, compact spaces, suitable in any laboratory setting. Option for two different rotor types: a Fixed-angle rotor for 24 x 1.5/2.0 ml (also hermetically sealed available) and a rotor for Spin Column Kits. Distinct control panel "Touch" function for easy operation, also with gloves. Optimum air cooling of the samples even at maximum speed.

Hermle

- Maintenance-free induction drive
- Rapid acceleration and deceleration
- Noise level below 60 dBA at 17.317 x g
- Microprocessor with large LCD Display
- Active imbalance-identification and cut off
- Audible signal at the end of each run
- Quick access to samples with a snap on lid
- Manufactured according to international safety regulations, i.e. IEC 61010
- Quick-key for short runs
- Storage of up to 99 runs

Without rotor. Please order separately.

2 Refrigerated high speed centrifuge Z 32 HK

With a wide range of accessories, the Z 32 HK high speed centrifuge is applicable in a wide variety of research settings. In spite of the remarkably small footprint, the Z 32 HK features a powerful refrigeration system capable of maintaining cool sample temperatures even at maximum speed.

Hermle

- Maintenance-free induction drive
- Microprocessor with large LCD display
- Motor driven lid lock
- Automatic rotor identification system with over speed protection immediately upon rotor installation
- Active imbalance identification and cut off rotor specific
- Imbalance tolerant drive
- CFC-free refrigeration system
- A large variety of rotors and accessories
- Manufactured according to international safety regulations, i.e. IEC 61010
- Audible signal at the end of each run with several melody options
- Quick and easy rotor exchange
- Noise level under 60dBA at max. speed
- Distinct control panel

Without rotor. Please order separately.

Universal Centrifuge Z 306

The small, universal laboratory centrifuge offers a wide range of applications, which covers clinical laboratory requirements, research, as well as industrial laboratory use. The Z 306 offers many accessories, including rotors for microtitreplates and high speed fixed angle rotors for reaction vessels or centrifuge tubes up to 50 ml. Additionally, swing out rotors, which hold a volume of 4 x 100 ml can be used with special adapters for tissue culture tubes and also for all common blood tubes.

Hermle

- Maintenance-free induction drive
- Microprocessor with large LCD display
- Lid lock
- Automatic rotor identification system with over speed protection, immediately upon rotor insertion
- Active imbalance-identification and -cut off (rotor specific)
- Imbalance tolerant drive
- Manufactured according to international safety regulations, i.e. IEC 61010
- Audible signal at the end of each run
- Rotor exchange is easy to handle
- Noise level under 63 dBA at max. speed
- Improved ventilation system keeps samples cool
- Stainless steel chamber

Floor-standing centrifuges ZK 496

NEW
Hermle

Refrigerated centrifuges for processing large volumes of up to 4 x 1.000 ml as well as blood bags with a large variety of rotors. Available as Floor-standing or Underbench device. Both devices are equipped with castors for easy handling.

- Maintenance-free induction drive
- Micropocessor with large LCD display
- Motor driven lid lock
- Automatic rotor identification system with over speed protection
- Active imbalance identification and cut off (rotor-specific)
- CFC-free refrigeration system
- A large variety of rotors and accessories
- Audible signal at the end of each run, adjustable melody and volume
- With timer function for starting the centrifuge at a pre-set time
- Manufactured according to international safety regulations, i. e. IEC 61010
- Stainless steel chamber

Please order rotors separately.

1 Microcentrifuge 5418 R (General Lab Product), cooled

Microcentrifuge for standard molecular biology applications. The compact centrifuge with low access height is characterized by extremely quiet operation.

Eppendorf AG

1

- 18 place rotor for 1.5/2.0 ml tubes and Microtainer®
- Lid opens automatically after spinning
- Very small profile, minimal bench space required
- Remarkably silent, even without rotor lid
- Standard, certified aerosol-tight rotor
- Convenient Eppendorf two-dial operation
- Rpm/rcf converter
- Short-spin
- The patented compressor technology reduces vibration to a minimum
- Low access height of 26 cm
- Keeps a constant 4 °C at max. speed
- Fast Temp for rapid pre-cooling of the centrifuge

This centrifuge is a General Lab Product for research purposes.

Specifications

Max. RCF:	16.873 x g
Max. speed:	14 000 rpm
Max. capacity:	18 x 1.5/2.0 ml
Temperature:	0 ... +40 °C
Timer:	30 s to 9:59 h, continuous run
Power consumption:	320 W
Dimensions (W x D x H):	300 x 460 x 250 mm
Weight:	22 kg
Power supply:	230 V, 50/60 Hz

Type	Description	Plug type	PK	Cat. No.
5418 R	incl. Rotor FA-45-18-11	EU	1	4.660 587
5418 R	incl. Rotor FA-45-18-11	UK	1	4.660 588

Online also available as IVD version.

6. Distillation, separation, filtration Separating, centrifuging/Benchtop centrifuges

GENERAL CATALOGUE EDITION 21

1

1 Microcentrifuge 5424 R (General Lab Product), cooled

Suitable for all modern molecular biology applications using Eppendorf and PCR tubes. The microcentrifuge with efficient cooling performance offers high temperature accuracy for maximum sample protection and optimal separation results.

Eppendorf AG

- 24-place-centrifuge for 1.5/2.0 ml tubes
- Lid opens automatically after spinning
- Aerosol tight rotors
- 4 different rotors (available as accessories)
- Very quiet in operation, even without rotor lid
- Choice of analogue dial or membrane keypad control
- Adjustable soft ramp acceleration
- The patented compressor technology reduces vibration to a minimum
- Small footprint and low access height of 26 cm
- Keeps a constant 4 °C at max. speed
- Fast Temp for rapid pre-cooling of the centrifuge, for example, from about 21 °C to 4 °C in 8 mins.

This centrifuges are General Lab Products for research purposes.

Specifications

Max. RCF:	21.130 x g
Max. speed:	15000 rpm
Max. capacity:	24 x 1.5/2 ml
Cooling temperature:	-10 ... +40 °C
Timer:	30 s to 9:59 h, continuous run
Power consumption:	350 W
Dimensions (W x D x H):	290 x 480 x 260 mm
Weight:	21 kg
Power supply:	230 V, 50/60 Hz

Other rotors available on request.

Online also available as IVD version.

2

Microcentrifuge 5425 (General Lab Product)

Non-refrigerated microcentrifuge for common standard applications with a high sample throughput, providing ergonomic comfort and great flexibility with its 6 rotor options.

Eppendorf AG

- Fast acceleration and deceleration (10 acceleration and braking ramps)
- Lower noise level (< 51 dB)
- Small footprint
- Low loading height for comfortable inserting rotor and samples
- Soft touch one-finger closure for ergonomic operation
- Automatic lid opening after running
- Rotor chamber made of stainless steel

This centrifuges are General Lab Products for research purposes.

3

4.661 164

Specifications

Max. RCF:	21.330 x g
Max. speed:	100 ... 2.000 rpm (10-rpm-steps) 2.000 ... 5.000 rpm (50-rpm-steps) 5.000 ... 15.060 rpm (100-rpm-steps)
Max. capacity:	10 x 5.0 ml
Timer:	10 s ... 9:59 h, continuous run
Power consumption:	280 W
Dimensions (W x D x H):	240 x 390 x 240 mm
Weight:	15.6 kg

1 Centrifuges 5702/5702 R/5702 RH (General Lab Product)

These low-speed, universally applicable centrifuges are especially suited for low to medium sample throughput in cell culture applications.

Eppendorf AG

- Compact with small footprint
- Maintenance-free motor
- Dial controls and digital display
- Powered lid locking
- Short braking time
- Automatic lid opening (model 5702 only)
- Rotor bowl made of stainless steel
- Optimized: backwards adjusted air flow for sample cooling

Additional features 5702 R:

- Two programme keys for saving the parameters of two standard centrifugation processes
- Adjustable acceleration rate and braking
- Temperature setting from -9 °C to 40 °C
- Stand-by cooling
- Fast-temp-function

Additional features 5702 RH:

- Software control for precise temperature control (depends on rotor)
- Active heating
- Stand-by heating
- Temperature derivation in stationary state at 4 °C and at 37 °C ±1 °C

This centrifuges are General Lab Products for research purposes.

Specifications

	5702/5702 R/5702 RH
Max. RCF:	3000 x g
Max. Speed:	100 to 4400 rpm (100 rpm steps)
Max. Load:	4 x 100 ml
Power consumption:	200 W // 380 W // 380 W
Temperature setting range:	- // -9 ... +40 °C // -9 ... +42 °C
Dimensions (W x D x H):	320 x 400 x 240 mm // 380 x 580 x 260 mm // 380 x 580 x 260 mm
Height (with opened lid):	530 mm // 600 mm // 600 mm
Weight:	20 kg // 36 kg // 36 kg
Power supply:	230 V, 50/60 Hz

Type	Description	PK	Cat. No.
5702	With rotor A-4-38, with adapter for conical tubes, 15/50 ml, with EU-plug	1	4.660 623

6. Distillation, separation, filtration

Separating, centrifuging/Benchtop centrifuges

GENERAL CATALOGUE EDITION 21

Benchtop centrifuges, 5804/5804 R/5810/5810 R (General Lab Product)

These centrifuges offer a flexible rotor program with a modular adapter system which can accommodate a high variety of tube lengths.

Eppendorf AG

- Ergonomic access height gives comfortable rotor loading
- Low noise level
- Motorized lid lock
- Reliable cooling at maximum speed*
- Imbalance detector
- Automatic rotor recognition logs rotor performance parameters and prevents these being exceeded
- Optional user setting by speed, rcf or radius correction values
- Values can be changed during centrifugation
- Temperature setting from -9 °C to +40 °C*
- Standby cooling*
- Selectable programme memory for up to 34 individual user programmes
- Short-spin function, speed can be preselected
- Fast-cool function* for rapid cooling of the centrifuge chamber
- 10 gentle acceleration and braking profiles for sensitive sample material

This centrifuges are General Lab Products for research purposes.

* Cooled models 5804 R and 5810 R only

1 Benchtop centrifuges 5804/5804 R (General Lab Product)

Eppendorf AG

Specifications

	5804 // 5804 R
Max. RCF:	20913 x g
Max. speed:	14000 rpm
Max. Load:	10 x MTP or 2 x DWP
Power consumption:	900 W // 1650 W
Dimensions (W x D x H):	470 x 550 x 340 mm // 640 x 550 x 340 mm
Weight:	55 kg // 80 kg
Power supply:	230 V, 50/60 Hz

5810 R	With rotor A-4-81, with adapter for conical tubes 15 / 50 ml	EU	1	4.660 659
5810 R	With rotor S-4-104, with adapter for conical tubes 15 / 50 ml	EU	1	4.660 661
5810	Without rotor	UK	1	4.660 646
5810 R	Without rotor	UK	1	4.660 656

Online also available as IVD version.

1 Roll containers, for centrifuges 5804/5804 R and 5810/5810 R

The roll container provides the flexibility to use the centrifuge where it is needed.

Eppendorf AG

- One drawer
- Place for rotors and accessories
- Four castors, two are lockable

Type	Dimensions (W x D x H) mm	PK	Cat. No.
Roll containers	700 x 620 x 450	1	4.656 042

2 Microcentrifuge 5430/5430 R (General Lab Product)

These centrifuges are used with e.g. rotors for Eppendorf Tubes® and PCR strips, rotors for microplates and 15/50 ml conical tubes, as well as a 48-place rotor, a 16-place rotor for Eppendorf Tubes® 5.0 ml and a swing-out rotor (24 x 1.5/2.0 ml).

Eppendorf AG

Microcentrifuge 5430

- 48 place centrifuge for 1.5ml/2.0ml micro test tubes, 6 x 50 ml Falcon® tubes or 2 x MTP plates
- Automatic rotor identification
- 12 different rotors (available as accessories)
- Stores up to 50 routine programs
- Menu guided operation in 4 different languages
- LCD display with backlighting
- Automatic lid opening following application sequence (only 5430)

Microcentrifuge 5430 R, additional features:

- Temp. range: -11 °C to +40 °C
- +4 °C at max. speed with all rotors
- Continues cooling after the centrifugation process
- Fast Temp for achieving required temperature in shortest possible time
- Fast Temp pro for having the centrifuge refrigerated and ready-for-use at your desired pre-set time

This centrifuges are General Lab Products for research purposes.

Specifications

	5430 // 5430 R
Max. RCF:	30.130 x g
Max. speed:	17.500 rpm
Max. capacity:	48 x 1.5/2.0 ml or 6 x 50 ml or 2 x MTP
Cooling temperature:	- // -11 ... +40 °C
Timer:	30 s to 99:59 h, with continuous run
Power consumption:	475 W // 1050 W
Dimensions (W x D x H):	330 x 420 x 250 mm // 380 x 640 x 290 mm
Weight:	29 kg // 56 kg
Power supply:	230 V, 50/60 Hz

Type	Description	Plug type	PK	Cat. No.
5430	Without rotor, with dial setting	EU	1	4.660 611

6. Distillation, separation, filtration

Separating, centrifuging/Benchtop centrifuges

GENERAL CATALOGUE EDITION 21

Benchtop centrifuges 5910 R/5920 R (General Lab Product)

These centrifuges combine a high capacity and versatility. Its main swing-bucket rotor holds both conical tubes and plates, no need to change rotor buckets or adapters. The 5910 R centrifuge has a low access height for easy operation. The 5910 R centrifuge holds standard 1 liter Nalgene® bottles.

Eppendorf AG

- Plate rotor options for centrifugation of all types of MTP, PCR or Deepwell Plates
- Fixed-angle rotors for high-speed molecular biology applications in tubes from 0.2 to 50 ml
- Aerosol-tight Eppendorf QuickLock® caps and lids allow fast and ergonomic lid locking
- Quiet operation (<59 db)
- Compact footprint
- Automatic rotor recognition and imbalance detection
- FastTemp function for quick pre-cooling and FastTemp pro® function for automatic precooling based on pre-programmable time and date
- Standby cooling function holds temperature when centrifuge is not in use
- ECO shut-off engages after 8 hours (adjustable)

This centrifuges are General Lab Products for research purposes.

1 General purpose centrifuge Megafuge ST4 plus

Universal centrifuge for routine applications. Motorised lid latch enables one finger downward motion for easiest closing and locking of centrifuge lid.

- Intuitive touchscreen
- Auto-Lock™ Rotor exchange: Secure, ergonomic push-button rotor exchange in as little as 3 seconds
- ClickSeal™ Bucket Sealing System: System has glove-friendly, one-handed open/close capability
- SMARTSpin™ Technology: optimises the acceleration and braking process and compensates imbalances
- Front USB port

High speed centrifuge tube, borosilicate glass

Borosilicate glass. The tubes have been chemically strengthened to achieve a greater mechanical strength than standard borosilicate centrifuge tubes. These tubes can be centrifuged up to 13.100 RCF when used with an accessory rubber adapter sleeve in a 50 ml rotor cavity. They can withstand temperatures up to 300 °C. Autoclavable.

LLG-Microcentrifuge tubes, PP

LLG Microtubes cover standard volumes for a variety of sample tests. They are available in 0.5 ml, 1.5 ml and 2.0 ml volumes. These standard Microtubes withstand high centrifugal forces, are temperature and chemically-resistant and guaranteed leak-free. An innovative and modern new generation of Microtubes with new features. Perfect sealing qualities, excellent chemical stability and optimal construction materials guarantee even better resistance to centrifugal and chemical forces. Easy to open and to close thanks to the improved lid geometry. For visual volume control the 1.5 ml tubes are equipped with graduations at 0.5 ml, 1.0 ml and 1.5 ml. The 2.0 ml tubes have graduations at 0.5 ml, 1.0 ml, 1.5 ml and 2.0 ml. The 0.5 ml tubes have no graduations. Certified DNase-, RNase- and pyrogen-free.

Clear, in bags. Suitable for microbiology. Guaranteed metal-free.

GENERAL CATALOGUE EDITION 21

Eppendorf Tubes® 5.0 mL, PP

Eppendorf AG

- Simple, practical and ergonomic single-hand operation. Large labelling area.
- Lid design: Hinged lid for minimized sample evaporation during storage and incubation in a wide range of temperatures from -86 °C to 80 °C
- Certified purity: Available in lot-tested and certified Eppendorf Quality, PCR clean, Sterile and Eppendorf Biopur® purity levels
- Maximum safety and stability for centrifugation up to 25 000 x g.
- Compatible with accessories for conical 15 ml tubes - many existing adapters and racks can be used.
- Available in Eppendorf LoBind® material for maximum recovery of valuable samples

The Starter Pack comprises:

- 400 Eppendorf Tubes® 5.0 mL, PCR clean (Certified purity grade)
- 8 universal adapters for rotors with bores for 15 ml conical tubes
- 2 Tube Racks 5.0 mL (16 spaces; white)
- Free of human DNA, free of DNase and RNase, free of PCR inhibiting agents.
- For PCR preparations or any reactions where DNase or RNase could interfere with the reaction or analysis.

From 80°C on, please use the Tube Clip opener Cat. No. 9.409 294.

Thermo Scientific

New and improved conical tubes with the largest writing area on the market for increased traceability with additional space for labeling information. Recyclable plastic rack reduces waste in the lab. New conical tubes have higher RCF ratings, which enable more applications from low speed to super speed centrifugation. They meet USP class VI requirements and are non-cytotoxic, pyrogen-free and RNase/DNase free. Graduated, leak proof and sterile (SAL 10⁻⁶)

(SAE 10)

Material caps: HDPE

Graduated centrifuge tubes, conical, PP or PMP

Kartell

Autoclavable. PP tubes can withstand temperatures up to +120 °C. PMP (TPX®) tubes can withstand temperatures up to +170 °C. Rimmed. High chemical resistance. Good transparency, especially when in contact with liquids.
Cannot be used with naked flame. Can be used as conventional test tubes.

Separating, centrifuging/Centrifuge tubes

GENERAL CATALOGUE EDITION 21

1 Centrifuge tubes, plastic, round bottom, PC, graduated

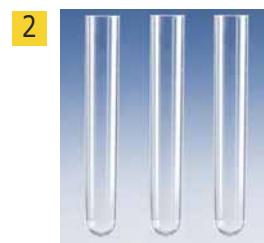

BRAND

Transparent. PC. Rimless, with moulded graduations.

Slightly yellowish in colour. Round bottom. For use with loads up to 20000xg rcf.

Note: the strength of Polycarbonate is reduced when it is autoclaved or cleaned using alkaline detergents.

Volume ml	Diam. mm	Height mm	Graduations ml	PK	Cat. No.
50	35	99	1	1	9.315 329

4 Centrifuge tubes Nalgene™ Oak Ridge, FEP

Thermo Scientific

Teflon® FEP with Tefzel® ETFE screw cap. Resistant to all acids, bases and solvents. Autoclavable.

Operating temperature range -100 to +150 °C. Can be used brim-full in refrigerated centrifuges at up to 50000xg rcf. Leak-proof. Accessory sealing cap assemblies are available for all sizes.

Volume ml	Diam. mm	Height mm	PK	Cat. No.
10	16.0	81.5	1	9.315 701
30	25.5	93.7	1	9.315 702
50*	28.8	107.7	1	9.315 703

* Capacity: 46 ml to the brim.

Teflon® and Tefzel® are a registered trademark of DuPont.

5 Centrifuge tubes Nalgene™ Oak Ridge, PSU

Thermo Scientific

Transparent. Polysulphone (PSU) with PP screw cap. As stable and robust as PC test-tubes, but considerably more resistant to acids and alkalis. Autoclavable. Can be used in refrigerated or ambient centrifuges at up to 50000 xg rcf. Accessory sealing cap assemblies are available for all sizes. Notes: If autoclaving, the tubes must be filled to 80 % of their total capacity. Polysulphone must not be used with Tween, as this causes hairline cracks to form.

Volume ml	Diam. mm	Height mm	PK	Cat. No.
30	25.7	94.5	1	9.315 708
50*	29.0	107.7	1	9.315 709

6. Distillation, separation, filtration

Separating, centrifuging/Centrifuge tubes

1 Nalgene™ Oak-Ridge centrifuge tubes, PC

Thermo Scientific

Transparent. PC with PP screw cap. Can be used in suitable refrigerated or ambient centrifuges at up to 50.000 xg rcf. Autoclavable. Accessory sealing cap assemblies are available for 10 ml, 30 ml and 50 ml sizes.

Capacity ml	Diam. mm	Height mm	PK	Cat. No.
10	16.1	81.7	1	9.315 691
28	25.4	101.8	1	9.315 692

50*	28.8	107.0	1	9.315 694
85**	38.2	105.7	1	9.315 695

* Capacity: 43ml to the brim.

**Capacity: 81ml to the brim.

2 Nalgene™ Oak-Ridge centrifuge tubes, PP-copolymer

Thermo Scientific

PP-copolymer with PP screw cap. PPCO is more resistant to chemicals than PC. Autoclavable.

When wet, the translucent test-tube enables observation of the contents.

Can be used in refrigerated and unrefrigerated centrifuges at up to 50.000 xg rcf.

Accessory sealing cap assemblies are available for all sizes.

* Capacity: 42 ml to the brim.

3 Centrifuge tubes Nalgene™, PC

Thermo Scientific

PC, without closures. Friction-fit closures Type DS3111 for high-speed centrifugation please order separately.

Transparent. Autoclavable. Can be used in refrigerated or ambient centrifuges at up to 50000xg rcf.

Temperature resistant from -135 to +135 °C. Lip (on Cat. No. 9.315 660 and 9.315 661) allows easier retrieval from rotor cavities.

* Up to 27500 xg if using the sealing screw cap 9.315 734.

2 Centrifuge bottles Nalgene™, PC

PC with PP screw cap. Crystal clear. Good mechanical strength. Autoclavable. Leak-proof even at low speeds. In order to ensure that the system is leak-proof even at high speeds and when centrifuging dangerous substances, the 250 ml and 1000 ml sizes must be used in conjunction with sealing screw cap sets.

Thermo Scientific

Volume ml	Diam. mm	Height mm	Max. rcf	PK	Cat. No.

6. Distillation, separation, filtration

Filtration/Filter paper, qualitative

Filter Paper, qualitative, folded filters

Highly pure filter paper (approx. 0.08 % ash) recommended for precise identification of materials and for sample preparation prior to sensitive detection methods. These filter papers are perfectly qualified for food control according to LFBG paragraph 64 para. 1 and 2, beverage analysis and environmental monitoring.

- Made of the same raw materials (super-refined cotton linters and cellulose) like quantitative filter papers
- High stability and durability due to alpha-Cellulose content above 95 %

3 Filter Paper, for clarification, folded filters

Recommended for identification of substances, clarification of liquids and for the preparation of samples in a broad range of chemical analysis.

Hahnemühle

- Creped filter papers have a particularly large surface area and correspondingly shorter filtration times
- For quick separation of large particles
- For reliable clarification of viscous liquids

2 Germ Testing Papers

For carrying out germ resistance tests. All papers are made from high-purity cellulose and are free of spores, bacteria and toxic substances that could influence the germination of the seeds. The highly absorbent papers store water for the entire duration of the tests. All germ test papers meet the requirements of ISTA and AOSA.

Hahnemühle

- Reliable seed testing
- Conductivity 40 mS/m
- pH value between 6.0 and 7.5
- High absorbance
- Roots do not grow through the paper
- Papers conform to ISTA recommendations of 2017

3

3 Germ testing papers

The testing papers do not contain any substances which could influence the growth of seeding. The colors used are non-toxic to germinating seed. The moisture level is maintained throughout the germination test period. The filter papers comply with ISTA and AOSA requirements.

4 Qualitative Filters 551, black, round filters

Recommended for the detection of very fine traces of light-coloured particles and precipitates.

Hahnemühle

- Made of pure celluloses and with constriction of black additives
- White and light-coloured particles can be detected easily by the strong contrast to the black filter paper
- Weight 95 g/m²
- Thickness 0.2 mm
- Filtration speed acc. to Herzberg 850 s

Further sizes on request.

Glass microfibre filters

Glass microfibre filters have a fast filtration and a high loading capacity and particle retention rate. Manufactured without chemical binder from high grade borosilicate glass. (Exception: GF6, GF9). They are suitable for gravity or low suction filtration. Filtration speeds generally very much higher than conventional cellulose papers. Efficient retention of micron size particles. Must be used flat. Ideal for use in flat perforated plate Buchner type funnels (not sintered glass models). Can be used up to 500 °C

Wide range of applications including:

- retention of fine analytical precipitates
- retention of biochemical gelatinous precipitates
- water/air pollution analyses
- as prefilters for membranes
- scintillation counting
- radioimmunoassay.

Filtration/Glass-fibre filters

GENERAL CATALOGUE EDITION 21

1 Glass fibre filters without binder

Recommended filters for controlling both air and water pollution.

Hahnemühle

- Made of 100 % borosilicate glass fibres without binders
- Extremely low content in alkali-earth metals
- Chemical stability: It keeps all its properties in contact with acid solutions (except hydrofluoric acid) and basic solutions at moderate concentrations
- Usable as a pre-filter for membranes to prevent the membranes from silting up
- Deposition of (radioactive) aerosols and monitoring of nuclear power plants
- Gravimetric analysis of organic and inorganic impurities in water and waste water according to DIN 38409 and EN 872 (suspended particles)
- Measurement of immission, measurement of dust in air and gases, monitoring of the efficiency of filtration and dedusting, monitoring the combustion air of power plants and of the steel and iron industry
- Measurement of dust release in workplace and production processes and the purification of compartment air
- Stability at high temperatures: It keeps its properties up to 500 °C
- High flow speed and high permeability to air

2 Fibre Filters with inorganic binder

Recommended filters for environmental analysis and controlling both air and water pollution.

Hahnemühle

- Made of 100 % borosilicate glass fibres with binders
- Glass fibre filters capture fine particles down to 1 µm from liquids, in air, gases and aerosols with even 0.3 to 0.5 µm being absorbed
- Extremely low content in alkali-earth metals
- Chemical stability: It keeps all its properties in contact with acid solutions (except hydrofluoric acid) and basic solutions at moderate concentrations
- Stable at temperatures up to 500 °C
- Gravimetric analysis of organic and inorganic impurities in water and waste water according to DIN 38409 and EN 872 (suspended particles)
- Measurement of immission, measurement of dust in air and gases, monitoring of the efficiency of filtration and dedusting, monitoring the combustion air of power plants and of the steel and iron industry
- Measurement of dust release in workplace and production processes and the purification of compartment air
- Measurement of scintillation

1 | 2 Membrane Filters Microsart™ e.motion

The membrane filters suitable for use in the Microsart™ e.motion are individually sterile-sealed, without protective paper on top of each filter, in a specially designed individual package on a band. For complete traceability, the membrane filter type, diameter, lot number and a unique serial number are printed on the package of each membrane filter unit. Specially developed pore structures of the 0.45 µm high Flow membrane filters permit faster filtration based on their high flow rates and throughputs.

Sartorius Lab Instruments

All Microsart membrane filters are "multi-fit" and can be used in all standard dispenser systems.

The membrane filters have a diameter of 47 mm or 50 mm, and are white, green or grey with a high-contrast 3.1 mm grid.

3 Membrane filters, Grade TE, PTFE with support

Whatman

Applications:

- Ideal venting filter for all applications
- For aggressive media and cryogenic liquids
- Separation of free water from organic solutions
- Outstanding as gas/liquid barrier
- Filtration of air and (hot) gases

Properties:

- Chemically inert to aqueous and organic solutions as well as concentrated acids and bases
- Hydrophobic - for aqueous filtration the pressure must be higher than the water breakthrough pressure
- Can be used up to 145 °C
- Can be sterilised by all methods except gamma radiation

2 Membrane filters, inorganic, Anodisc®

Material: Anopore®. White.

Whatman

The inorganic membrane Anopore® consists of high-purity aluminium oxide and can be used for a wide range of applications. The unique material has a precise, non-deformable honeycomb structure with a narrow pore size distribution range that guarantees very efficient particle retention.

In addition, the membrane has a low protein binding capacity, minimal autofluorescence, is non-toxic and supports cellular growth.

Filtration/Membrane filters

1

1 Membrane filters, regenerated cellulose

Sartorius Lab Instruments

The very low adsorption membranes are hydrophilic, solvent-resistant (pH 3-12) and therefore suitable for the particle removal from solvents.

2

2 Membrane filters, cellulose acetate

Sartorius Lab Instruments

Type 111. Resistant to steam sterilisation up to 134 °C, or in dry heat up to 180 °C. Very low adsorption (important when filtering proteinaceous solutions). Suitable for particle removal and ultracleaning of aqueous solutions, methanol, ethanol, high-grade alcohols and residue analysis of fuels and oils. The extractable content of these filters make up < 1 % of their weight. Other pore sizes and formats available on request.

Membrane filters, Grade OE, made from cellulose acetate

Whatman

Very high wet strength and very low ability for protein binding. For filtration of aqueous, alcohol and oil-based solutions at temperatures up to 180 °C.

6. Distillation, separation, filtration

Filtration/Membrane filters

1 Membrane filters, Grade ME, mixed cellulose esters, Grade ME

Applications:

For microbiological analysis (sterile with grid)

Properties:

0.45 µm pore size, 100 % microbe retention of *serratia marcescens*
 1.2 µm pore size for microbiological control of yeasts

**Warning**

H phrases: H228

Description	Pore size µm	Diam. mm	PK	Cat. No.
ME 25/21 ST	0.45	50	100	9.058 179
ME 24/21 ST	0.2	47	100	9.058 199
ME 24/21 ST	0.2	50	100	9.058 200

Whatman

1

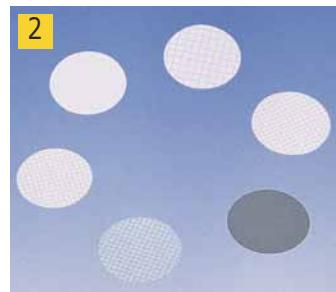

2 Membrane filters, Grade ME, made from mixed cellulose esters

Whatman

2

**Applications:**

- Excellent for gravimetric analysis
- Especially for aqueous solutions
- Ideally suitable for contamination test

Properties:

- Economical
- Constant weight
- Hydrophilic
- Not sterile
- Can be used up to 125 °C
- Autoclavable up to 121 °C

**Warning**

Filtration/Syringe filters

1 LLG-Syringe Filters SPHEROS

Cost-effective syringe filters for filtration of a broad variety of solvents and aqueous or inorganic solutions. These syringe filters cover most applications in HPLC, pharmaceutical, environmental, biotechnology, and food and beverage testing laboratories.

- Robust Polypropylene housing
- Multifunctional syringe filters with female Luer-Lock inlet and male Luer-Slip outlet
- Suitable for all syringes with Luer connection
- Sterile or non-sterile
- Sterile products in individual hard blister packaging and dispenser box

2 3 LLG Syringe Filters SPHEROS, Cellulose Acetate

Hydrophilic membrane for filtration of aqueous liquids. Low protein binding capacity. Especially suitable for biological macromolecules, water soluble oligomers and polymers. With female Luer-Lock inlet and male Luer-Slip outlet. Sterile products in individual hard blister packaging and dispenser box.

Filter diam. mm	Pore size μm	Housing	Sterile	PK	Cat. No.

4 LLG Syringe Filters SPHEROS, PES

Hydrophilic membrane for aqueous and polar organic solutions with low protein binding capacity. Especially suited for sterile filtration of solutions and media in cell culture as well as for ion chromatography and organic acids. With female Luer-Lock inlet and male Luer-Slip outlet. Sterile filters individually packed in a hard blister package.

Filter diam. mm	Pore size μm	Housing	Sterile	PK	Cat. No.

Filtration/Syringe filters

GENERAL CATALOGUE EDITION 21

LLG-Syringe Filters

We offer a line of syringe filters especially designed to provide efficient filtration of a broad variety of fluids, solvents, aqueous or inorganic solutions. Our syringe filters cover most applications in HPLC, pharmaceutical, environmental, biotechnology and food and beverage testing laboratories.

- Housing injected in Polypropylene or MABS
- Multifunctional Syringe filters equipped with Luer-Lock connections on both sides or female Luer-Lock input and male Luer-Slip output
- Suitable for all syringes with Luer connection
- Pre-sterilised or non-sterile
- Sterile products in individual hard blister
- Superior pressure stability

1

1 LLG Syringe Filter CA, Cellulose acetate

Hydrophilic membrane for filtration of aqueous solutions.

This membrane features excellent shape stability in aqueous solutions and a very low binding capacity for proteins (21 µg per 25 mm Filter). Ideal for use with biological macromolecules, water soluble oligomers and polymers. With Luer-Lock input and Luer-Lock or Luer-Slip output.

2

Filtration/Syringe filters

1 LLG Syringe Filter RC, Regenerated cellulose

Hydrophilic membrane features very low adsorption. It is recommended for filtration of aqueous and organic/aqueous liquids. For filtration of polar and medium polar liquids. With Luer-Lock input and Luer-Slip output.

Type	Filter diam.	Pore size	Housing	PK	Cat. No.
	mm	µm			
non sterile	13	0.20	PP	500	9.055 530

6. Distillation, separation, filtration

Filtration/Syringe filters

1 | 2 Syringe filters GD/X®

Whatman GD/X syringe filters are the perfect solution for samples with high viscosity or samples that contain particles. Four filter layers decrease clogging and therefore filter exchange during processing is avoided. These filters allow 3 to 7 times higher throughput than traditional types.

3 Inorganic membrane syringe filters, Anotop®

The Anopore® inorganic membrane consists of high-purity aluminium oxide and can be used for a wide range of applications. This unique material has a precise, non-deformable, honeycomb structure with a relatively consistent pore size that guarantees very efficient particle retention. In addition, the membrane has a low protein binding capacity, minimal autofluorescence, is non-toxic and supports cellular growth.

Whatman

Filtration/Syringe filters

GENERAL CATALOGUE EDITION 21

1

1 Syringe filters Spartan®, Regenerated cellulose

Versatile use - ready-to-use filter units with a hydrophilic, low protein-binding membrane made of regenerated cellulose. First class chemical resistance against the usual aqueous and organic HPLC solvents

Whatman

- Spartan® 13 and 30 are tested and certified for UV absorbance substances at wavelengths of 210 nm and 254 nm with water, methanol and acetonitrile;
- Spartan® 13 has an extremely low hold up volume; <10 µl, for optimal filtration

Applications:

Ideal for HPLC sample preparation to achieve reproducible results. Carefully controlled manufacture guarantees lowest traces of UV-absorbing, extractable components.

3 Syringe filters, Minisart® High-Flow, PES

Housing MBS. Minisart® High Flow PES (Polyethersulfone) syringe filters for sterile filtration, particle removal and ultra-cleaning. Covers a wide pH range.

Sartorius Lab Instruments

These independent ready-to-use syringe filters with PES membrane filter feature excellent flow speed and high filterable volume. The Minisart® High Flow is a syringe filter for rapid volume sterilisation with maximum user convenience. Ready-to-use units, which offer flow rates at low inlet pressures, allow for a correspondingly rapid sterile filtration.

Filtration/Syringe filters

Syringe filter Minisart® NML, SFAC

Hausing MBS. SFCA/CA (Surfactant-free Cellulose Acetate) membrane. For sterile, particle free, ultrapure filtration of small volumes of liquid up to approx. 100 ml. Color coded and printed for easy membrane and pore size identification. With hydrophilic cellulose acetate membrane for minimum adsorption. Ready-to-use immediately. With female luer-lock inlet, male luer slip outlet.

Minisart SRP 15 and SRP 25 are also available in 0.2 µm pore sizes (and sterile).

2 Syringe filter CHROMAFIL®, Cellulose acetate (CA)

Hydrophilic membrane for filtration of water-soluble oligomers and polymers, especially suited for biological macromolecules. Very high shape stability in aqueous solutions extremely low binding capacity for proteins (21 µg/ 25 mm filter).

1

2 Syringe filter CHROMAFIL®, Polytetrafluoroethylene (PTFE)

A hydrophobic membrane. Ideal for filtration of non-polar liquids and gases. It is very resistant to various solvents as well as acids and bases. By flushing with alcohol, followed by water, the original hydrophobic membrane can be made more hydrophilic.

MACHEREY-NAGEL

6. Distillation, separation, filtration

Filtration/Syringe filters

1 Syringe filter CHROMAFIL®, Glass-fibre (GF)

Inert Filter, nominal pore size 1µm, allows higher flow rates than smaller pore filters.
For solutions with high loads of particulate matter or for highly viscous solutions (e. g. soil samples, fermentation broths) as prefilters for other CHROMAFIL® filters, they prevent plugging of the membrane.

2 Syringeless filters SEPARA

SEPARA integrates in one single device auto-sampler vial, filtration membrane, plunger, and cap/septa. The single step filtering process is efficient and saves time. Fast and simple to use. Reducing sample loss. After filtration the sample is ready to use in most standard autosampler.

GVS S.p.A.

The pre-slit cap ensures easy and clean transfer of sample. 5 different septa material, PP vial with Ø 12 x 33 mm, Filtering capacity 0.48 ml, dead volume <30 µl, maximum operating temperature 50 °C

3 Syringeless filters Mini-UniPrep™

The Whatman Mini-UniPrep™ filter provides a quick and easy means of removing particles from HPLC samples. In comparison to other methods the amount of time required for sample preparation is reduced to one third. Mini-Uni-Prep™ is a ready-to-use filter unit consisting of a 0.4ml chamber and a plunger. The plunger contains a filtration membrane at one end and a cap with septum at the other. The plunger is pressed through the sample in the chamber. The pressure generated forces the filtrate into the plunger reservoir, with air escaping through the vent hole until the locking mechanism engages to form an airtight seal. The unit can now be placed in any autosampler and the sample analysed.

2 Mini-cartridge filters

Sartorius Lab Instruments

Mini-cartridge filters are inserted into a stainless steel housing. The bayonet closure provides a secure seal against back-pressure surges. An inner O-ring seals the lower part of the housing (except for the aeration housing). For the filtration of larger volumes and for long service lives. Individually tested. Their integrity can be checked at any time. Can be autoclaved repeatedly.

There are several different types which differ in the filter material used:

Sartobran-P

Heterogeneous double membrane of cellulose acetate, for the sterile filtration of liquids.

Sartofluor

Hydrophobic PTFE membrane filter, for the sterile filtration of air and gases.

Sartopure-PP3

High performance PP fleece prefilters for particle reduction.

Type	Description	PK	Cat. No.

1

2 LLG-Inline-filters, PTFE

The 50mm inline filter with it's ultra pure Polypropylene housing (ultrasonic welded) is designed to contain 47 mm membranes. The filter comes with 6-12mm hose connectors (tapered) at the inlet and the outlet side. The PTFE-membrane can be used for filtration of aggressive chemicals including acids and non-aqueous solutions. Due to its high filter area of 1735mm² the filter is suitable for long term gas filtration /venting applications, it could be used for filtration of higher volumes of liquid (up to approximately 500ml, depending on the particle load of the filtrated suspension) or for filtration of aggressive non aqueous liquids.

2

- hydrophobic PTFE-membrane
- Housing polypropylene
- autoclavable at 121 °C for 20 minutes at 2 bar, max. 3 cycles
- stepped hose connector of 6-10 mm on either sides
- high throughput with low pressure drop
- max. operating pressure 4.0 bar

Diam.	Pore size	PK	Cat. No.
mm	µm		
50	0.20	5	9.059 513
50	0.45	5	9.059 514

3 In-line filters Midisart® 2000

Sartorius Lab Instruments

For sterile ventilation of fermenters, culture vessels, etc. or to act as a water barrier between the suction flask and the vacuum pump in filtration applications. The supported PTFE membrane within a PP housing gives excellent chemical resistance. Filter in either direction (3 bar max. pressure).

3

- Stepped horse-barb of 6-12 mm on either sides
- sterile single packed filters, autoclavable

Filtration/Filtration apparatus

GENERAL CATALOGUE EDITION 21

1 Filtration capsules, Sartobran 150 and 300

Sartorius Lab Instruments

Ready-to-use pressure filtration capsules for sterile filtration of media and aqueous solutions with volumes of up to 20 litres (Sartobran 150), or 40 litres (Sartobran 300). The units consist of a polypropylene housing containing a double-layer cellulose acetate membrane (0.2 µm and 0.45 µm). The membranes, which have an area of 150 cm² or 300 cm², have extremely low protein adsorption levels. Autoclavable at up to 134 °C.

Automatically air vented via an integral PTFE membrane. Sterile and individually packed.
With 6 to 12 mm flexible tubing connections (SO) or 1/2 inch tri-clamp (TC).

Type	PK	Cat. No.

2 Manifolds Microsart®, stainless steel

For microbiological quality control. Quick connectors at both sides of the manifolds enable fast connections of either tubing, another manifold or end caps. Various funnel and filtration units are available.

Sartorius Lab Instruments

- Full autoclavability without disassembly
- Sterile venting
- Reduced risk of secondary contamination
- Low working height
- Rubber feet providing better stability at the workplace

Scope of supply:

Microsart® Manifolds for Microsart® funnels and filters: Manifold, filter base support with sinter frit, blind coupling,

20 cm tubing and venting filter

Microsart® Manifolds for Biosart® 100 monitors: Manifold, filter base support with sinter frit, Biosart® adapter, blind coupling,

20 cm tubing and venting filter

Microsart® Manifolds for Biosart® 250 funnels: Manifold, filter base support with sinter frit, blind coupling,

20 cm tubing and plug for venting holes

Microsart® Manifolds including stainless steel funnels (100/500 ml): Manifold, filter base support with sinter frit, blind coupling,

20 cm tubing and plug for venting holes

1 LLG-Filtering apparatus

Universally applicable filtration unit made of high-quality borosilicate glass. Wide range of applications for filtration with filter paper or membrane filters (47 mm).

- Large funnel (300 ml) with scale
- Filter flask 1 or 2 litres, with scale
- Safe plastic olive
- Filter plate with porosity 2
- Filter plates with porosity 1 or 3 optionally available
- All components available as spare parts

Scope of delivery: 1000 (2000) ml Filter flask NS45/40, funnel 300 ml, filter holder NS45/40 with connector GL14 and filter plate 47 mm (por. 2), clamp.

Description	PK	Cat. No.
LLG-Filtering apparatus 1000 ml	1	6.291 850
LLG-Filtering apparatus 2000 ml	1	6.291 851

2 Filtering apparatus DURAN®

The DURAN® filtering apparatus is made of high-quality borosilicate glass. Aside from glass, the medium only comes into chemical contact with PTFE. This means that the filtering apparatus can be used to filter virtually any chemical. Thanks to the PTFE disc holder, fritted glass discs of different porosities can be used in addition to the slit-sieve disc. This creates a wide application scope for filtration using filter paper, membrane filters (47mm) or simply using glass filters. Different porosities are available between 10 µm and 160µm, which makes it possible to perform coarse and fine filtration in addition to analytical filtration. Furthermore, the filtering apparatus is suitable for the filtration of HPLC media, testing for bacterial contamination, residue analysis and the filtration of other media.

Scope of delivery: 1000 (2000) ml suction bottle with NS 45/40, extension NS 45/40 with hose connection GL 14, PTFE adapter plate, Filter disc D50 (Porosität 2), slit-sieve disc D48, filter funnel 250 (500) ml, clamp (Alu), straight plastic hose connection with seal, threaded cap GL 14

3

3 Protective collars, EPDM.

For filter flasks.

Special design centres the funnel and flask and provides stable support for funnels, filters and manifolds placed on them. A clean seal is made between the flask rim and container placed on it. Application of the vacuum provides a tight seal. Also provides all-round protection for glass filter flask rims, significantly reducing impact damage and extending working life.

GENERAL CATALOGUE EDITION 21

Cooling/Cryogenic tubes

Warning

Do not use CryoTubes in the liquid phase of liquid nitrogen unless correctly sealed. Improper use may cause liquified nitrogen to be trapped inside the vial and lead to pressure build-up, resulting in possible explosion or biohazard release.

→ Products for nitrogen storage - please see page 768.

1

1 LLG-Cryotubes, PP, sterile

With star-shape in the screw cap, for automated capper/decapper. Temperature resistant down to -196°C.

Not appropriate for operations in liquid nitrogen. With marking area, fill line and graduations printed on the vial. Safe and precise handling of biotechnology materials. Bar-code printed on each tube.

DNase/RNase free. Vials and caps are autoclavable at 121 °C.

Homogeneous conception:

- all made from polypropylene
- single-body, single-turn screw cap

Printed graduations for accurate measurements. Large white area for writing specimen identification. Sterile.

Packed in 2 bags of 50 tubes.

GENERAL CATALOGUE EDITION 21

Cooling/Cryogenic tubes

1 | 2 Cryotubes Nunc with External Thread, PP/PE

Intended for cryogenic transportation and storage of biological material.

Thermo Scientific

Available in three different tube types: Round or conical bottom shape with starfoot or round without foot (= non free standing). Conform to the IATA requirements for the transport of diagnostic specimens and to the US pharmacopoeia USP Class VI. Packed in resealable zip lock bags with printed catalog no. and lot. no. Pyrogen-free. Non-toxic. Sterile (SAL 10⁻⁶). Certified RNase- and DNase-free.

Material tubes: PP

Material screw caps: PE

Warning:

Do not use CryoTubes in the liquid phase of liquid nitrogen unless correctly sealed in Nunc CryoFlex™ Tubing (Cat. No. 4.009 142). Improper use may cause liquified nitrogen to be trapped inside the vial and lead to pressure build-up, resulting in possible explosion or biohazard release.

* Closure design does not permit the use of Cryo Color Coders.

3 | 4 Cryotubes Nunc with Internal Thread, PP, sterile

Intended for cryogenic transportation and storage of biological material.

Thermo Scientific

Internal thread with a silicone gasket provides the best possible seal.

Available in four different bottom shapes: Round with or without free standing and round or conical with starfoot. Conform to the IATA requirements for the transport of diagnostic specimens and to the US pharmacopoeia USP Class VI. Packed in resealable zip lock bags with printed catalog no. and lot. no. Pyrogen-free. Non-toxic. Sterile (SAL 10⁻⁶). Certified RNase- and DNase-free.

Material tube and screw cap: PP

Warning:

4 Cryogenic storage boxes Arctic Square®, PC, autoclavable

Heathrow Scientific

Safely store vials from -196 to +121 °C for repeated use in mechanical freezers as well as liquid nitrogen. Boxes are designed with unique features to help the user orient, identify, and access vials with ease. The forward-sloped base and high-contrast, imprinted indexing on the transparent lid ensure quick visual orientation. Hinged lid allows easy one-handed access to samples. A built-in stop prevents the lid from swinging too far when the box is picked up by the lid, helping to prevent accidental spills. The 5 x 5 array box does not have hinged lid. All boxes include vent and drainage holes. Stackable. Autoclavable.

1 Cryogenic Boxes, CryoBoxes™, PC

Thermo Scientific

Robust design, autoclavable. With printed grid on lid for cryovials and similar tubes up to 13.5 mm diameter (except type 5026: up to Ø 12.5 mm). Temperature resistant from -196 to 121 °C.
With grid numbers for reliable identification of individual samples.

Type 5050 is a plain box with transparent PC lid, without grid, used for storing tubes of various sizes.

Cooling/Cryogenic boxes

1 Microtube Storage Boxes, PP, 50-/100-Well

Heathrow Scientific

Autoclavable. Compact storage box has angled front slot for easy access to tubes. Rugged, polypropylene box has durable three-point hinges, snapping clasp for secure closure, moulded grid lines on lid, imprinted coordinates on bottom of base and imprinted and raised coordinates on tube wells. Ideal for sample or case study storage. Holds 1.5 ml to 2.0 ml microtubes. Resist storage temperatures from -80 to +121 °C.

2 Microtube Storage Boxes, PC

Manufactured from polycarbonate with high mechanical strength and high temperature resistance between -196 to +121 °C.

ISOLAB

Uniquely designed to carry 81 cryo tubes in 9 x 9 array "Hedgehog" designed tube compartments holds the tube in their position firmly.

Unique design with vent and drainage holes guarantees best, efficient air circulation. Forward slope base ensures quick visual orientation.

Easily stackable for reducing storage space. Hinged lid with built-in stop allows easy one-handed access to tubes. Clear box lid enables easy identification of box content and protects the tubes from dust, moisture and other environmental effects. Alphanumeric index both on tube rows and the lid enables easy identification of tube positions. Box is supplied together with a disposable forceps, made from ABS, with fine end for easy handling and fast removal of tubes.

Heathrow Scientific

Overall rack size (H x W x D): 238 x 139 x 571 mm.

With four drawers to hold 16 boxes of 133 x 133 x 53 mm.

Drawers feature a unique stop that when fully extended pivot down allowing for easy box access.

Freezer rack also includes a pull-out wire handle for easy removal off the shelf. Polycarbonate drawer handles provide a user-friendly grip. Includes a slot and label for drawer/sample identification.

Arctic Squares®	1	9.193 980

4 Deep freeze labels TOUGH-SPOTS®

Pre-cut Peel-off round labels for 0.5 and 1.5/2.0 ml microcentrifuge tube tops.

Heathrow Scientific

Temperature resistant from -196 °C to 80 °C.

Easy to write on: PVC labels accept writing from most lab markers.

Convenient: Dispensing box assists in labeling individual tubes used in small experiments.

GENERAL CATALOGUE EDITION 21

1 Deep freeze labels Cryo-Babies®/Cryo-Tags®

Temperature resistant from -196 °C to +150 °C. All labels withstand freezer temperatures down to -196 °C (liquid and vapour phase nitrogen), boiling water baths, autoclaving and moderate ovens (150 °C). Chemically inert labels resist most organic solvents and caustic agents. They adhere to most plastics, glass and metals without cracking, peeling or degrading. Made with a flexible, polyolefin label material and acrylic adhesive. This unique combination expands and contracts together with temperature fluctuations resulting in a strong adhesive bond. Convenient dispensing box assists in labeling individual tubes used in small experiments. Easy to write on. PVC labels accept writing from most lab markers including solvent resistant pens.

2

2 Deep freeze labels

Manufactured from polyfiber grade flexible paper with acrylic resin adhesive back. This unique combination expands and retracts together with temperature fluctuations and always guarantees a strong adhesive bond. Chemically inert, resists to water, moisture and most organic solvents and caustic agents. Can be used between -196 to +80 °C temperature range. Sticks to any clean surface including PTFE coated surfaces without cracking, peeling and degrading. Peels off without leaving any sticky residue. Recommended to be used on tube caps with different diameters. Supplied as white color or pack of 6 different colors matching the universal hazard color codes (yellow for chemical reactivity, blue for health hazards, green for safety, red for flammability, orange tape for biohazard and white for general use).

3 Label Dispenser for Deep freeze labels

Perfect organizer for fast and efficient use of labels. Manufactured from clear acrylic and holds 6 label box. Drop the label box in the label dispenser and feed the paper through the slot. The writing surface enables easy and clean writing on the label. The sharp cutting edge helps to tear off the labels. A weighted base with nonskid pads prevents sliding or lifting. The article is delivered without pen.

4

LLG-Temperature block exact, aluminium

Suitable for both cooling and heating, universally usable, uniform temperature distribution within the block, ideal for all temperature-sensitive applications.

9.409 015

Aluminum blocks with conical compartments and closed bottom for easy and precise tempering of reaction tubes and PCR tubes. The precisely adapted shape of the borings and the closed bottom offer advantages compared with cylindrical drilled blocks with open bottom, such as much better heat transfer and temperature accuracy. Made of a special aluminum alloy with high thermal conductivity. Identical temperature conditions for all samples. Compact size, requiring little space. Suitable for 96-well plates, 8 or 12 strips and single tubes. Ideal for working with 8- or 12-channel pipettes. Blocks for different tube sizes and combinations of tube sizes as indicated, all working steps in one block, holes closed at the bottom and tapered to fit perfectly the respective tube sizes and offer an optimum heat exchange.

8-channel Decapper for screw cap tubes

Process a full rack of Thermo Scientific™ Matrix™ or Thermo Scientific™ Nunc™ tubes in less than one minute with this ergonomic, manual capper/decapper. The Thermo Scientific™ 8-Channel Screw Cap Capper/Decapper is designed to cap tubes to the optimal torque to maintain sample integrity and prevent sample loss during storage. The 8-channel Capper/Decapper is a practical addition to benchtop processing of screw top storage tubes.

Thermo Scientific

- Improves processing throughput of manual procedures with automated column-wise decapping and capping in just four seconds
- Ensures reproducibility by capping all tubes to the optimal torque level specified for the tube
- Allows anyone in the lab to cap or decap tubes with a light weight, easy-to-use and ergonomic design
- Stand allows easy storage of removed caps during sample processing steps
- Virtually always available for use with long battery life and quick recharge time

1 Capping Systems Matrix™ SepraSeal

For open tubes without screw cap.

Thermo Scientific

Thermo Scientific™ Matrix™ SepraSeal tube sealing solutions complement the innovative line of Thermo Scientific Matrix 2D and non-2D coded storage tubes. Available in a range of formats, colors and sterility, there is a sealing option to meet a range of application and storage requirements.

Enhanced Materials

- Made of an advanced thermoplastic elastomer that offers excellent chemical resistance and low vapor transmission rates
- Elastomer ensures sealing performance will not degrade, even after multiple cap piercings

Sample Access Options

- Designed for storage down to -20 °C, Matrix SepraSeal mats are available in sterile, nonsterile, solid, or pre-split, in a range of colors for quick visual sample identification
- Solid seals can be removed for sample access with the Matrix SepraSeal cap removal tool
- For applications involving repetitive sample access, a pre-split Matrix SepraSeal can be pierced by automated liquid handling equipment, requiring very little pressure, while maintaining seal integrity with self sealing closure

Application Flexibility

- Individual tube capping or apply 96 caps at once
- Supplied in mats of 96 caps each, sealing is secure and consistent every time when applied with the Thermo Scientific SuperSealer

7. Heating and cooling technology

Cooling/Low and Ultra low temperature freezers

GENERAL CATALOGUE EDITION 21

1

9.699 310

Ultra low temperature freezer, ULUF, up to -90 °C

- Low energy consumption
- Low noise level, low heat dissipation
- Insulated inner doors
- Castors
- Lock on door
- Ergonomic loading
- Heated door frame, heated vacuum valve
- 100 % HCFC/CFC free
- Premade porthole for external temperature probes (diam. 11 mm)
- Single-compressor (ULUF 15, 65, 125, 450, 550) or two compressor systems (ULUF 750) as security in case of failure of a compressor.

Arctiko

Controller features

- Temperature graph
 - Micro processor controller with digital display
 - Approx. 72 hours battery back up for alarms, loggings and temperature display in case of power cut
 - Visual and acoustic alarm, adjustable high/low temperature alarm, power failure alarm, probe failure alarm, instrument failure alarm, open door alarm, contact for remote alarm, prepared for GSM alarm
 - Prepared for connection of 2 additional probes
 - Integrated data logger (software included)
 - RS485/232 Interface
 - Computer USB data read out
 - Direct download/upload on/from USB memory stick
 - Auto cycle if probe failure
 - Ambient temperature display
 - Shows all alarms as text (no codes)
 - 3-level password protected
 - Battery level indication
 - Integrated memory
 - Display text available in different languages
- Accessories (optional on request): Racks and boxes, CO₂ backup system, GSM alarm module, cryo gloves, water cooled condensers.

5 year warranty on the compressor.

3

Ultra-low temperature freezer, UFV series up to -90 °C

NEW

BINDER

The ultra-low freezers are suitable for the stable long-term storage of sensitive samples and guarantee a constant low temperature. The ultra-low freezers are designed for -90 °C, but can be used in a temperature range from -40 °C to -90 °C.

- Climate-neutral refrigerants R-290 and R-170
- Interior completely made of stainless steel
- Powerful cascade compression refrigeration machine
- Efficient thermal insulation through vacuum insulation panels
- Removable interior doors made of stainless steel
- 3 flexibly positionable shelves made of stainless steel
- Water cooling (depending on variant)
- Optical and acoustic alarms

Specifications

Ultra low temperature Upright Freezers, ULT Series, up to -86 °C

1

Supreme stability, reliability, user-friendliness and small dimensions make these freezers the perfect choice for use inside the lab. For temporary to long term storage.

Nordiclab ApS

Low power consumption, natural refrigerant, cyclopentane insulation combined with recyclable materials, makes these freezers very environmental friendly. The unit is easy to install. Due to the small footprint, transport through all standard sized doors is possible. In combination with a low weight, it is also easy to move around. The material is galvanized and pre-coated steel on the outside and stainless steel on the inside.

- Temperature logger with USB port
- Data logging 35.000 Entries
- Battery Backup for min. 48 h
- Digital controller with display
- High/low temperature alarm
- Door alarm
- Contact for remote alarm
- Porthole for external probe & CO₂ backup Ø12 mm
- Eco-friendly, HCFC-free Nature R refrigerant

Extended exchange warranty - in warranty cases which cannot be quickly solved onsite the client receives a new unit.

Racks must be ordered separately.

Ultra low temperature Chest Freezers, ULT Series, up to -86 °C

2

Freezer for temporary to longer term storage or daily use. Ideal where space is limited, but the user still needs a regular storage capacity. Low power consumption, natural refrigerant, cyclopentane insulation combined with recyclable materials, makes these freezers very environmental friendly. The unit is easy to install. Due to the small footprint, transport through all standard sized doors is possible. The freezer also has four castors, which makes it very mobile. The material is galvanized and pre-coated steel on the outside and precoated white steel on the inside.

- Digital controller with display
- Audible and visual alarm
- High/low temperature alarm
- Contact for remote alarm
- Battery Backup 48 h
- Porthole for external probe & CO₂ backup Ø12 mm
- Eco-friendly, HCFC-free Nature R refrigerant

Extended exchange warranty - in warranty cases which cannot be quickly solved onsite the client receives new unit.

Racks must be ordered separately.

► Accessories please see page 780.

Ultra low temperature freezer, ULTF series, up to -86 °C

The ULTF range shows that high performance freezing with focus on low energy consumption is the future.

Arctiko

The range has been updated with our advanced Arctiko controller which ensures that all alarm and data logging features are included as standard. The ULTF range is produced with the true and original single compressor technology which ensures the lowest noise level available.

- Single compressor
- Low energy consumption
- Low noise level
- Low heat dissipation
- 100% HCFC/CFC free
- Sub lids
- Castors and key lock
- Prepared porthole for external temperature probes

Controller features

- Temperature graph
- Micro processor controller with digital display
- Approx. 72 hours battery back up for alarms, loggings and temperature display in case of power cut
- Visual and acoustic alarm
- Adjustable high/low temperature alarm

Freezer boxes B35-50/B35-85, up to -85 °C

The cold boxes are small benchtop units for cooling and freezing in all laboratories. Due in particular to its compact space-saving design and the low-noise cooling unit, the cold box is suitable for direct use in the workplace.

Fryka-Kältetechnik

- Vacuum-Insulation: large interior space with small external dimensions and low power consumption
- Extremely low noise refrigeration unit
- Models with temperature range -85 °C with two-stage cascade refrigeration system
- with natural refrigerants (R-290, R-170)
- Interior made of high quality stainless steel
- Interior without fittings allows easy cleaning and disinfection
- Side air vent, so suitable for installation directly on walls
- Bushing (diameter 10 mm), e.g. for temperature monitoring with external sensors
- Maximum safety, due to mains-independent alarm, battery lasting approx. 72 hours
- Visual and audible signal
- Microprocessor-controlled with membrane keyboard and easy-to-read LED display
- Potential-free contact for connection to an external alarm system
- RS485 interface
- 100 mV/K-output for connection to a temperature recording system
- Lockable insulating door with door frame heating and double magnetic seal with additional sealing surface
- Stackable unit, max. 2 units

Cold boxes B35 //logg:

- Touchscreen control with color display and integrated data logger for full traceability
- User-friendly menu structure, remote access via network/internet
- Real-time display of the temperature profile and further values
- Recording the temperature profiles and alarm events
- Integrated memory with up to 12 years memory capacity
- Data for transfer to PC can be read out via USB interface
- Ethernet interface (RJ45)

Stainless steel shelf B 35-RS: 5 drawers, each for 6 standard cryoboxes (135 x 135 x 52 mm).

Extra gaps for optimal, uniform and rapid cooling of the entire frozen product (please order separately).

FRYKA

COOLING AND FREEZING UP TO

-85°C

MADE
IN
GERMANY

Cooling and freezing of
gases, liquids and solids

Robust and durable technology, sophisticated functions as well as a particularly simple handling: All that makes FRYKA recirculating chillers and freezers the first choice in many segments of modern research and industry.

www.fryka.de

Underbench freezers TUS 50-100/TUS 80-100, up to -80 °C

The freezers have a usable space of 100 litres and can be used for cooling and freezing in industrial and scientific laboratories. Particularly due its compact, space-saving design with low-noise cooling unit, the underbench freezer is suitable for use directly under or even on the desk at work.

Fryka-Kältetechnik

- Vacuum-Insulation: large interior space with small external dimensions and low power consumption
- Extremely low noise refrigeration unit
- Models with temperature range -80 °C: with two-stage cascade refrigeration system
- With natural refrigerants (R-290, R-170)
- Interior made of high quality stainless steel
- Bushing (diameter 19 mm), e.g. for temperature monitoring with external sensors

Chest freezers TT 50-90/TT 85-90, up to -85 °C

Fryka-Kältetechnik

The chest freezers are used successfully in the laboratory as well as in industry due to their compact design, their technical properties and their reliability. The use of vacuum insulation panels (VIP), enables a extensive interior space with compact external dimensions. The interior is made of high-grade stainless steel. Models with temperature range -85 °C have a two-stage cascade refrigeration system for high performance and high safety. A bushing (diameter 19 mm) enables temperature monitoring with external sensors.

- Extremely quiet cooling unit, with natural refrigerants (R-290, R-170)
- Visual and acoustic alarm signal
- Lockable cover latch with lever action
- Microprocessor-controlled adjustment with membrane keyboard and LED display
- Independant alarm system, with battery capacity for approx. 72 hours
- Interface (RS485)

TT 50-90 logg/TT 85-90 logg:

- Touchscreen control with color display and integrated data logger
- Remote access via network/internet

Cooling/Low and Ultra low temperature freezers

Ultra low temperature freezers HDE/TDE series, to -86 °C

Environmentally friendly, energy-saving freezers with a temperature range from -50 to -86 °C.

- Maximum 24 minutes temperature recovery time after door opening
- Ergonomic design
- Very quiet operation below 53 dB (A)
- Compatible with most racking systems
- Natural refrigerants based on hydrocarbons
- Water-blown foam insulation: avoids harmful emissions and reduces long-term propellant outgassing
- Capacity for 300-600 boxes depending on model
- Intuitive touch-screen operation with display of all relevant data
- Data logger function with secure cloud storage option and smartphone connection

**Herafreeze™ HDE models with 5 interior doors and 5 compartments for inserts < 24 cm height
TDE models with 4 interior doors and 4 compartments for units < 30 cm height**

Upright Freezers LT/XLT Series, up to -65 °C

NEW

Nordiclab ApS

Freezer for temporary to longer term storage or daily use. Ideal where space is limited, but the user still needs a regular storage capacity. The unit is easy to install. Due to the small footprint, transport through all standard sized doors is possible. The freezer also has four castors with brakes, which makes it very mobile. The material is galvanized and pre-coated steel on the outside, stainless steel on the inside and cyclopentane for efficient insulation.

- Temperature logger with USB port
- Data logging 35.000 Entries
- Battery Backup 48 h
- Digital controller with display
- High/low temperature alarm
- Door alarm
- Contact for remote alarm
- Porthole for external probe & CO₂ backup Ø12 mm
- Integrated lock
- Eco-friendly, HCFC-free Nature R refrigerant (MLT U250 with HCFC-free R290 refrigerant)
- ISO 9001, 14001 & 18001 OHSAS Certified

Extended exchange warranty - in warranty cases which cannot be quickly solved onsite the client receives a new unit.

Racks must be ordered separately.

Chest Freezers LT/XLT Series, up to -65 °C

NEW

Nordiclab ApS

Freezer for temporary to longer term storage or daily use. Ideal where space is limited, but the user still needs a regular storage capacity. The unit is easy to install.

Due to the small footprint, transport through all standard sized doors is possible. The freezer also has four castors (XLT C75 without castors, with legs), which makes it very mobile. The material is galvanized and pre-coated steel on the outside, precoated white steel on the inside and cyclopentane for efficient insulation.

- Digital controller with display
- Audible and visual alarm
- High/low temperature alarm
- Porthole for external probe & CO₂ backup Ø12 mm
- Integrated lock
- Eco-friendly, HCFC-free Nature R refrigerant at -65 °C and HCFC-free R290 refrigerant at -45 °C
- ISO 9001, 14001 & 18001 OHSAS Certified

Extended exchange warranty - in warranty cases which cannot be quickly solved onsite the client receives a new unit.

Racks must be ordered separately.

1 Mini-Freezer KBT 08-51, up to -50 °C

The mini-freezers are the ideal solution for chilling material samples directly at the workplace.

Fryka-Kältetechnik

- Electronic temperature control with LED display, 2 controls available
- Refrigeration unit: low noise, air-cooled, low maintenance
- with natural refrigerant R-1270
- Housing parts made of high quality stainless steel
- Insulated stainless steel hinges and hinged lid with magnetic seal
- Ram protection ring going over and under

ST71 control

- Electronic temperature control with LED display
- Optical and acoustic alarm

ST100 control

- Microprocessor-controlled, with membrane keyboard and easy-to-read LED display
- Protection against unintentional activation
- Alarm system that is separate from the mains, with battery capacity for approx. 72 hours
- Display of the maximum temperature reached in the interior area during the fault
- RS485 interface, potential-free contact for connection to an external alarm system and 100 mV/K output
- Optical and acoustic alarm

2 Laboratory refrigerators and freezers LKPv/LGPv with professional electronic controller, up to -2 °C/-35 °C

The laboratory appliances incorporating Profi electronic controllers offer many advantages. High-grade materials, high-performance components and accurate workmanship right down to the last detail ensure the high quality of the Liebherr appliances. Wherever huge storing capacity is required the large-scale laboratory appliances with Profi electronic controller are the ideal solution.

Liebherr

- Dynamic cooling system
- Profi electronic controller with integrated real-time clock
- Castors, thereof two with brake
- Integrated, ergonomic handle
- Plastic-coated grid shelves and CNS inner liner
- Glass door (..23) with ceiling light (separately switchable)
- Hot-gas defrost system for very short defrost cycles

Security package:

- Integrated data memory (Alarm events and temperature profile)
- Visual and audible temperature and door alarm
- Mains-independent power supply of the electronic controller
- Infrared and RS 485 interface enabling external documentation
- Volt-free contact for alarm forwarding to an external remote warning system
- Maximum temperature stability and consistency according to IEC 60068-3
- 3-point calibration
- Access port for an external temperature sensor
- Lock

Laboratory refrigerators and freezers ES series, up to +1 °C/-30 °C

Designed for routine sample protection where laboratory space is limited.

Thermo Scientific

Our new ES Series lab refrigerators, freezers and combination refrigerator/freezer are the ideal choice when there is limited space in the laboratory.

All ES Series models deliver the sample protection, performance, security and quality you have come to depend on from us:

- with EU plug and UK adapter
- Integrated controller
- Digital temperature display
- High and low temperature alarms
- Standard door locks, lockable
- Low energy consumption
- Access ports
- Defrost type automatic for temperature range +1 to +10 °C and manual for temperature range -19 to -21 °C

Biomedical freezers FLEXA LFE, up to -25 °C

Freezers with flexible interior, adjustable shelves and high temperature stability.
Ideal for storing biological and medical samples.

- With natural refrigerant R-290
- Static cooling
- Digital controller
- LED display with touch operation
- Visual/acoustic alarm when door is open
- Alarm at over/under temperature and temperature sensor failure
- Lockable door
- Selectable door stop

Scope of supply LFE 110: Freezer, 3 adjustable shelves (2 x regular size, 1 x small), 1 basket
Scope of supply LFE 360: Freezer, 5 adjustable shelves (regular size), 1 basket

► Accessories - please see page 785.

1 Cold box B 30-20, up to -20 °C

Compact desktop cold box for cooling and freezing for all laboratories. Due to the low-noise cooling unit, the cold box can be used directly in the workplace. The space-saving box has an insulating glass pane in the door, so that the cooling material can be observed during freezing.

Fryka-Kältetechnik

1

- Extremely low noise refrigeration unit
- Microprocessor-controlled with membrane keyboard and easy-to-read LED display
- with natural refrigerant R-1270
- Interior made of high quality stainless steel
- Interior without fittings allows easy cleaning and disinfection
- Bushing (diameter 10 mm), e.g. for temperature monitoring with external sensors
- Lockable door with insulating glass, door frame heating and double magnetic seal with additional lip
- Stackable unit, max. 3 boxes

Stainless steel shelf B 30-RS: 4 drawers, each for 4 standard cryoboxes.

Drawer size (W x D x H): 300 x 280 x 52 mm. Extra gaps for optimal, uniform and rapid cooling of the entire frozen product (please order separately).

High-Performance refrigerators and freezers TSX series

The TSX Series high performance refrigerators and freezers are designed for the storage of media, reagents and other laboratory products.

Thermo Scientific

V-drive increases compressor speed to quickly restore temperature after door openings.

- Whisper quiet with a sound level of 52 dBA
- Natural refrigerants (R290)
- Compatible with wireless monitoring systems and remote alarm contacts
- Audible and optical alarm
- GMP Clean Room Class A/ISO 6 (ISO EN 14644-1) compatible with appropriate pre-install preparation
- Four 2" casters, the front two are lockable
- Self-closing door with 90° stop
- Optional chart recorders available

High performance freezers TSX Series, up to -35 °C

- TSX 5030 FV is equipped with 2 doors
- With auto defrost

1 Laboratory refrigerators GPS series up to +1 °C

Medium and large capacities designed for routine sample protection. With capacities ranging from space-saving 400 L to spacious 1400 L, our new GPS Series lab refrigerators meet the demands of today's laboratory requirements. All models contain sample protection features designed for the rigorous demands of the laboratory environment.

Thermo Scientific

- With EU plug and UK adapter
- Integrated controller
- Digital temperature display
- High and low temperature alarms
- Standard door locks, lockable
- Standard casters
- Choice of glass or solid door
- Automatic defrost
- Access ports

Biomedical refrigerators FLEXA LRE/PRE, up to 2 °C

Refrigerators with flexible interior, adjustable shelves and high temperature stability.

Ideal for storing biological and medical samples.

Arctiko

- Environmentally friendly refrigerant
- Convection cooling
- Digital controller
- LED display with touch operation
- Visual/acoustic alarm when door is open
- Alarm at over/under temperature and temperature sensor failure
- Lockable door
- Selectable door stop

LRE models: With LED interior lighting

PRE models: With LED interior lighting and glass doors

Scope of supply LRE/PRE 120: Refrigerator, 3 adjustable shelves (2 x regular size, 1 x small), 1 basket

Scope of supply LRE/PRE 440: Refrigerator, 5 adjustable shelves (regular size), 1 basket

Cooling/Refrigerators and Freezers

GENERAL CATALOGUE EDITION 21

Laboratory refrigerators LKv/LKUv and laboratory fridge-freezer LCv, up to 3 °C/-30 °C

Wherever floor space is limited or under-worktop installation is planned, the laboratory refrigerators with Comfort electronic controllers are the ideal solution. The range comprises two freestanding (LKv) and two under-worktop (LKUv) laboratory refrigerators, in each case with glass door and solid door versions. The temperature can be set from +3 °C to +8 °C. The forced-air cooling system in conjunction with the precision electronic controller ensures temperature consistency and uniform temperature distribution in the interior. The LCv 4010 laboratory fridge-freezer, which has two separately cooling circuits, further extends the range of compact laboratory appliances.

Liebherr

- Dynamic cooling system
- Precision electronic controller with digital temperature display
- Glass door (..13) with ceiling light (separately switchable)
- Convenient, clear view drawers (LCv 4010)
- Self-closing door with integrated lock

Security package:

- Visual and audible temperature and door alarm
- Visual power failure alarm when mains power returns
- Integrated data memory with min/max temperatures
- Volt-free contact for alarm forwarding to an external remote warning system
- RS 485 interface enabling external documentation
- Access port for an external temperature sensor
- Maximum temperature stability and consistency according to IEC 60068-3

Refrigerator drawers AluCool® including dividers

High quality aluminium drawers including frame on smooth-running wheels with pull-out stop. Includes flexible dividing system with card pockets. Depending on the specific need, the dividing system allows the storage of drugs, blood and plasma with a space saving of up to 30%. With a few simple steps, the flexible dividers are taken out and the drawer can be cleaned easily and hygienically.

H+H System

Typ A:
FKS 1800/1802/2600 /2602/3600/3602; FKU 1800/1805; UKS 1800/1801/2600/2602/3600/3602/3650;

Cooling/Refrigerators and Freezers-Refrigerators and Freezers ex protected

Pharmacy refrigerators MK, up to +2 °C

Liebherr pharmaceutical refrigerators compliant with DIN 58345 safely store high-quality preparations and sensitive medications at all times. This is achieved by a combination of precise electronic controls, highly effective insulation, an optimised forced-air cooling system, and premium-quality workmanship.

Liebherr

- Maintenance of an operating temperature from +2 °C to +8 °C, visual and audible warning installation for high and low temperature
- Can be used in ambient temperatures from +10 °C to +35 °C
- Noise emission less than 48 dB(A)
- Visual and audible power failure alarm for at least 12 h
- Safety thermostat to avoid temperatures below +2 °C
- Mechanical resistance of internal fittings at least 100 kg/m²
- Lockable door optionally made of steel or insulating glass

LLG-Laboratory Power Failure Detector	1	6.255 819

3 4 Spark-free laboratory refrigerators, up to +1 °C

3

The German guidelines "Working Safely in Laboratories BG-I 850-0" stipulates that interior space must be explosion-protected where hazardous, explosive atmospheres can develop (for example, due to the presence of flammable liquids). Such explosive atmospheres can be created by stored flammable liquids, for example. The laboratory refrigerators by Lovibond® meet these requirements. The interiors are free from sparking sources and are therefore explosion-proof. With glass shelves. Variable temperature control from +1 °C to 15 °C. Temperature is continuously controlled by thermostat. The digital temperature display enables the interior temperature to be easily read.

- Spark-free according to BG-I 850-0
- Dynamic cooling system
- 1 °C to 15 °C, continuously adjustable
- Digital temperature display
- High energy efficiency
- Robust materials
- Lockable

GENERAL CATALOGUE EDITION 21

1 Spark-free laboratory refrigerators LKexv, up to +1 °C

Laboratory refrigerators with dynamic cooling and spark-free interior. Designed especially for storing explosive and highly flammable substances. The interiors of the LKexv models meet all the safety requirements of the EU Directive 94/9EC (ATEX 95). The appliances excel with a large capacity and rugged design. The cooling temperature is continuously adjustable from +1 °C to +15 °C with the aid of the thermostat integrated in the control panel. Certified according to ATEX 95.

Liebherr

Features: Flexible, hygienic interior, Glass shelves, Water tray, Lock, Reversible door hinges.

1 Flake ice maker with reservoir, UFP series, air cooled

1

For fast, HACCP-compliant production of various quantities of compact, granular ice flakes for laboratories, the chemical industry and food production. The ice is produced by a vertical stainless steel evaporator and transported by a worm gear to the head of the cylinder, pressed and broken into the desired size. For the production of up to 153 kg of ice per day.

MANITOWOC®

The new refrigerant R290 meets the requirements of the latest EU regulations, reduces energy consumption by up to 30 %, has no ozone depletion potential and only a very low global warming potential.

- Robust stainless steel evaporator
- Easy ice removal
- Suitable for demineralised water
- Closed system for optimum hygiene
- Environmentally friendly refrigerant
- Air-cooled
- Depending on model, has storage capacities from 20 to 55 kg
- Stainless steel housing
- Easy to clean
- Height-adjustable feet from 110 to 150 mm
- Comfortable and safe operation
- Low energy consumption

Scope of supply: Flake ice maker with height-adjustable stainless steel feet, ice shovel, water inlet and outlet set

Flake ice makers with/without reservoir, air-cooled
2
3

Manufactured according to DIN ISO 9001. For preparing solid and saturated ice flakes of hygienic, 0.5 °C cold ice. With electronic control of the ice temperature. The units have a stainless steel housing and an antimicrobial coated interior. Air-cooled versions, with cleaning indication.

Scotsman / HIBU

- MF models without reservoir (please order separately).
- AF models without drain pump
- EF models standard with drain pump. The drain pump allows an installation or set-up without any drainage height or distance problems. Place your ice maker just where it is needed even lower than the actual drain outlet (can be up to 1.70 m higher). Distance to drain outlet up to 15 meters. Drain can be placed up to 1.70 higher.
- 2 year warranty.

Scope of supply: Flake ice maker, 1 x scoop

Also available with water-cooled compressor. Alternative models available on request.
A specially built model for laboratory-grade water is available on request.

GENERAL CATALOGUE EDITION 21

Cooling/Ice machines-Transport boxes

1 Dry Ice Machines SnowPack®

The dry ice machine SnowPack® produces dry ice tablets of -79 °C with 50 or 250 g weight within a short time. Suitable for all European siphon carbon dioxide cylinders with valve (W 21.80 x 1¼" acc. to DIN 477-1, no. 6) without pressure regulator.

Bürkle

- Produces dry ice tablets at -79 °C with 50 or 250 g
- Operates without electricity
- Taint and odour free

Applications: Hospitals, universities, schools, laboratories, chemical industry, materials testing.

Examples of use: Lowering the temperature in cooling baths or cold traps, pre-cooling tissue samples, ensuring safe transport or embedding biological substances, freezing blood and tissue samples, studies in chemistry, physics and materials technology, etc.

Gassing period (per tablet):

Tablets per 22 kg bottle (dependent on ambient temperature and pressure):

approx. 1 min

Cool packs Icecatch®

Icecatch® cool packs for temperature sensitive products used in the pharmaceutical, biotech, medical and food industries. Icecatch® cool packs distinguish themselves through the following specific features:

- Reliable cold storage through the use of immobilised coolant
- For repeat usage due to the use of robust PA/PE film
- Disposal with the domestic trash due to the use of non-poisonous ingredients
- Unobjectionable use in the pharmaceutical and food industries
- Phase transition 0 °C

Icecatch

9.695 000

Icecatch®-Gel

- Spreading of heat absorption around the 0 °C range through the use of immobilised cooling gel
- Optimal price/heat absorption capacity relationship
- Filled with cooling gel

Icecatch®-Solid

- Maximum dimensional stability during the freezing process through the use of hard foam
- Filled with hard foam

Cooling/Transport boxes

1

1 Isolation Box Icecatch®, EPS

The standard thermo boxes made of EPS (Styrofoam®) for temperature sensitive products used in the Pharmaceutical and food industries which have to be stored and transported within a specific temperature spectrum. In combination with the Icecatch cooling elements the perfect solution for the transport of temperature sensitive products.

Icecatch

2 Isolating box with lid, Neopor®

Neopor® is characterised by its outstanding hot and cold thermal insulation properties (a further 20 % over Styropor), its high compressive strength, shock absorbing properties, low weight and insensitivity to moisture. It also contains infrared absorbers and reflectors. Compared to conventional insulating materials, they diminish heat conductivity and lend the material its characteristic silver-grey color.

Suitable accessories can be found in our online shop.

3

1 Ice buckets and pans PolarSafe™, PS

These polystyrene buckets and pans are produced with thick walls to provide rigidity and strength, and yet are very lightweight. Perfectly suited for use with ice, dry ice and slurry ice. Even liquid nitrogen can be stored in these containers. All products provide excellent insulating properties to help keep temperature sensitive samples safely chilled. PolarSafe™ buckets come with snug fitting lids to minimize evaporation loss and to maximize cooling. They feature easy-grab knobs on each lid and prominent recessed handles to facilitate transport. The pans, without a lid feature unique gripping ridges and pour spouts to facilitate the disposal of cooling agents.

2 Cool Containers True North®, PU

Rigid polyurethane container provides durability for chilling your temperature sensitive samples. Excellent insulation properties for ultra cold. Use with ice, dry ice and ice-salt slurries, etc. For low temperature use down to -196°C. Minimize evaporation loss with close fit lid. Easily remove with comfortable recessed knobs. Keyed lid and base fit together to conveniently store lid under base. With spout and ergonomic handles for safe handling. Stackable.

3 | 4 Insulated container Magic Touch 2™

Superior insulating properties combined with high chemical resistance make Magic Touch 2™ laboratory ice buckets and pans compatible not only with wet ice, but also with ultra-low temperature materials including dry ice, ice-salt mixtures, dry ice solvent mixtures, or liquid nitrogen. Their lightly textured non-slip finish and raised edge provides secure transport and a stylish look.

Bel-Art Products

3

Expanded urethane icewares are

- lightweight
- durable
- non-sweating
- impervious to moisture and odors
- able to withstand a wide temperature range: -196 °C to 100 °C
- provided with a convenient pour spout, drip-proof rims and fill line
- furnished with perfect fitting lid
- easy and secure to stack because of a keyed lid and base

Labtop Cooler Nalgene™, Type 5115, 5116, DS5116

The economical alternative for keeping samples and biochemical reagents cool at the workbench or for protecting against temperature fluctuations and power failure in refrigeration apparatus. With write-on, gridded lid. Lids fit one way to maintain the correct grid orientation. Robust, space-saving and stackable. With non-slip rubber feet. Can be used down to -135 °C. Adapters are also supplied for 0.5 ml microtubes.

1 Cooling Block Systems, FreezeBox™

Blue. FreezeBox™ is a new, energy-saving, environmentally friendly and safe cooling equipment, without additives. It does not require electricity (except for pre-cooling the cores in the freezer) and no ice for low-temperature cooling of biological samples. The system can be used ice-free, is lightweight, easy to transport and ideal for the collection and storage of biological samples. It can be combined with interchangeable cores and different tube modules. Cooling cores can be tempered in a refrigerator or freezer and inserted into the FreezeBox™. For operation with dry ice, leave out the cooling core and fill with 200 g dry ice instead.

- For use with cooling core, ice or dry ice
- Easy to clean and disinfect
- Durable, suitable for frequent use
- Easy to mount

Freezing Aid for Cell Cultures, FreezerCell™

2

FreezerCell™ can be used for a variety of cell types, including stem cells, primary cells, cell lines and yeasts. The FreezerCell™ does not require any additives and only needs to be placed in an ultra deep freezer and the cooling runs at -1°C per minute.

Fill the freezing aid with the cryotubes and freeze for approx. 3 hours at -80 °C.

Then the samples are ready to transfer to a nitrogen tank.

This gentle method ensures a high survival rate of the cells during the freezing process.

- No pre-cooling necessary
- Consistent temperature distribution, even with partial loading
- Lid can be opened easily

1 Immersion circulator

Immersion circulator for all kinds of water baths. It clamps securely to both straight and curved tank walls. The patented, closed housing protects the user and the heating element.

PolyScience

- Temperature stability ± 0.07 °C
- Minimum working depth 7.5 inch/19 cm
- Large LCD-display
- Display resolution 0.1 °C
- Displays actual and set point temperature simultaneously
- Integrated pump and heater protection
- Integrated over-temperature protection
- Low liquid level protection
- Included clamp for straight and curved tank walls
- Maximum pressure 0.12 bar/1.8 psi with a maximum pressure flow rate of 11.9 l/min

3 Open Bath Systems, Stainless Steel

An economical alternative to integrated heating baths for liquid temperatures up to 150 °C.

PolyScience

Controller bridge rests securely on the bath, yet is easily removed for tank cleaning.

Generous bath opening provides ready access to samples and the included bath cover improves stability.

- Working temperatures from ambient +10° up to 150 °C
- Advanced Programmable, Advanced Digital or MX Temperature Controller
- 6, 10, 20 or 28 liter reservoir
- DuraTop™ Chemical Resistant Bridge, Swivel 180™ Rotating Controller (on Advanced Programmable and Advanced Digital models)
- Lidded opening for optional cooling coil (10, 20 and 28 liter models)
- External circulation capability
- Complies with DIN 12876-1 Class I safety requirements for use with non-flammable liquids
- Incl. bath cover

Working temperature range:

+10° ... +150 °C (+135 °C, MX type)

1 Refrigerated/heated circulators

The circulators are available in 4 bath sizes combined with 4 different temperature controllers. A large, 180° freely rotatable display allows good visibility and control of the values set from different angles.

PolyScience

- Temperature range -40 to 200 °C
- Reservoir sizes ranging from 7 liters to 45 liters
- Working temperature from ambient +10 °C to 200 °C
- Pressure and suction pump (selected models)
- Incl. lid and LidDock™ lid holder
- DuraTop™, precision-molded phenolic bath top resists laboratory chemicals
- Large bath opening and drain
- Swivel 180™, display with a 180° viewing radius
- Easy hook-up of fluid connections
- Intuitive setup and operation, featuring multi-language help and screen prompts
- Simplified setup and maintenance
- Class III safety, according to DIN 12876-1 Class III standards for use with flammable liquids (selected models)

2

2 Heated Circulating Baths with MX Temperature Controller

- Working Temperature: Ambient +10° to +135 °C
- Temperature Stability: ±0.07 °C
- Pump: 1-speed
- Pump Pressure (max.): 1.8 psi (0.12 bar)
- External Circulation: Closed loop

3 Thermostatic controllers Optima™ T100/TC120

Combine with a plastic or stainless steel tank or with an accessory T-clamp for independent use. The two general purpose heating circulators offer excellent temperature stability and uniformity with a cooling/heating range of 0 °C to +100 °C* (T100) and -15 °C to +120 °C* (TC120).

Grant

*For using at or below room temperature you need additional flow coolers C1G (9.920 765) or C2G (9.920 766).

Features:

T100: visual alarm, 2 point recalibration, fixed over temperature cut-out

TC120: visual and audible alarm, timer, 2 point recalibration, adjustable over temperature cut-out, pump for external circulation

T Clamp: For attaching the thermostats to any vertical sided tank with a maximum wall thickness of 35 mm for rectangular tanks, 30 mm for circular tanks (300 mm diameter), and a capacity of up to 50 L.

Models with clamps available on request.

1 Thermostatic controllers Optima™ TX150/TXF200

Combine with a plastic or stainless steel tank or with an accessory T-clamp for independent use. The two advanced heating circulators feature a modern, icon driven programming interface and full colour display. Cooling/heating range: -15 °C to +150 °C* (TX150) and -15 °C to +200 °C* (TXF200). *For using at or below room temperature you need additional flow coolers C1G (9.920 765) or C2G (9.920 766).

Grant

**Features:**

Visual and audible alarm, timer, 5 point recalibration, adjustable over temperature cut-out, pump, external probe, programmable, relay, menu system, program storage, USB port.

T Clamp: For attaching the thermostats to any vertical sided tank with a maximum wall thickness of 35 mm for rectangular tanks, 30 mm for circular tanks (300 mm diameter), and a capacity of up to 50 L.

Models with clamps available on request.

Specifications

Temperature range with stainless steel tank

TX150: -15 °C to 150 °C*

TXF200: -15 °C to 200 °C*

Stability/Uniformity (DIN 12876) at 70 °C:

Setting resolution: ±0.01 °C / ±0.05 °C

Display: 0.1 °C (0.01 °C with Labwise)

Display: QVGA TFT

Timer: 1 min to 99 hrs 59 mins

No. of pre-set temperatures: 3

Recalibration points: 5

Heating power (230 V): 1.9 kW

Power supply (230 V/50-60 Hz): 2.0 kW

Interface: USB and RS232

Pump max. pressure

Accessories for water baths Optima™ series

2

Drain siphon SY1: For the rapid draining of baths.

Grant

Heat exchange coil CW5: For use with precision and general purpose stirred baths.

Temperature range 2 °C above coolant temperature.

Coil diameter/l mm 77/55, pipe bore inlet/outlet 7 mm.

PP spheres PS20: Between operating temperatures 60 °C and 100 °C and below room temperature a lid or layers of polypropylene spheres can be used.

Above 100 °C a lid must be used.

6.239 419

C1G refrigerated cooler:

For use with all stainless steel Optima™ baths ranging from 0 °C to +40 °C.

For 220 - 240 V 50 Hz single phase supplies.

C2G refrigerated cooler:

For use with all stainless steel Optima™ baths ranging from -15 °C to +40 °C.

A bath lid must be used at temperatures below 0°C, in order to achieve optimum performance.

For 220 - 240 V 50 Hz single phase supplies.

1

Stirred thermostatic baths Optima™ series

Complete units including plastic or stainless steel bath, bridge mounting plate and thermostatic controller. For 220-240V, 50/60Hz.

Grant

- The two general purpose heating circulators offer excellent temperature stability and uniformity with a cooling/heating range of 0 to 100 °C (T100) and -15 °C to +120 °C (TC120).
- The two advanced heating circulators feature a modern, icon driven programming interface and full color display. Cooling/heating range: -15 °C to +150 °C (TX150) and -15 °C to +200 °C (TXF200).
- Grant stirred baths and circulators provide a source of precision heating and cooling. Complete range of 32 models covers basic to more sophisticated needs, each model representing excellent value for money and featuring intuitive programming and accurate, safe temperature control.
- An accessory gabled hinged lid is available to reduce evaporation, avoid heat loss and avoid sample contamination.
- High efficiency stainless steel (ST) tanks (range -15 °C to +200 °C)
- A drain trap is included on the ST12, ST18, ST26 and ST38

Accessory polypropylene spheres or a lid must be used at temperatures between 60 °C and 100 °C. Above 100 °C only a lid must be used.

For using at or below room temperature you need additional flow coolers C1G (9.920 765) or C2G (9.920 766).

Please see article table for usable working space. External dimensions incl. controller.

Please order spheres and lids separately.

1 Baths and Circulators

The Huber circulators are split into two product lines, the Compatible Control models and the simpler KISS models. Both model lines represent classically constructed laboratory circulators with open baths. Baths and circulators for heating applications up to +300 °C are available, as well as models for heating and cooling applications from -90 °C to +200 °C. Immersion or bridge circulators are suitable for thermal control of existing baths. The Ministat, the smallest cooling and heating circulator in the world, is the first choice for operation in fume-hoods or integrating into systems.

Huber

Circulators with Pilot ONE Controller

Models with Pilot ONE Controller convincing in practice with their highly precise temperature control and a professional range of functions even in the basic version. The electronic upgrade function "E-grade" allows a simple and low cost expansion of functions at any time. Operation is simple using large colour displays, an easily understandable menu and an individually customisable display. Models with the Pilot ONE have powerful pressure and suction pumps with continuously variable speed control for adjusting circulation to the bath in use. Further connections are available via the optional Com.G@te, e.g. RS232 and RS485, analogue interface 4 to 20 mA or 0 to 10 V, standby signal and programmable alarm.

Circulators using the KISS Controller

The functions of models with the low price KISS controller concentrate on the essentials. KISS models are suitable for numerous typical laboratory applications, such as temperature control of samples, analysis, materials testing, as well as the external temperature control of test equipment or experimental constructions. The machine achieves a temperature stability of ±0.05 °C and are fitted with an over temperature and low fluid level protection. The safety systems are according to class III/FL (DIN 12876) for use with flammable fluids.

Advantages and Functions (model dependent):

- Working Temperatures from -90 °C to +300 °C
- Models for internal and external temperature control
- High heating and cooling powers up to 7kW
- Powerful controllable circulation pumps
- Function expansion with the E-grade system is available at any time
- High precision cascade temperature control
- Large and full colour 5.7" TFT touchscreen
- Programmer with calendar/clock function
- Extended range of languages including a selection of European and Asian
- Comprehensive warning and safety functions
- Large, bright OLED display
- Simple operation via a plain text menu
- RS232 and USB Interfaces
- Safety class 3 (FL) to DIN 12876
- Internal and external temperature control

2 Immersion circulators KISS E and CC-E

Immersion circulators are the basis of many combinations of polycarbonate and stainless steel baths. Together with a cooling bath it is possible to get exact and reproducible temperatures down to -30 °C. All models are equipped with a powerful suction pressure pump and comply with safety class III (FL) for use with flammable liquids. Pump adapters for external tempering and cooling coils for cooling water connection are available as accessories.

Huber

Temp. control range °C:	(-30) 25 to 200 °C

*according to DIN 12876, measured in 12-litre stainless steel bath.

1

1 Thermostatic baths with polycarbonate tanks

The transparent polycarbonate baths are suitable for use up to 100 °C.

Huber

An immersion thermostat is mounted on the bath bridge for all models.

With a pump adapter, this combination can also be used with external, closed applications.

Models with the Pilot ONE controller have a variable speed pressure/suction pump and are therefore also suitable for external open applications.

2

2 Heating circulators with stainless steel baths

The insulated stainless steel baths are suitable for use up to 200°C. All models have a bridge-mounted immersion circulator. With a pump adapter, this combination can also be used with externally closed and externally open (with option level control) applications. Models with the Pilot ONE controller have a variable speed pressure/suction pump and are therefore also suitable for external open applications.

OUR POWER DWARFS FOR YOUR LABORATORY

Our smallest – Stars in every laboratory

Inspired by **temperature**

Our smallest ones are convincing as an inexpensive and environmentally friendly solution for numerous laboratory applications. The units require little space on the laboratory bench and are therefore ideally suited for high-precision temperature control of research reactors, reactor blocks, vapour barriers, vacuum pumps, rotary evaporators or heat exchangers.

huber

1

1 Heating circulators

Good things come in small packages! Thanks to their low bath volumes the models CC-104A und KISS-104A (with polycarbonate bath) as well as the CC-202C and KISS-202C (with stainless steel bath) are especially suitable for controlling the temperature of small external applications. All models are fitted with rear mounted M16x1 pump connections as standard. Models with the Pilot ONE have a speed regulated pressure/suction pump. The temperature constancy, in accordance with DIN12876, is 0.02 K with the Compatible Control models and 0.05 K for the KISS models. Models CC-202C and KISS-202C are fitted with an integrated cooling coil as standard. With the models CC-104A and KISS-104A the cooling coil is an optional extra.

Huber

Temperature range

2 Heating bath circulators

Heating bath circulators are suitable for temperatures up to 200 °C or 300 °C depending on model.

Huber

The Compatible Control models have a continuously variable pressure and suction pump. The pump pressure can be controlled with an optional pressure sensor, and so can protect your valuable glass-ware from breakage. The machines are preferred and used for temperature control of externally connected applications. Additionally there is the ability to control the temperature of objects placed directly in the open bath.

1 Thermoregulators CORIO™

The CORIO™ C Immersion Circulator is the basic model of the CORIO™ circulator portfolio. The bath attachment clamp is included in delivery and facilitates mounting of the circulator on any bath tank up to 30 liters. With a few simple steps you can install a pump set onto the CORIO™ CD Immersion Circulator. In no time at all, your circulator is ready for temperature control of an external application.

JULABO

- Precise temperature control
- For internal standard applications
- Immersion depth: 7.5 to 16.5 cm
- Bright, white, easy to read display
- Whisper quiet
- Easy operation

CORIO™ C

- For bath tank up to 30 liters
- Class I (NFL) according to DIN 12876-1
- Circulation capacity 6 l/min at 0.1 bar

CORIO™ CD

- For bath tank up to 50 liters
- Pump change-over between internal and external circulation
- USB interface
- Class III (FL) according to DIN 12876-1
- Circulation capacity 15 l/min at 0.35 bar

Delivery without bath please order separately.

To adapt the CORIO™ Immersion Circulator to your individual application we offer a comprehensive range of accessories (racks, bath lids, and more).

Type	Heating capacity kW	Working Temp. range °C	Temp. stability ± °C	PK	Cat. No.
CORIO™ C	2	+20 ... +100	0.03	1	7.673 349
CORIO™ CD	2	+20 ... +150	0.03	1	4.658 066

Pump set for CORIO™ CD with connectors M16x1, Art. No. 4.658 027

2 Thermoregulators CORIO™ CP

NEW
JULABO

CORIO CP thermoregulators are capable to control the temperature of external applications in combination with an optional pump set. Suitable for bath vessels with a volume of up to 50 l.

- For internal and external applications (accessories required)
- Bright, white, easily visible display, even from a distance
- Very quiet
- Easy operation
- Low-level warning system
- Pump switch for internal and external circulation
- Powerful, continuously variable pump
- USB connection
- RS232 interface
- Class III (FL) according to DIN 12876-1

Scope of supply: Thermoregulator, mains power cable, bath attachment clamp

Specifications

Setting accuracy:	0.01 °C
Pump output:	8 ... 27 l/min
Pump pressure:	0.1 ... 0.7 bar
Immersion depth:	75 ... 165 mm
Max. viscosity:	50 cSt
Timer:	0 ... 999 min
Permissible ambient temperature:	5 ... 40 °C
Dimensions (W x D x H):	132 x 160 x 362 mm
Weight:	2.5 kg
Power supply:	230 V/50 Hz

Type	Working Temp. range °C	Temp. stability ± °C	Heating capacity kW	PK	Cat. No.
CP	20 ... 200	0.02	2	1	4.669 404

1

1 Thermoregulators DYNEO™ DD

For internal and external applications. The thermoregulators with maximum flexibility can be mounted with the sturdy bath clamp to any bath up to 50 liters. Equipped with USB interface, also available with optional analogue (extra code A) or RS232 (extra code D) interface.

JULABO

- Easy switching between internal and external circulation (optional pump set, Cat. No. 4.658 027)
- Large colour TFT Display
- Easy to operate via central controller
- Integrated programmer for 8 x 60 program steps
- Class III (FL) acc. to DIN 12876-1
- Continuously adjustable, powerful pressure pump
- External Pt100 sensor connection
- Installation cooling coil for counter-cooling, Cat No. 4.658 026, available separately

Bath clamp included.

Specifications

Operating temperature range:	20...200 °C
Temperature stability:	0.01 °C
Heating capacity:	2 kW
Flow rate:	8 ... 27 l/min
Pump capacity:	0.1 ... 0.7 bar
Dimensions (W x D x H):	130 x 160 x 360 mm
Weight:	2.5 kg
Power supply:	200-230 V, 50/60 Hz

Type	PK	Cat. No.
DD	1	4.663 220
DD.A	1	4.663 233

2 Bridge circulators MAGIO MS and MX

NEW
JULABO

Thanks to the adjustable stainless steel bridge the thermostats can be used with bath tanks up to a filling volume of 100 litres and bath widths from 33 to 68 cm.

- Simple control of complex applications
- Infinitely adjustable, extremely powerful pressure and suction pump
- Large, high-resolution TFT touch display with multilingual user interface
- Medium-contacting parts made of stainless steel
- Integrated programmer
- External Pt100 connection
- USB interface
- RS232 interface
- Ethernet interface
- Analogue interfaces (optionally)
- Classification III according to DIN 12876-1

Specifications:

	MS-Z // MX-Z
Temperature stability:	±0.01 °C
Flow rate:	16 ... 31 l/min
Pump pressure:	0.24 ... 0.92 bar
Suction pressure:	0.03 ... 0.4 bar
Immersion depth:	150 mm // 200 mm
Heating capacity:	2000 W // 3000 W
Permissible ambient temperature:	5 ... 40 °C
Power supply:	230 V/50 ... 60 Hz

Type	Dimensions (W x D x H) mm	Temp. range °C	Heating power W	PK	Cat. No.
MS-Z	340 x 190 x 360	20 ... 300	2000	1	4.678 302
MX-Z	340 x 190 x 410	20 ... 300	3000	1	4.678 309

1 Heating circulators MAGIO MS and MX

For precise temperature control of internal and external applications from 3 to 26 litres.

1

- Simple control of complex applications

4 Circulator Baths, CORIO™ CD

CORIO™ CD Heating Circulators for internal and external temperature applications with stainless steel

baths for working temperatures from +20 °C to +150 °C. CORIO™ Heating Circulators feature

professional technology for demanding applications. These units facilitate internal temperature control in the bath tank or control of externally connected applications.

JULABO

- For internal and external applications
- Bright, white, easy to read display
- Very quiet
- Pump change-over between internal and external circulation
- USB connection
- High-quality bath tanks made of stainless steel with bath lid and drain tap
- Integrated cooling coil for counter-cooling

Working temperature range: +20 ... +150 °C

Temperature stability: ±0.03 °C

Heating capacity: 2 kW

Flow rate: 15 l/min

Pressure: 0.35 bar

1 Circulator Baths, CORIO™ CP

NEW
JULABO

With insulated stainless steel bath tanks, flexible performance and an operating temperature range of up to 200 °C. Temperature control is possible either in the internal bath or in a connected external application.

- Suitable for internal and external applications
- High-quality stainless steel bath vessels with bath lid and drain
- Integrated pump connections M16x1
- Integrated cooling coil for counter-cooling
- Bright, white, easily visible display, even from a distance
- Low-level warning system
- Easy switching between internal and external circulation
- Powerful, continuously variable pump
- Pump capacity adjustable from 8 to 27 l/min
- Very quiet
- Rubber feet for secure standing
- USB connection
- RS232 interface
- 3-point calibration
- Class III (FL) according to DIN 12876-1

Scope of supply: Circulator bath, mains power cable, connection box, bath, bath cover, hose connectors 8 and 12 mm

Specifications

Temperature range:	20 ... 200 °C

1 Refrigerated/heated circulators

The circulators are available in 4 bath sizes combined with 4 different temperature controllers. A large, 180° freely rotatable display allows good visibility and control of the values set from different angles.

PolyScience

- Temperature range -40 to 200 °C
- Reservoir sizes ranging from 7 liters to 45 liters
- Working temperature from ambient +10 °C to 200 °C
- Pressure and suction pump (selected models)
- Incl. lid and LidDock™ lid holder
- DuraTop™, precision-molded phenolic bath top resists laboratory chemicals
- Large bath opening and drain
- Swivel 180™, display with a 180° viewing radius
- Easy hook-up of fluid connections
- Intuitive setup and operation, featuring multi-language help and screen prompts
- Simplified setup and maintenance
- Class III safety, according to DIN 12876-1 Class III standards for use with flammable liquids (selected models)

2

2 Refrigerated Circulators with MX Temperature Controller

- Working Temperature: From -30° up to +135 °C
- Temperature Stability: ±0.07 °C
- Pressure Pump with one pump speed
- Maximum Pressure: 1.8 psi (0.12 bar)
- External circulation: closed loop

3 Refrigerated Circulators with Standard Digital (SD) Temperature Controller

- Working Temperature: From -30° up to +170 °C
- Temperature Stability: ±0.04 °C
- Large, universal icon and English display
- Swivel 180™ Rotating Controller
- Pressure Pump with two speeds
- Pump pressure max. 2.9 psi (0.20 bar)
- On-board connectivity: RS-232 serial output
- Adjustable over- or under-temperature
- Automatic performance optimization
- Single-point calibration capability

3 Refrigerated/heated circulating baths LT ecocool

Consisting of two models, all products in the LT ecocool range are supplied assembled as ready to use kits, complete with accessory hosing, clips and connectors as standard.

Grant

- Choice of two models, temperature range -25 °C to 150 °C (model dependent)
- Industry leading 4 year warranty with Grant renowned service and support, no registration required
- Active cooling through the whole temperature range
- True energy saving of up to 80% against standard compressor units
- Thermostat and chiller work in harmony, neither will operate alone, eliminating any danger of overheating or freezing
- Single front switch for user convenience
- Modern, sleek, attractive design

Type	Capacity	Dimensions (W x D x H)	Heating power	Cooling capacity kW at 20/0/-20°C	Temp. range	PK	Cat. No.

1 Refrigerated circulators LTC 4

Versatile system for the laboratory, with a comprehensive specification to suit most low temperature applications.

Grant

- Optima™ digital thermostat for precise temperature control: assembled with TX 150
- Cooling/heating range -30 to 100 °C
- Stability ±0.1 °C
- Powerful integral pump; allows temperature-controlled fluid to be circulated to external devices (18 L/min, 310 mbar)
- Easy to use rotary dial and two function keys
- Clear 4 digit display - easy to read from a distance for instant reassurance
- Visual alarm and countdown timer; alerts you when your attention is required
- User calibration facility for optimum accuracy at the required operating temperature
- Operating setpoint plus 3 adjustable preset temperatures for convenience
- Liquid protection and over-temperature cut-out
- Easy access to coolant reservoir for local cooling of tubes, bottles etc.
- Powerful efficient cooling, ozone-friendly refrigerant
- Dual-position bridge plate, ensures visibility/accessibility of the thermostat whilst optimising bench space
- Robust construction, corrosion resistant materials, stainless steel tank; durable in demanding environments
- 5 °C thermostat on/off switch; stops tank freezing when operating with water

2 Cooling circulators

Combinations of immersion circulators and insulated refrigeration baths are low-cost solutions for direct thermoregulation within the temperature range -20/-30 °C to +200 °C. The refrigeration baths operate with natural refrigerants. A pump adapter (optional) can be fitted for thermoregulation of externally closed applications. Models with the Pilot ONE controller have a variable speed pressure/suction pump and are therefore suitable for external open thermoregulation applications. The temperature stability is 0.02 K for the Compatible Control models and 0.05 K for the KISS models.

Huber

1 Compatible Control Refrigeration Circulators K6

The K6 models are compact refrigeration bath circulators for temperatures from -25 to 200 °C. These units are a combination of a refrigerated bath and immersion circulator, in combination with an integrated pump they are suitable for external open (with level control) and closed applications. The CC-E immersion circulator with its suction/pressure pump is suitable to externally open and closed applications. The temperature stability is 0.02 K for the Compatible Control models and 0.05 K for the KISS models.

All units use natural refrigerant as standard.

2 Compact refrigerated circulators - Ministat®

Exceptionally compact and powerful, Ministats have been the smallest cooling circulators in the world since 1976. Their compact form allows them to be placed in small spaces, e.g. in a laboratory extraction hood. Compliance with DIN 12876, class 3 allows them to be used unsupervised in continual operation. The maximum ambient temperature is 40 °C. The powerful variable speed pressure/suction pump can thermoregulate objects in the bath or external applications. The maximum pressure can be controlled using an optional pressure sensor - VPC (Variable Pressure Control) - which protects delicate glassware. The small volume and high power of the Ministats means exceptionally rapid heating and cooling rates are achieved. Optional displacement inserts reduce the bath volume by approximately 50 % amplifying this effect and reducing moisture absorption in the thermal fluid. All models have Active Cooling Control for cooling power control at the maximum working temperature and an automatic cooling power regulation for energy saving operation and reduced heat dissipation into the lab. The bath opening is large enough to allow small objects to be thermoregulated within. All parts in contact with the thermal fluid are made of stainless steel or Polycarbonate.

Huber

Ministats have the Pilot ONE with Plug & Play technology (proven since 1980). In the event of service the controller can be simply swapped. Using a data cable the Ministat can be remotely controlled. The Pilot ONE has a state of the art microprocessor controller and a high precision temperature measurement system for exact and reproducible temperature control. The functionality and TFT-display are supported by Easy Control. Typical applications for the smallest cooling circulator in the world are external closed systems e.g. photometer, refractometer and viscosimeter.

1 Refrigeration Bath Circulators to -45 °C

HUBER refrigerated bath circulators perform safe and repeatable heating and cooling tasks in the lab. The models are covering the range to -45 °C with a selection of heating and cooling powers are available with air or water cooling (w). Natural refrigerants for environmentally friendly operation are available on request. A powerful variable speed pressure/suction pump allows the thermoregulation of objects directly in the bath or can be used to control external applications. The pump speed is stepless and when used in combination with an optional pressure sensor the maximum pressure can be controlled. VPC (Variable Pressure Control) ensures the best circulation and protects delicate glass apparatus from breakage caused by overpressure. Small volume and high heating and cooling powers result in the shortest heating and cooling rates. Optional displacement inserts reduce the bath volume by half increasing this effect. Additionally the bath surface area is reduced, lowering moisture absorption. The optional calibration insert allows all HUBER refrigeration circulators to be used as calibration baths. The calibration insert ensures an even temperature distribution with a temperature stability of ±0.01K. All models have Active Cooling Control for cooling power control at the maximum working temperature and an automatic cooling power regulation for energy saving operation and reduced heat dissipation into the lab. Depending on the model carry handles or castors are fitted for easy transportation. The drain is located on the front of the unit to enable simple drainage of the bath. The cover plate is thermostabilized to avoid condensation. All models have the Pilot ONE with Plug & Play technology which can be simply swapped in the event of a service. The Pilot ONE can be used as a remote control (with data cable). The Pilot ONE is a high tech microprocessor based controller with a high precision measurement system for exact and reproducible results. The wide ranging functionality is supported by a large TFT display and simple operation. HUBER refrigeration circulators can be equipped with a Com.G@te to the NAMUR standard to enable integration in a process control system. Depending on the bath dimensions objects can be thermoregulated within the bath. Typical applications for these classics are the thermoregulation of externally closed systems, e.g. photometer, refractometer, viscosimeter, double-jacketed reactors and autoclaves. They are used in miniplants, kilo labs, for stock point measurement, for low temperature calibration, for petroleum tests and many more applications.

2 Double-walled wide-mouth bottles GLS 80®, DURAN®

The DURAN® double-walled wide-mouth bottles GLS 80® incorporate an integral jacket that isolates the contents from the external environment. Heated or cooled liquids can be circulated through the jacket to control the temperature within the screw topped DURAN® bottle.

DWK Life Sciences

Applications

- Simple, low cost, jacketed chemostat or bioreactor for cell culture.
- Vessel for temperature-controlled reactions such as enzyme digestions.
- Simple continuous flow stirred reactor system with the optional GLS 80® cap components.
- Thermostatic vessel to maintain fluids, or high viscosity liquids at a constant temperature, useful when working with endo- or exothermic reactions.
- Large cold trap or condenser when used with dry ice in the inner container.

Features

- Usable temperature range of - 40 to + 120 °C.
- Manufactured from DURAN® borosilicate 3.3 glass.
- All components are fully autoclavable.
- Available in two sizes: 500 and 1000 ml.
- Compatible with full range of wide mouth GLS 80® connection cap systems for liquid addition or removal during processing.

2 Refrigerated circulator baths, CORIO™ CD

CORIO™ CD Heating Circulators for internal and external temperature applications with stainless steel baths for working temperatures from -40 °C to +150 °C.

JULABO

CORIO™ Heating Circulators feature professional technology for demanding applications.

These units facilitate internal temperature control in the bath tank or control of externally connected applications.

- For internal and external applications
- Bright, white, easy to read display
- Very quiet
- Pump change-over between internal and external circulation
- External pump connections (M16x1)
- USB connection
- High-quality bath tanks made of stainless steel with bath lid and drain tap
- Integrated cooling coil for counter-cooling
- Removable ventilation grille
- Refrigeration machines without lateral ventilation openings
- Class III (FL) according to DIN 12876-1

1 Refrigerated circulators CORIO™ CP

NEW
JULABO

With insulated stainless steel bath tanks, flexible performance and an operating temperature range of up to 200 °C. Temperature control is possible either in the internal bath or in a connected external application.

- Suitable for internal and external applications
- High-quality stainless steel bath vessels including bath lid and drain
- Refrigerating units without side ventilation openings
- More space in the bath due to space-saving evaporator coils
- External pump connections M16x1
- Bright, white, easily visible display, even from a distance
- Low-level warning system
- Simple switching between internal and external circulation
- Powerful, continuously variable pump
- Pump capacity adjustable from 8 to 27 l/min
- Very quiet
- Rubber feet for secure standing
- Removable air vent
- USB connection
- RS232 interface
- Class III (FL) according to DIN 12876-1

Scope of supply: refrigerated circulator, mains power cable, connection box, bath cover, connecting cable, refrigerator, hose connectors 8 and 12 mm

Specifications

Setting accuracy:	0.01 °C
Temperature uniformity:	±0.03 °C
Pump output:	8 ... 27 l/min
Pump pressure:	0.1 ... 0.7 bar
Heat output:	2 kW
Timer:	0 ... 999 min
Hose connector inner width:	8/12 mm
Permissible ambient temperature:	5 ... 40 °C
Power supply:	230 V/50 Hz

1 Refrigerated/heated circulators MAGIO MS

1

For precise, reliable temperature control of demanding external applications, e.g. in basic research, in material testing and in technical installations.

- Simple control of complex applications
- Infinitely adjustable, extremely powerful pressure and suction pump
- Large, high-resolution TFT touch display with multilingual user interface
- Medium-contacting parts made of stainless steel
- Integrated programmer
- External Pt100 connection
- USB interface
- RS232 interface
- Ethernet interface
- Analogue interfaces (optionally)
- Classification III according to DIN 12876-1

Specifications:

Temperature stability:	±0.01 °C
Flow rate:	16 ... 31 l/min
Pump pressure:	0.24 ... 0.92 bar
Suction pressure:	0.03 ... 0.4 bar
Heating capacity:	2000 W
Permissible ambient temperature:	5 ... 40 °C
Power supply:	230 V/50 ... 60 Hz
